

SGraph-AI

Brand Identity & Product Portfolio Strategy

Transitioning the 'Secure Send' codename into a unified platform ecosystem.

Version 1.0 DRAFT | Feb 2026 | Parent
Organisation: MGraph-AI | Domain: sgraph.ai

The Pivot: Establishing SGraph as the Client-Facing Brand

Executive Summary

Key Insight:
'Secure Send' was a
feature description.
'SGraph' is a product
identity.

01. The Decision

We are launching the product codenamed 'Secure Send' as SGraph Send. It will live at the domain `send.sgraph.ai`.

02. The Strategic Rationale

- **Market:** This move bypasses the saturated 'Send+Secure' namespace and eliminates trademark risks associated with generic descriptive names.
- **Architecture:** It establishes a coherent family for future products (Image, Text, Billing) atop the MGraph infrastructure.
- **Differentiation:** Positions the tool not just as a file transfer utility, but as the first entry in a privacy-first ecosystem.

The ‘Send + Secure’ Namespace is Saturated

Why we cannot use the codename commercially.

Competitor	Domain	Risk Profile
XM SendSecure	xmedius.com	Enterprise budget (OpenText). High SEO difficulty.
SendSafely	sendsafely.com	Established encryption platform. Strong LinkedIn presence.
SendSafe (MailHippo)	mailhippo.com	Registered Trademark. HIPAA compliant email.
SendSafe App	App Store	Delivery app with escrow payments.

Takeaway: Operating here invites legal friction and guarantees user confusion. We would be Product #6 in a crowded room.

Descriptive Names Limit Growth

Functional vs. Iconic Naming Strategy

The Trap: Descriptive

Functional names describe the feature but limit the scope. If the product evolves, the name becomes a liability.

- Secure Send (Limits to sending)
- CloudFileStore (Generic)
- VideoMeetingTool (Boring)

The Goal: Iconic

Iconic names allow the brand to define the meaning. They are empty vessels filled by the product experience.

- [Dropbox](#) (The word now means 'Cloud Storage')
- [Stripe](#) (The word now means 'Payments')
- [SGraph](#) (The word will mean 'Privacy Platform')

**“Secure Send describes what it does.
SGraph describes who we are.”**

SEO is a Zero-Sum Game for 'Secure Send'

Inter: Comparing the search landscape.

Uncontested Commercial Space. We own the keyword.

The SGraph Opportunity: "sgraph.ai" and "send.sgraph.ai" are completely uncontested. We do not have to fight OpenText for ranking.

The 'S' is Multi-Valent

One Letter, Multiple Meanings.

SECURE

Zero-knowledge, privacy-first.
Core to all products.

SEMANTIC

Knowledge graphs, LLM
analysis, meaning extraction.

SIMPLE

Minimalist design, no bloat,
focused utility.

SERVICE

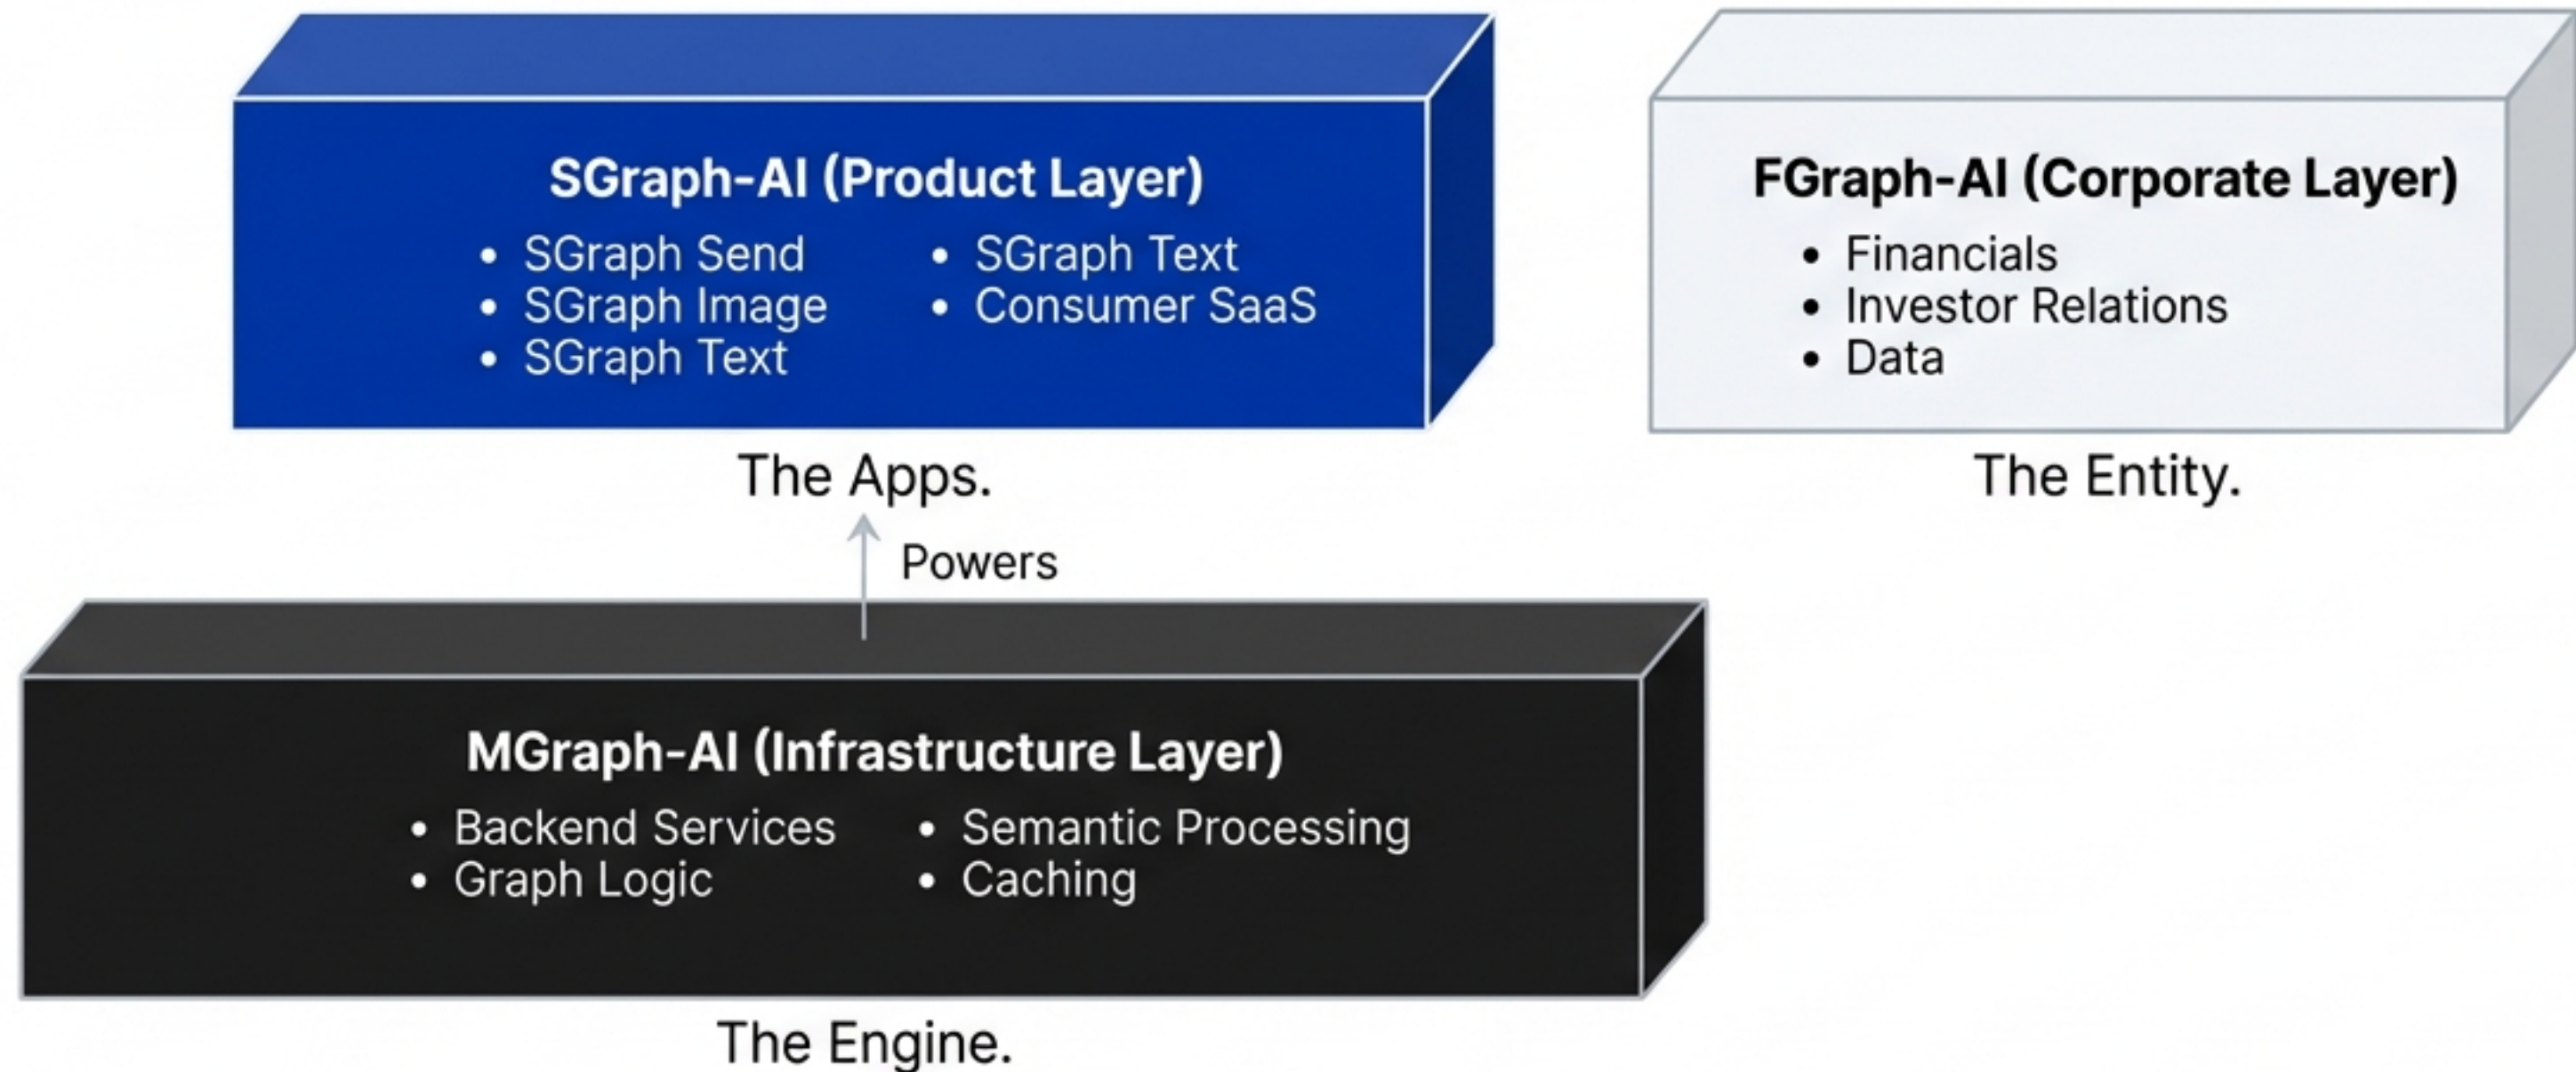

The SaaS delivery model.

The ambiguity is a feature, not a bug. 'Secure Send' is rigid. 'SGraph' is flexible enough to accommodate future verticals while maintaining brand coherence.

Connecting the Stack: MGraph vs. SGraph vs. FGraph

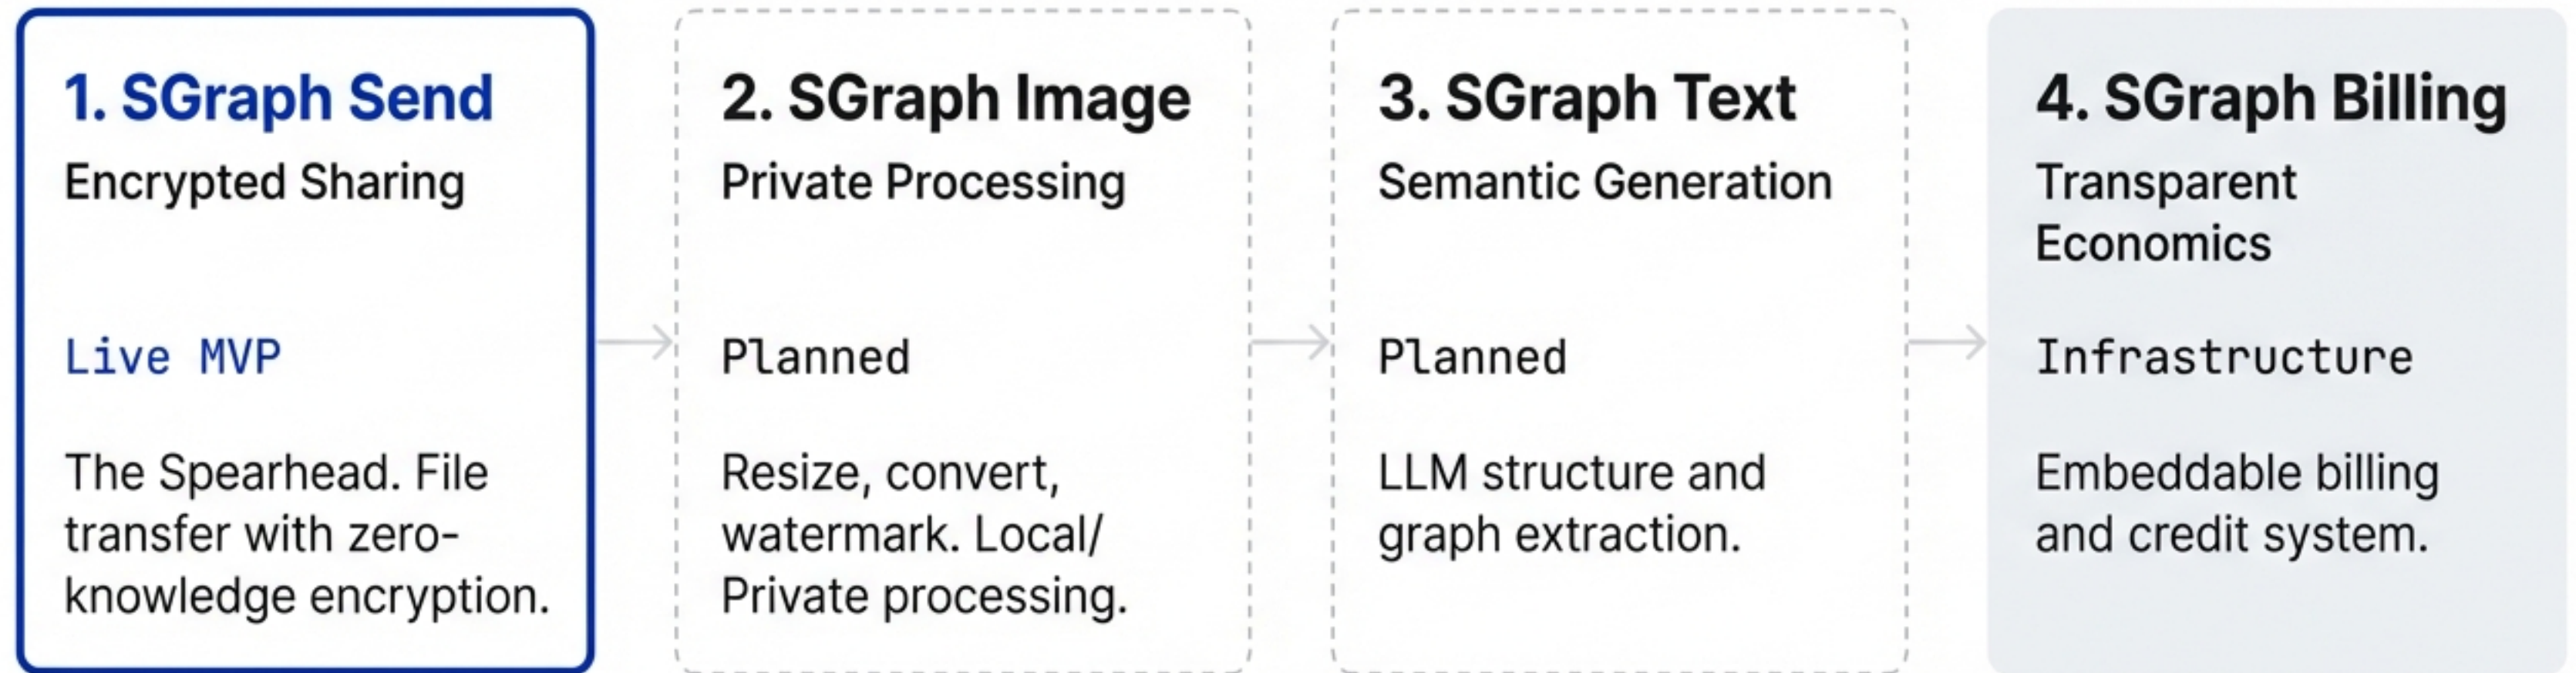

Brand Architecture mirrors Technical Architecture.

The three brands are distinct yet integrated, ensuring clarity for consumers, investors, and engineers.

A Coherent Family, Not Orphan Tools

Product Portfolio Roadmap

Synergy Strategy: Use SGraph Send to transfer; use SGraph Image to process.
Cross-selling is native to the naming convention.

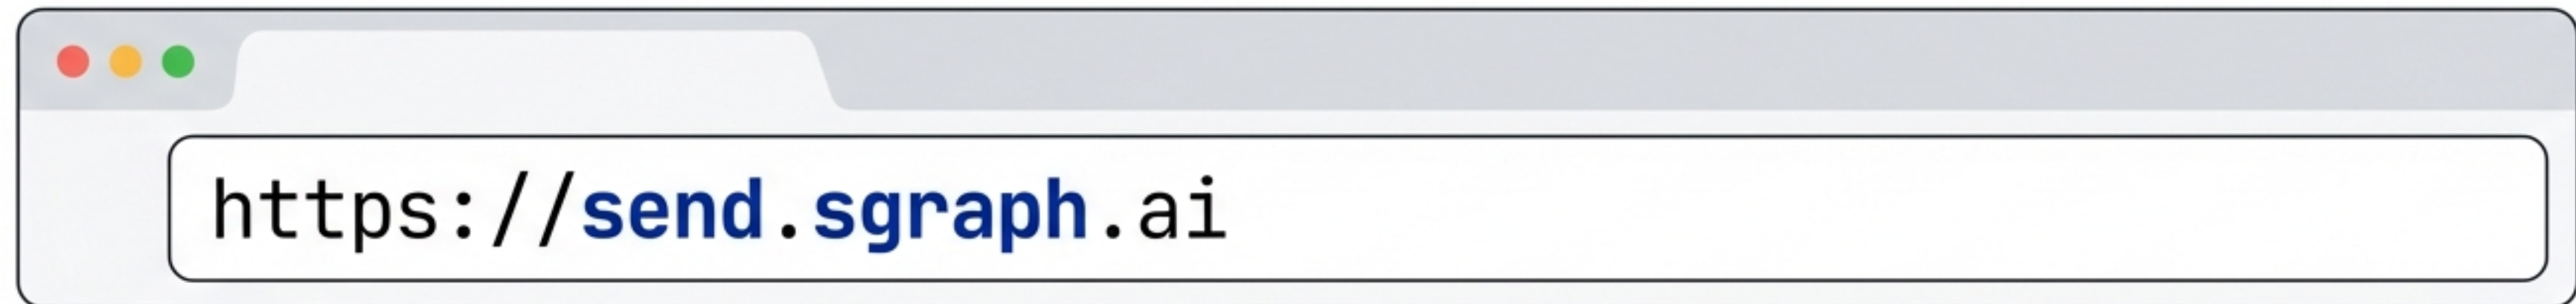

Standardised Taxonomy Across the Stack

Developer Consistency.

1			
2	Web Domain	<code>send.sgraph.ai</code>	Impact: Predictability. Users can guess the package name just by knowing the product name.
3			
4	GitHub Repo	<code>SGraph-AI__App__Send</code>	
5			
6	Docker Image	<code>sgraph/send</code>	
8			
9	PyPI Package	<code>sgraph-send</code>	
10			
11	CLI Command	<code>sgraph-send (alias: ss)</code>	

The Domain Tells a Story

Linguistic flow and user experience.

Just [**send**] it via [**sgraph.ai**] $\longrightarrow$ **Send Secure Graph AI**

Production	Dev / QA	API
<code>send.sgraph.ai</code>	<code>dev-send.sgraph.ai</code> <code>qa-send.sgraph.ai</code>	<code>send.sgraph.ai/api/v1/</code>

Strategic Asset: We own the domain. Zero acquisition cost. Zero negotiation.

The DNA of SGraph

Shared Brand Values

Zero Knowledge

We cannot see your data. Period.

Radical Transparency

Warrant canaries, open metrics.

Ephemeral

Data dies; it doesn't linger.

Deploy Anywhere

Open Source/Docker.

Simple

No bloat. Features are plugins.

Culturally Aware

Localised UX, not just US-centric.

Cost Transparent

Visible per-transfer credits.

“The brand and the product are the same thing.”

Where SGraph Wins

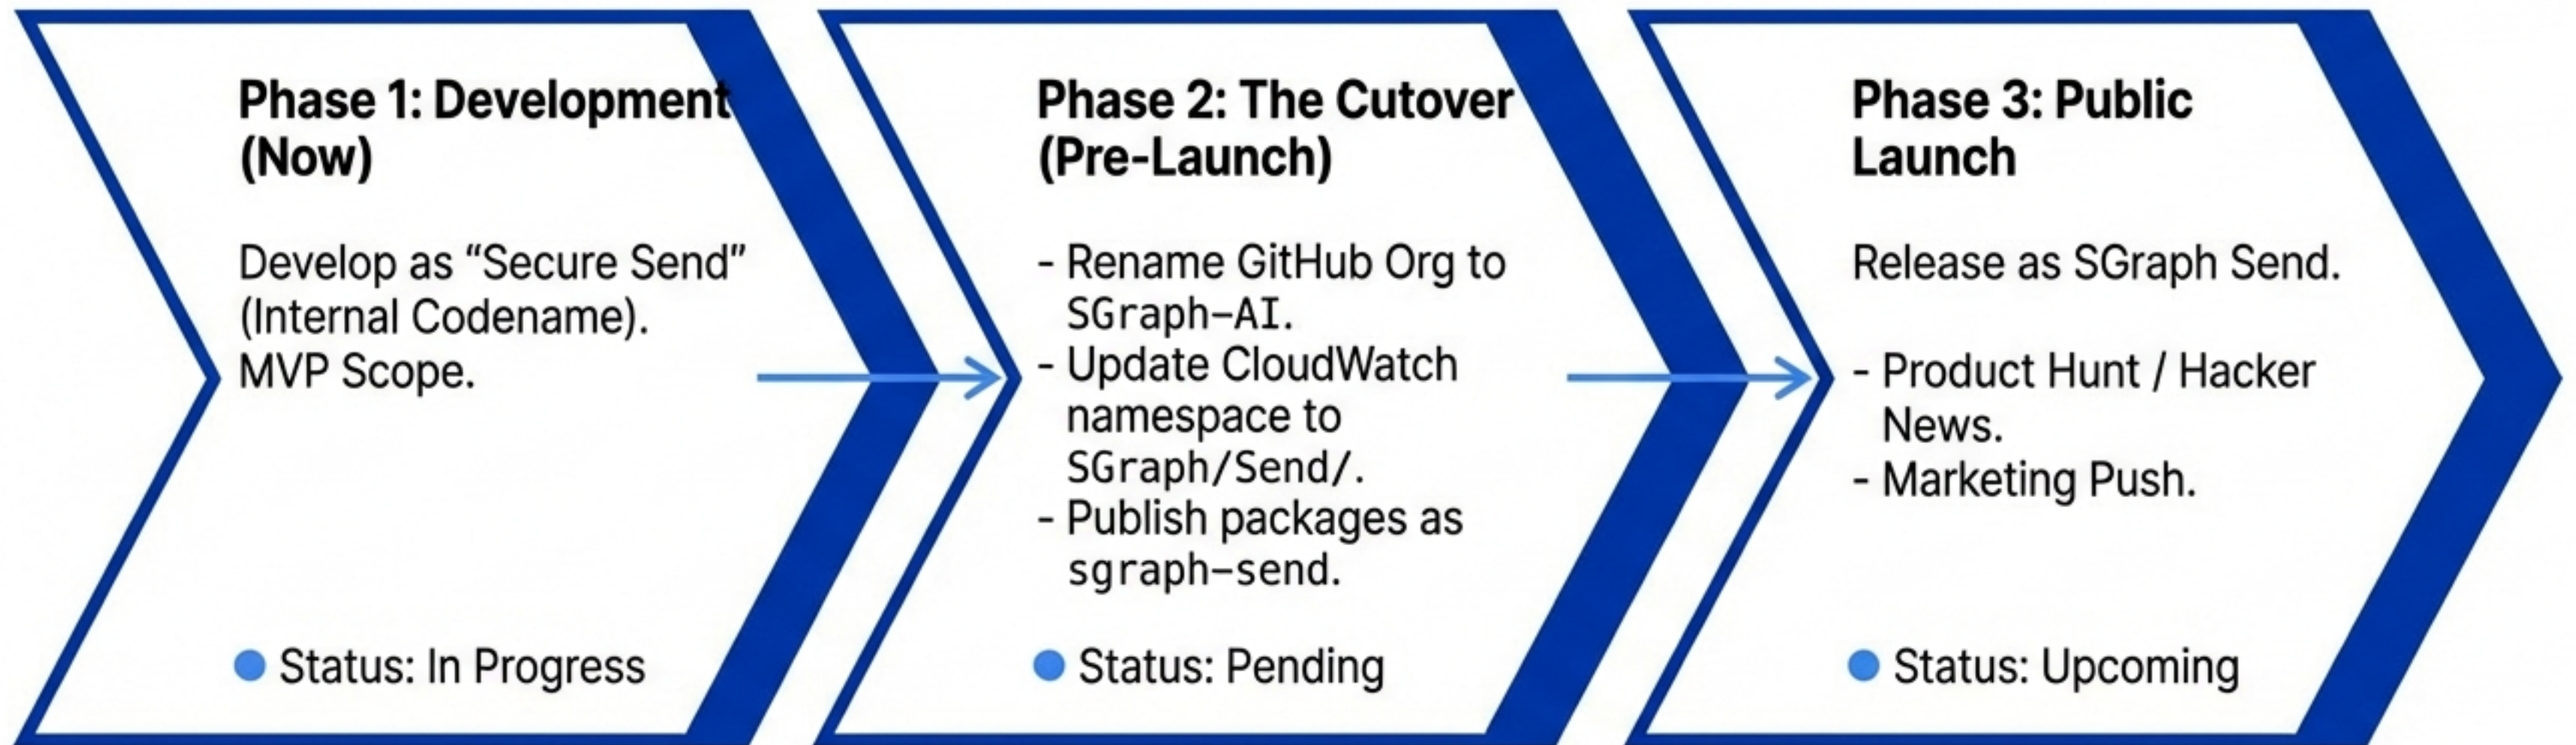

Competitive Positioning Matrix

Feature	SGraph Send	WeTransfer	SendSafely	OnionShare
Zero-Knowledge Encryption	✓	✗	✗	✓
Open Source / Self-Host	✓	✗	✗	✓
Plugin Architecture	✓	✗	✗	✗
LLM Integration	✓	✗	✗	✗
Ecosystem (Img/Text)	✓	✗	✗	✗
Cultural Adaptation	✓	✗	✗	✗

The Winning Zone:
The only Privacy Platform
with Ecosystem & AI
capabilities.

Migration Plan: From Codename to Launch Brand

Operational Timeline

No architectural changes required. Encryption and plugins remain untouched.

Winning the Privacy Community

Zero-cost, high-credibility distribution strategy

-
- **The Pitch:** We emphasize “Open Source” and “Zero Knowledge” over marketing fluff. Listings are earned through code quality.

Summary: The Path Forward

Vision & Execution.

1. “Secure Send” was what the tool did.
2. “SGraph” is who we are.

send.sgraph.ai

Action: Execute migration prior to Product Hunt launch.
