

STRATEGIC REDESIGN BRIEF

# sgraph.ai: Showcasing SG/Send v0.3.0

Your files, your keys, your privacy.

Date: 27 March 2026 | Version: v0.16.62 | Status: READY FOR WORK

# The Product Has Outgrown the Pitch

Encrypt a file and share a link.

SG/Send is shipping to production ([main.send.sgraph.ai](https://main.send.sgraph.ai)). The current website describes a simple link-sharing tool. The v0.3.0 reality is vastly different.

## The New Reality

Zero-knowledge encrypted file sharing combined with rich, inline content viewing.

## The Mandate

The website must catch up. Every feature showcased must be real, working, and verified. No aspirational claims.

# Don't Just Download. Experience.

## Industry Standard (WeTransfer, Dropbox)

### Upload -> Download

Upload -> Download. The recipient gets an opaque blob and has to figure out what to do with it offline.

## SG/Send (v0.3.0)

### Upload -> Experience

Upload -> Experience. Markdown renders. PDFs open. Images display. JSON shows structure. All in the browser, all zero-knowledge.

# Who Visits sgraph.ai?

## Audience A: The Recipient (Highest Volume)

**Who:** Received a link. Doesn't know the brand.

**Goal:** Trust the site, decrypt, become a sender.

**Entry:** send.sgraph.ai -> clicks header to sgraph.ai

## Audience B: The Evaluator (CISO/IT)

**Who:** Assessing security tools.

**Goal:** Verify AES-256-GCM, GDPR, zero-tracking.

**Entry:** Direct to sgraph.ai security page

## Audience C: The Investor / Partner

**Who:** Evaluating SGraph as a company.

**Goal:** Traction, differentiation, platform vision.

**Entry:** Direct to homepage/about

## Audience D: The Power User

**Who:** Existing SG/Send user.

**Goal:** Advanced features, SgPrint details, version history.

**Entry:** Direct to /features

# Verifiable Zero-Knowledge (Client-Side AES-256-GCM)

## Key Insight

The server never sees the data, the filenames, or the decryption key.

## Messaging Directives

Your files are encrypted in your browser before upload.  
Zero cookies. Zero tracking.

## The Proof

Highlight the Web Crypto API. No external JavaScript dependencies required, reducing supply chain risk.

# The Transparency Panel

**Concept:** Do not just claim zero-knowledge; mathematically prove it to the user immediately after upload.

**Callout:** This panel is a unique differentiator in the market. It must be a featured, interactive UI component on the new sgraph.ai homepage.

# Human-Friendly Cryptography

**The Feature:** Share a token, not a link. Derives both transfer ID and key using SHA-256 & PBKDF2.

Card A

#88bff7cba6a2/NLEWAl4Q8iGCn  
...R73IFIkNTkmw1pAfi1lr2AQImB  
FFaa6Aa5vI6bf7uIWa11N0AcPn...

Raw Hash (The Burden)

Card B

royal-stamp-1474

Human-Readable Token (The Joy)

## The Scale:

320 words x 320 words x 10,000 =  
~1 billion possible combinations.

## Design Directive:

Feature this heavily. Visualise someone speaking a token over a phone call versus struggling to copy-paste a URL hash.

# Rich Content Viewing (The Gallery)

✓ Decrypted

## Feature:

Type-aware thumbnails and inline rendering.

## Capabilities:

Images display at full resolution in an interactive lightbox. Markdown renders with full typography. PDFs open in a built-in zero-knowledge viewer.

## Website Goal:

This is our most visual feature. It must serve as the hero graphic on the homepage. Show, don't tell.

PDF

### Professional and improvement

### Professional improvement

Professional improvement and modern technology

### Motivation

JPG

MD

## Markdown document

The beautifully formatted document use as wise to score document in markdown cool more.

### Headings

- Solid data and etonations
- Marked end moticals
- Beautifully for matd document.

### Code blocks

You can add code decryption of the material: wensar in the annex:

```
4-see code "1/5.4.5"
see code "1/5.4.5"

func scelerent() {
  effecte "scelerent" {
    return "1/5.4.5"
  }
  effecte {
    return "1/5.4.5"
  }
}
1763
100
```

### Description

The **markdown** is mactels formatahro represent is the following document overenents:

- Perhendons
- Keelerienis
- Uecastros
- Storisation choiclips.

# A File Explorer Inside the Browser

**The UX:** Drop a folder in; the recipient receives a full, navigable tree.

## Features to Highlight

- Tabbed multi-pane layout (mirroring VS Code or macOS Finder).
- Drag to resize panes; open files side-by-side.
- Inline rendering of code, text, images, and JSON.

## Messaging Pipeline

See everything exactly as the sender organised it—without downloading a single thing.

# SgPrint: Markdown to Professional PDF

The Feature: One-click print-ready formatting for plain text and markdown files.

Before

| Table   | Table 2 | Item 3 |
|---------|---------|--------|
| Table 1 | Text    | Item 1 |
| Table 2 | Text    | Item 2 |

Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua. Ut enim ad minim veniam, quis nostrud exercitation.

**Visual Details to Showcase:** Logo header, auto-generated metadata, branded table borders, and coloured code block syntax.

**Messaging Pipeline:** From encrypted text to a branded A4 document in one click.

# Synthesis: The Security vs. Friction Spectrum

**Concept:** Giving the sender granular control over their security posture.

# The Website Architecture Blueprint

## Crucial Flow

Two distinct sites functioning as one seamless brand.

# Design Direction & Brand Rules

**Aesthetics:** Security Without Austerity. Dark theme with teal accents.  
Warm and modern, avoiding cold/corporate tropes.

## Rule 1: Show, Don't Describe

Use curated, annotated, real product screenshots.  
Zero generic stock art.

## Rule 2: Mobile-First Validation

Recipients heavily rely on phones. The website must mirror the Web Component responsiveness of the native product.

## Rule 3: Tech Stack

Static, fast, no JS frameworks. Deployed via S3/CloudFront.  
Zero analytics cookies.

### DM Sans

Fira Code

Thin Regular Bold

Aa, Bb, Cc

**Aa, Bb, Cc**

# The Conversion Engine & Constraints

**The Golden Rule:** Every recipient is a potential sender. Download pages must evangelise the product.

Reality Check (Do NOT Claim):

## The Constraints

**[ERR]** No one-time/view-limited secrets (Planned).

**[ERR]** No full multi-language localization (Framework exists, strings don't).

**[ERR]** No user accounts/settings pages (Planned).

**[ERR]** No external API access (Internal only).

**Directive:** Only pitch what we can mathematically and visually prove today.

# Action Plan: Agent Directives

Sherpa Agent  
(Content)

- Draft Homepage hero copy.
- Write accessible Security documentation.
- Prep v0.3.0 launch blog.

Ambassador Agent  
(Comms)

- Script the 30-sec and 2-min demo flows.
- Refine Recipient-to-Sender download page messaging.
- Update email templates.

Designer Agent  
(Visuals)

- Curate and annotate real product screenshots.
- Design ZK architecture flow diagram.
- Build mobile-responsive page layouts.

Dev/Architect Agents  
(Tech)

- Provision S3/CloudFront infrastructure for the static site.
- Implement i18n framework.
- Ensure zero-cookie policy implementation.
