

Build Your Company on SG/Send

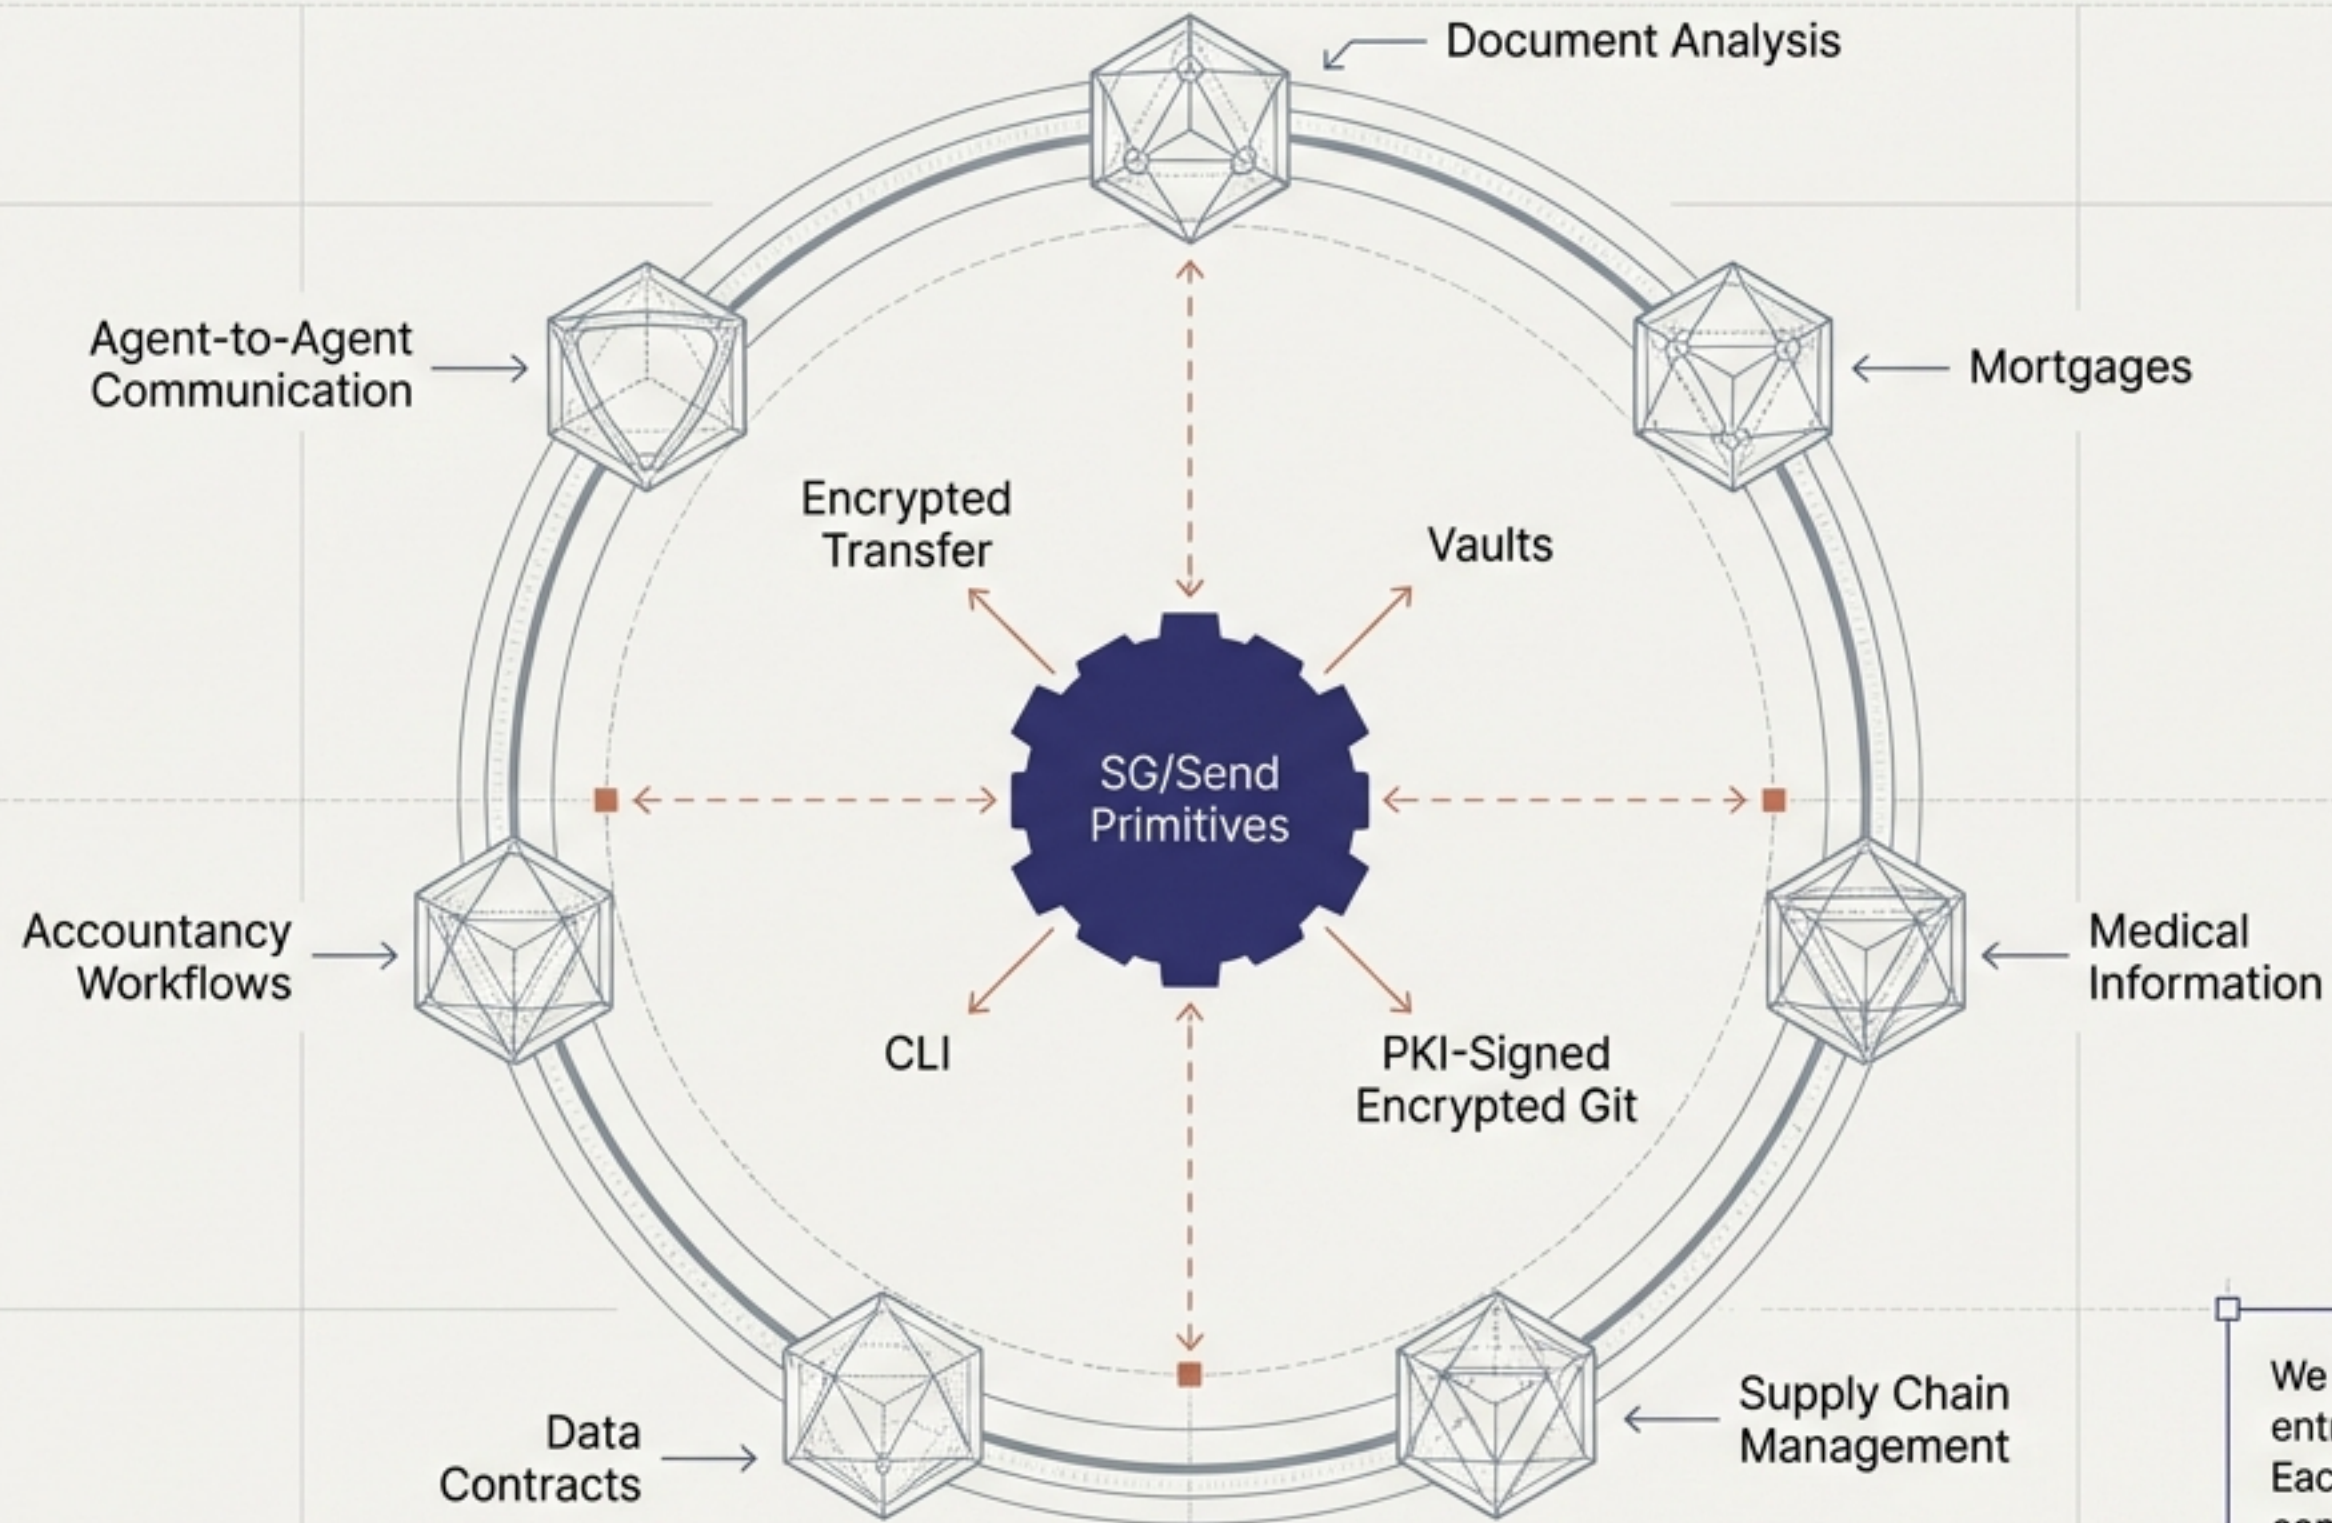

Ecosystem Strategy & The Founder Pack

Strategy Brief v0.16.10 | 16 Mar 2026

Released under CC BY 4.0

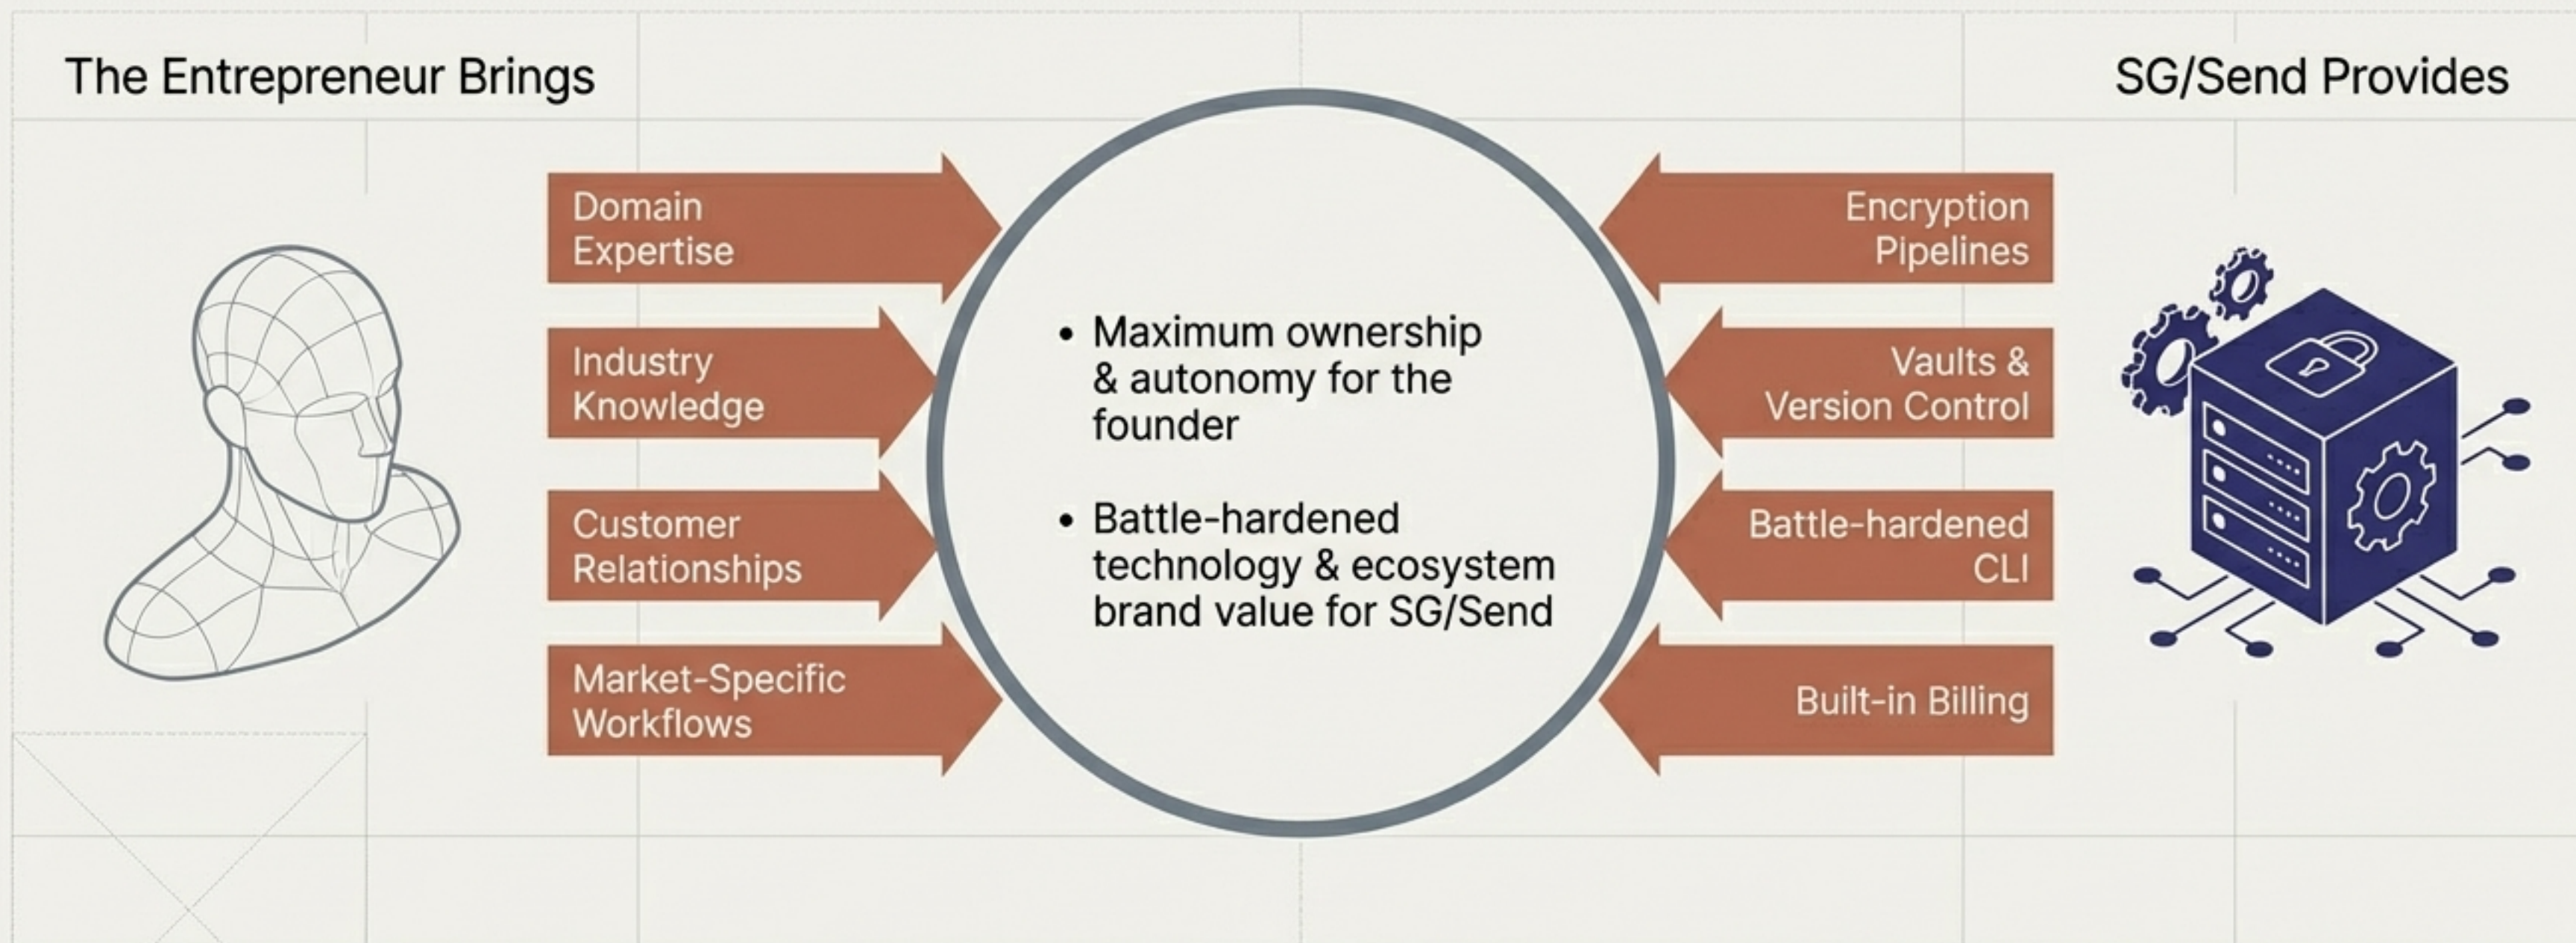

Our centre of gravity must remain on the core primitives.

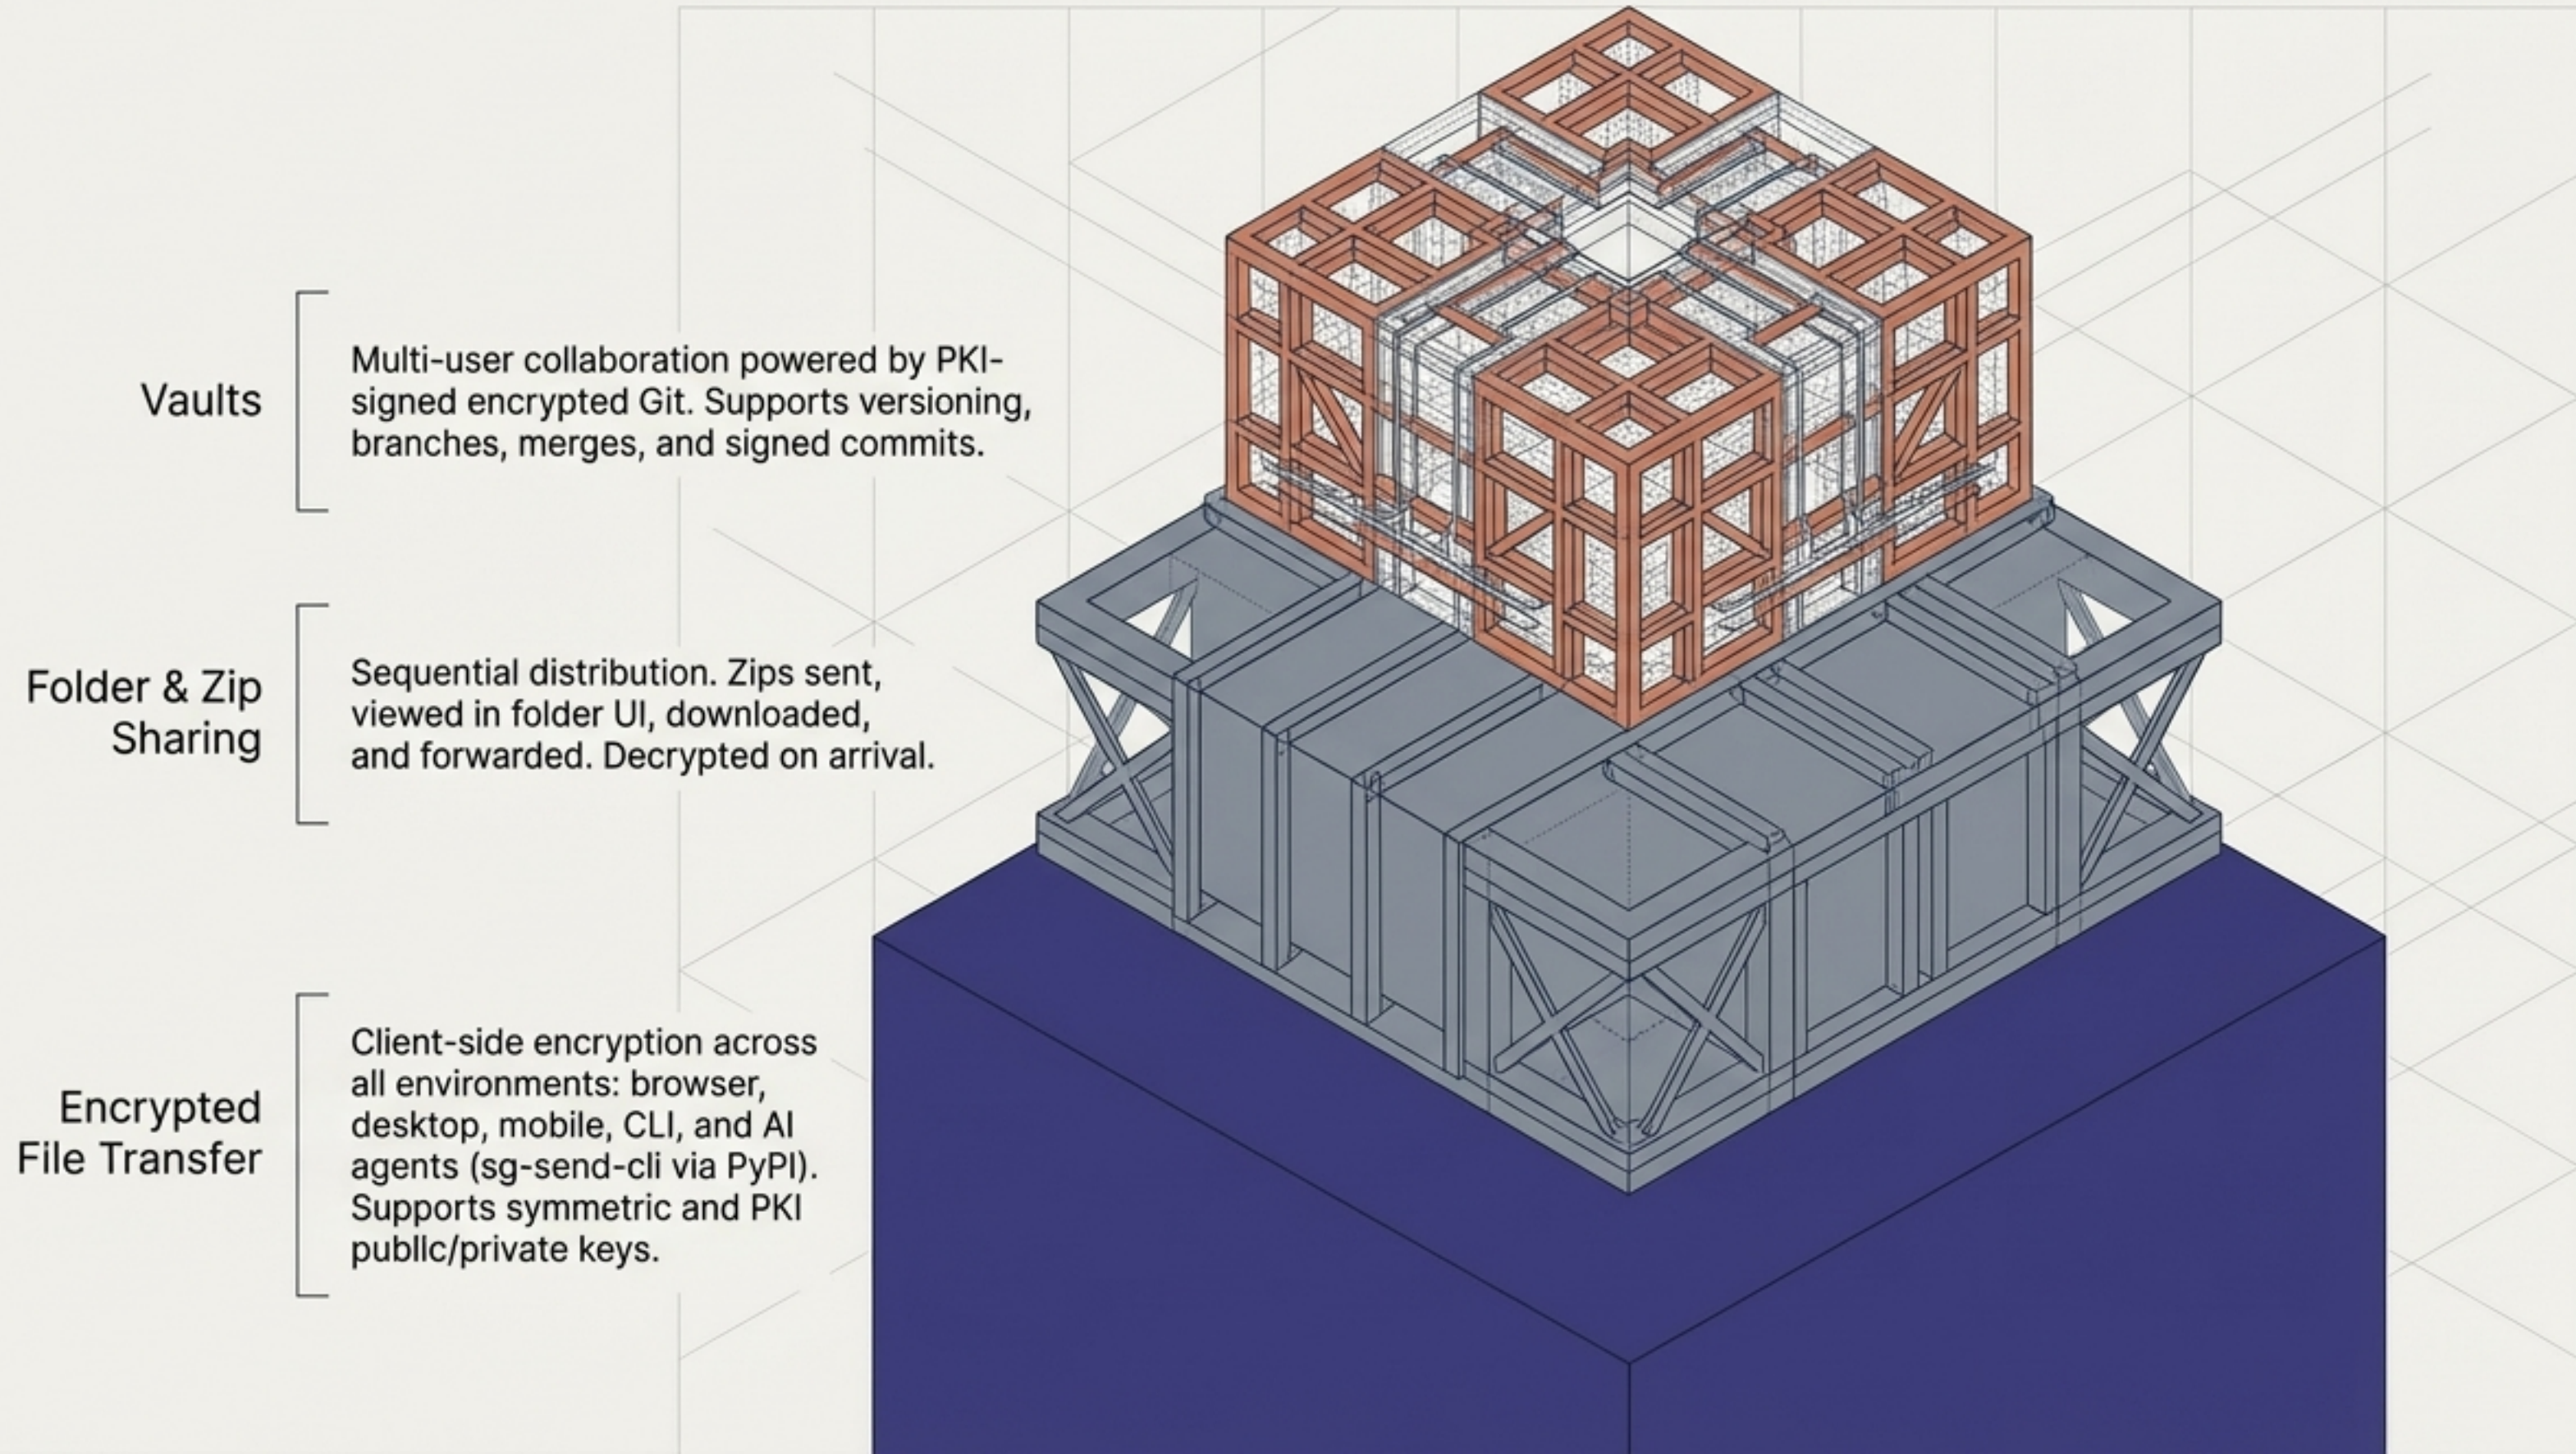

We build the infrastructure;
entrepreneurs build the edge.
Each orbiting node is a standalone
company waiting to be built on
our foundation.

Symbiotic growth accelerates both the domain founder founder and the infrastructure.

The new co-founder conversation: Build your thing on top of what we have built.

Three battle-tested primitives form the foundation of every new venture.

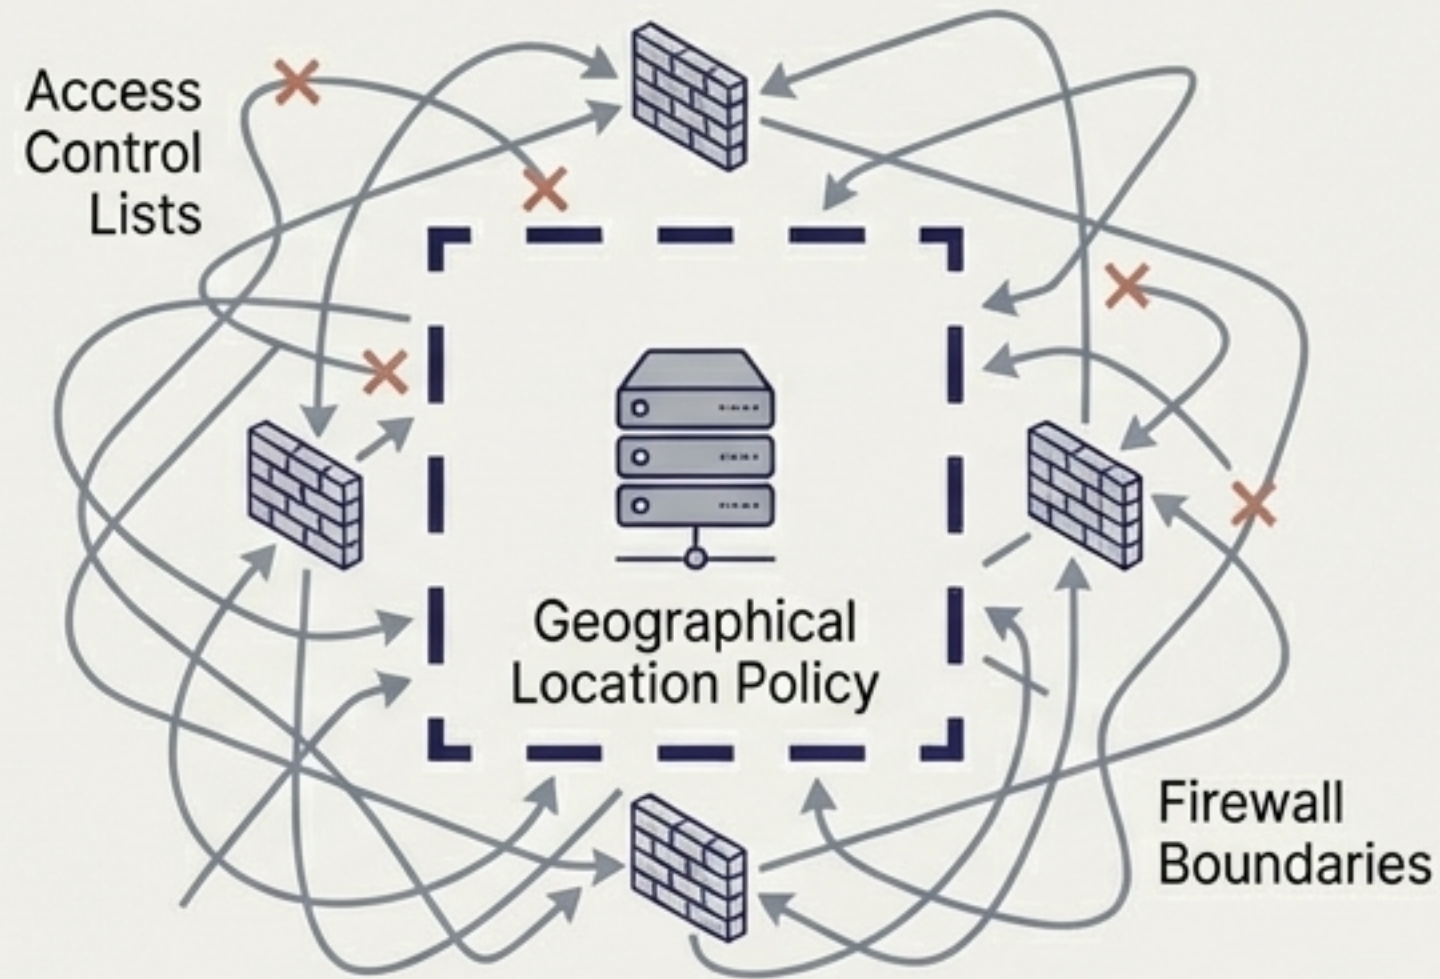

Distinct workflows require distinct architectural primitives.

Primitive	Primary Action	Workflow Type	Target Use Case	Technical Base
Zips & Folders	Distribution	Sequential (Receive, Add, Forward)	Accountants, Compliance, Document Review Chains	Decrypt on arrival, Standalone Folder UI
Vaults	Collaboration	Parallel (Multi-user ongoing editing)	Data Rooms, Project Dev, Document Management	PKI-signed encrypted Git, Branch/Merge mechanics

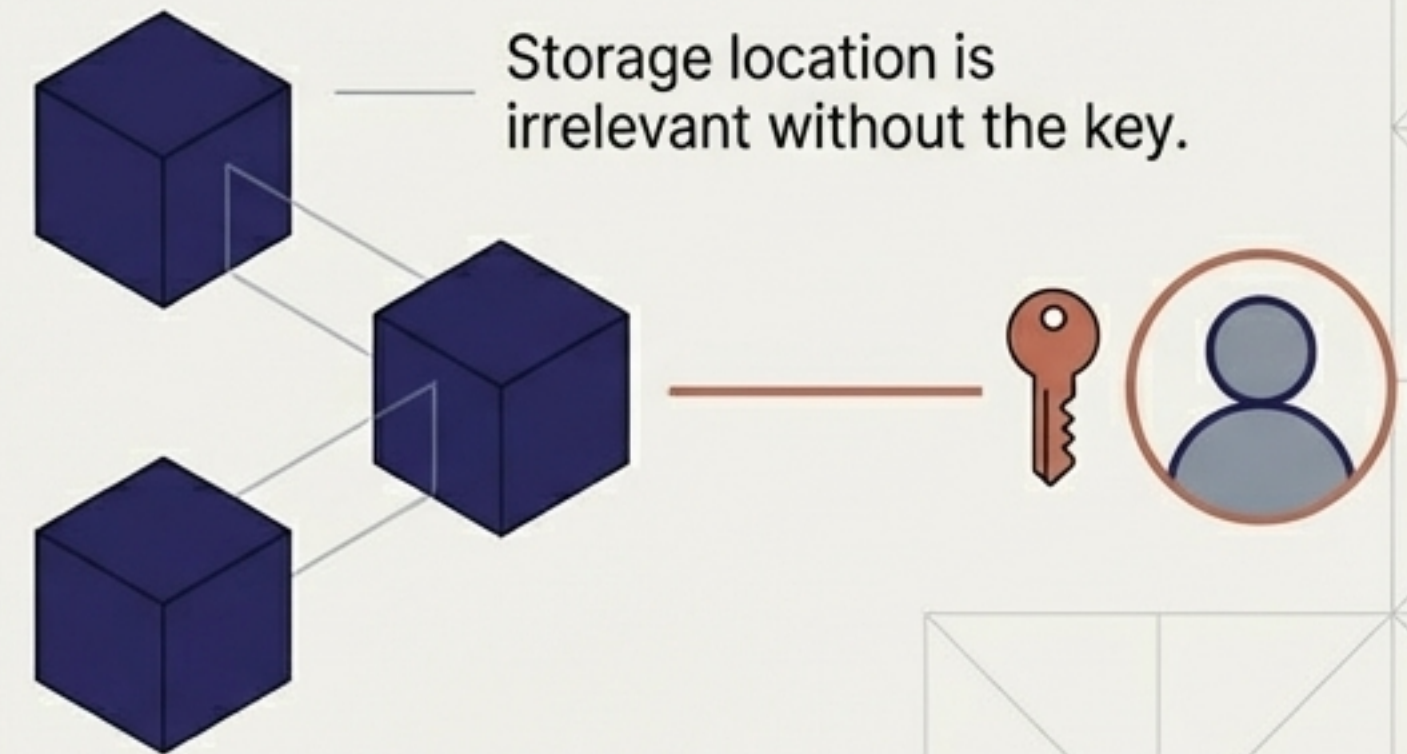

Zips are for sequential distribution. Vaults are for parallel collaboration.
The architecture seamlessly supports both without overlap.

Cryptographic provenance geographically decouples data storage from access.

Traditional Compliance Policy

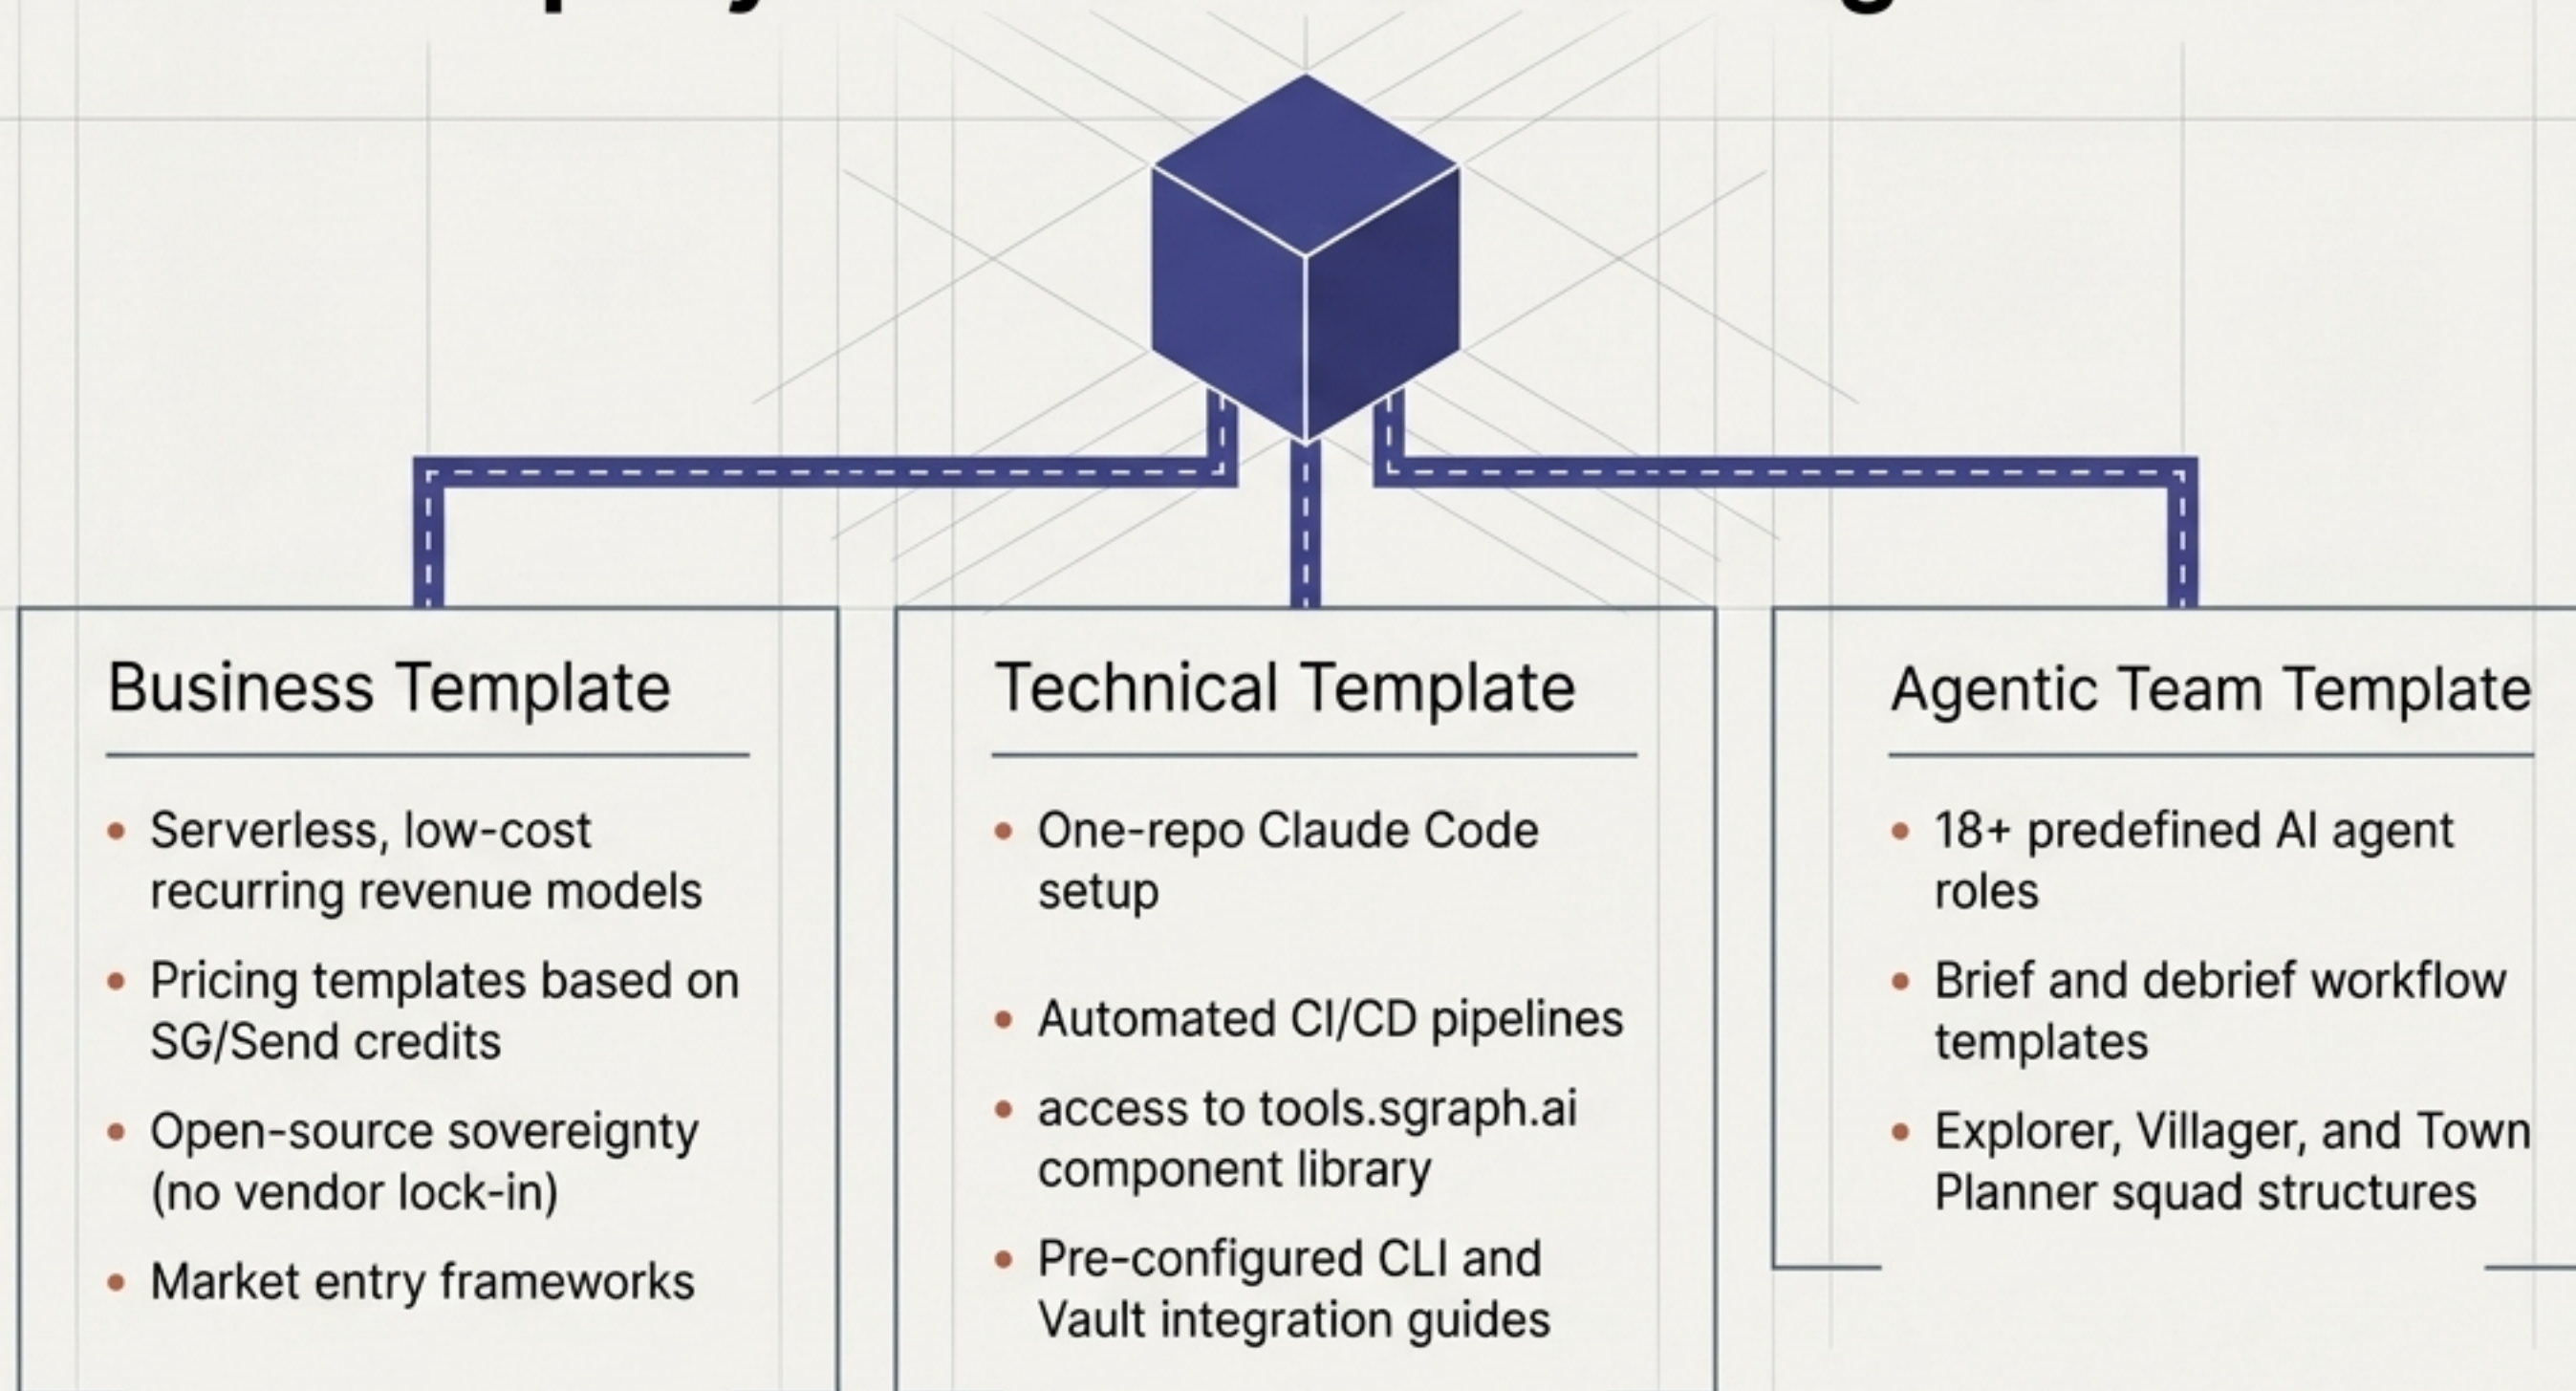

The SG/Send Paradigm Shift

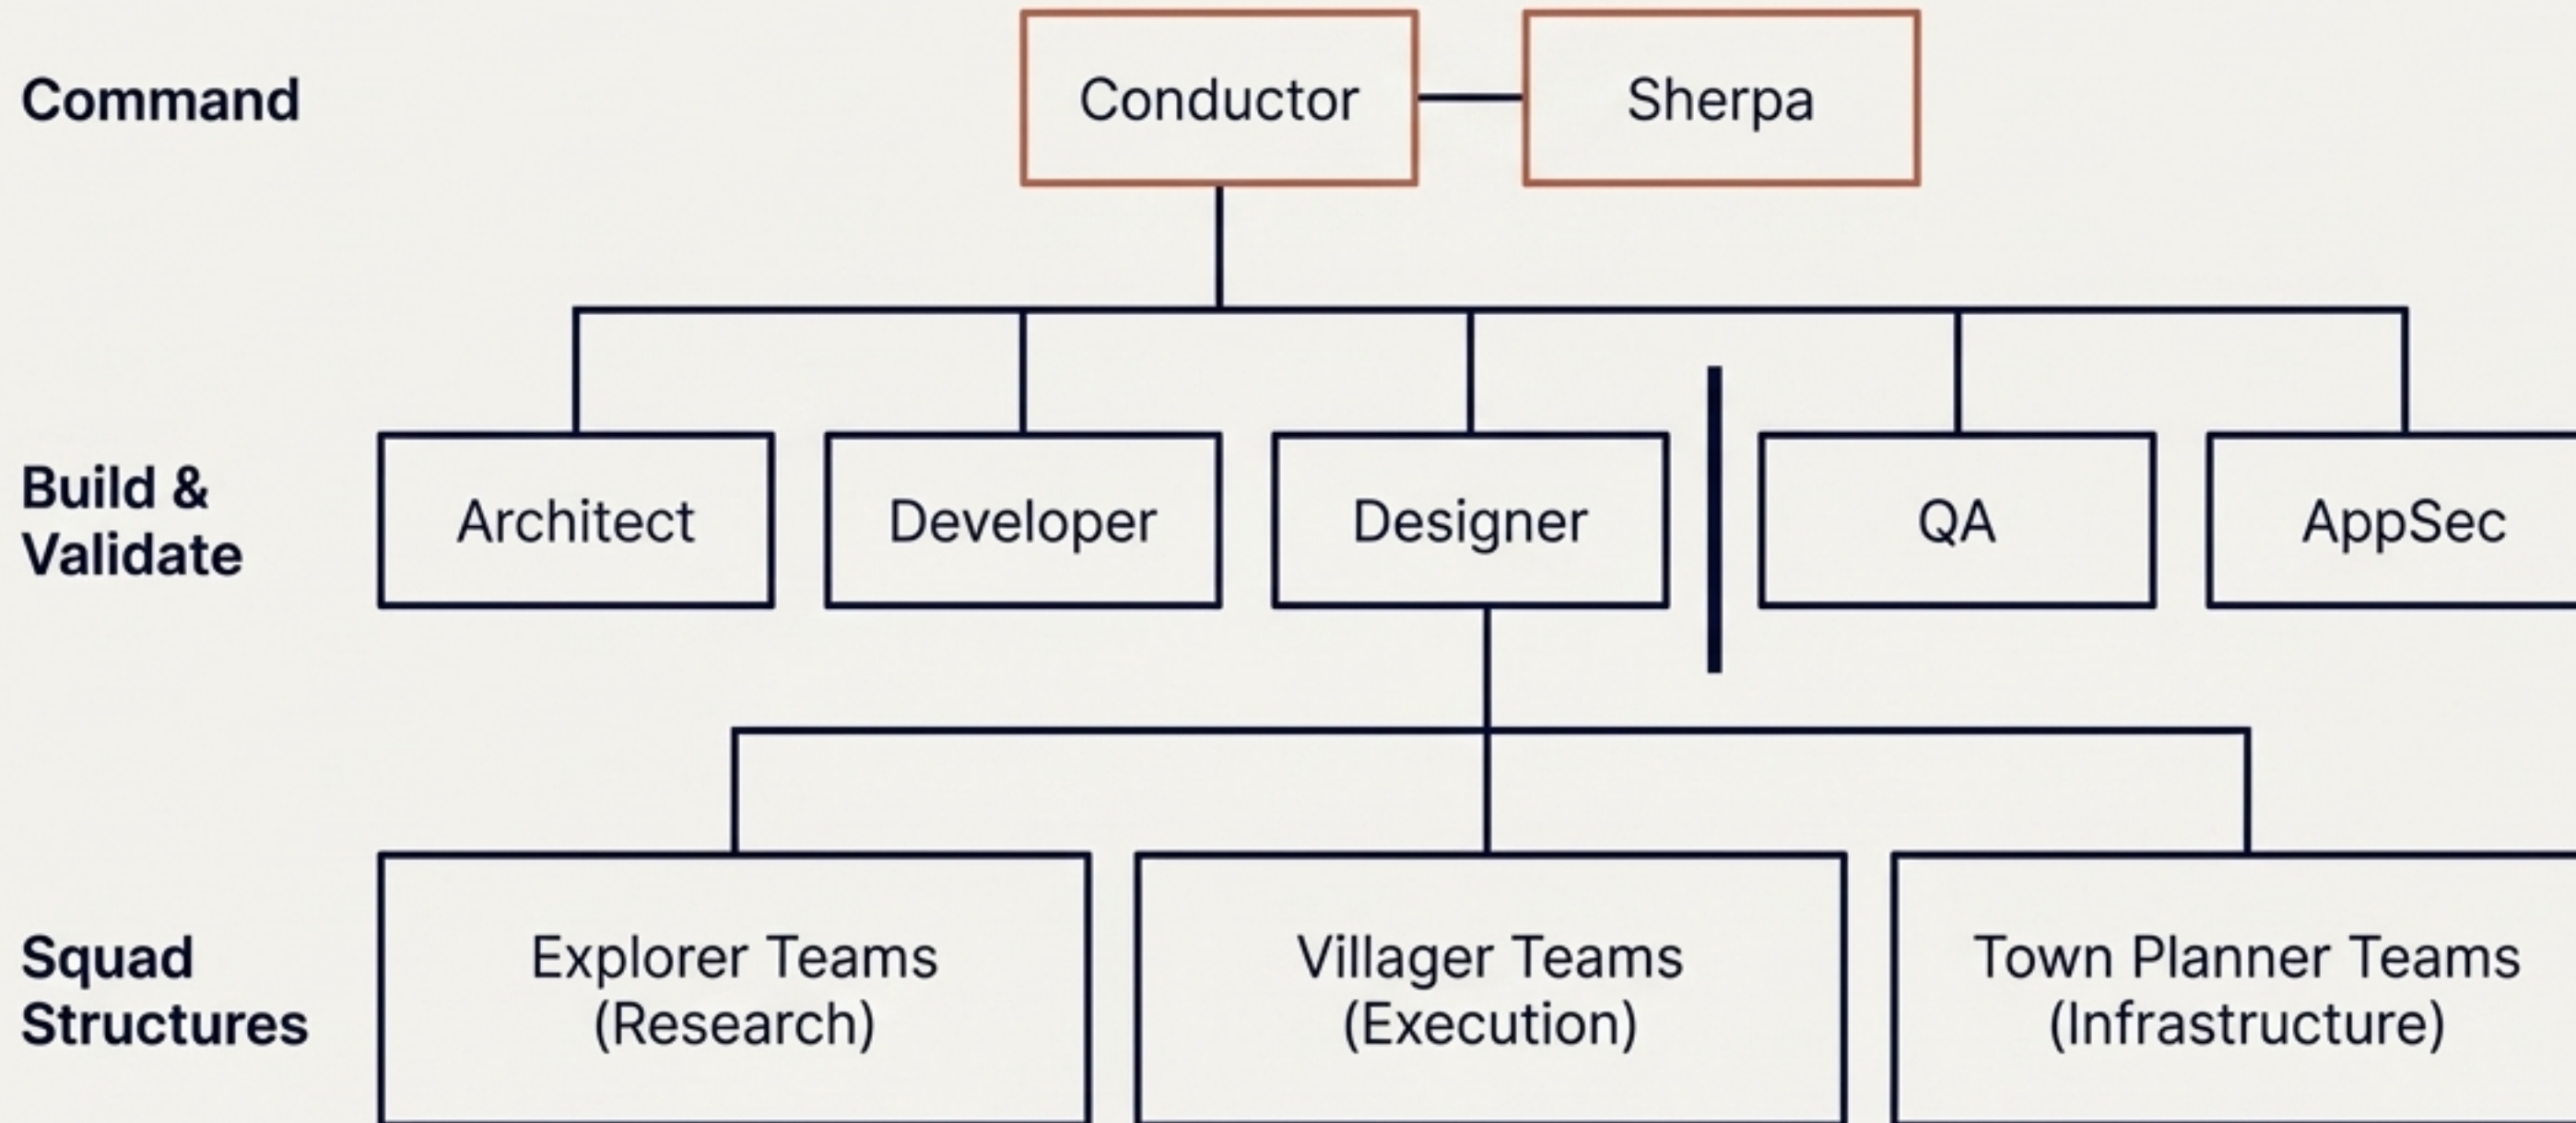

Provenance is cryptographic, not policy-based. This removes months of GDPR compliance work for startups in Healthcare, Finance, and Legal sectors.

The Founder Pack delivers a complete company-in-a-box within a single vault.

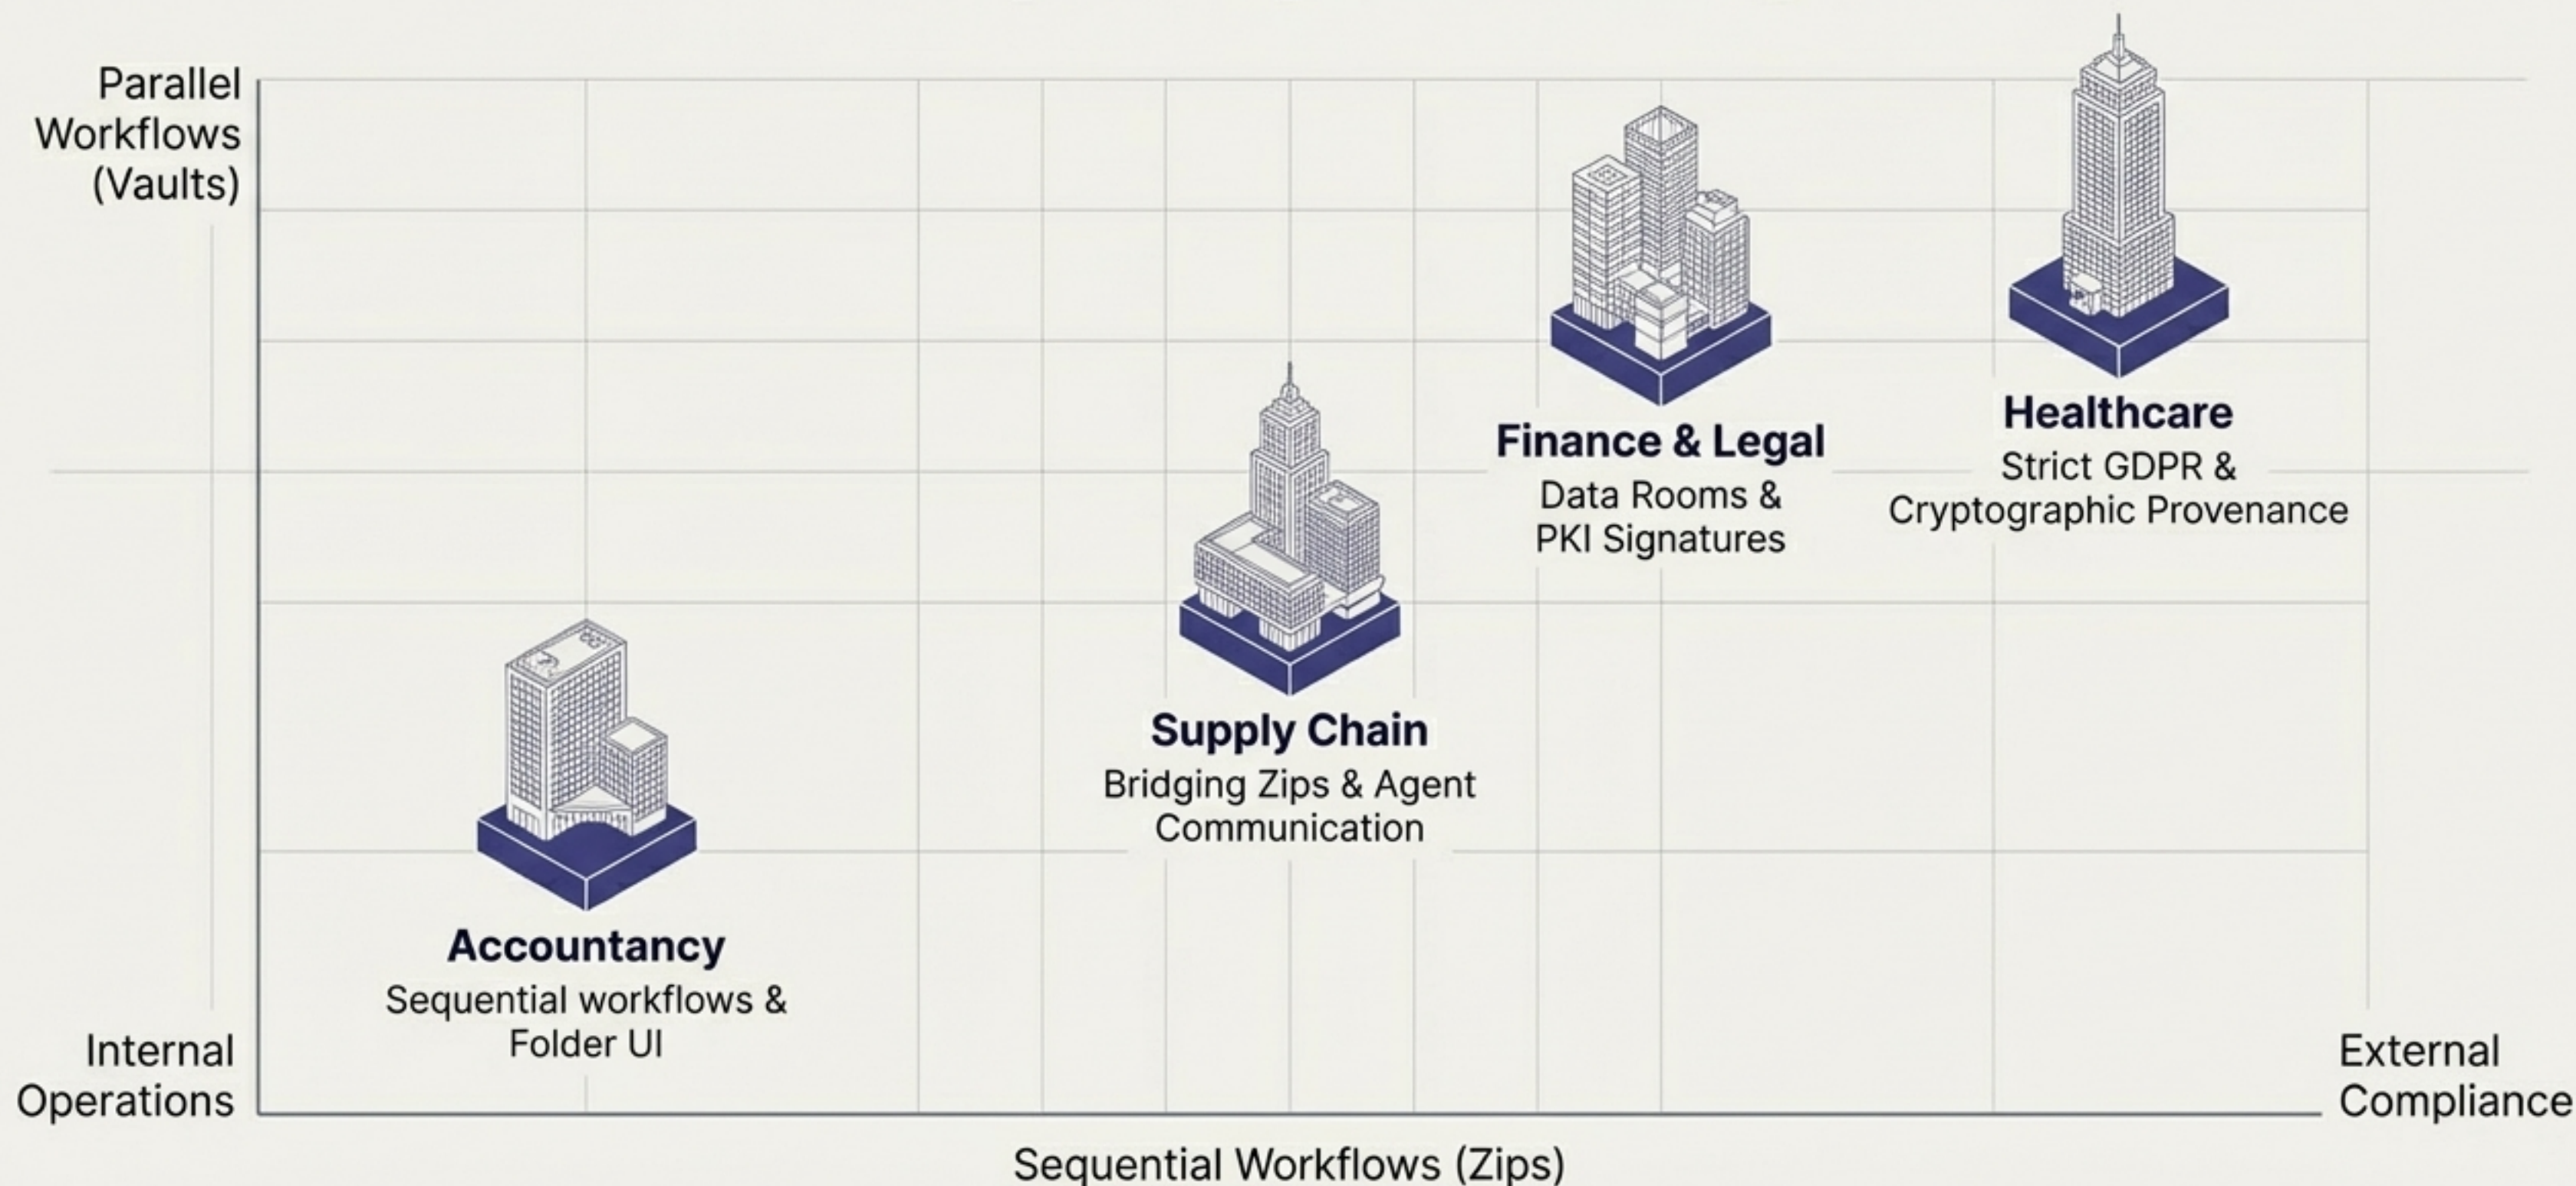

The Pack functions as an ecosystem investment (offered free) or a direct revenue stream via customised dev packs.

Pre-configured agentic structures enable autonomous development from day one.

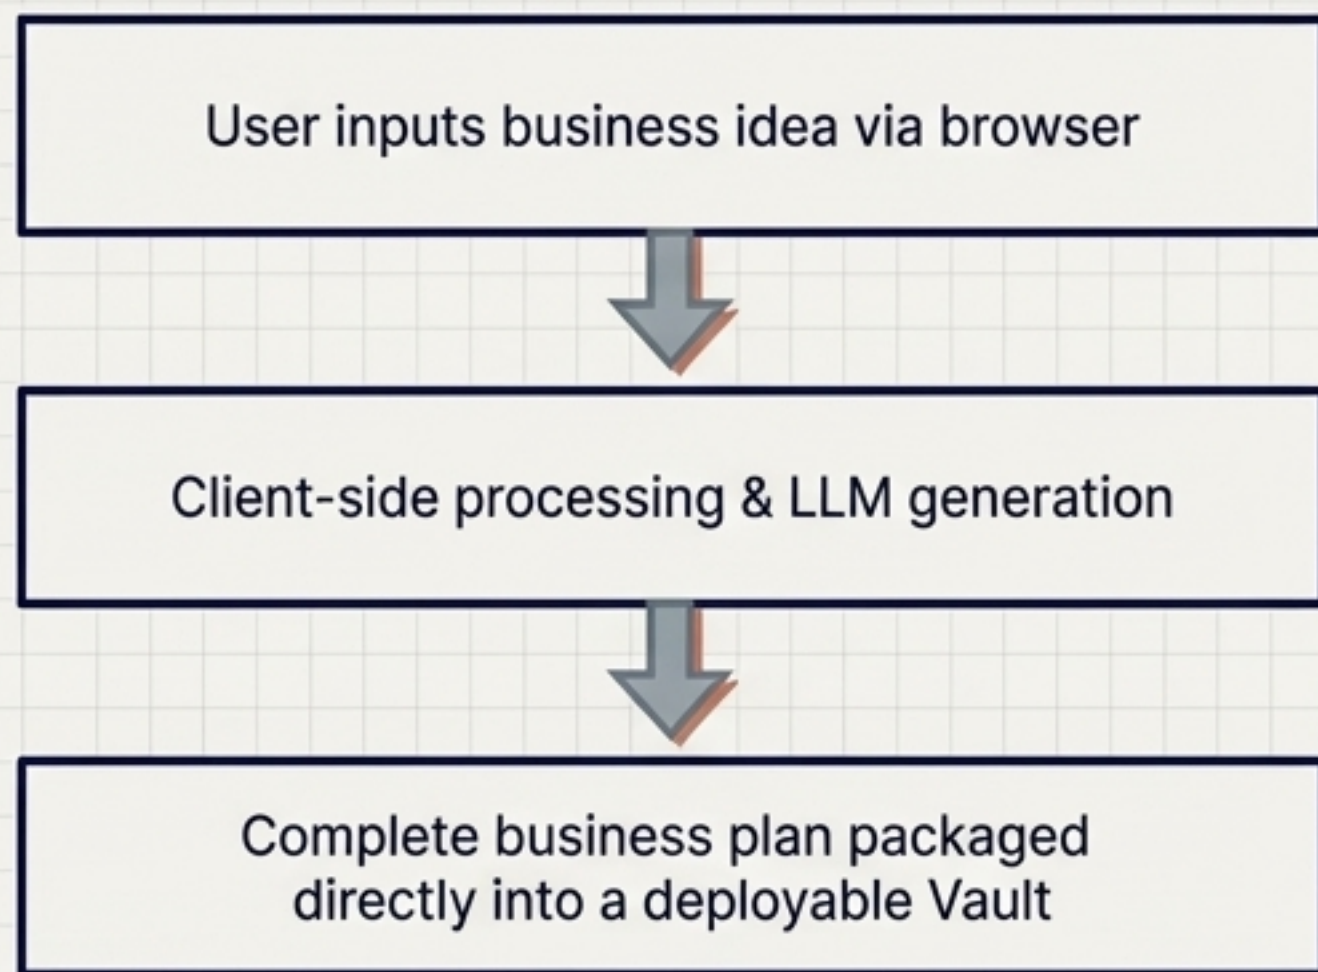

Founders do not start from a blank prompt; they inherit a highly structured 18+ agent workforce with predefined operational workflows.

Massive addressable markets wait to be disrupted by domain experts.

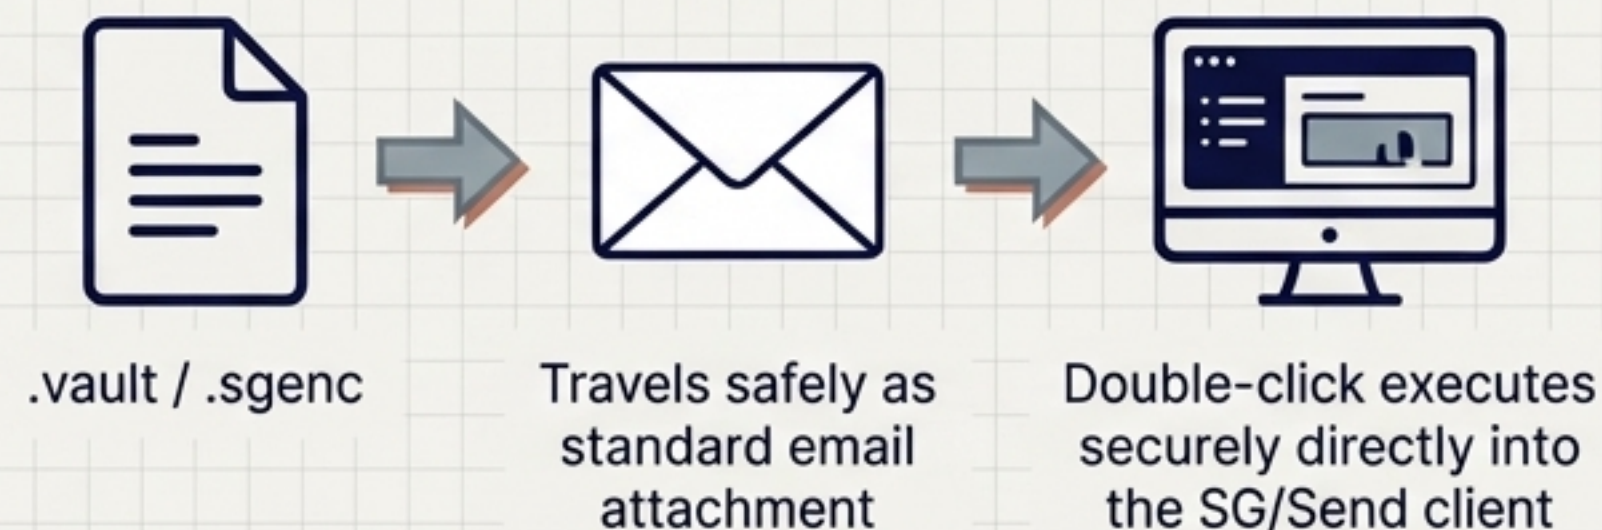

Continuous innovation will lower the barrier to autonomous company creation.

The LLM-Powered Future

The Encrypted Extension Feature

Final acceptance criteria for strategy brief v0.16.10.
Execution pending Architect and Alchemist sign-off.
