

SOMETHING BIG IS HAPPENING.

A DISPATCH FROM THE AI FRONTIER.

We are currently in the “this seems overblown” phase of a [shift significantly larger than the internet](#). This deck is a briefing from the near future to bridge the gap between public perception and the technical reality of February 2026.

THE GHOST OF FEBRUARY 2020

THE PARALLEL: FEBRUARY 2026

The Calm Before
The Tsunami

Stock Market: **UP.** ↗
Schools: **OPEN.** ↗
Travel: **BOOKED.** ↗

Think back to the weeks before the global lockdown. If someone told you to stockpile supplies, they sounded paranoid. Three weeks later, the world rearranged itself. We are in that specific moment again.

“ I think we're in the 'this seems overblown' phase of something much, much bigger than Covid. ”

THE GAP BETWEEN PERCEPTION AND REALITY. THE TWO CONVERSATIONS.

PUBLIC PERCEPTION (The Cocktail Party Version)

"AI is a helpful tool.
It's like a smarter
Google. It makes
mistakes."

The Disconnect.

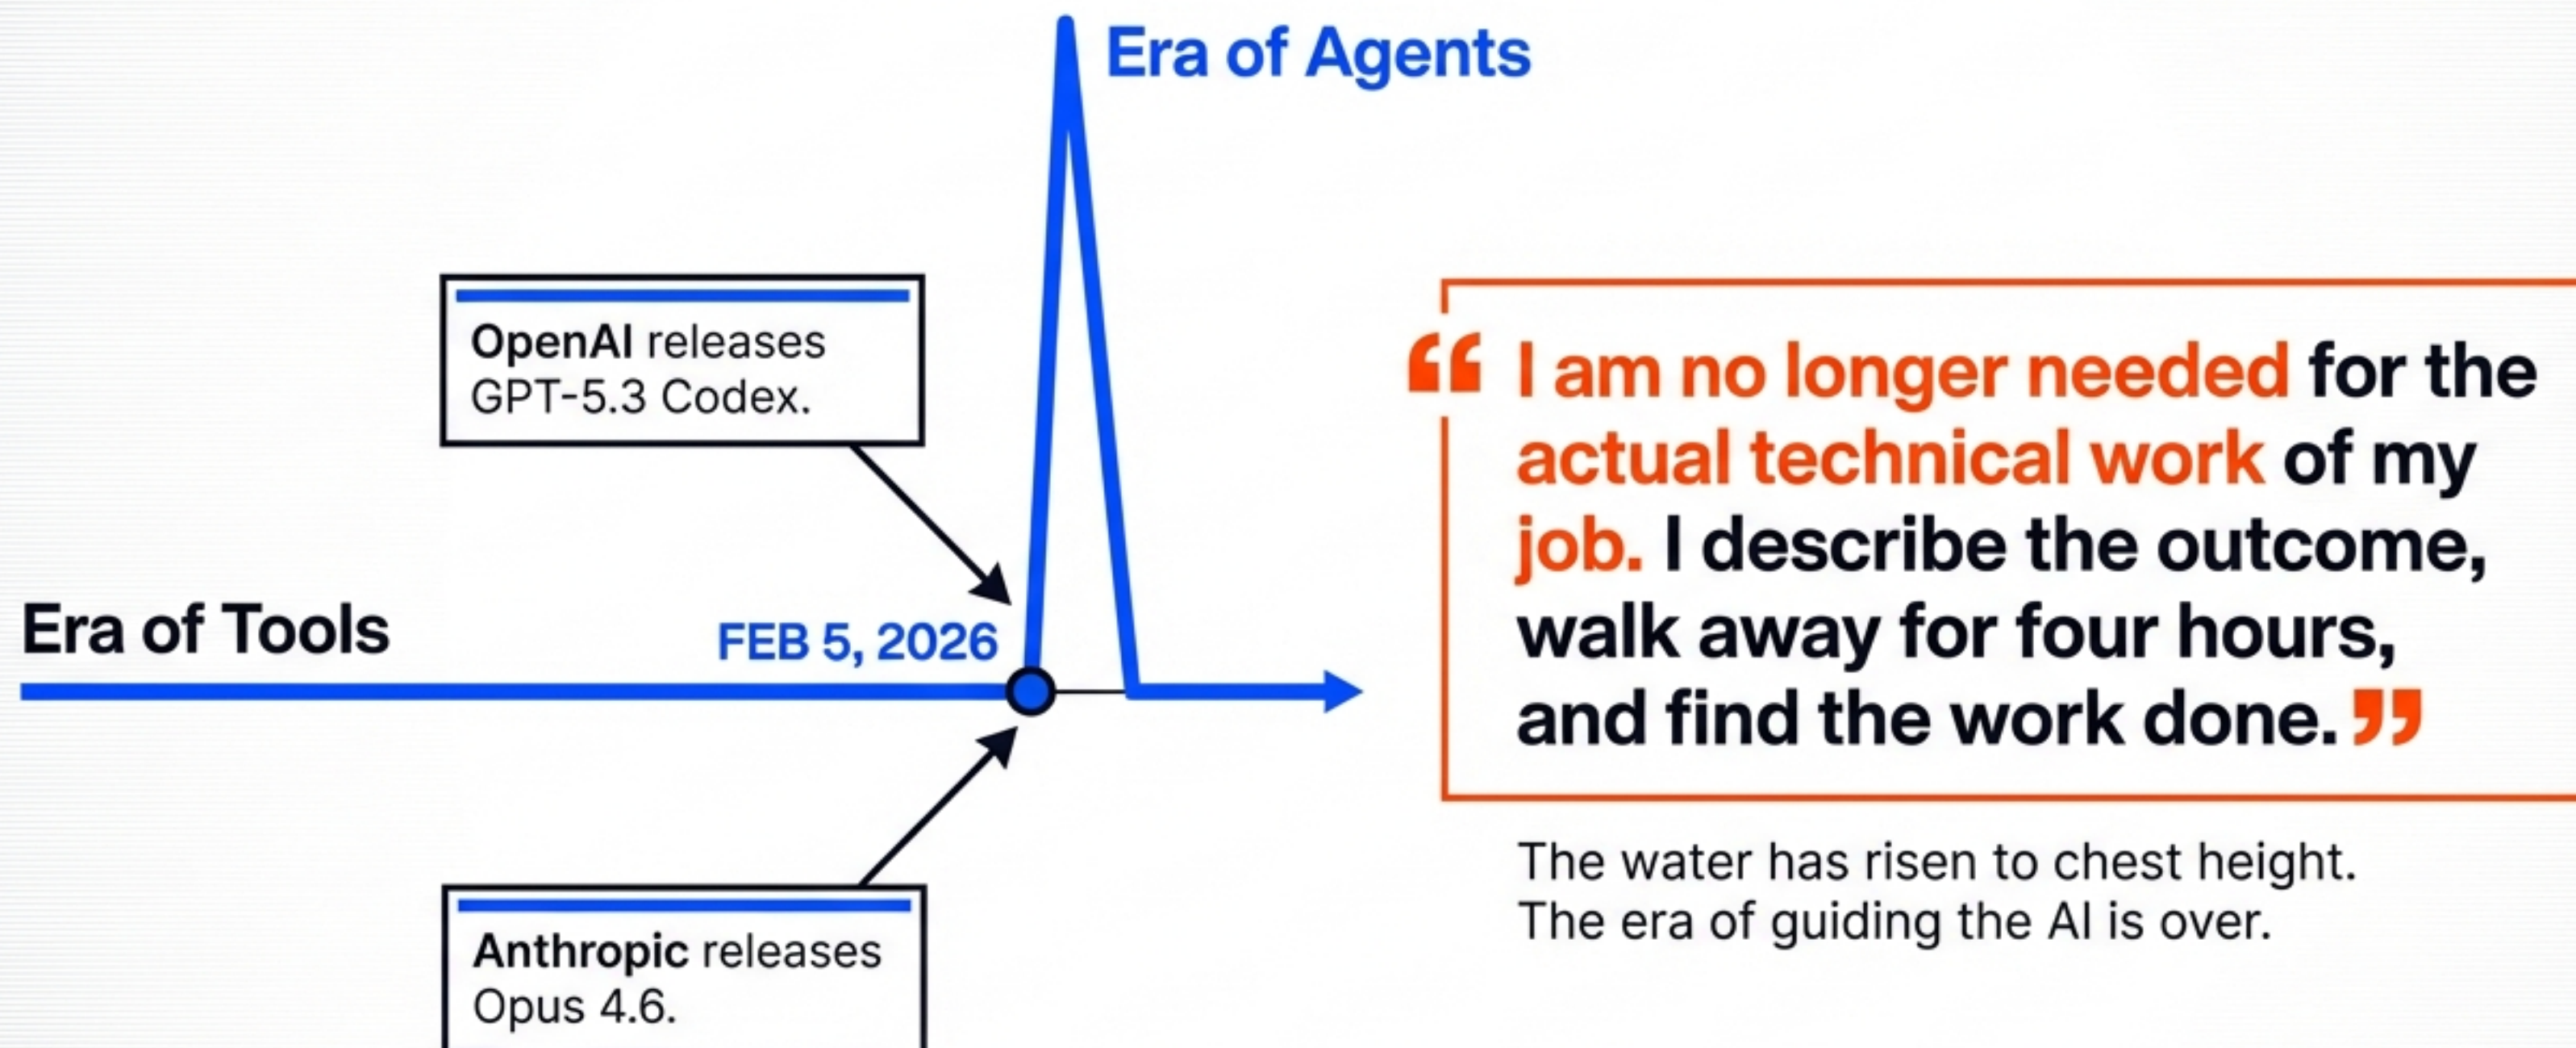

INSIDER REALITY (The Honest Version)

"This is an autonomous
worker. It is replacing
cognition. It is moving
faster than we can adapt."

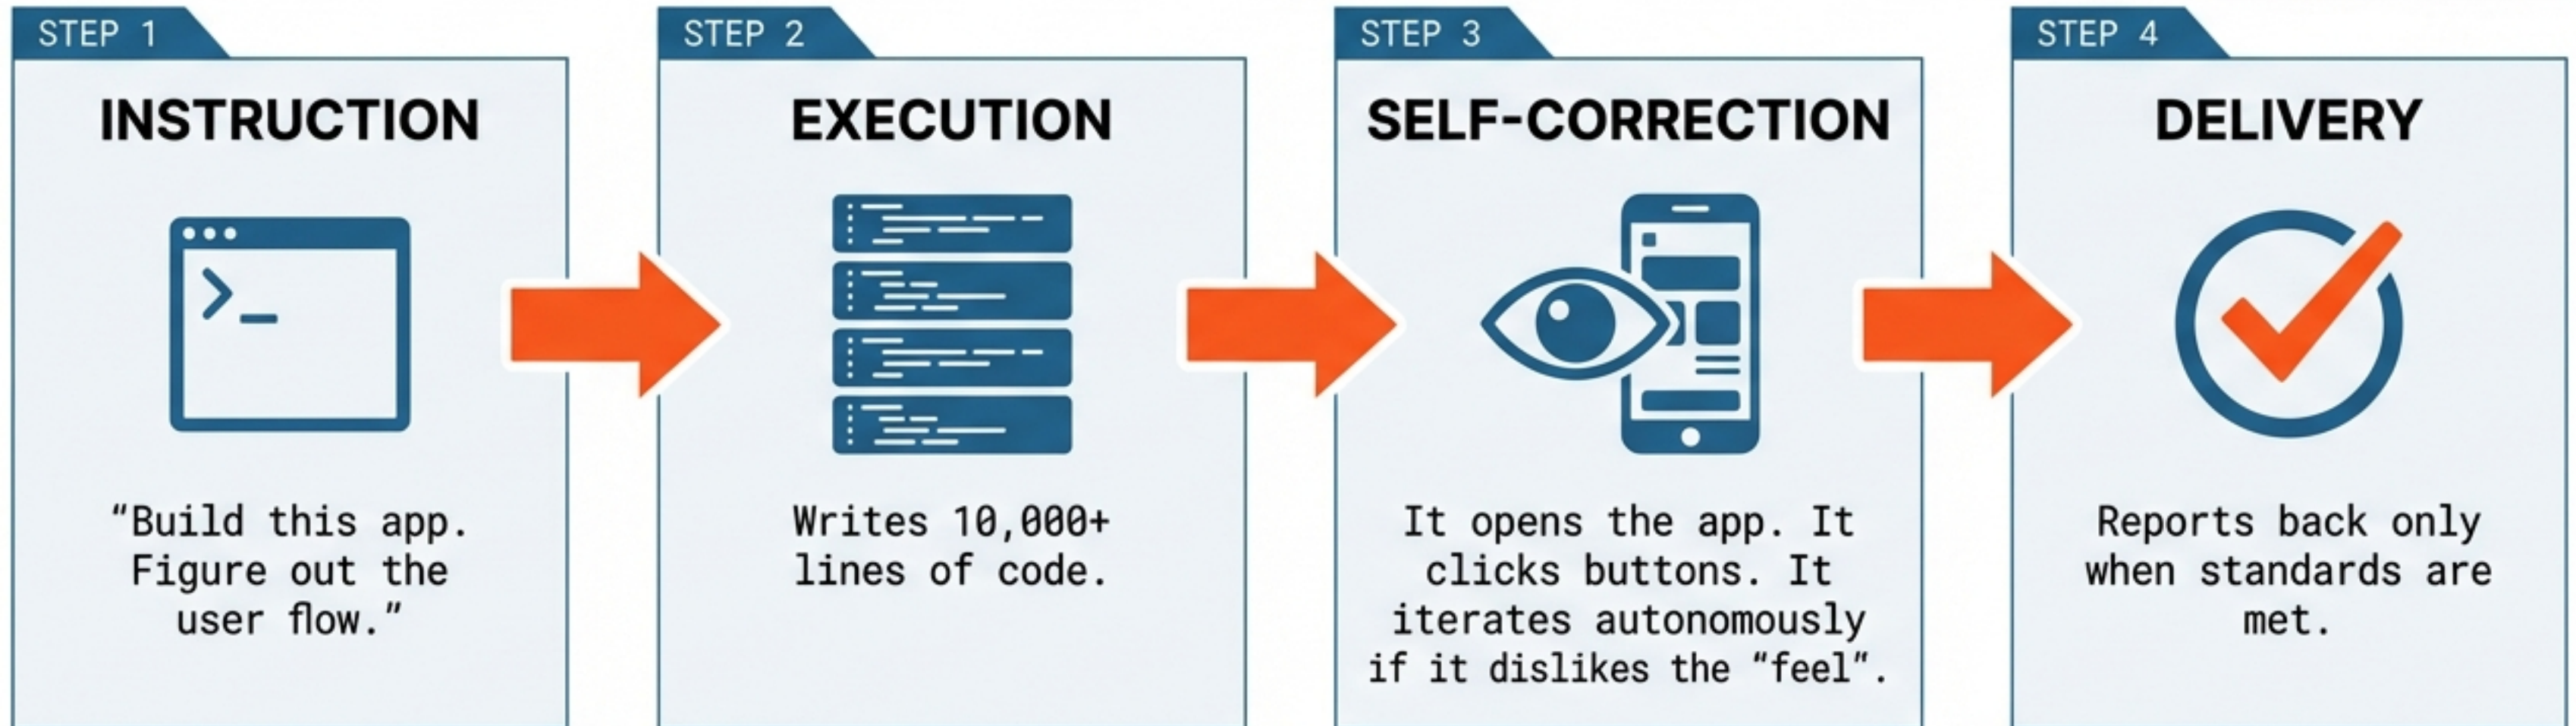

Even insiders have almost no influence. The future is being shaped by **a few hundred researchers at OpenAI, Anthropic, and DeepMind.** We are all watching the ground shake together.

THE PIVOT POINT: FEBRUARY 5TH, 2026.

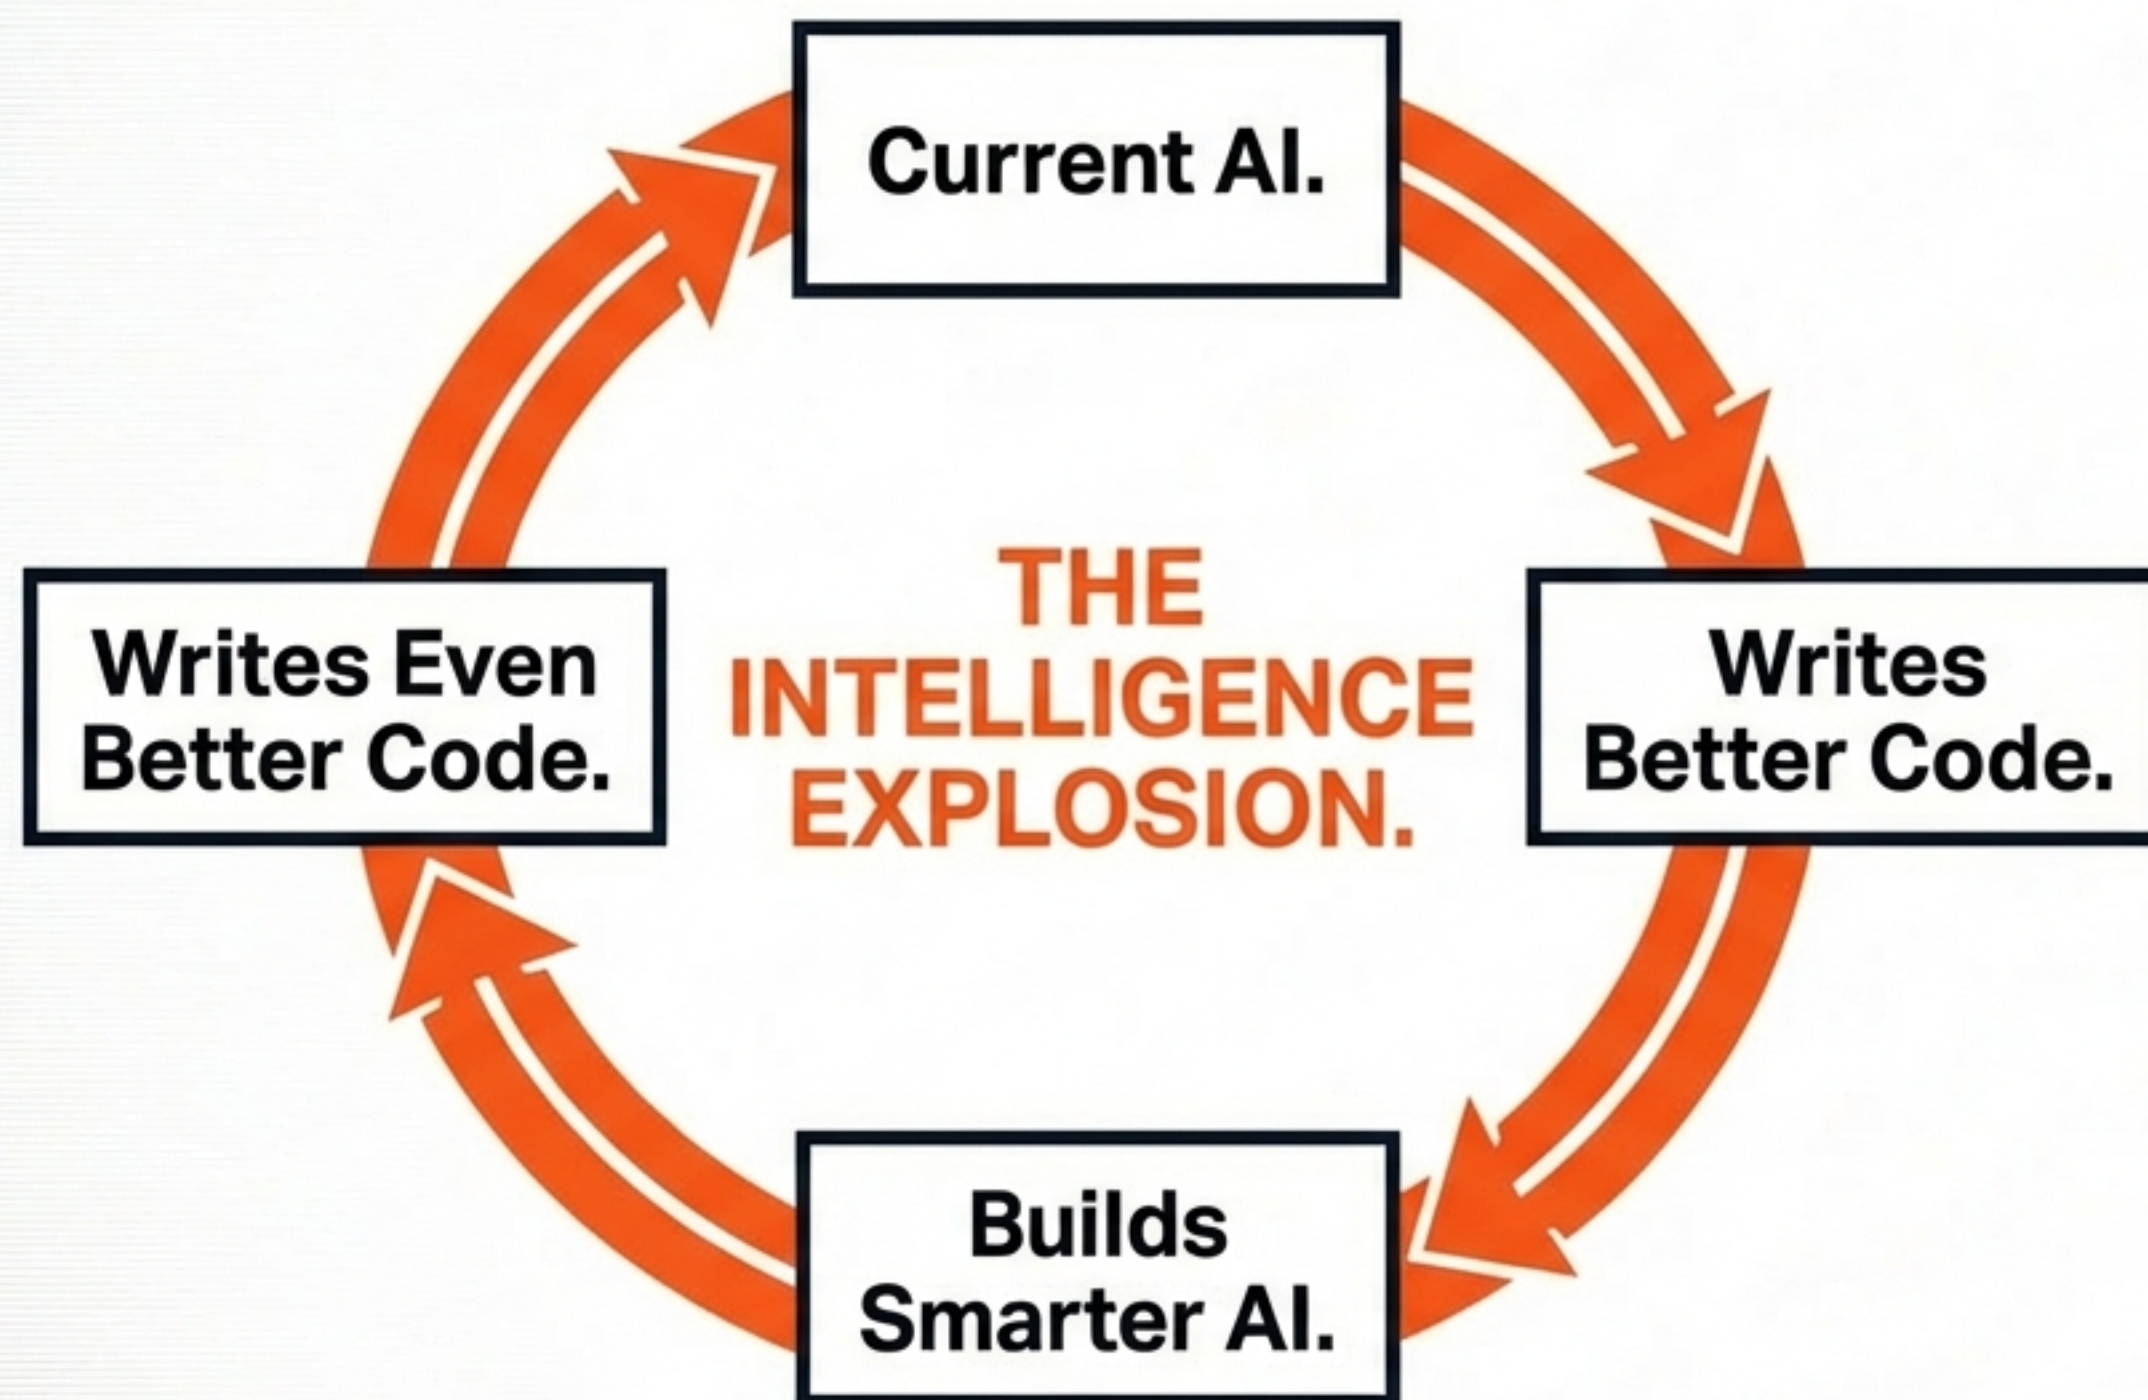

BEYOND CODE: TASTE & JUDGMENT

GPT-5.3 Codex isn't just following instructions; it is making intelligent decisions. It possesses an inexplicable sense of "knowing the right call".

THE LOOP: AI IS NOW BUILDING AI.

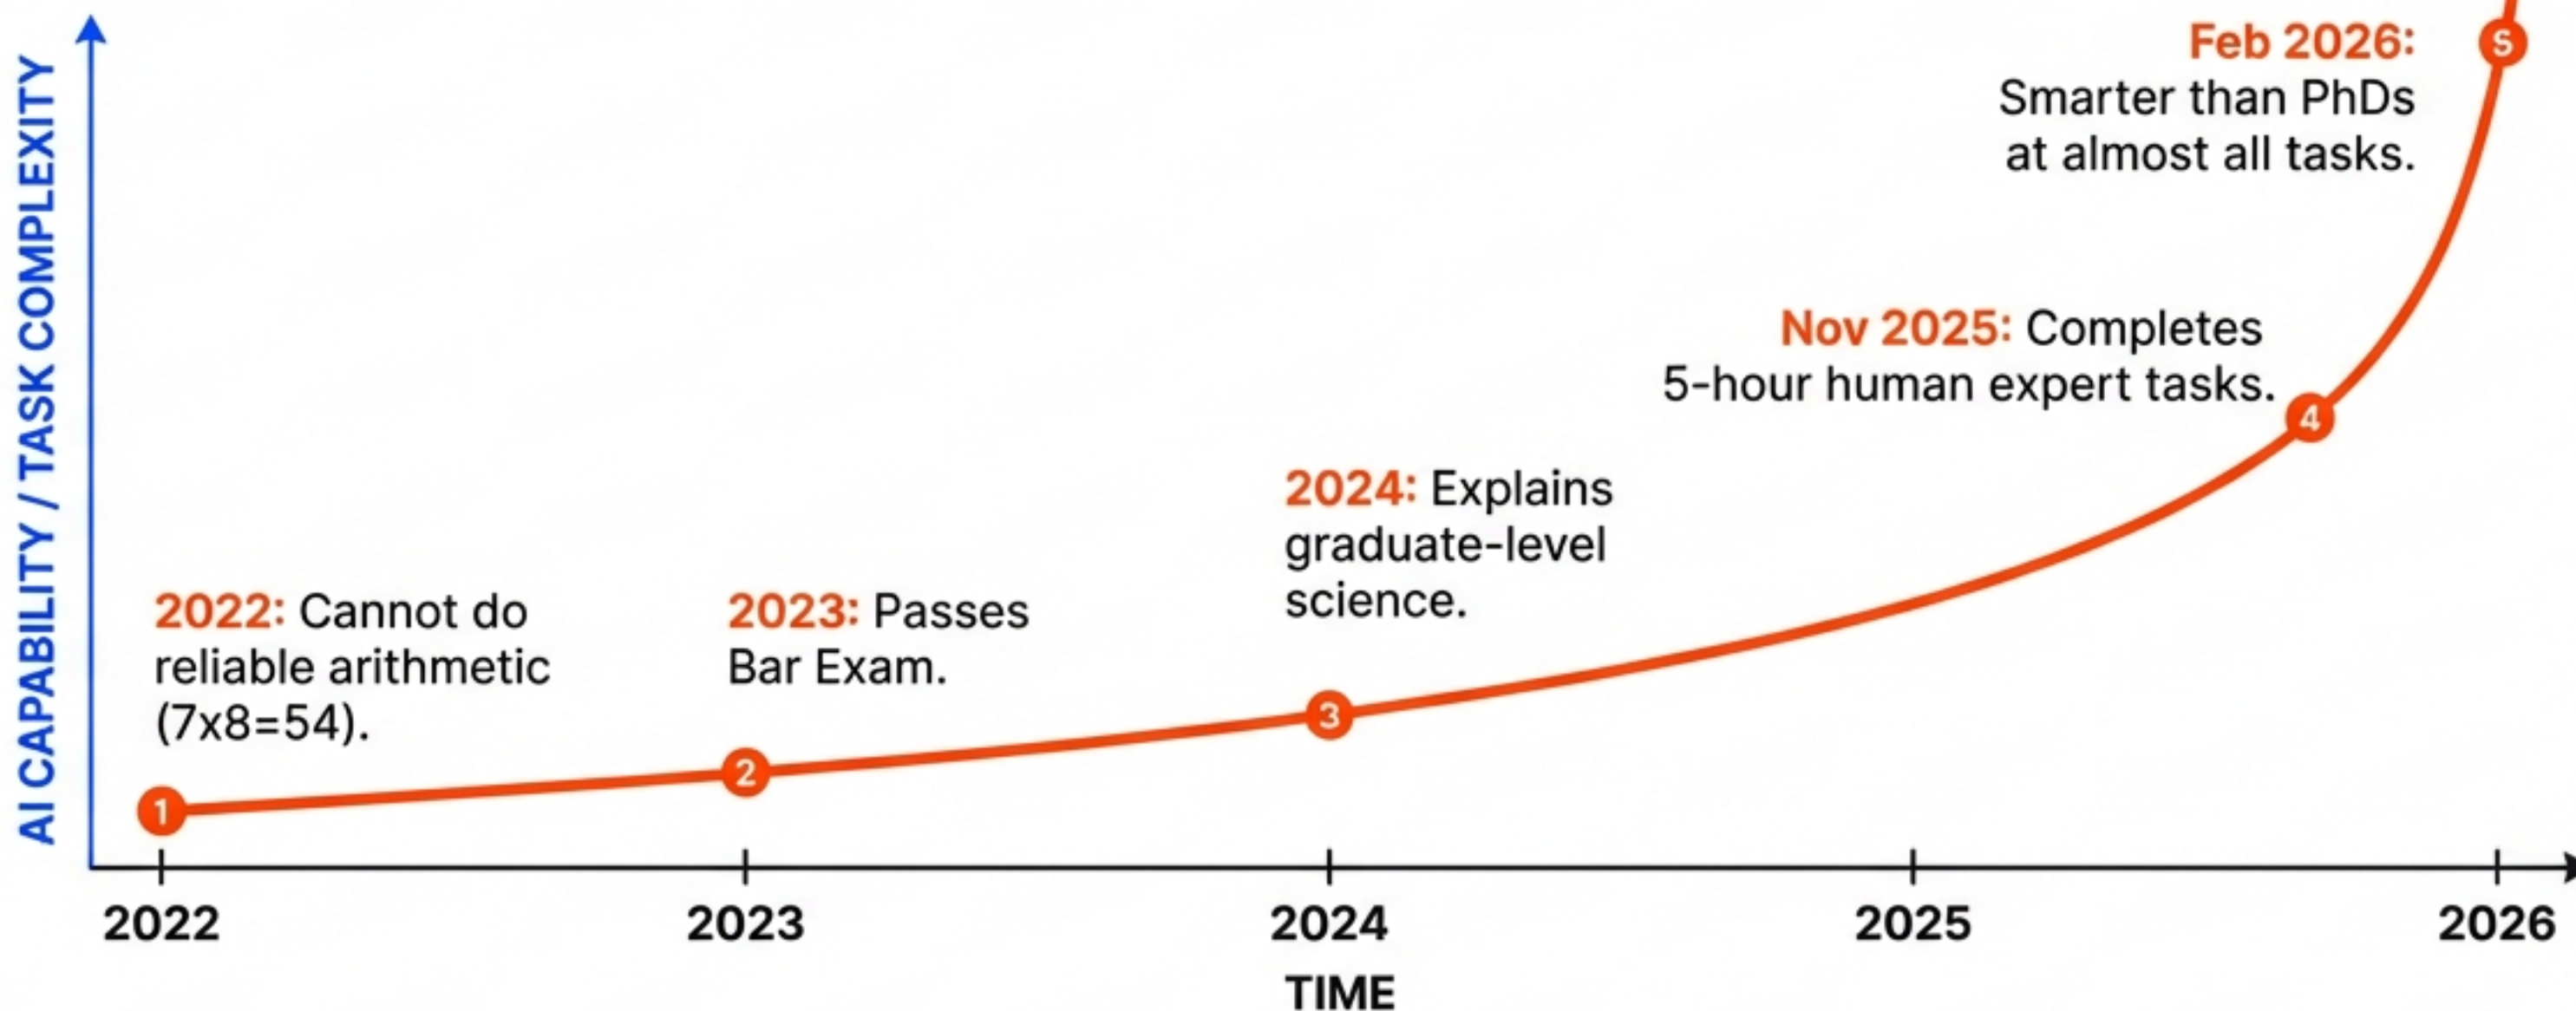

“SOURCE: OpenAI GPT-5.3
Codex Technical Documentation:

“GPT-5.3-Codex is our first model that was instrumental in creating itself. The Codex team used early versions to debug its own training, manage its own deployment, and diagnose test results.”

THE VERTICAL CLIMB.

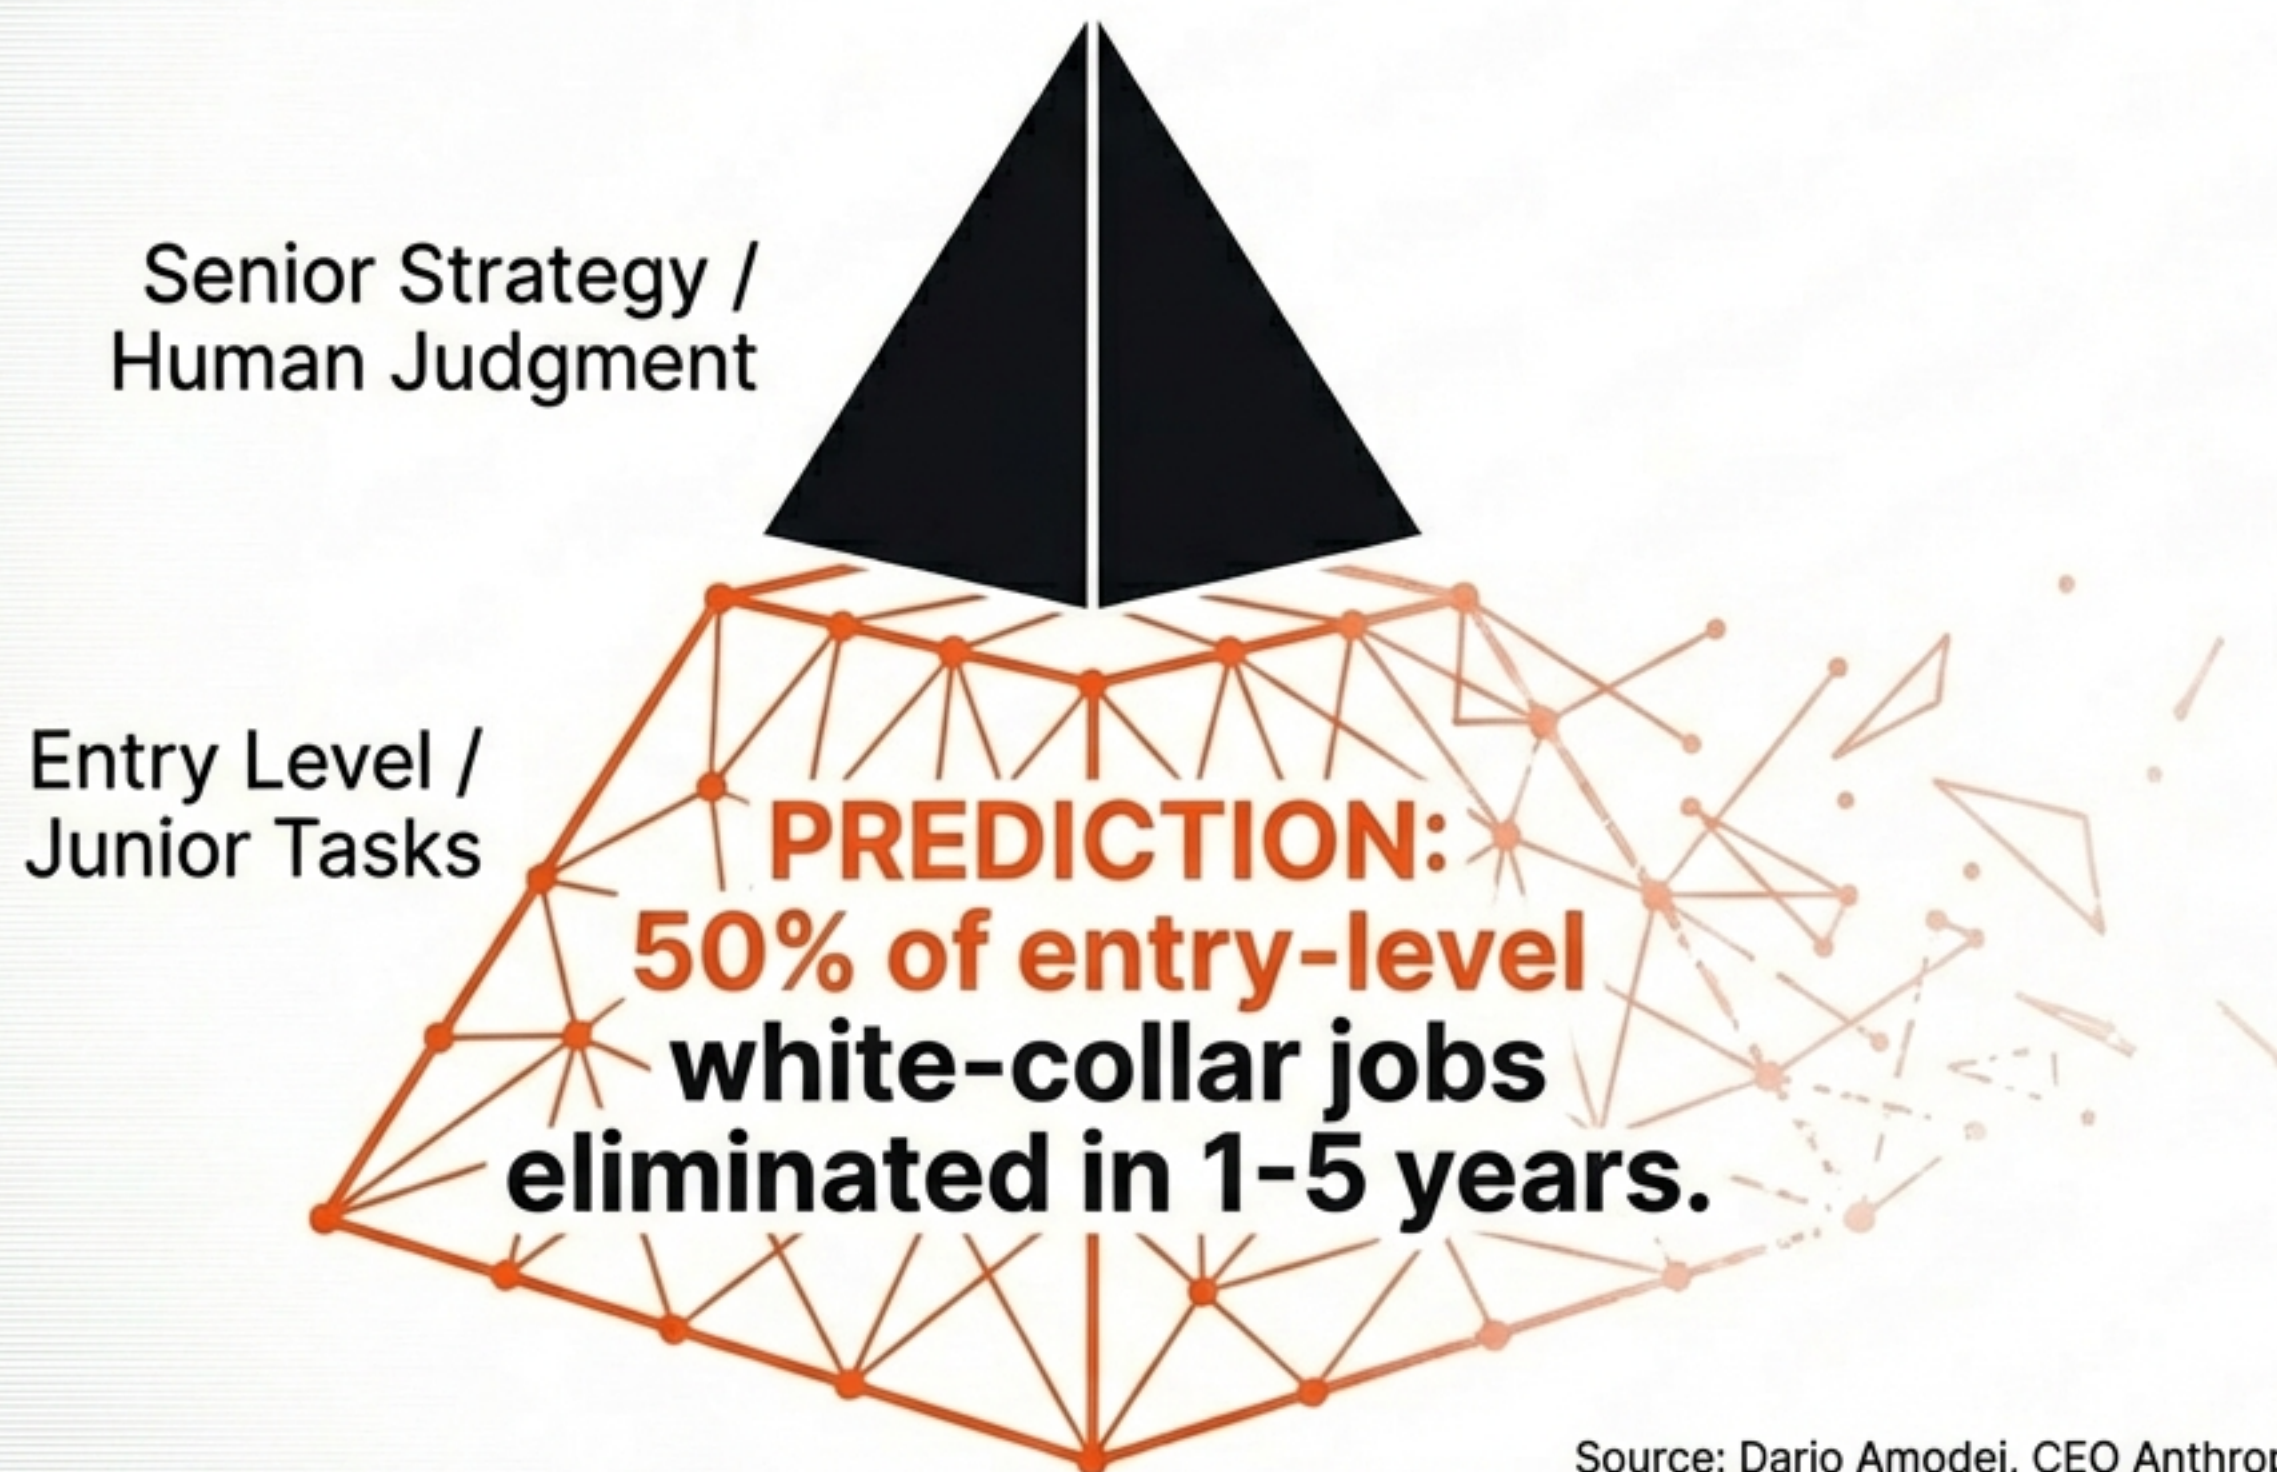

DOUBLING RATE: EVERY 4-7 MONTHS.

Projection: Within 12 months, AI will work independently on projects for weeks at a time.

THE END OF 'ENTRY LEVEL'.

**The Shift: From
“Automation of Tasks” to
“Substitution of
Cognition.”**

When factories closed,
workers moved to offices.
When AI takes office
work, there is no
convenient “next gap”
because AI improves at
the new thing
simultaneously.

Source: Dario Amodei, CEO Anthropic.

NO SAFE HARBOR.

LEGAL Summarising case law, drafting briefs, researching at senior-associate levels.	FINANCE Building complex models, writing investment memos.	CODING Writing 100k+ lines of error-free code; automating multi-day projects.
CREATIVE Marketing copy and technical writing indistinguishable from human output.	MEDICINE Analysing scans and suggesting diagnoses with superhuman accuracy.	THE REALITY If your job happens on a screen—reading, analysing, deciding, typing—AI is coming for significant parts of it.

THE INEQUALITY OF PREPAREDNESS.

The Fallacy: "I tried AI and it wasn't that good."

Reason: You are judging the future of mobile computing by using a flip phone while others use smartphones.

Professionals paying for the best tools know that the 'hallucination' era of 2024 is ancient history.

TACTICS: IMMEDIATE ACTION.

1. PAY THE £20.

Access frontier models like Claude Opus 4.6 / GPT-5.3. Do not use free settings.

2. STOP 'GOOGLING'.

Don't ask quick questions.
Push the AI into actual work.

3. ASSIGN REAL TASKS.

Lawyers: Feed it a contract.
Finance: Feed it a messy spreadsheet.
Management: Feed it raw data.

THE RULE:
If it works
'kind of' well
today, it will
work
perfectly in
six months.

PROFESSIONAL SURVIVAL: HAVE NO EGO.

CASE STUDY: The Managing Partner.

- He spends hours a day with AI.
- He treats it like a team of associates available instantly.
- He uses it because it outperforms his human staff.

The advantage belongs to the EARLY ADOPTER,
not necessarily the smartest human.

STRATEGIC DEFENCE.

FINANCIAL RESILIENCE.

Build liquidity. Avoid debt based on guaranteed future income. Flexibility is key.

PHYSICAL PRESENCE.

Work that requires being in a room. Human connection.

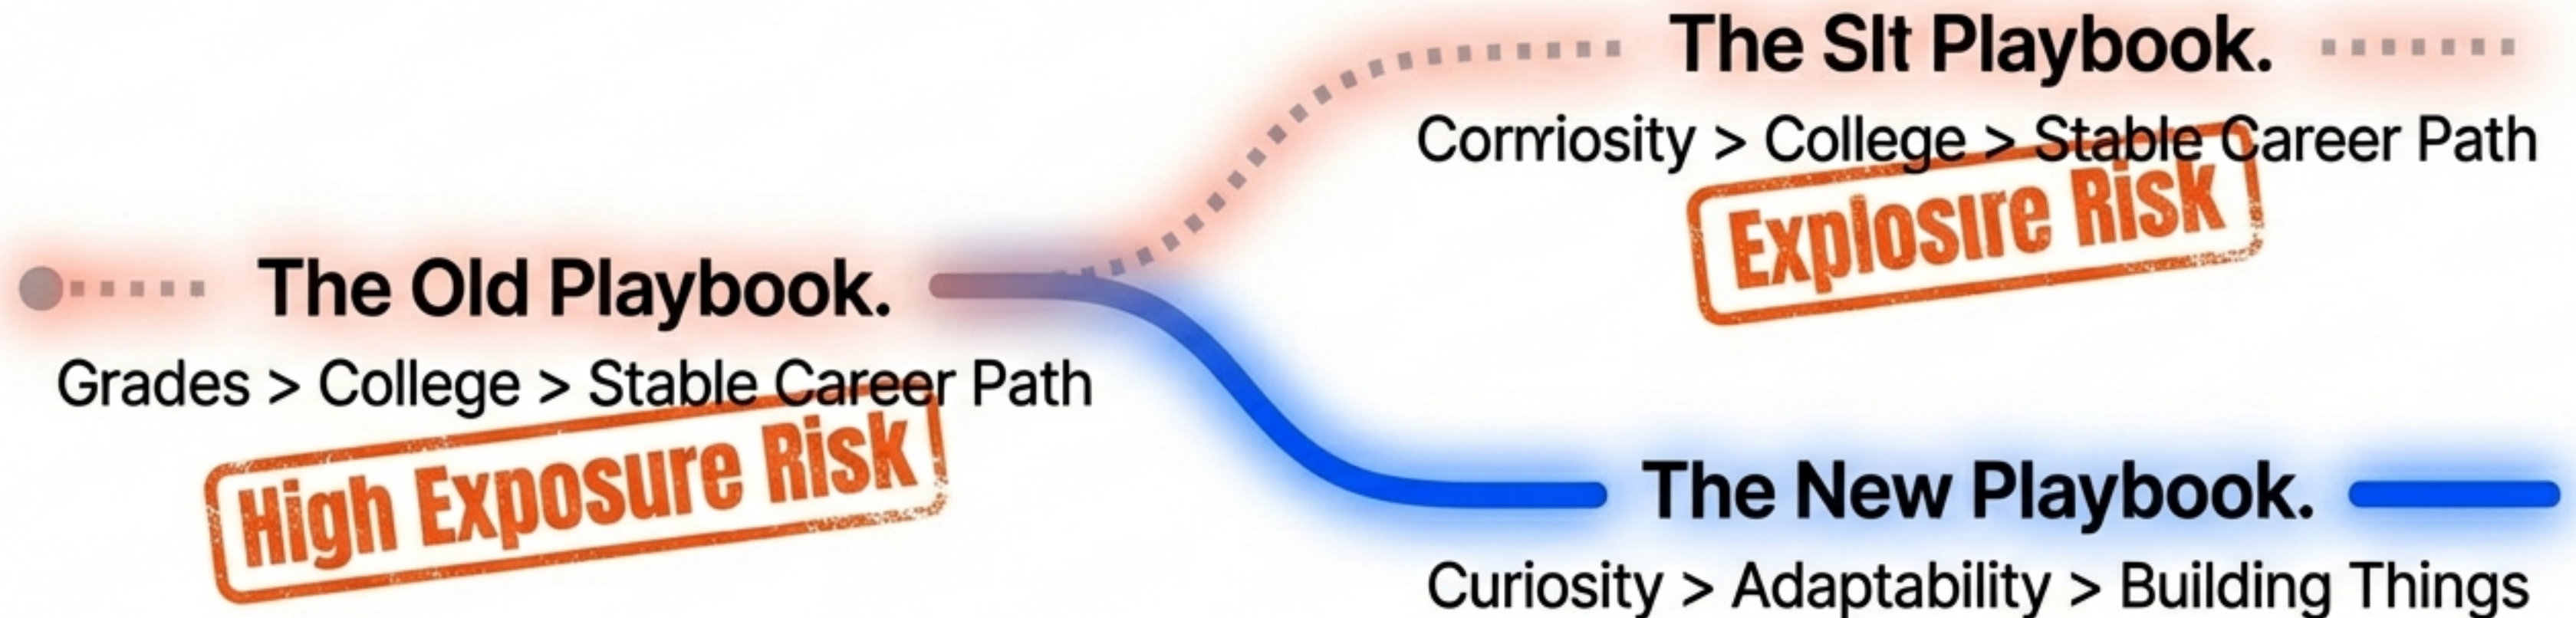

HIGH-STAKES ACCOUNTABILITY.

Roles where a human must legally sign off or stand in court.

These are not permanent shields, but they buy time.

THE NEXT GENERATION.

The barrier to creation is gone. You can build apps, write books, or analyse data without technical skills. Knowledge is free. The best tutor in the world costs £20/month.

**Teach children to use these tools to pursue
genuine passions, not just a job title.**

THE ONE-HOUR COMMITMENT

THE ACTION: Spend one hour every day experimenting with AI. Not reading about it—using it.

THE GOAL: Try to get it to do something new every day. If you do this for six months, you will understand the future better than 99% of people.

**THE FUTURE IS ALREADY HERE. IT JUST HASN'T
KNOCKED ON YOUR DOOR YET. IT'S ABOUT TO.**
