

The Grafter: Open Source Customer Engagement

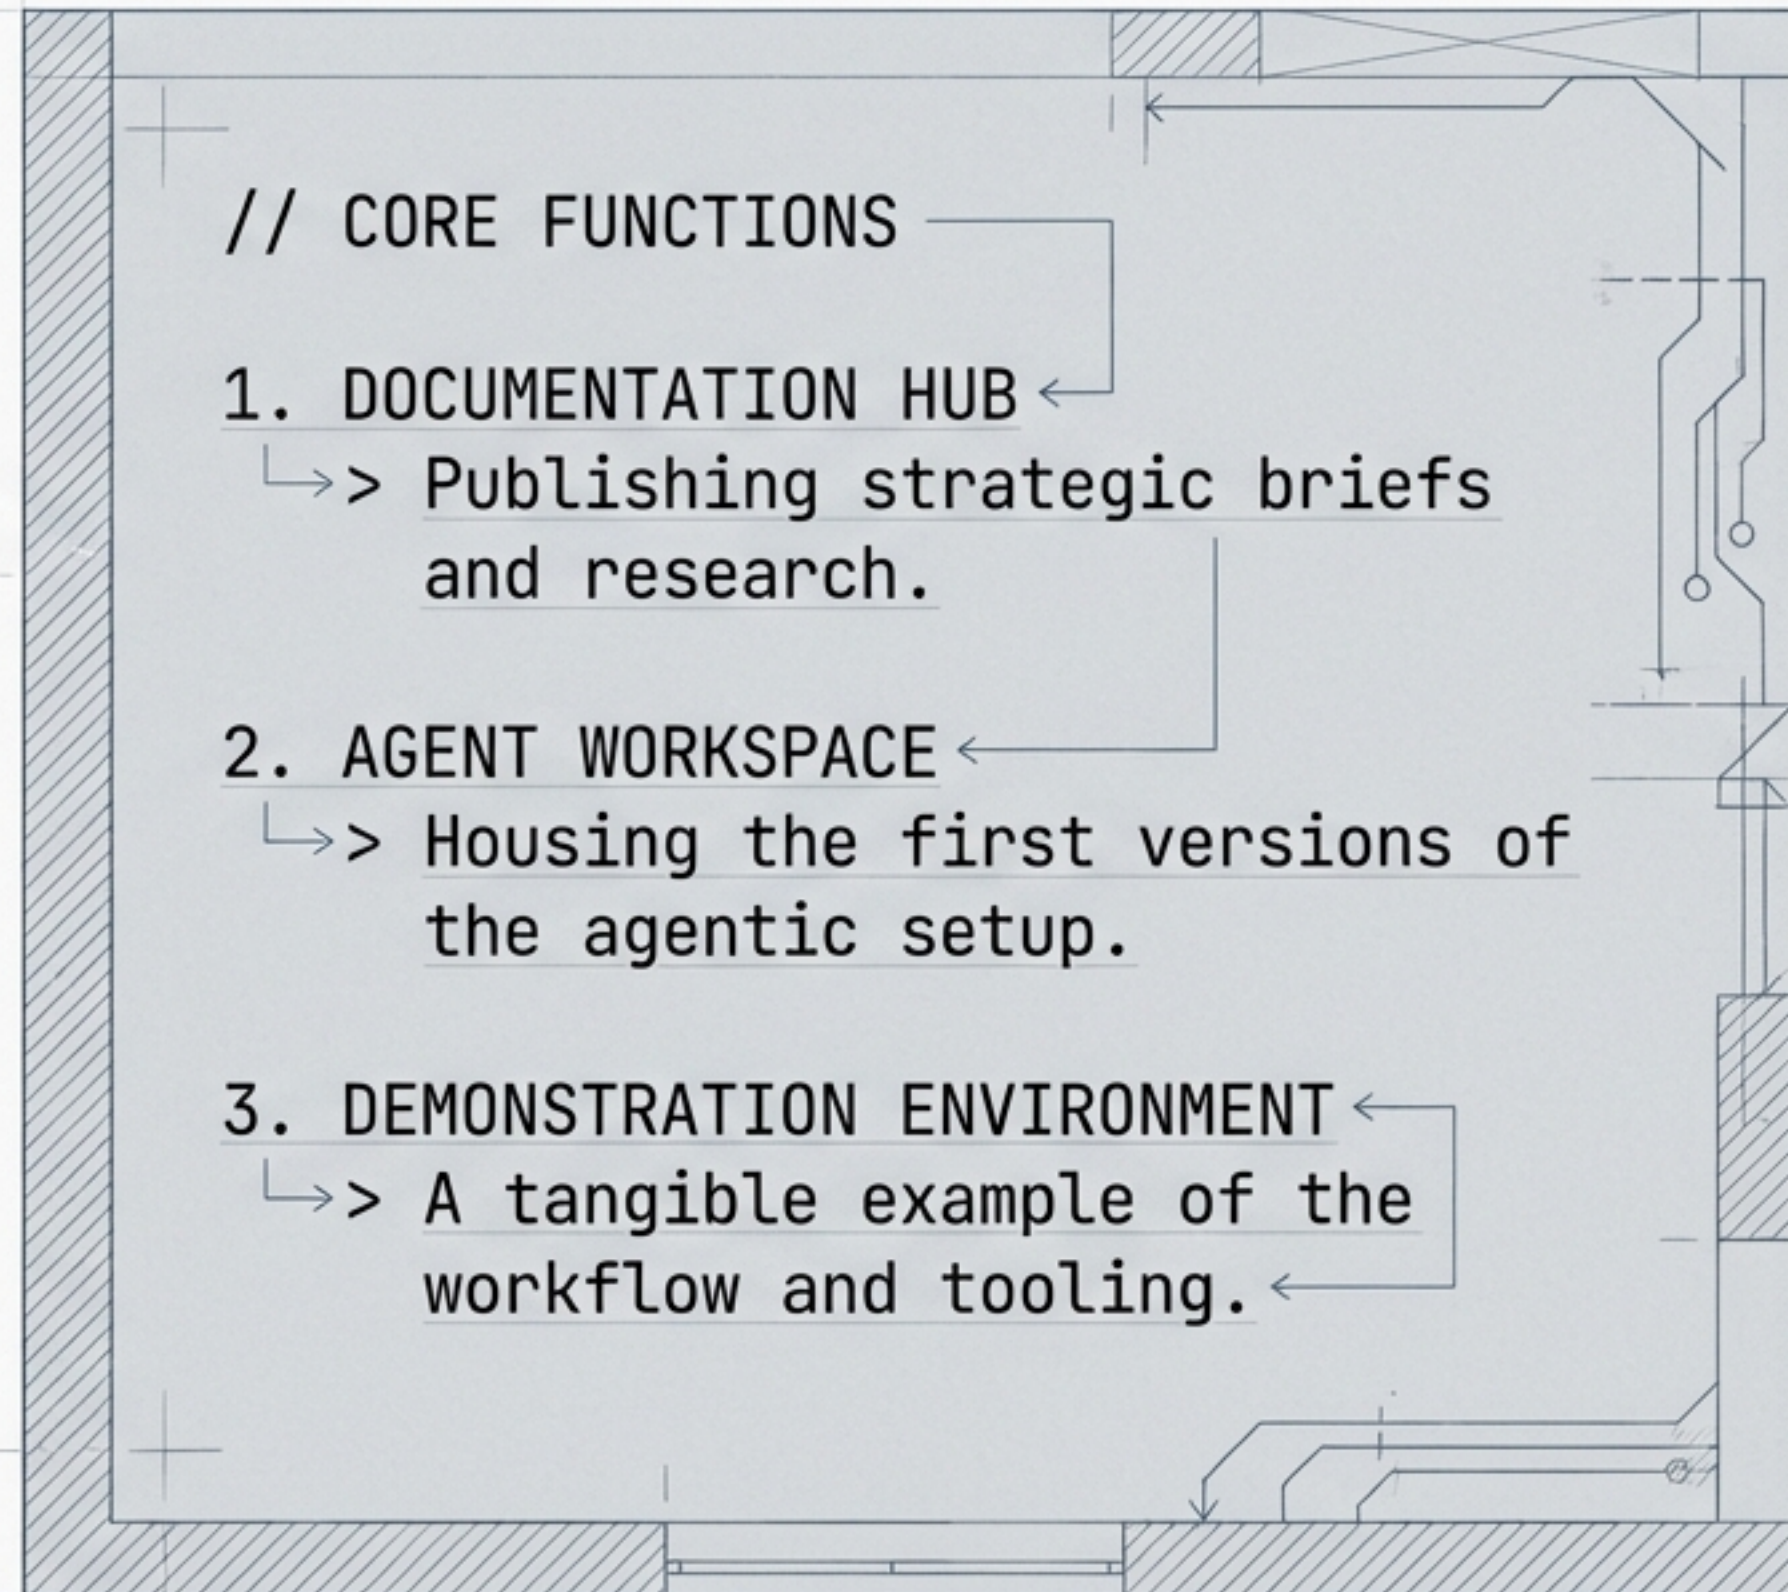

A Repository Brief by The Cyber Boardroom

Date: February 2026

Perspective: Active Customer
Status: Strategic Brief

A Working Space for Active Engagement

This repository serves as the operational home for The Cyber Boardroom's engagement with The Grafter platform. It is designed from the perspective of an active customer who intends to consume, contribute, and improve the ecosystem.

A Contribution to the Ecosystem, Not a Fork

***“We are a customer of The Graftor.
We want to help. We want to start
consuming the platform and
contributing back.”***

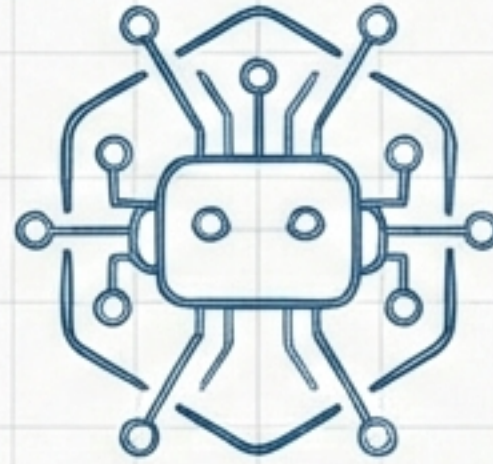

This project is a practical demonstration of an open-source, community-driven approach. It is not a competing project, but a customer showing up with tools and ideas.

Three Pillars of the Repository

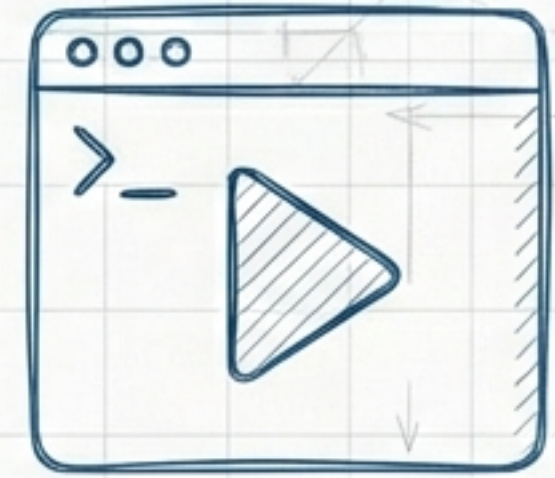

Documentation

Strategic briefs,
architecture
recommendations, and
engagement materials.

Agents & Bots

The working element
of the repo, housing
specific bot
configurations and
role definitions.

Demonstration

The proof of concept.
Showing how the
agentic workflow and
open-source model fit
together in practice.

The Repository Architecture

```
root/  
├── docs/  
│   ├── strategic-briefs/  
│   └── technical-discovery/  
├── agents/  
│   ├── conductor/  
│   └── role-definitions/  
├── research/  
│   └── public-ecosystem-data/  
├── demos/  
└── scripts/
```

Contains strategic briefing and technical discovery briefs

Initialises the Conductor and agent roles

Publicly sourced information about the platform

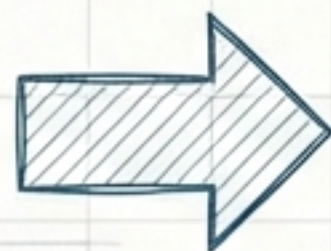

The Open Kitchen: What We Publish

Everything in this repo is shared openly as a demonstration of the open-source approach.

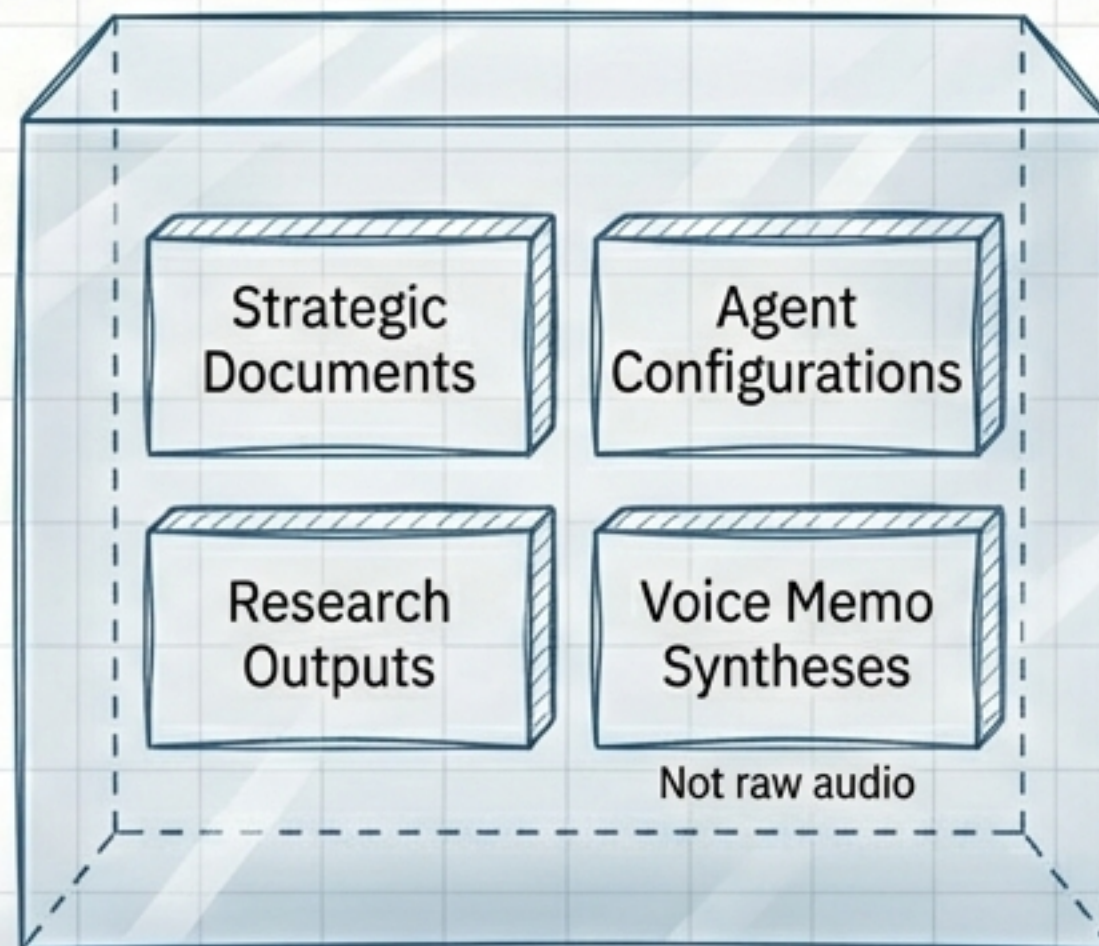

Raw Inputs

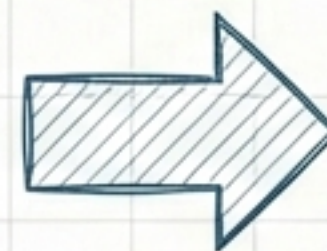

Synthesis &
Processing

The Graftor Repo

Public
Value

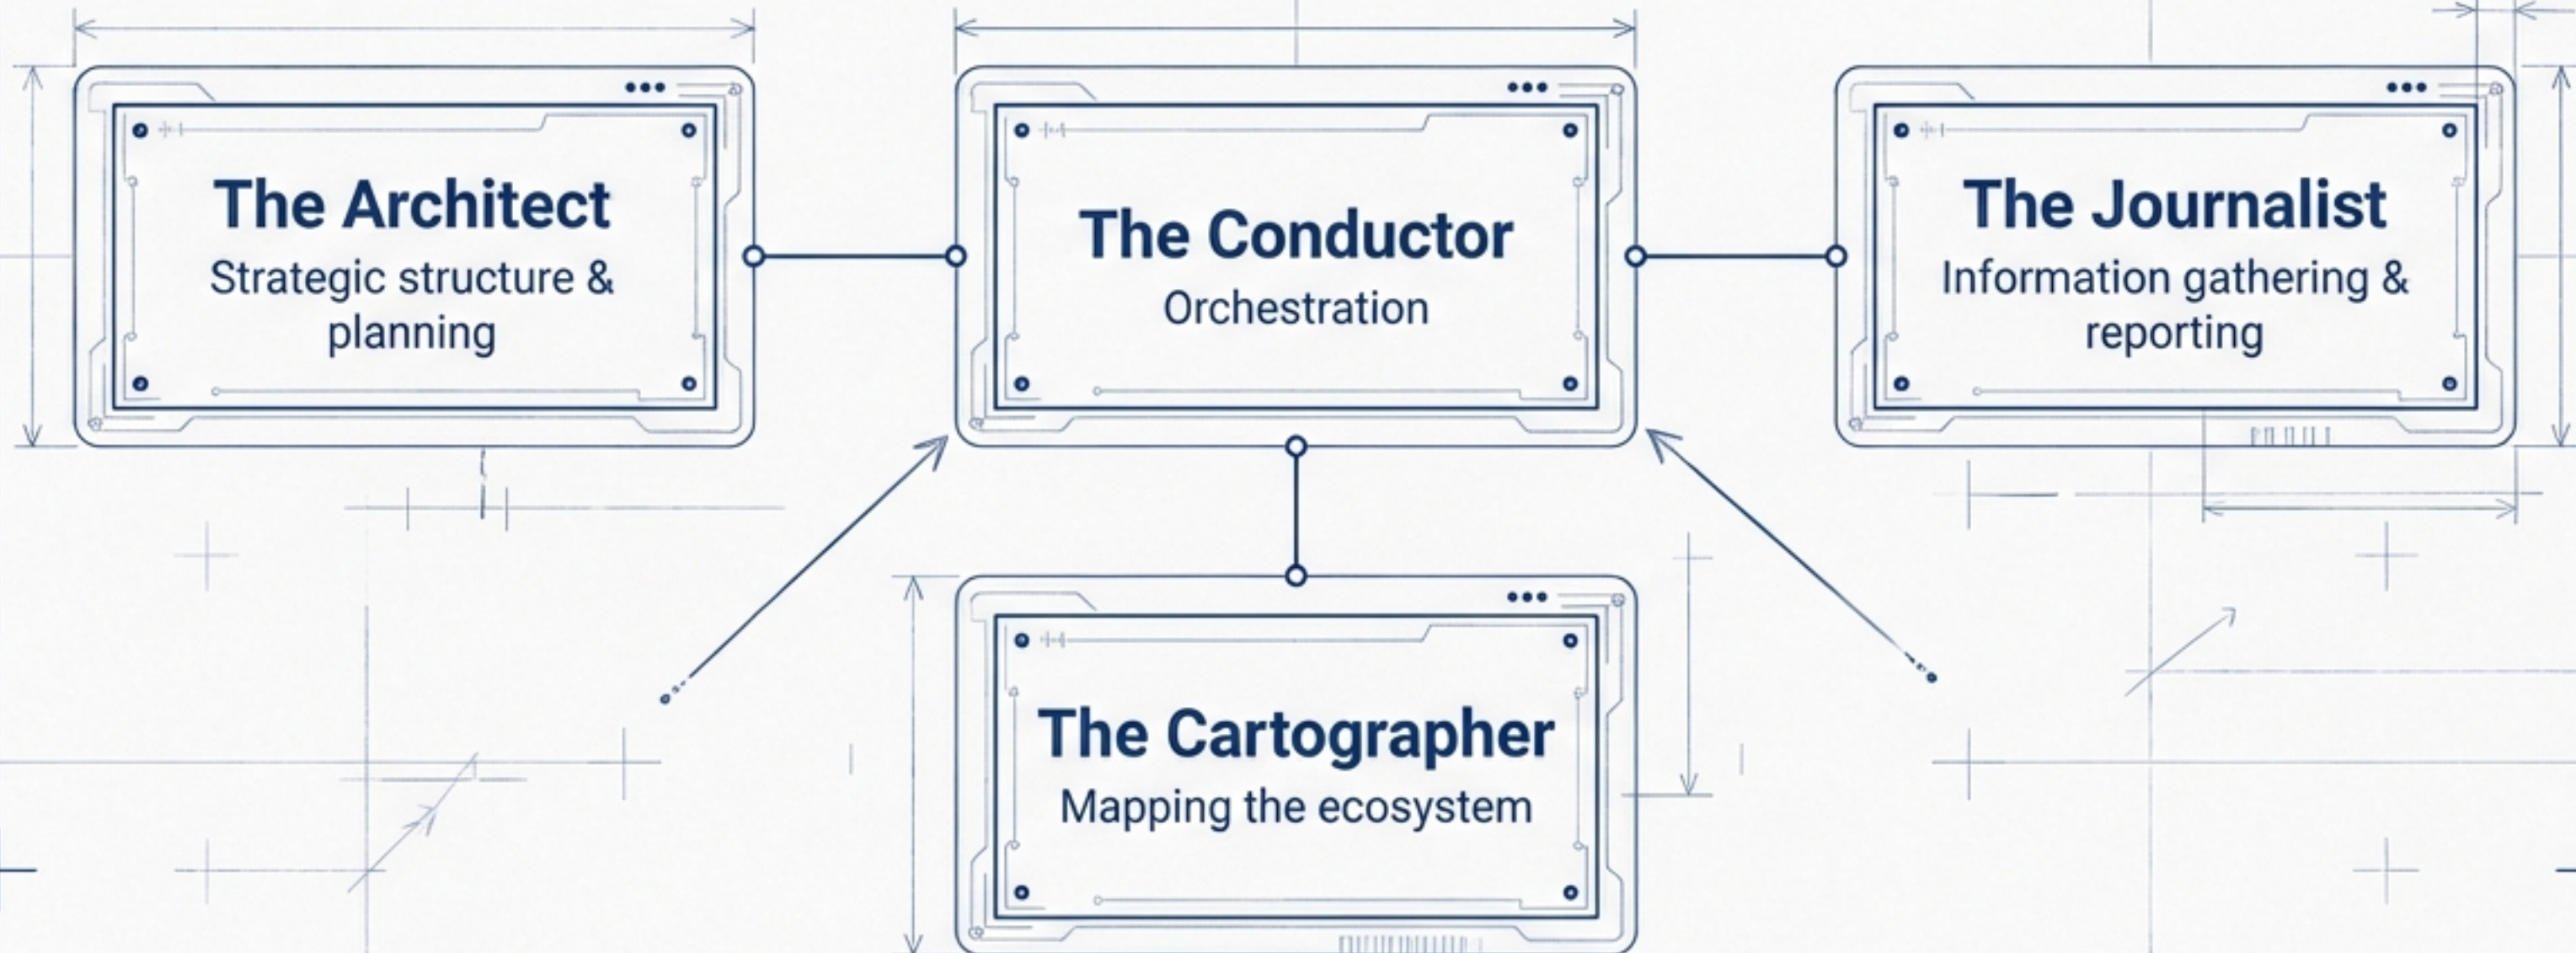

Shared Knowledge

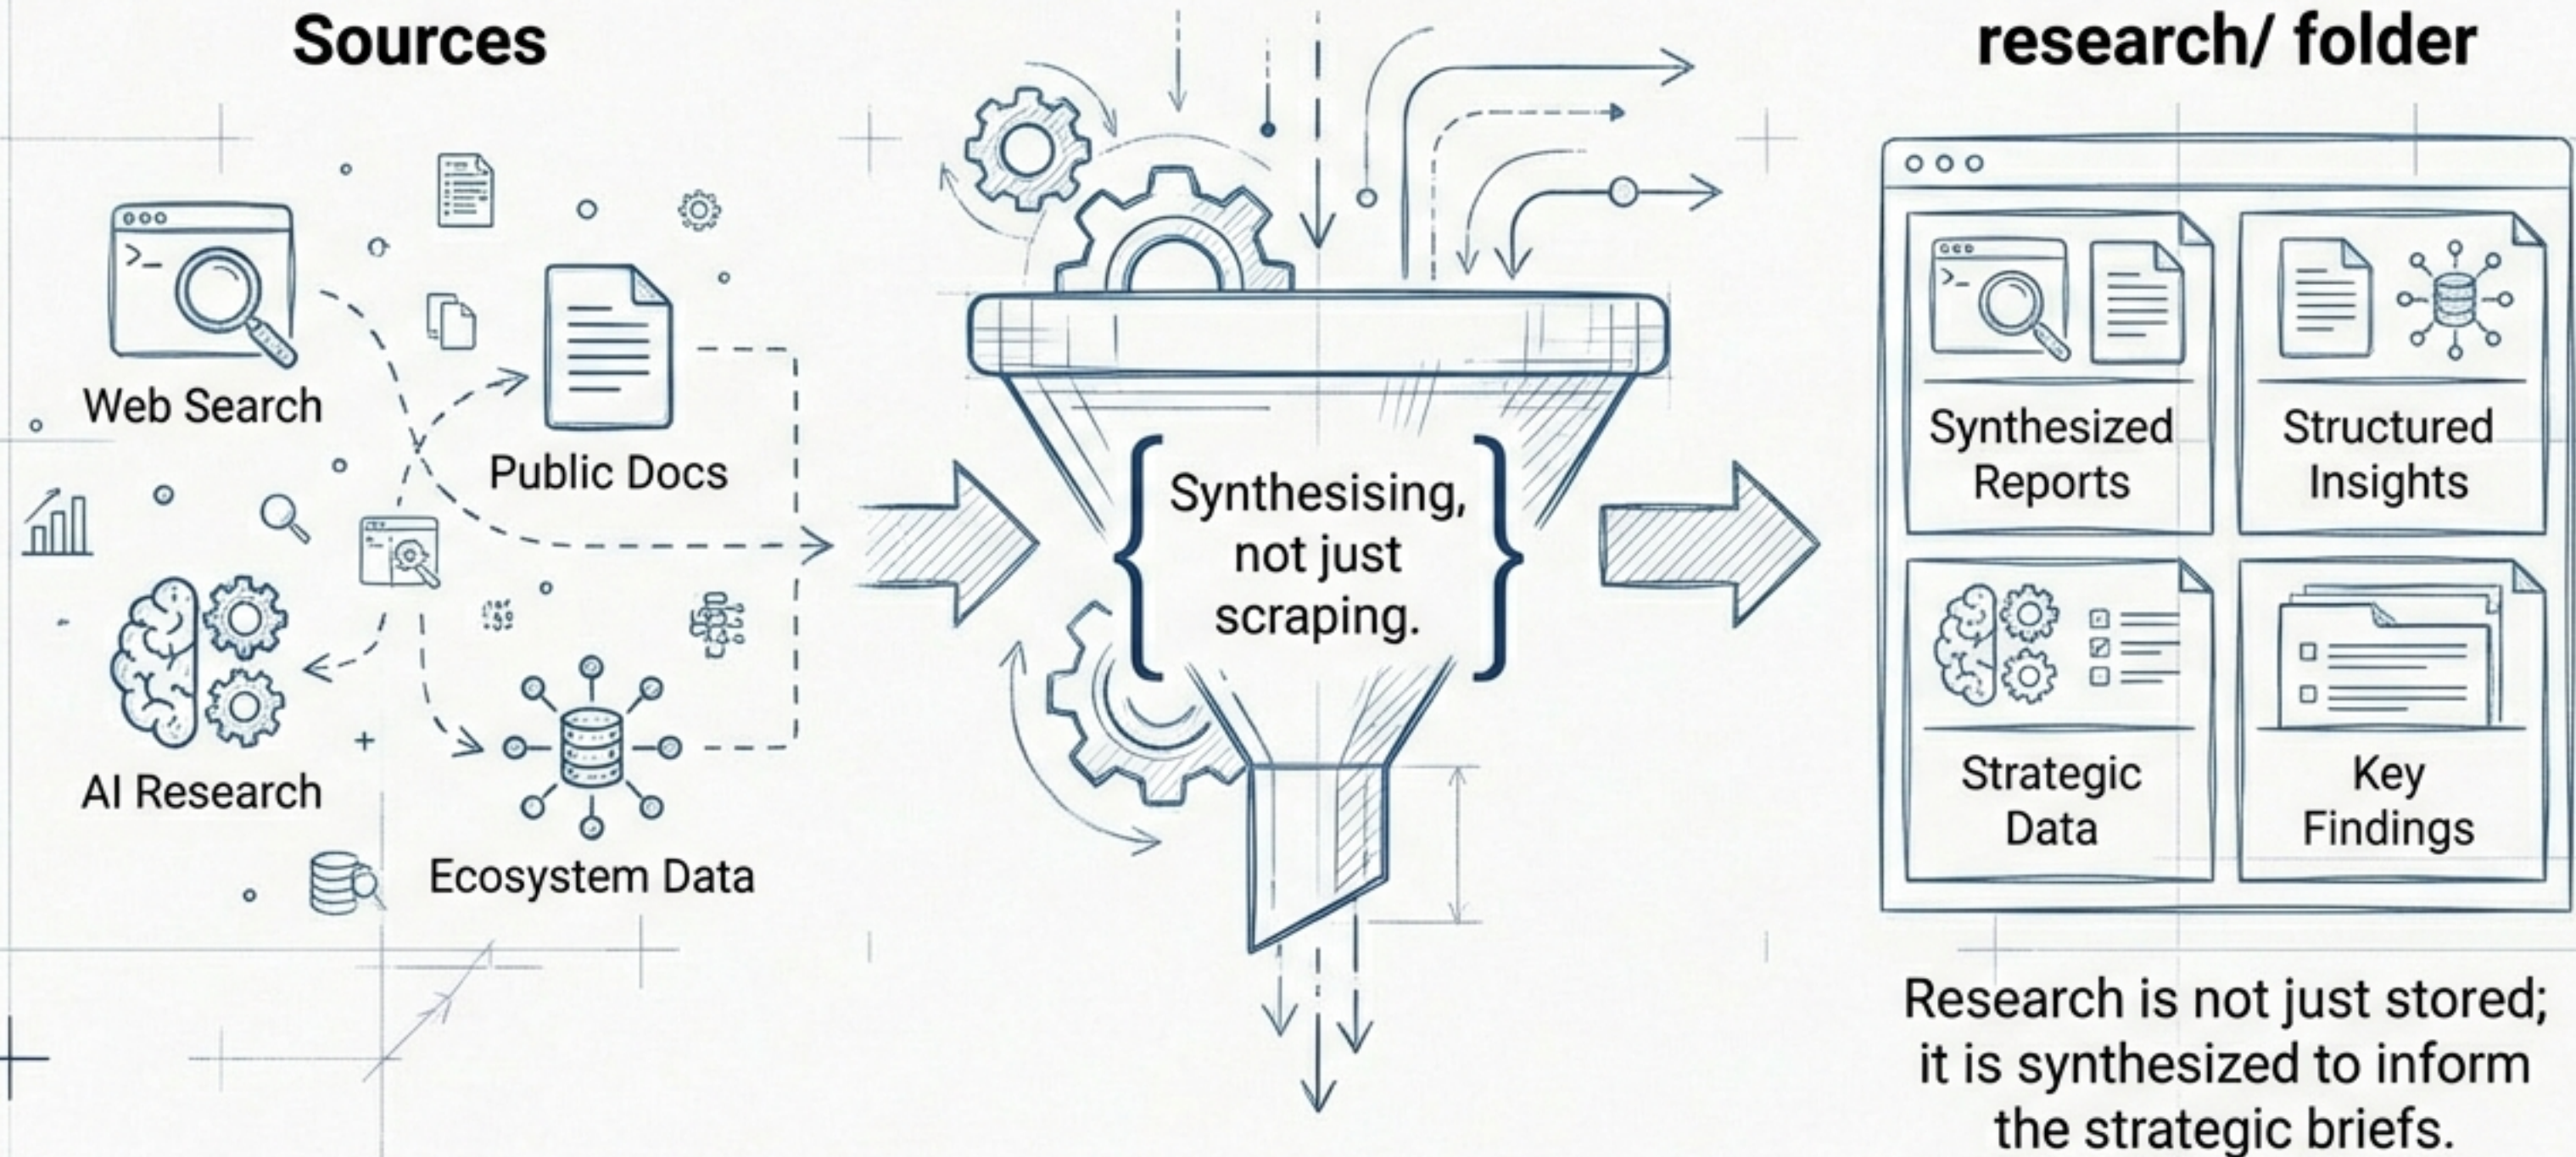

Housing the Agentic Framework

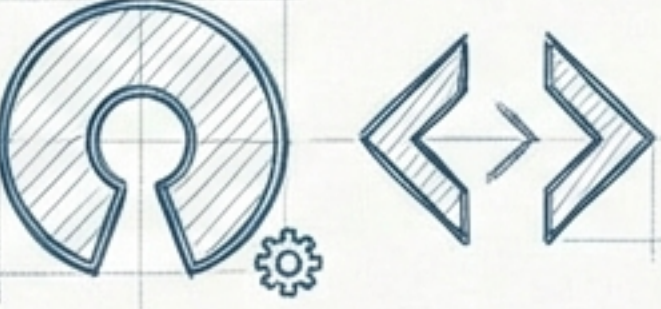

The repository houses the first versions of the agentic setup.

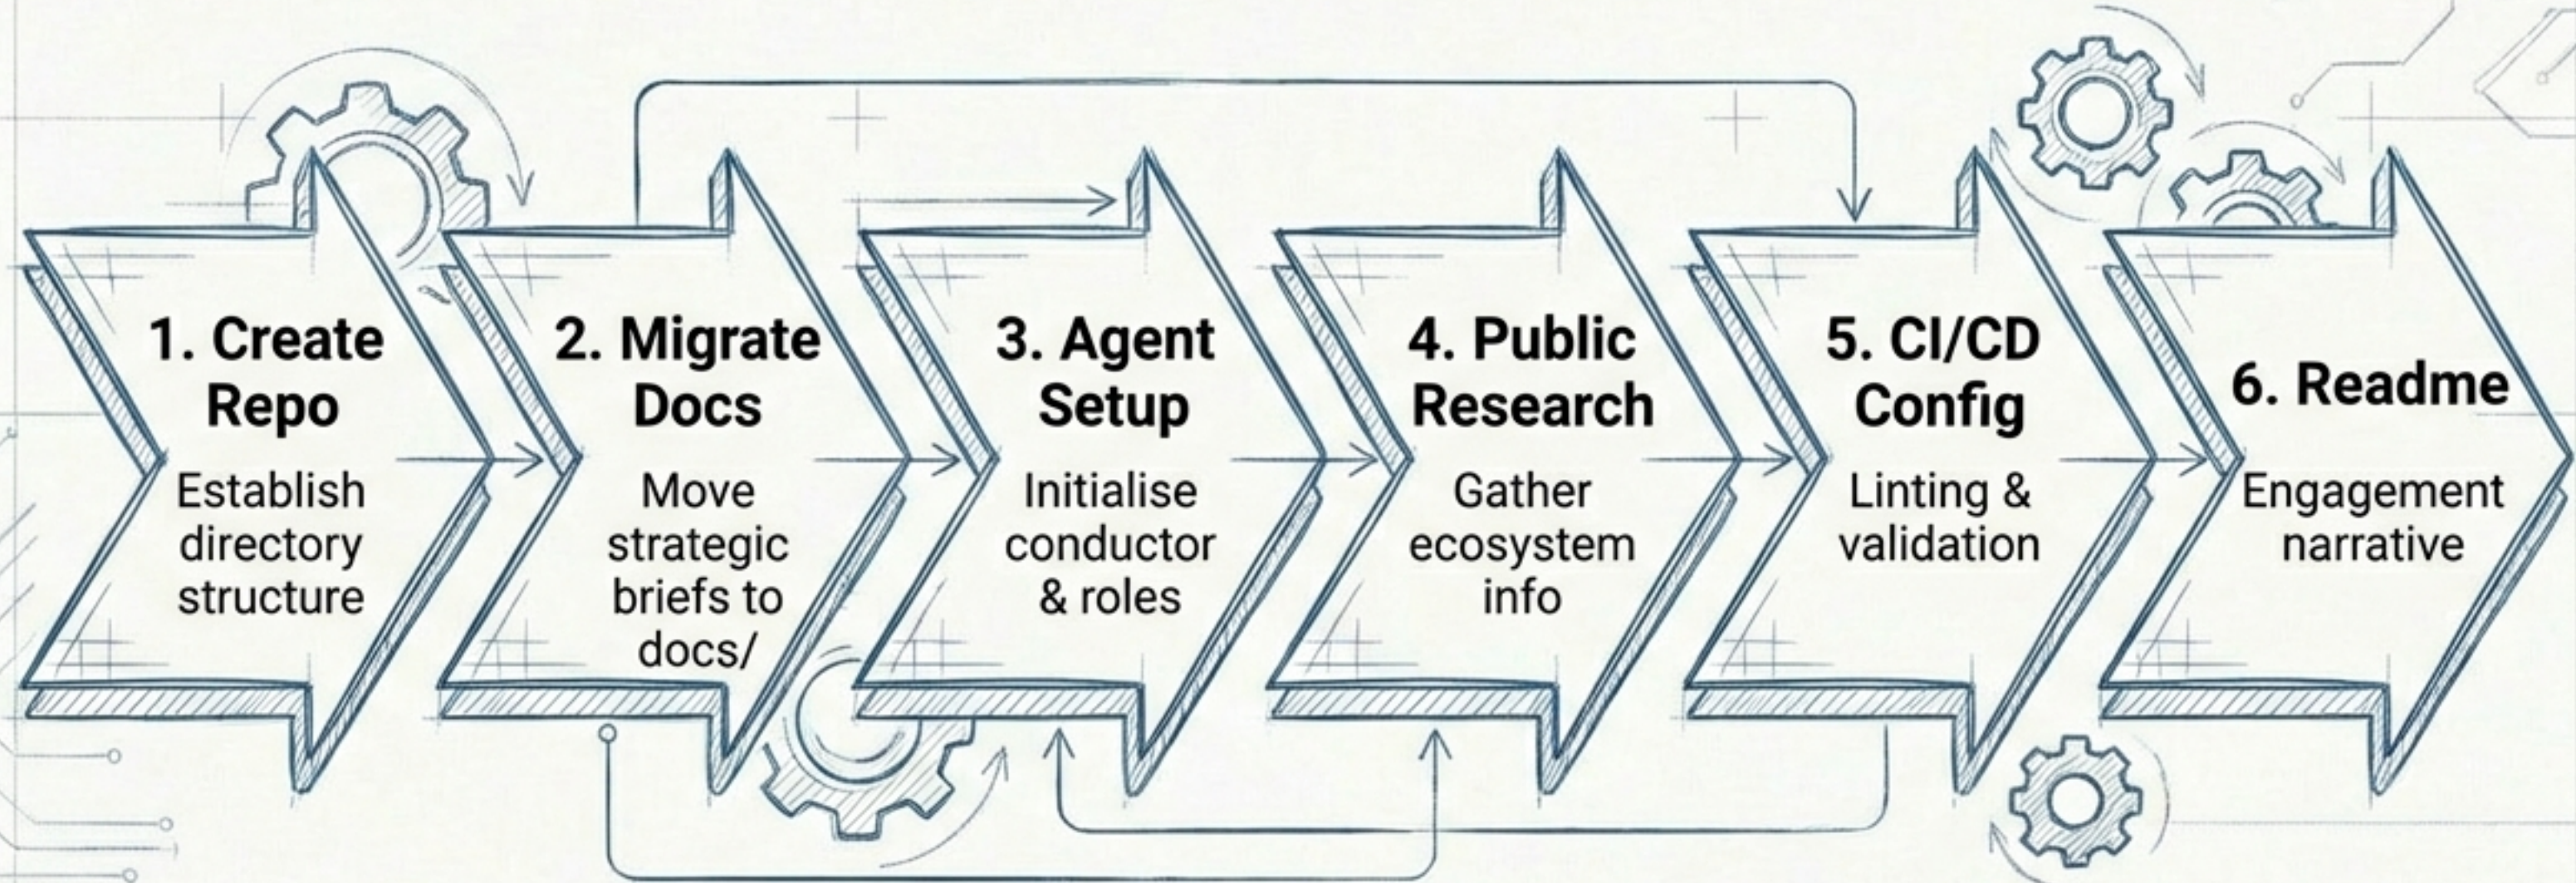

Intelligence and Research Synthesis

A Dual-Licensing Framework

Content Type	Licence	
Documentation, Briefs, Research		Creative Commons (CC BY 4.0)
Code, Agent Configs, Tooling		MIT or Apache 2.0

Operational Roadmap: Initial Setup

Engineering Discipline in a Demo Environment

CI/CD Implementation

Implementation of basic linting and document validation. Lightweight initially, designed to expand.

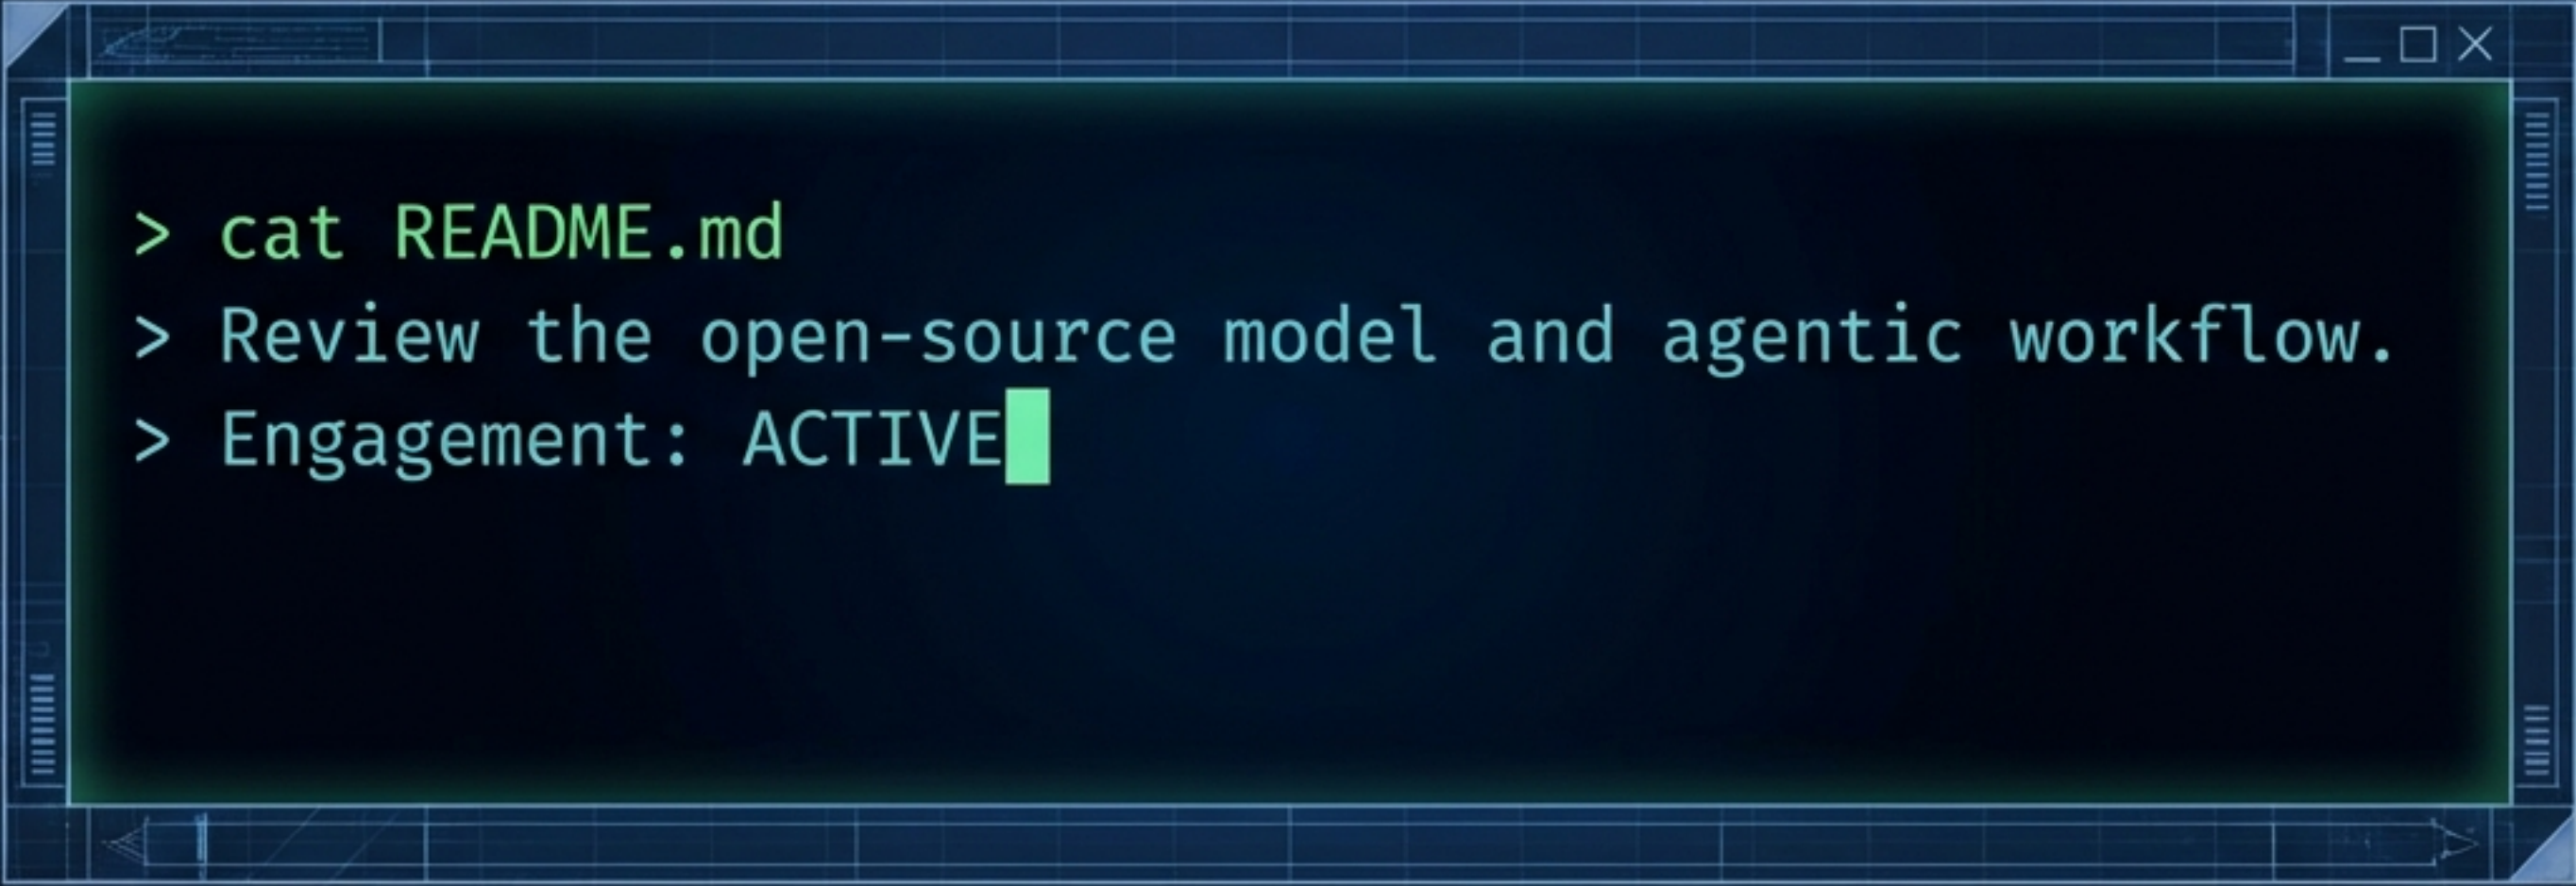

The Readme Standard

A commitment to a clear narrative on who this is for, what it contains, and how to engage.

Driven from a Customer Perspective

The Grafter repository is part of a strategic planning initiative by The Cyber Boardroom.

A terminal window with a dark blue background and a light blue border. The window contains a list of tasks, each preceded by a green greater-than sign. The tasks are: 'cat README.md', 'Review the open-source model and agentic workflow.', and 'Engagement: ACTIVE' followed by a green cursor bar. The window has standard window controls (minimize, maximize, close) in the top right corner and a vertical scrollbar on the right side.

```
> cat README.md  
> Review the open-source model and agentic workflow.  
> Engagement: ACTIVE
```
