

From Voice Memo to a Vast Content Library

An invitation to co-author, publish, and profit from 50+ AI-generated research assets in Cybersecurity & Software Development.

An Initiative by Dinis Cruz

It All Started with a Voice Memo.

My name is Dinis Cruz. For years, I've captured fleeting ideas and deep insights on the go.

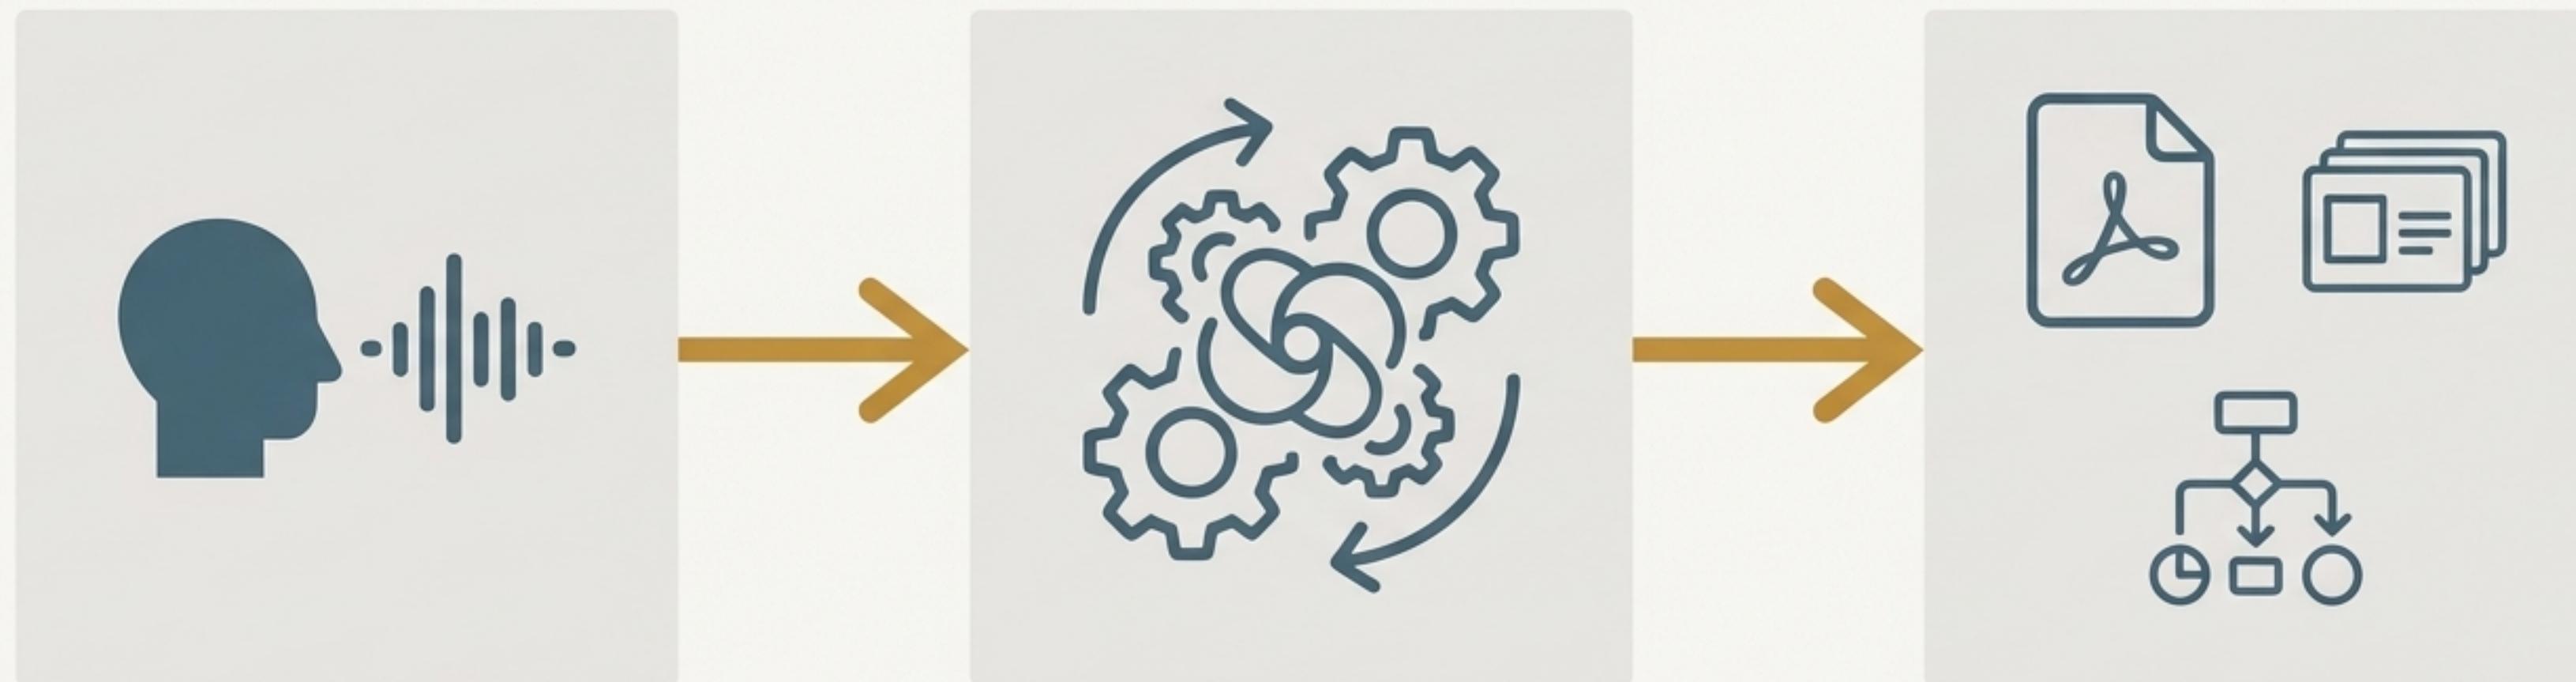

This project began by transforming my personal voice memos—raw thoughts on AI, cybersecurity, and software engineering—into a structured, professional-grade content library.

This isn't just AI content; it's human expertise, scaled.

The Engine: A Human-AI Content Workflow

Using a powerful AI-powered workflow centered on NotebookLM, I've developed a system that converts raw concepts into comprehensive drafts. This process has been a game-changer, enabling the creation of research documents, infographics, and slide decks at an unprecedented pace. The heavy lifting of initial creation is done, allowing us to focus on refinement and storytelling.

Human Concept
(Dinis Cruz)

AI-Powered Synthesis
(NotebookLM)

Generated Assets

The Result: A Treasure Trove of Content, Ready for Polish.

50+

High-quality assets generated in just a few weeks.

1.6 GB

Total size of the current content repository.

3 Formats

Detailed Research Docs, Polished Slide Decks, and Data-Rich Infographics.

This rapidly growing library, openly published on GitHub, is the foundation of our collaboration. It's a continuous pipeline of fresh content from my ongoing research, waiting for a skilled partner to help it reach its full potential.

A Rich and Diverse Content Landscape.

The repository covers cutting-edge topics at the intersection of AI, software engineering, and cybersecurity. All materials are available under a Creative Commons license.

Generative AI & Development

- LLM coding style guides
- AI vs. the Internet (trust in AI-generated content)
- The Generative AI divide

Software Engineering & DevSecOps

- Iterative Flow Development (IFD) methodology
- Type-Safe Python frameworks & testing for LLMs
- Threat modeling with Wardley Maps

Knowledge Graphs & Data

- Self-evolving knowledge graphs with Neo4j
- Connecting and customizing open knowledge bases

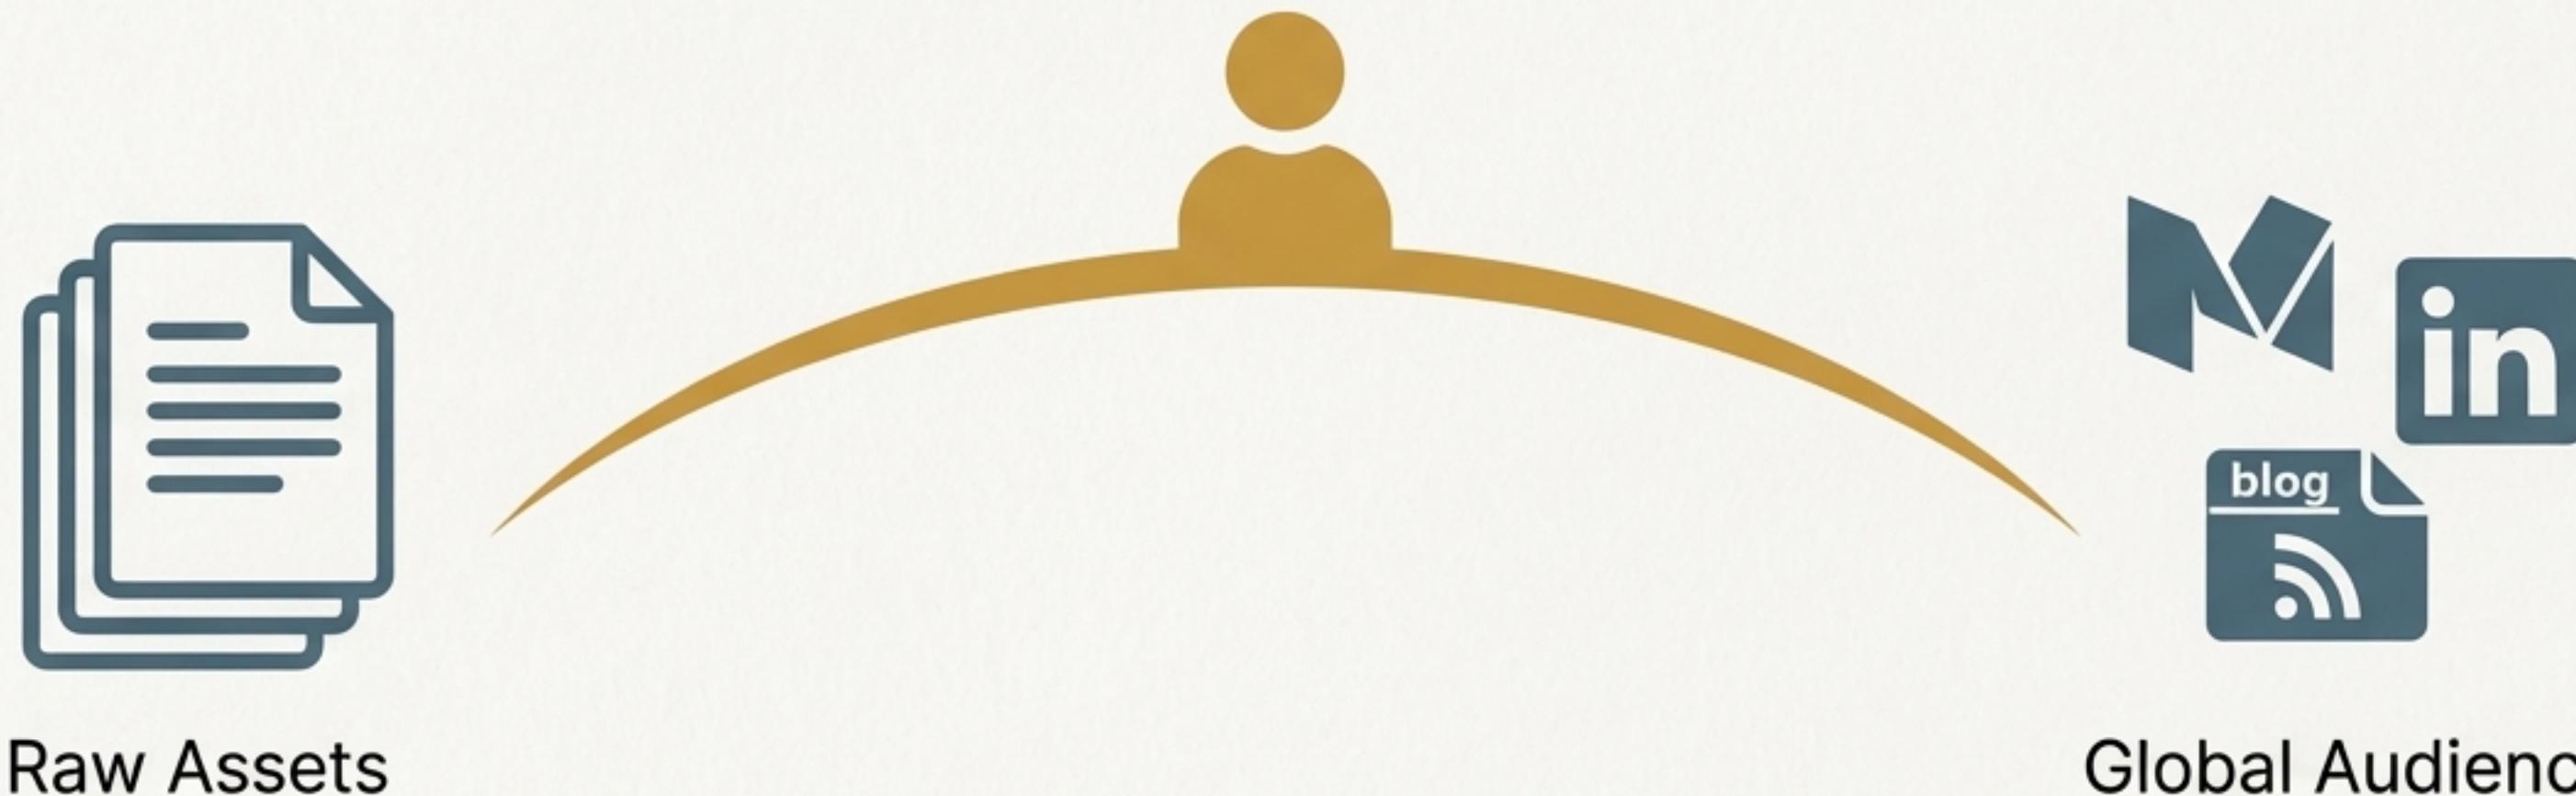

Open-Source & Startups

- Multi-startup strategy using open-source
- Case studies on lean serverless infrastructure
- The 'Future of News' analysis

An Idea is Only as Powerful as its Reach.

The AI-driven workflow is brilliant at generating structured, high-quality drafts. It has conquered the “blank page” problem. However, transforming this material into polished, engaging publications that resonate with a human audience requires a different kind of expertise. The core ideas are here; the final layer of storytelling and distribution is the missing piece.

We're Looking For a Partner, Not Just a Writer.

This is a call for a true collaborator. Your role is to take the raw materials and add the essential human touch—shaping the narrative, improving clarity, and driving distribution.

Skilled Writer/Editor

Can rewrite technical content into an engaging human voice.

Media-Savvy

Knows how to adapt content for Medium, LinkedIn, Dev.to, or video scripts.

Marketing Oriented

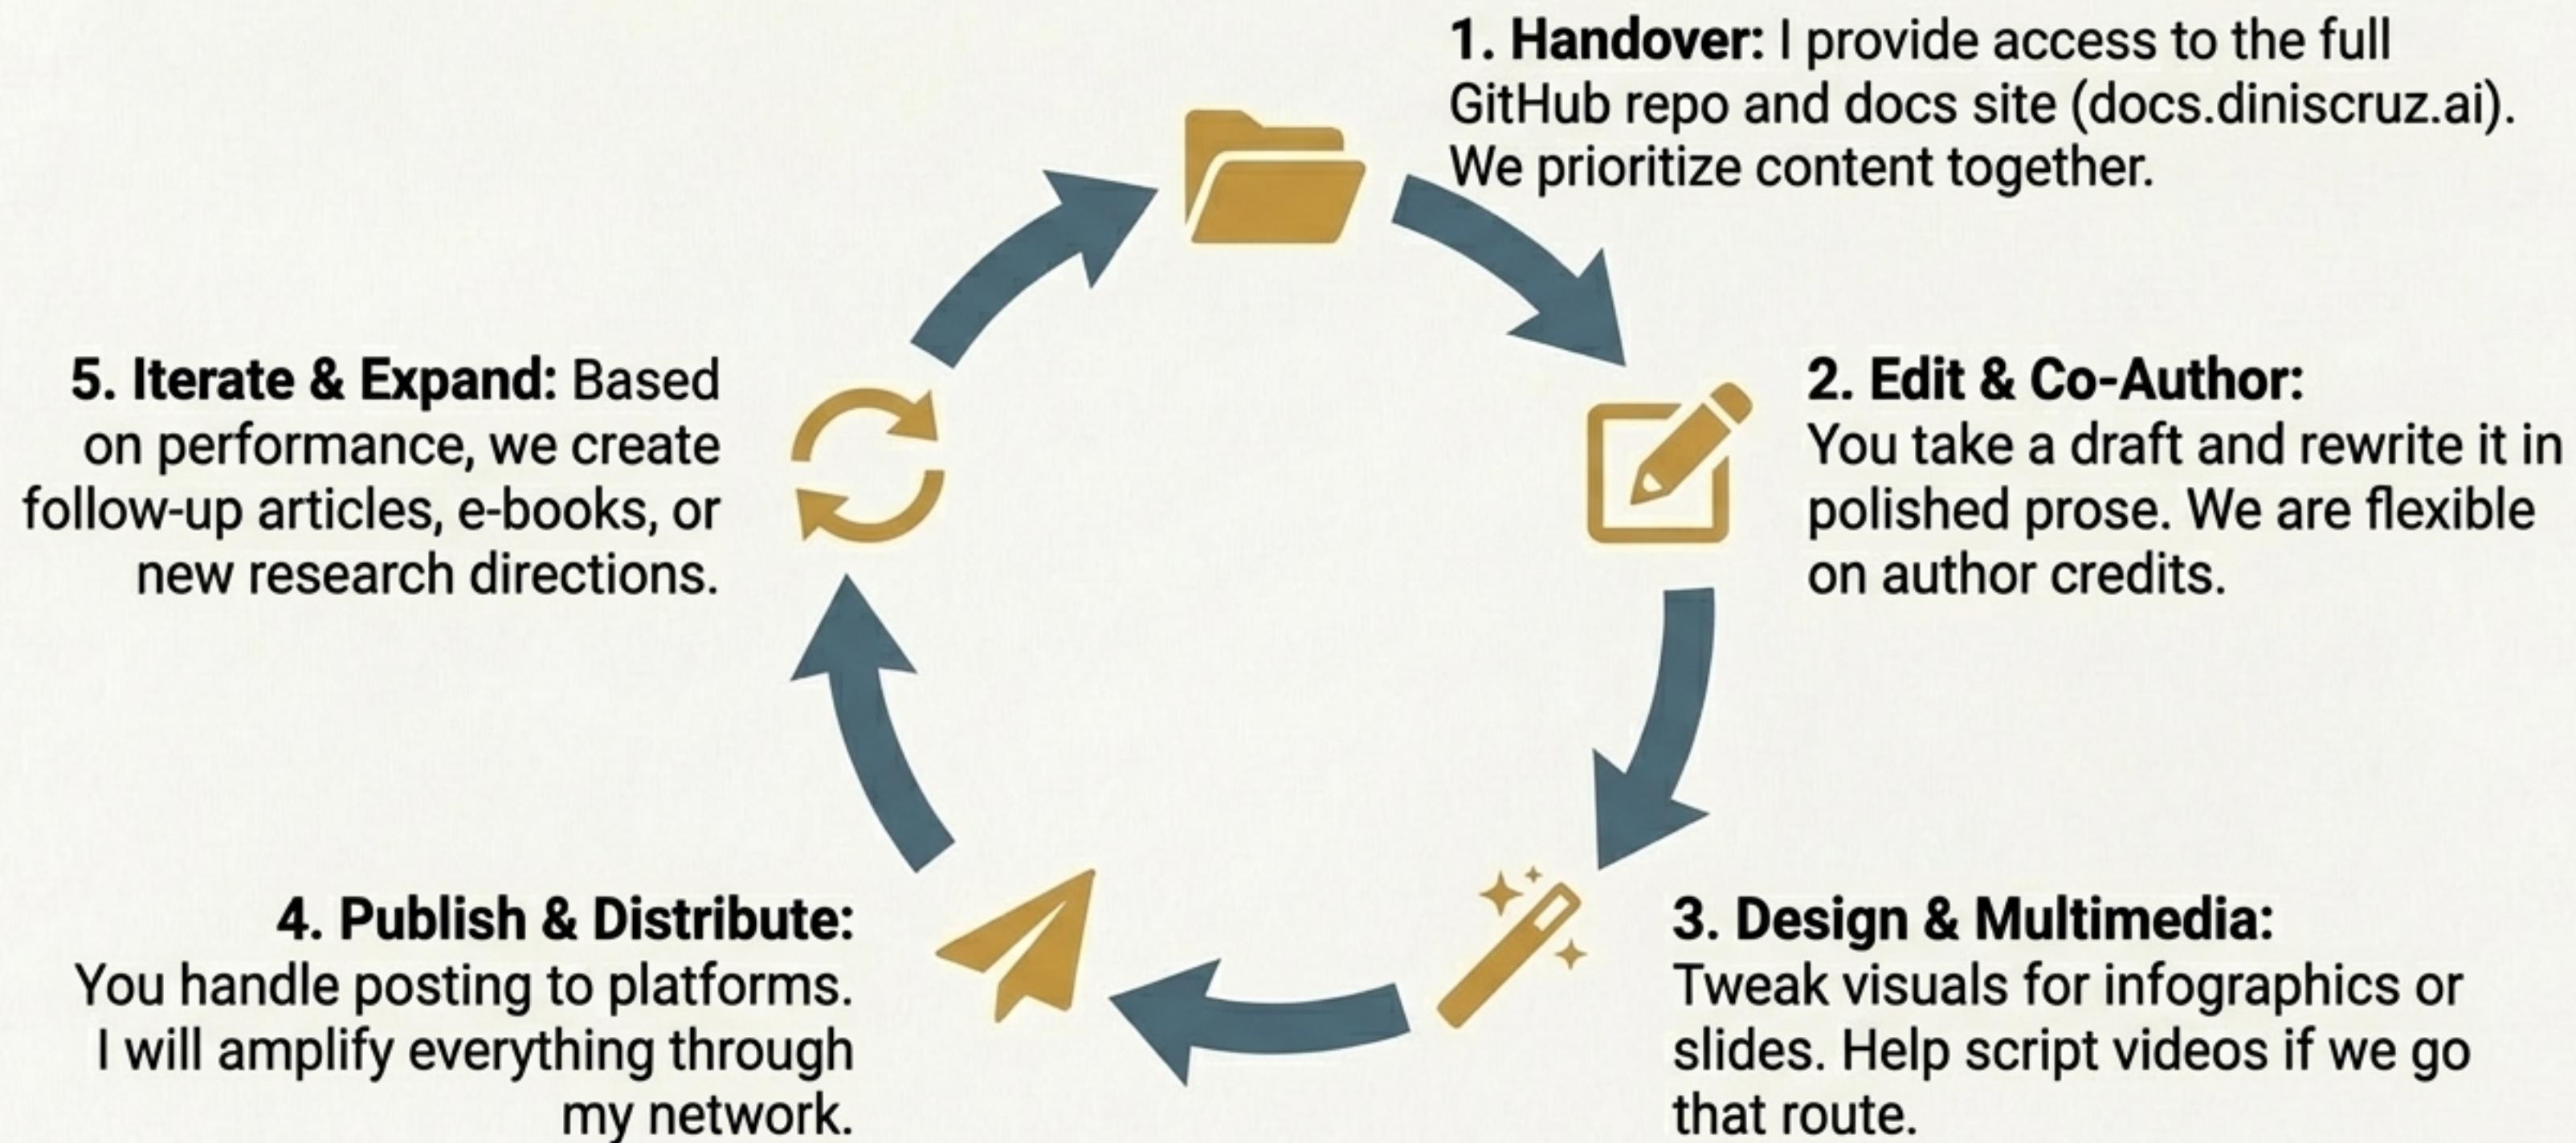

Can identify the best outlets and strategies to maximize impact.

Entrepreneurial Mindset

Thinks creatively about monetization and audience building.

How We Will Work Together.

The Pact: A Fair and Transparent Partnership

Our collaboration is built on a simple, transparent agreement designed for mutual success.

50/50 Revenue Share

We split all revenue from the content we publish together (Medium Partner Program, sponsored posts, YouTube ads, etc.).

Royalties for 1 Year

The 50/50 split applies to all recurring revenue for one year after publication.

Creative Commons License

All materials remain open. No exclusivity. We both can share and reuse the content freely.

No Long-Term Obligation

Either party can end the collaboration with 15 days' notice. No lock-in.

More Than a Project: A Platform for Your Brand.

Beyond revenue, this is an opportunity to rapidly increase your visibility and build your portfolio with high-quality, ready-made material.

Build Your Portfolio: Co-author cutting-edge research in high-demand fields.

Leverage an Existing Audience: Get your work in front of my established network, including ~22k engaged LinkedIn followers.

Focus on Creativity: Skip the blank page. Spend your time on polishing, storytelling, and creative distribution.

Join an Indie Research Team: Be part of an innovative content venture at the ground level.

Why Collaborate with Dinis Cruz.

I've been deeply involved in the tech industry for years, with a strong belief in open knowledge sharing. My work combines deep technical expertise with a significant online presence.

Experience	Community	Content History	Network
Founder of multiple cybersecurity/AI startups; former CTO, CISO, and Chief Scientist.	Active contributor to open-source communities like OWASP.	66+ presentations on SlideShare, thousands of blog posts.	Over 3,000 LinkedIn posts and 75 articles, building a following of over 22,000 professionals.

Let's Create and Publish Together.

If this opportunity excites you, I'd love to connect. The tech world moves fast, and I have timely pieces ready to publish now. Let's turn this cache of AI-assisted research into a powerful content stream.
