

Secure Send: Privacy-First AI & Strategic Expansion

LLM Integration, Ephemeral Retention, Compliance & Go-to-Market Strategy

FOUR PILLARS OF EXPANSION

01. LLM INTEGRATION

- Client-side & Zero-Knowledge AI.
- Summaries, semantic graphs, slides.
- No server-side plaintext visibility.

02. RETENTION & EPHEMERAL DESIGN

- Shift from "storage" to "transactions".
- Enforced deletion (1, 3, 7 days).
- Download limits to minimize blast radius.

03. SECURITY & TRUST

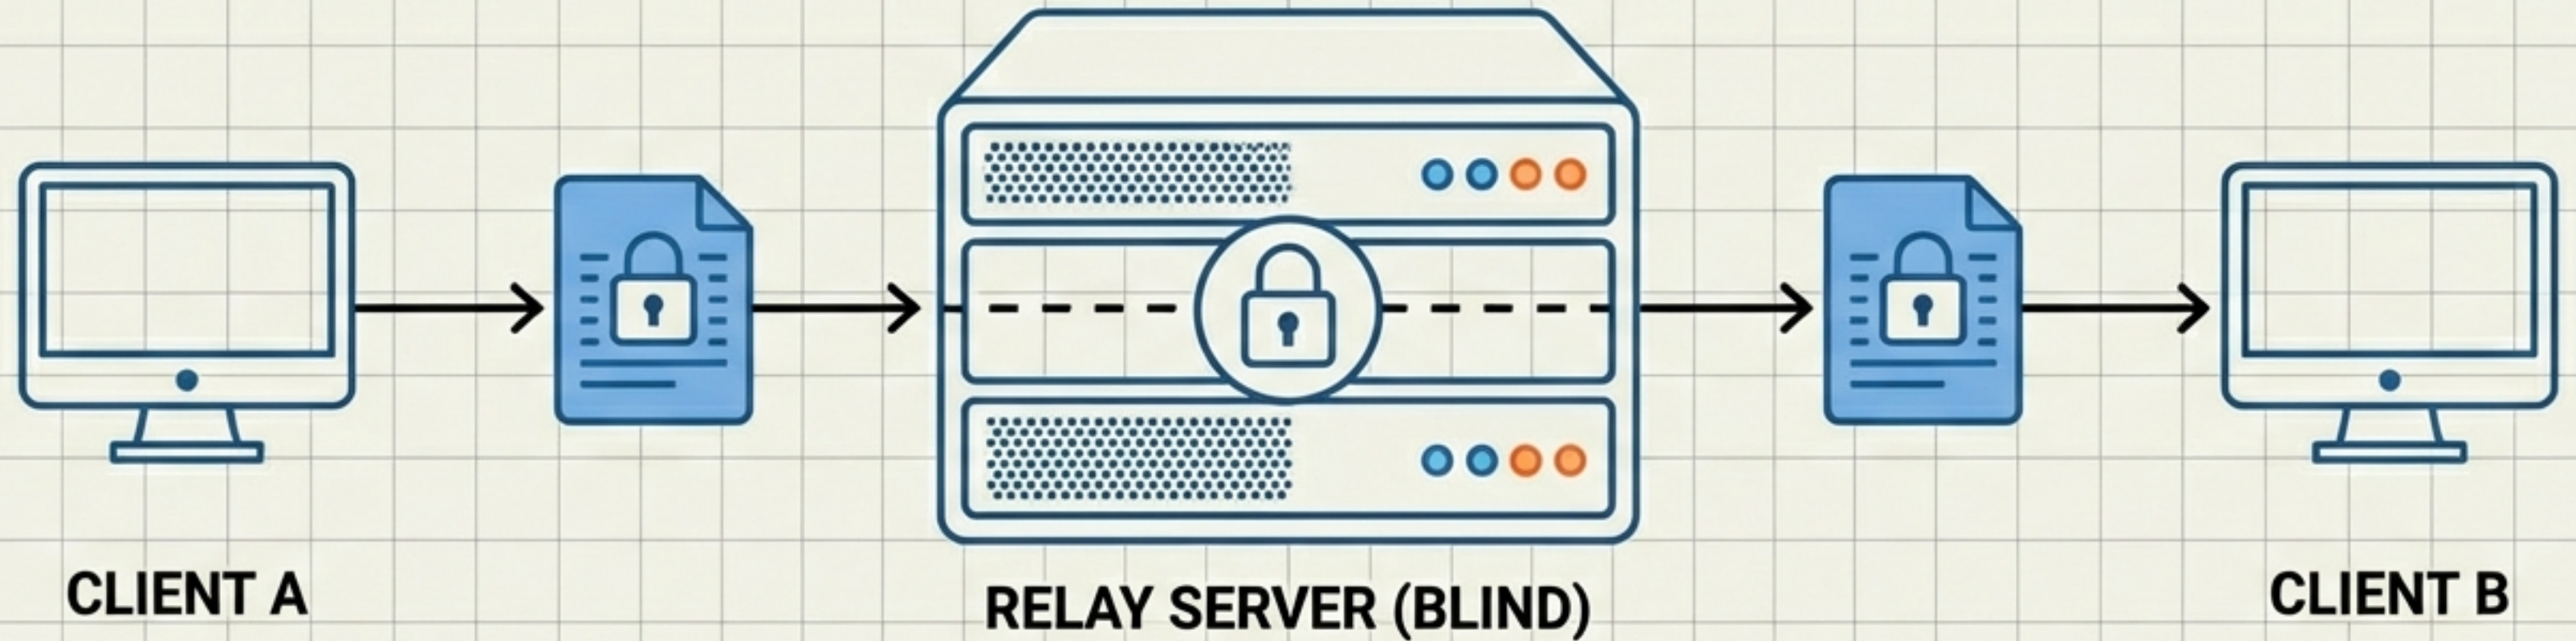

- "Publish Everything" strategy.
- Mapping to GDPR, ISO 27001, SOC 2.
- Continuous AI-driven auditing.

04. GO-TO-MARKET

- Naming collision strategy.
- SEO & Brand analysis.
- Competitive positioning.

THE PRIME DIRECTIVE: ZERO-KNOWLEDGE

“Data loss is possible. Data exposure is not.”

CONSTRAINT: The entire platform can be compromised or subpoenaed without privacy impact.

DESIGN RULE: If a feature requires the server to see plaintext content, it must run on the client or it does not exist.

VISION: HIGH-UTILITY AI, ZERO COMPROMISE

STANDARD AI MODEL

Data uploaded to cloud provider.
Privacy risk: High.
Unsuitable for sensitive sectors.

SECURE SEND AI MODEL

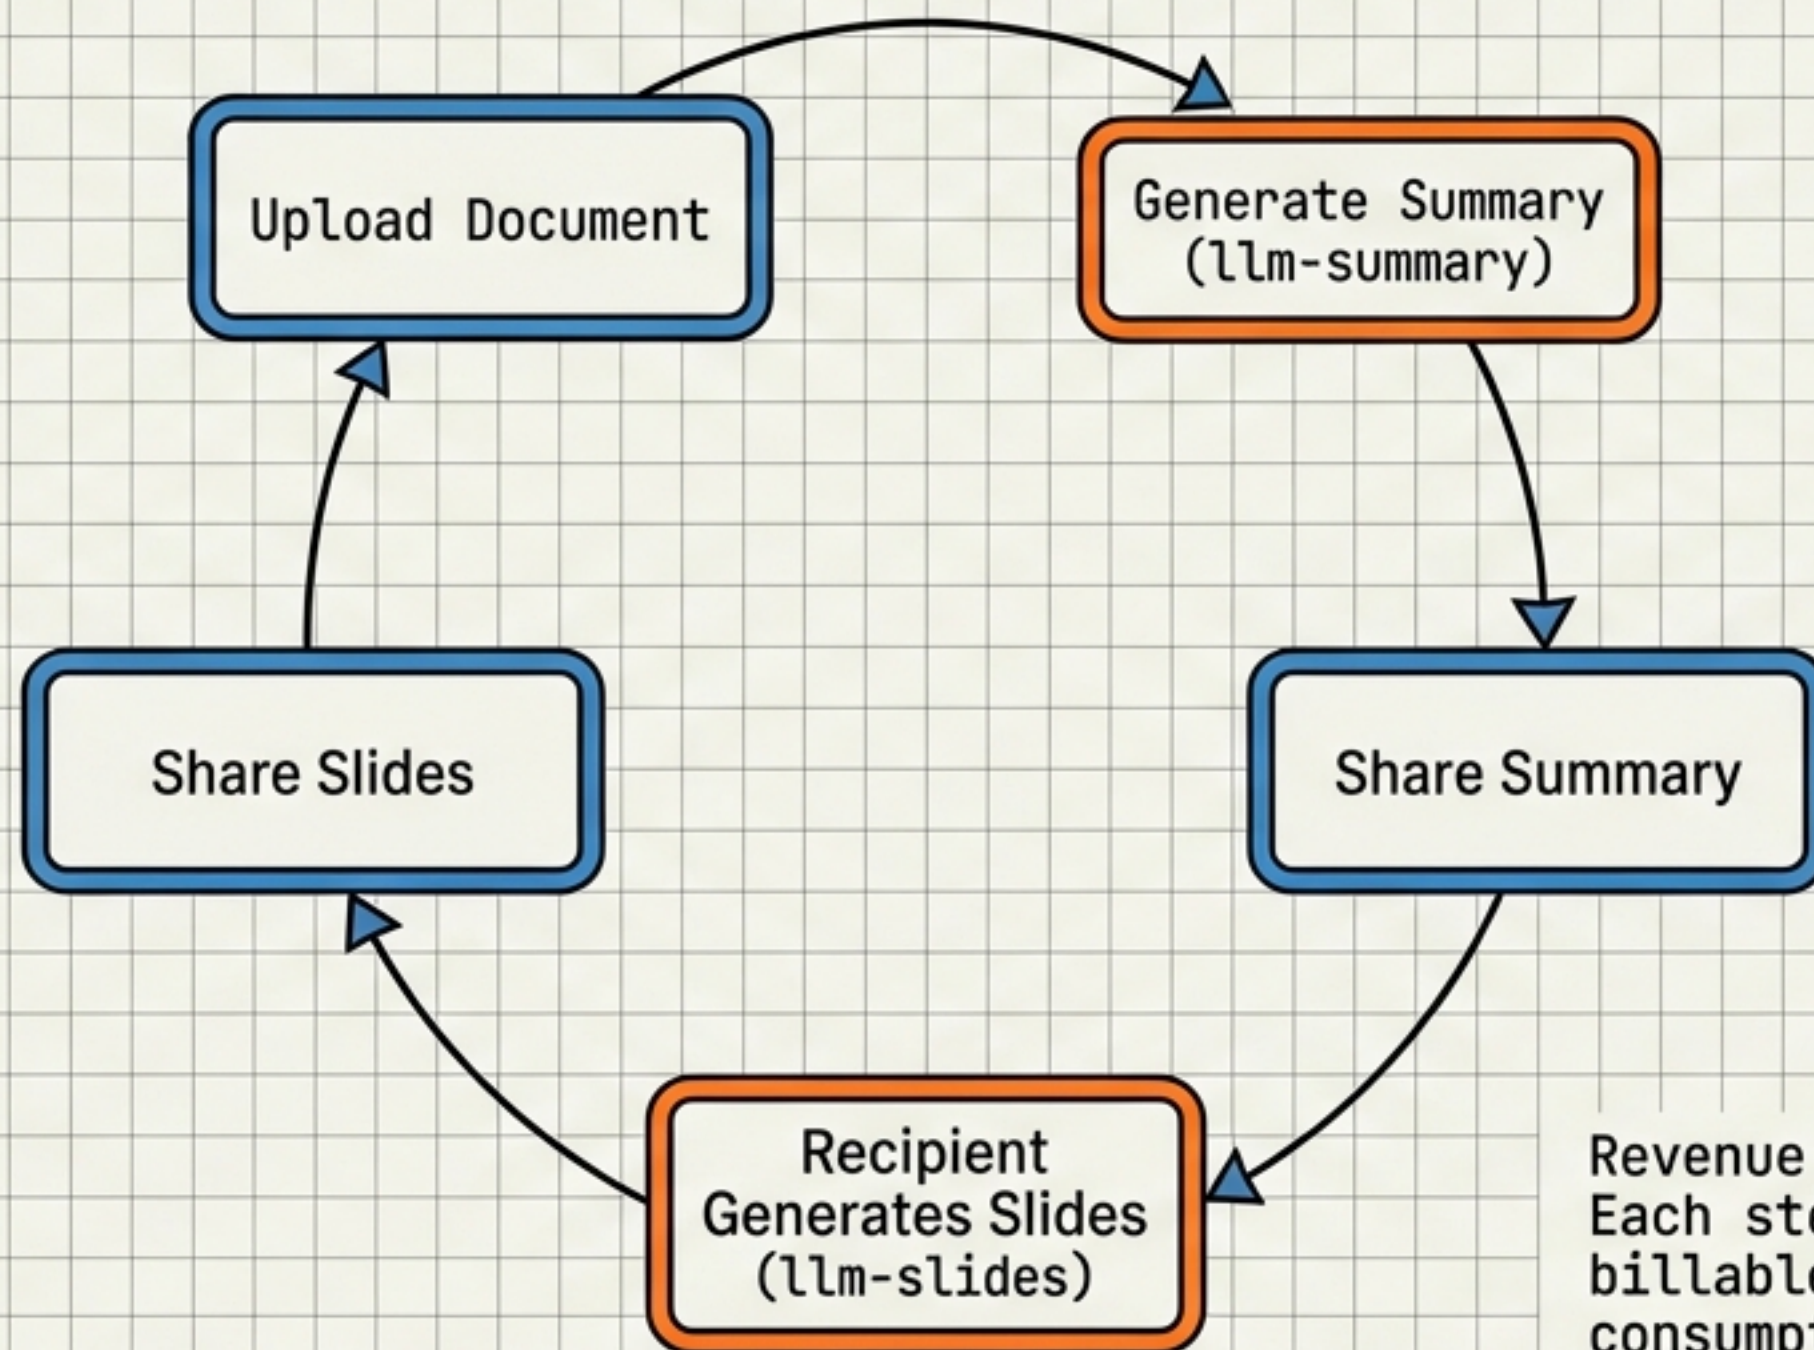

Data stays on device (Gemini Nano) or
uses encrypted proxy.
Privacy risk: Zero.
Utility: Summaries, Chat, Slides, Graphs.

**BRINGING LLM UTILITY TO SENSITIVE SECTORS
WHERE STANDARD AI IS BANNED.**

LLM ARCHITECTURE & ACCESS MODES

IN-BROWSER	LOCAL HARDWARE	BRING YOUR OWN KEY	PLATFORM CREDITS
Gemini Nano	Ollama	OpenAI / Anthropic	Proxied API
Runs in Chrome. Max Privacy (Local). Cost: Free.	Runs on localhost. Max Privacy (Local). Cost: Free.	Direct connection. Keys stored in browser. User pays provider.	Server acts as blind proxy. No payload storage. User buys credits from us.

THE ARTIFACT LOOP: A VIRTUOUS CYCLE

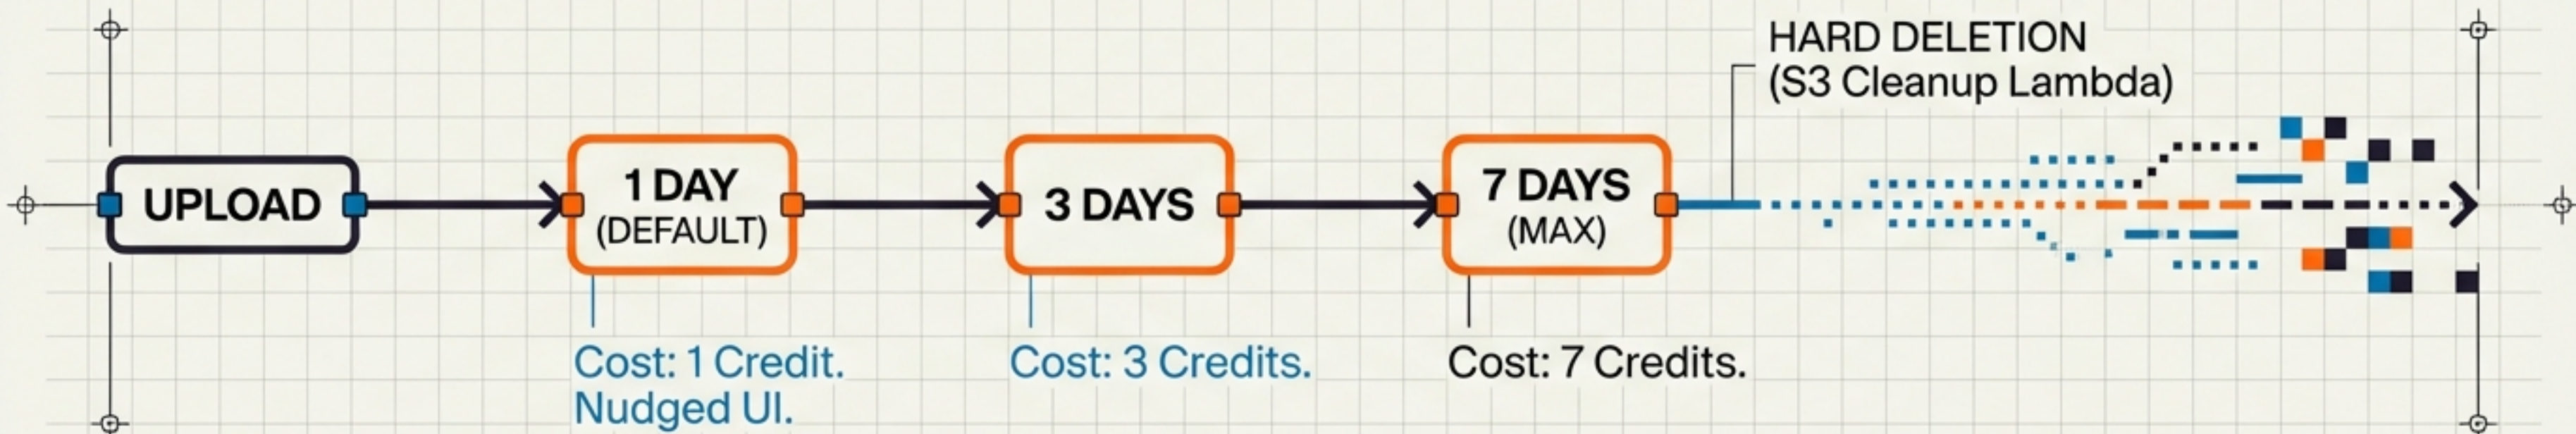

PLUGINS:
llm-summary
llm-chat
llm-slides
llm-semantic-graph
llm-audio

Revenue Implication:
Each step is a potential
billable transfer or credit
consumption event.

Architectural Brutalism meets Swiss International Style

EPHEMERAL BY DESIGN

DOWNLOAD LIMITS

- Options: Self-destruct after 1 download, 5 downloads, or 10 downloads.

KEY PHILOSOPHY

Not storage. Transactions. Reduced blast radius. Predictable costs.

THE CREDIT MODEL & UNIT ECONOMICS

COST DRIVERS

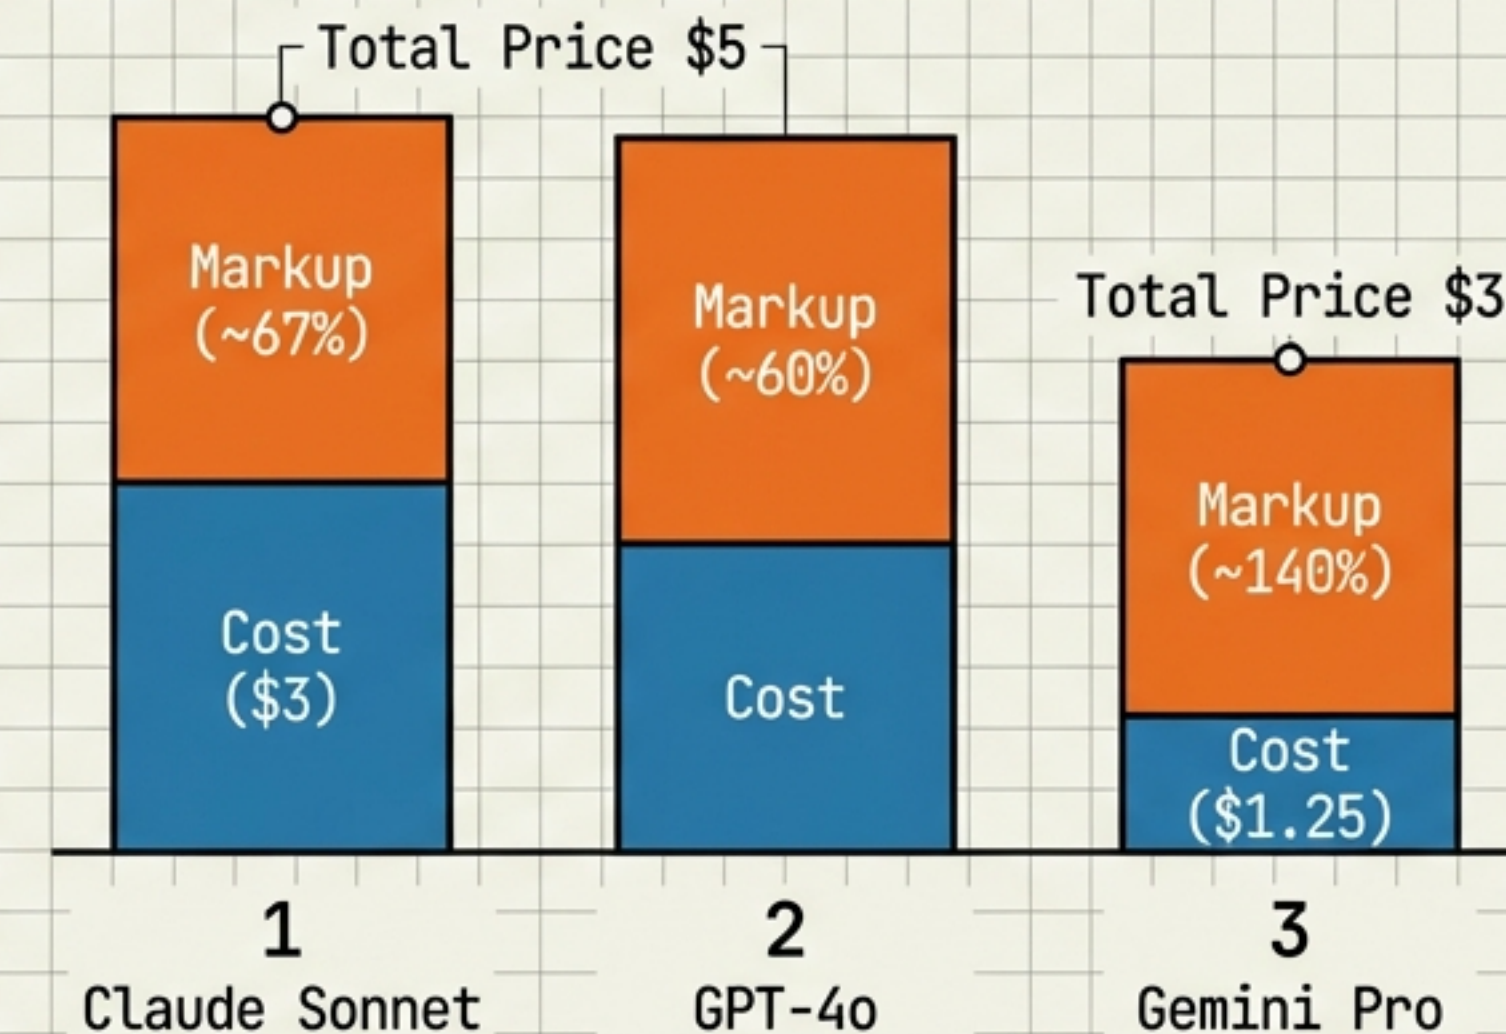

🕒 **Retention:** 1 day = 1 credit /
7 days = 7 credits

💬 **AI Chat:** 1 credit

📺 **AI Slides:** 5-10 credits

🔊 **AI Audio:** 10 credits (Premium)

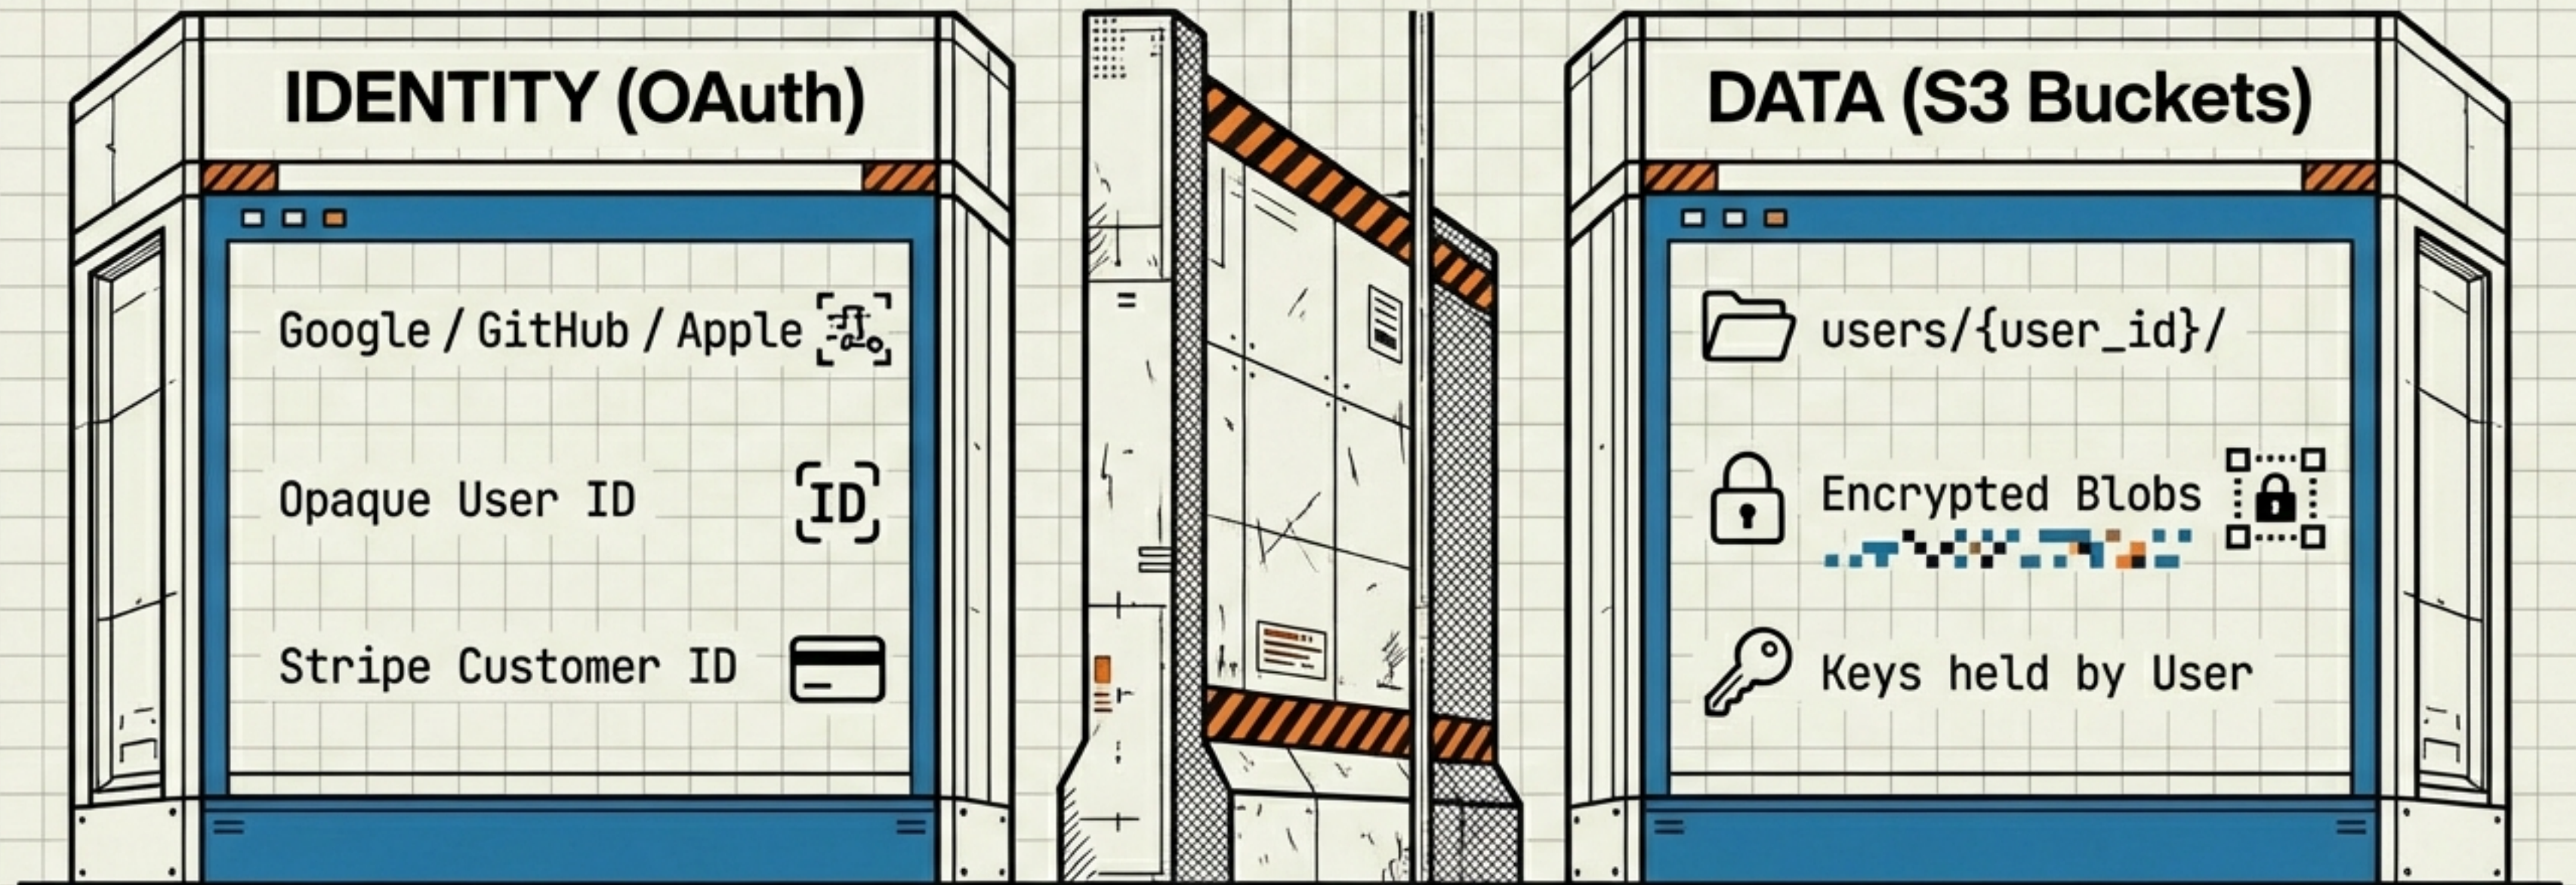

API RESALE MARGINS

High margins on credit resale fund infrastructure.

Architectural Brutalism meets Swiss International Style

IDENTITY WITHOUT COMPROMISE

THE KEY CHALLENGE: Server cannot reset passwords.
We recommend 1Password/Bitwarden integrations for key management.

Architectural Brutalism meets Swiss International Style

SECURITY, COMPLIANCE & TRUST

Strategy: Publish Everything.

High Compliance (Zero PII)

Mapped to Controls

Not Supported

TRANSPARENCY TOOLS

- Public DSAR Page
- Vendor Due Diligence Pack
- Automated AI Security Agent Reports (Continuous Scan)

PRIVACY DECISION: IP ADDRESS RETENTION

STORE IP ADDRESS?

NO

Lose transparency
panel & abuse
detection.

YES

- FOREVER

Privacy risk &
GDPR liability.

STORE
TEMPORARILY

AUTO-DELETE IP WHEN TRANSFER
EXPIRES (MAX 7 DAYS).

BENEFITS:

- PRESERVES USER TRANSPARENCY PANEL.
- ENABLES SHORT-TERM ABUSE DETECTION.
- ELIMINATES LONG-TERM LOGS.

GO-TO-MARKET: THE NAMING HURDLE

CURRENT NAME: "SECURE SEND"

STATUS: GENERIC / TAKEN.

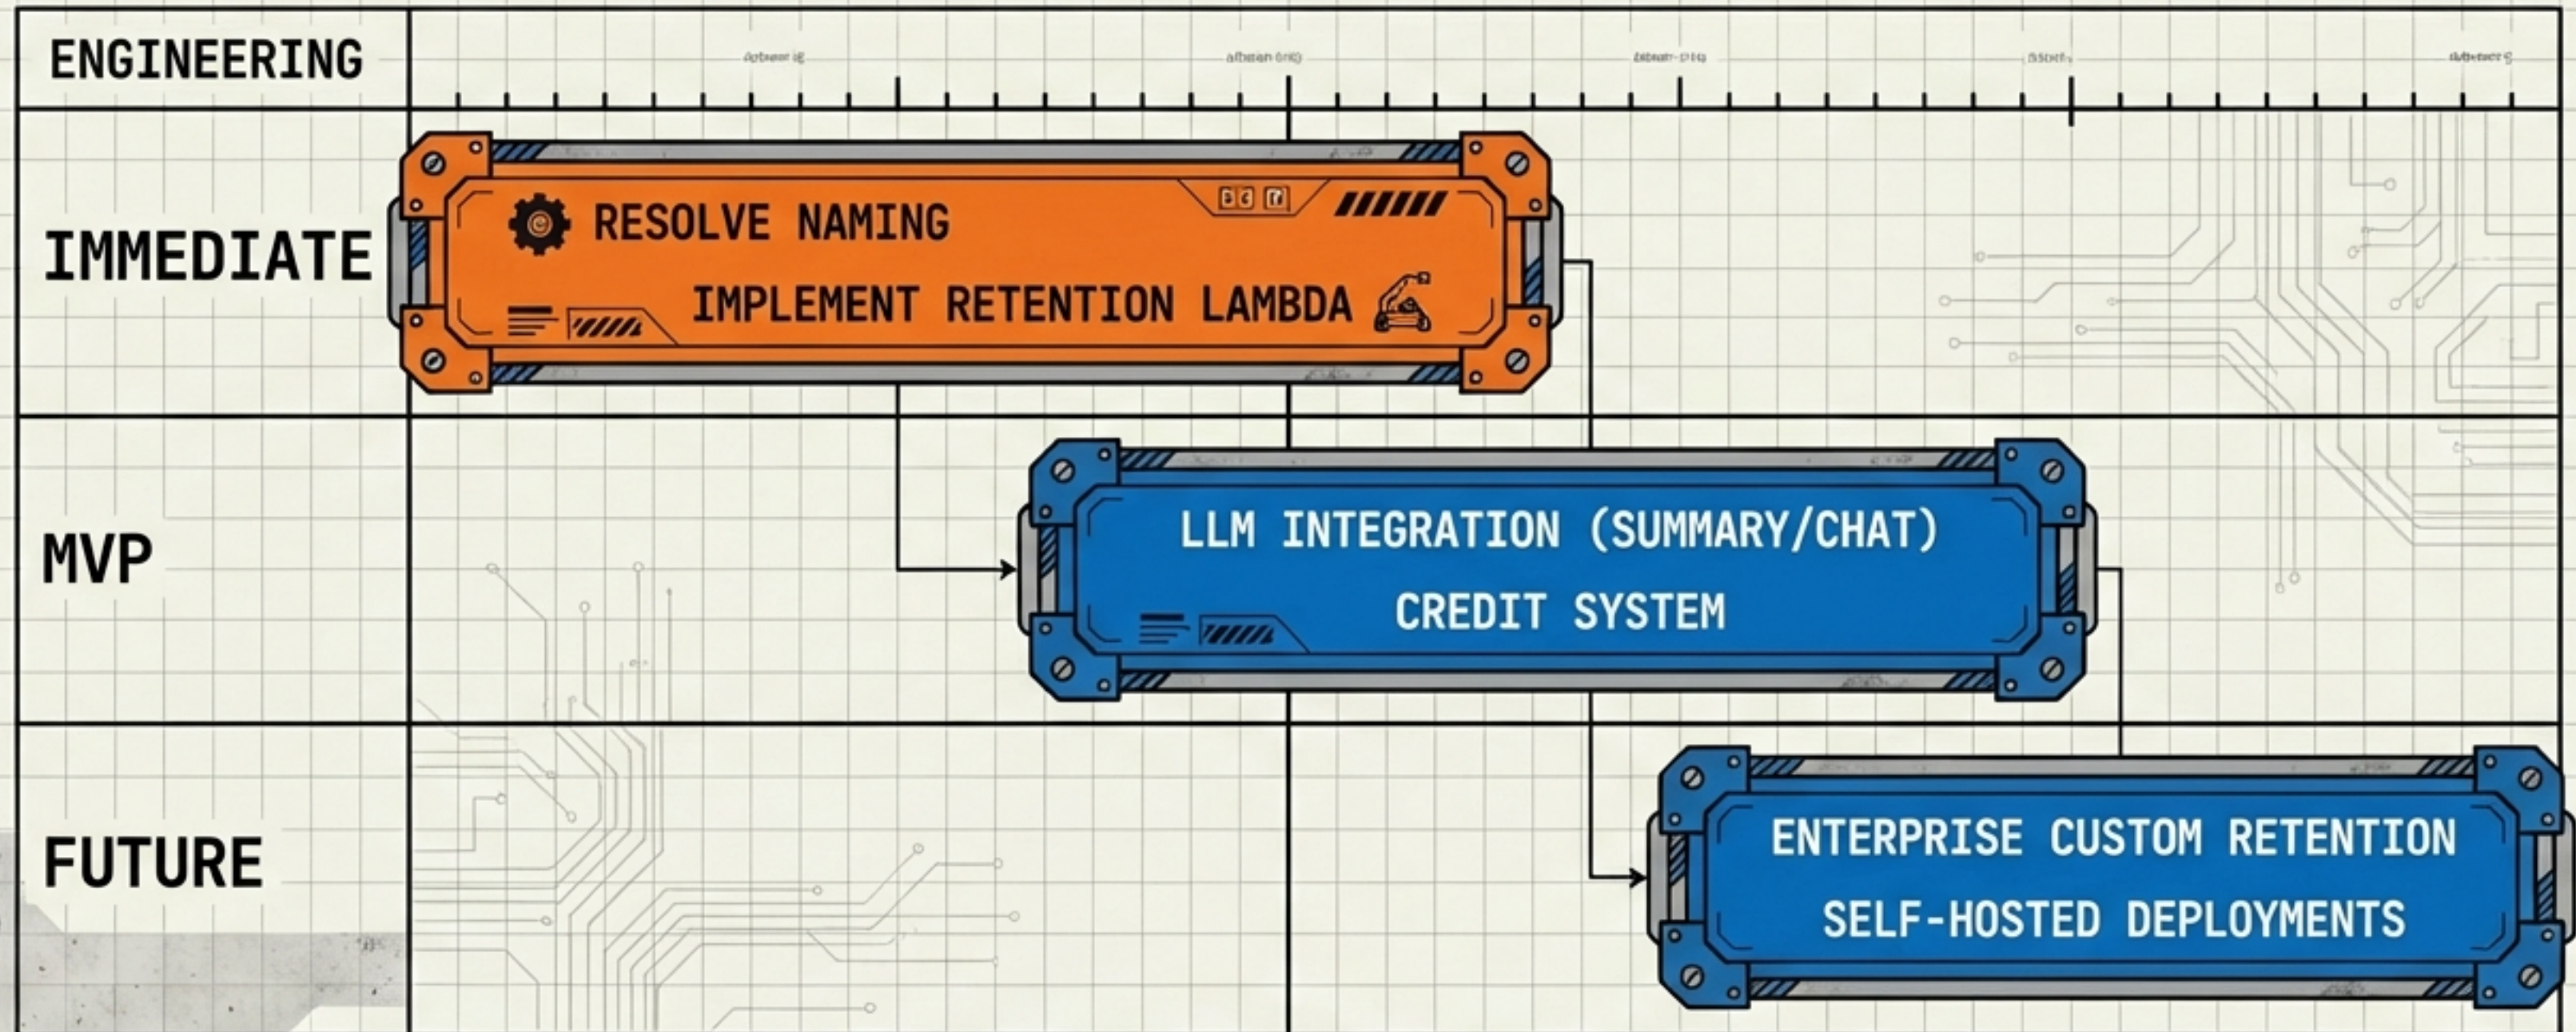

CONFLICTS: `securesend.link`,
Enterprise file sharing tools

ACTION PLAN:

- ☐ AI-ASSISTED NAMING RESEARCH
- ☐ SEO STRATEGY & DOMAIN ACQUISITION
- ☐ BRAND STATE ANALYSIS

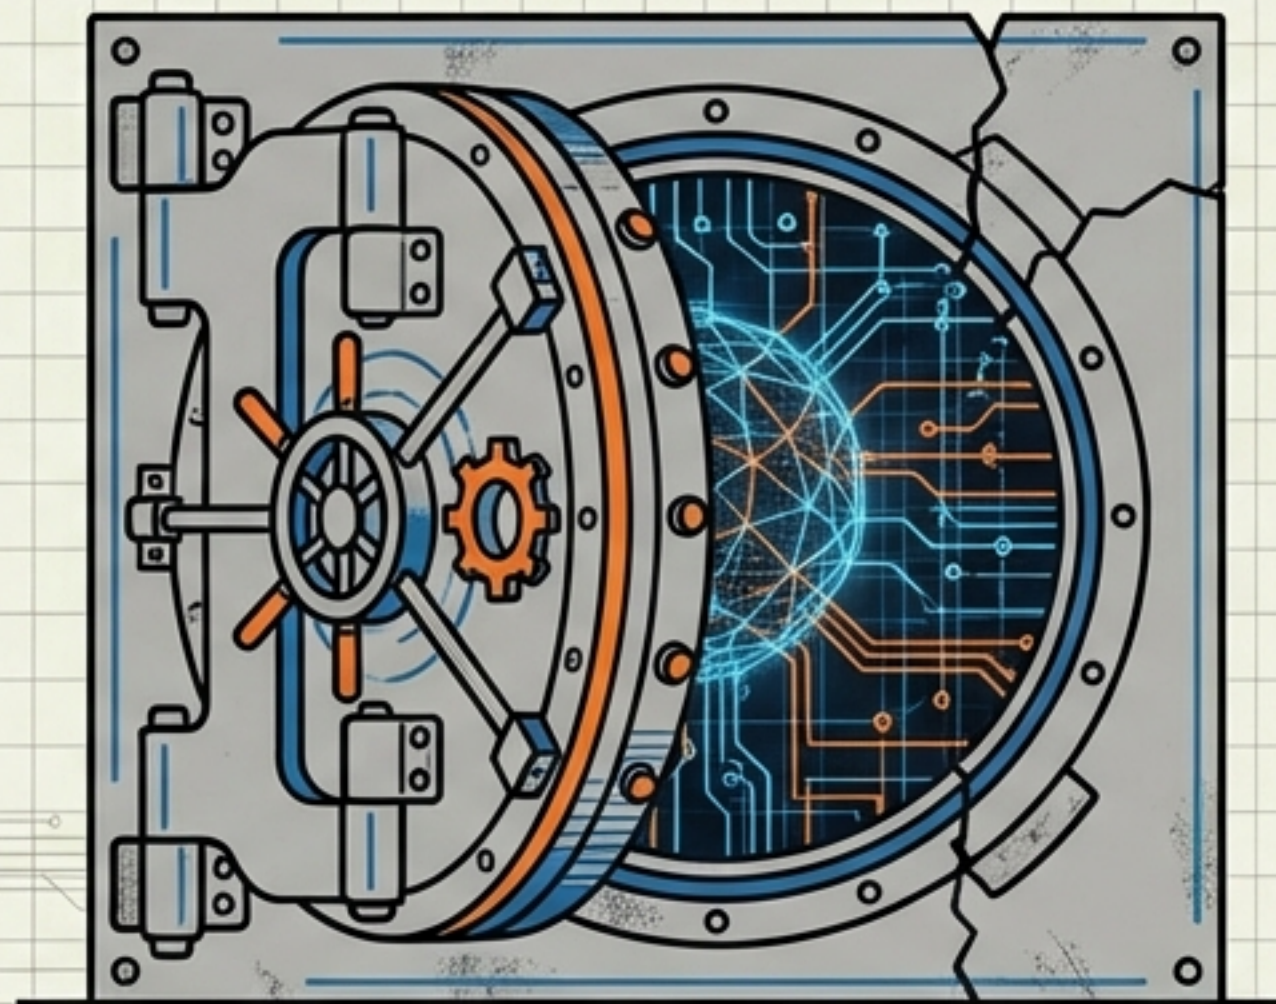

OBJECTIVE: SECURE UNIQUE IDENTITY BEFORE PUBLIC LAUNCH.

STRATEGIC ROADMAP

THE FUTURE OF SECURE COLLABORATION

**ZERO KNOWLEDGE
ARCHITECTURE** + **CLIENT-SIDE
AI POWER** + **EPHEMERAL
SAFETY** = **THE NEW
STANDARD**

WE ARE BUILDING A PLATFORM WHERE USERS DON'T HAVE TO CHOOSE BETWEEN UTILITY AND PRIVACY.
