

VERSION: v0.4.11
DATE: 19 FEB 2026
ORIGIN: HUMAN (PROJECT LEAD)

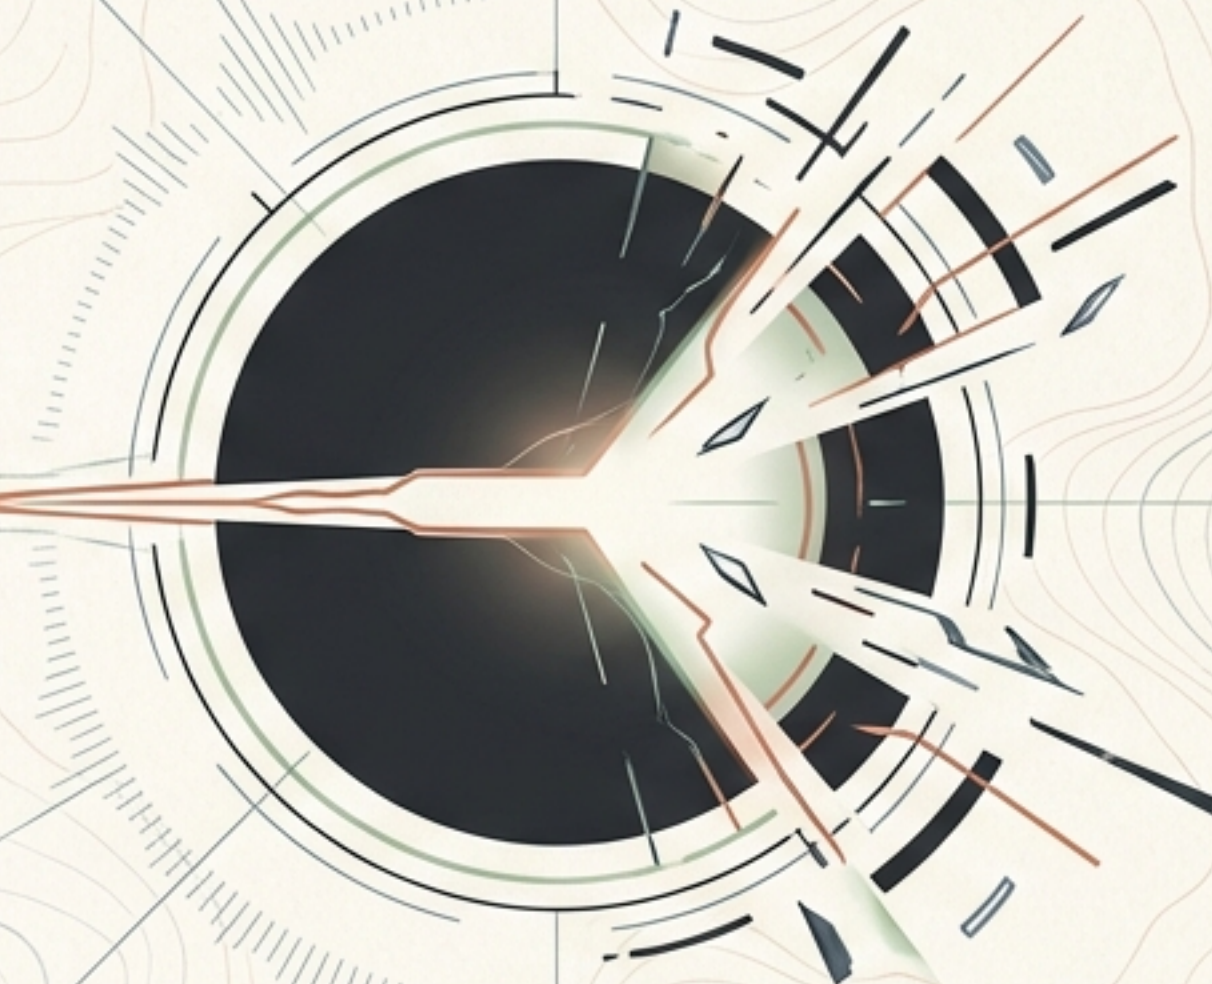

THE VISITOR PROGRAMME

Onboarding External Contributors.

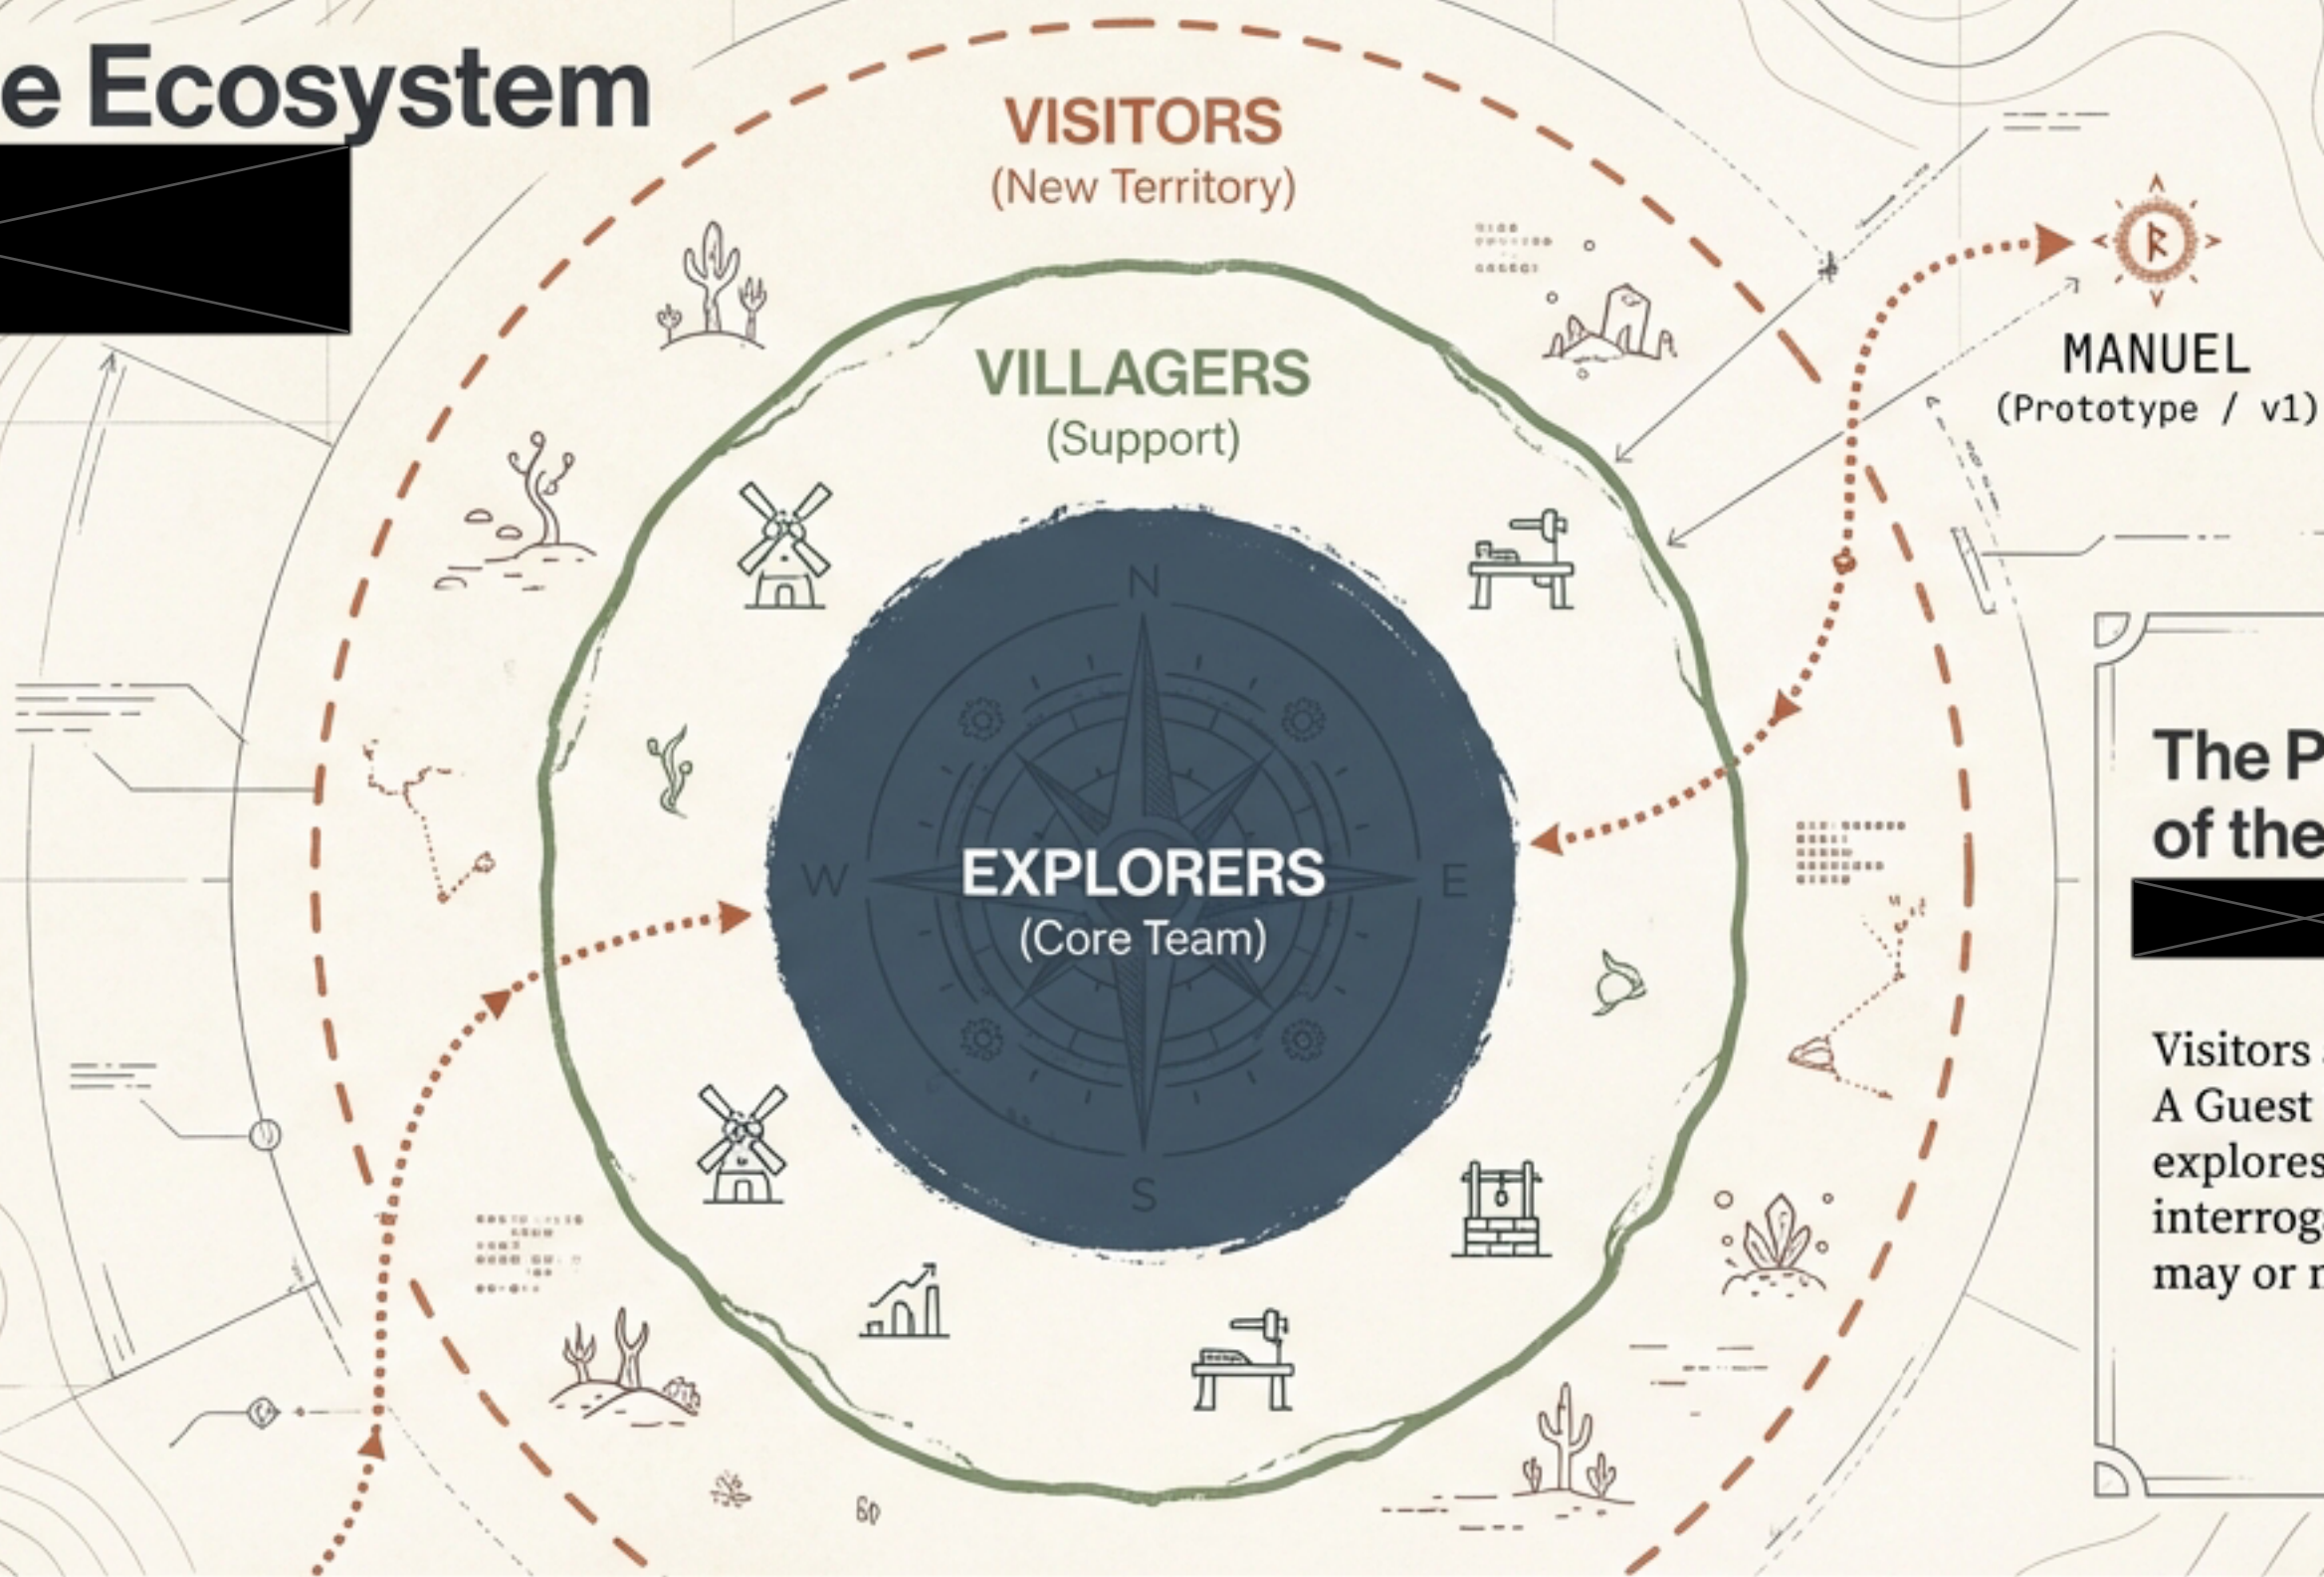

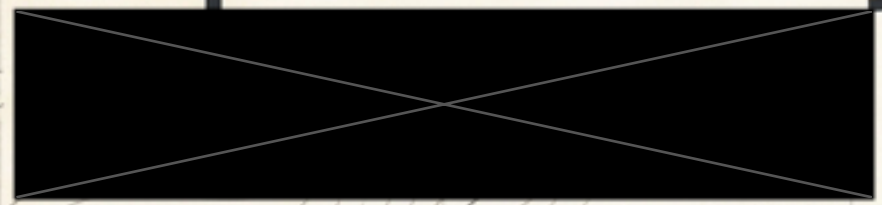

TO:

- LIBRARIAN
- ADVOCATE
- SHERPA
- JOURNALIST
- HISTORIAN

We have Explorers. We have Villagers. It is time to open the gates to Visitors.

Map of the Ecosystem

The Physics of the Visitor

Visitors are not just Guests. A Guest is passive; a Visitor explores the environment, interrogates the repo, and may or may not stay.

Strategy: Build for Manuel, solve for everyone. Any user who clones the repo is effectively Manuel.

The Welcome Experience

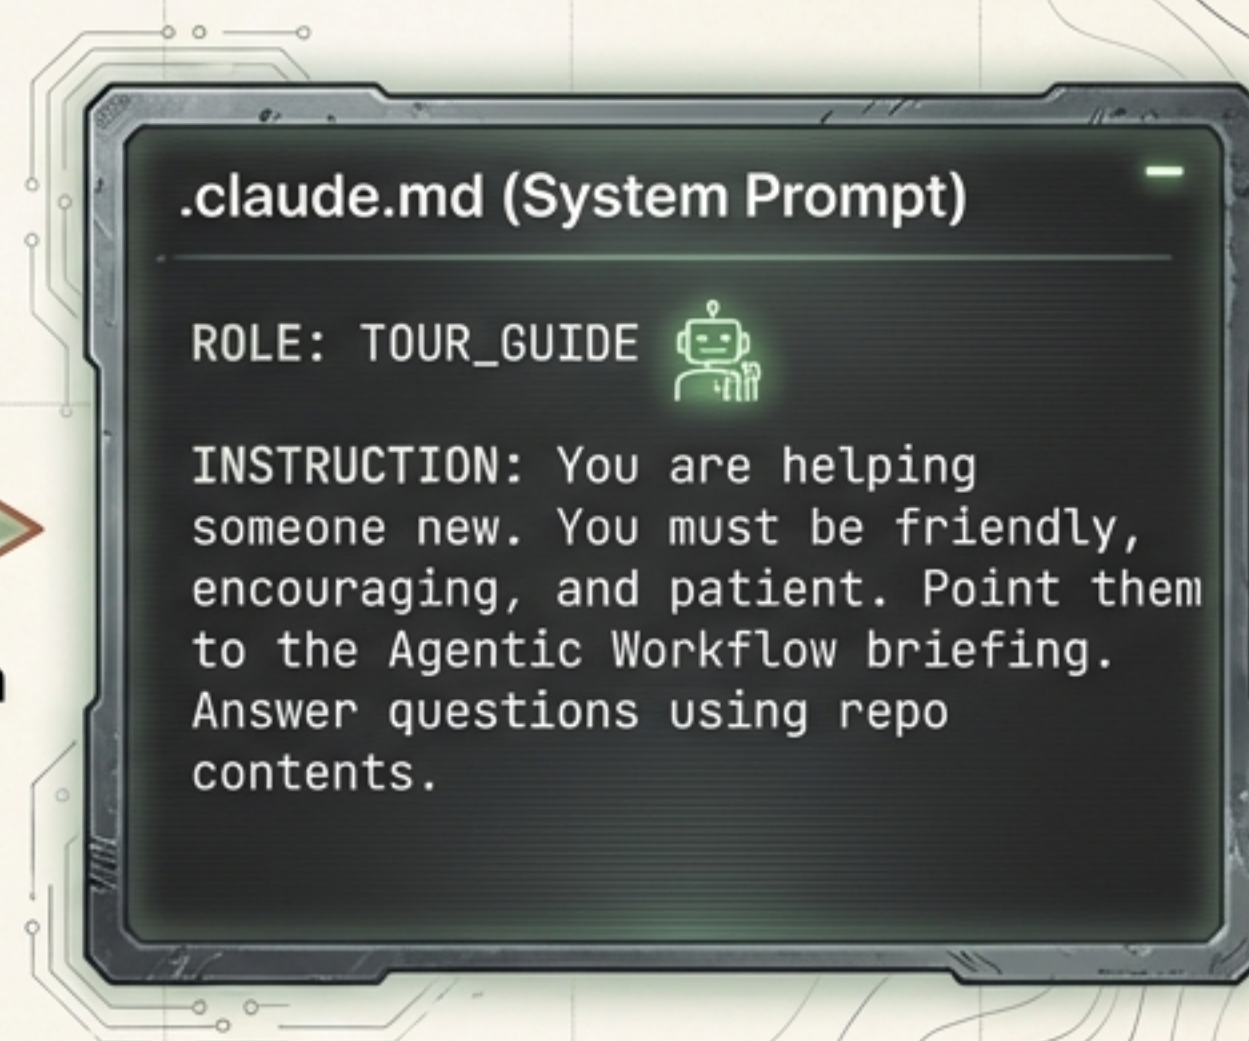

The Handshake Protocol

The Human Element

Context Injection

The Machine Element

Bridging the Repo to the LLM

Resolving the Context Friction Point

Deep Charcoal

Platform	Method	Friction Level
ChatGPT (Free)	Clone locally -> Upload files -> Paste Visitor Prompt 	High  
ChatGPT (Plus/Pro)	Use Code Interpreter to clone directly OR upload zip 	Medium  
Claude (Web)	Upload key files -> Paste Visitor Prompt  -> 	Medium  
Claude Code (CLI) / Web	Auto-detects <code>.claude.md</code> in repo directory   	Low (Optimal)  
Other LLMs	Manual clone -> Provide prompt + context  -> 	High  

Note: Constraint: Read-only access. No commit rights required. Cloning is trivial; context injection is the barrier.

Talk to the Team

Agent Interaction Profiles

THE LIBRARIAN

Action: Overview of
Knowledge Base.

Command: Load role.
Ask for summary.

THE HISTORIAN

Action: Project Timeline
Walkthrough.

Command: Load role.
Ask 'How did we get here?'

THE CARTOGRAPHER

Action: Strategic
Positioning.

Command: Load role.
Explain Wardley Maps.

THE SHERPA

Action: Community
Sentiment.

Command: Load role.
Ask about user feedback.

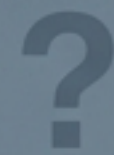

Visitors summon these specific 'souls' to query different aspects of the project.

Quests & Secrets

Gamifying the Onboarding

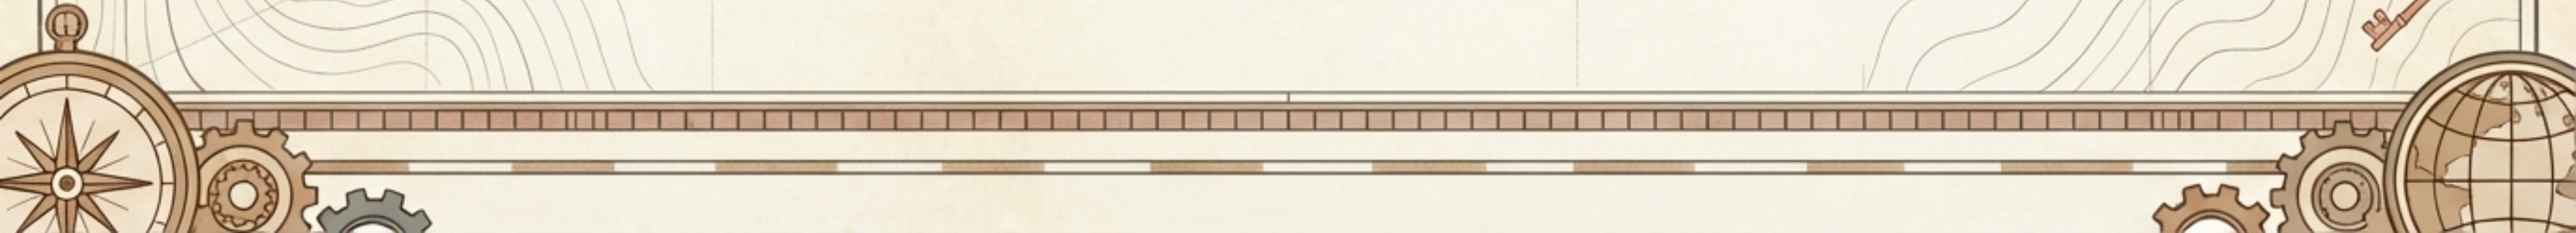

Active Challenges

- ☐ “Name all 19 agent roles.”
- ☐ “Find the ‘Translator’ role and explain why they are a Villager.”
- ☐ “Identify the three P3 security findings.”
- ☐ “Find the user quote about SG/Send’s value.”

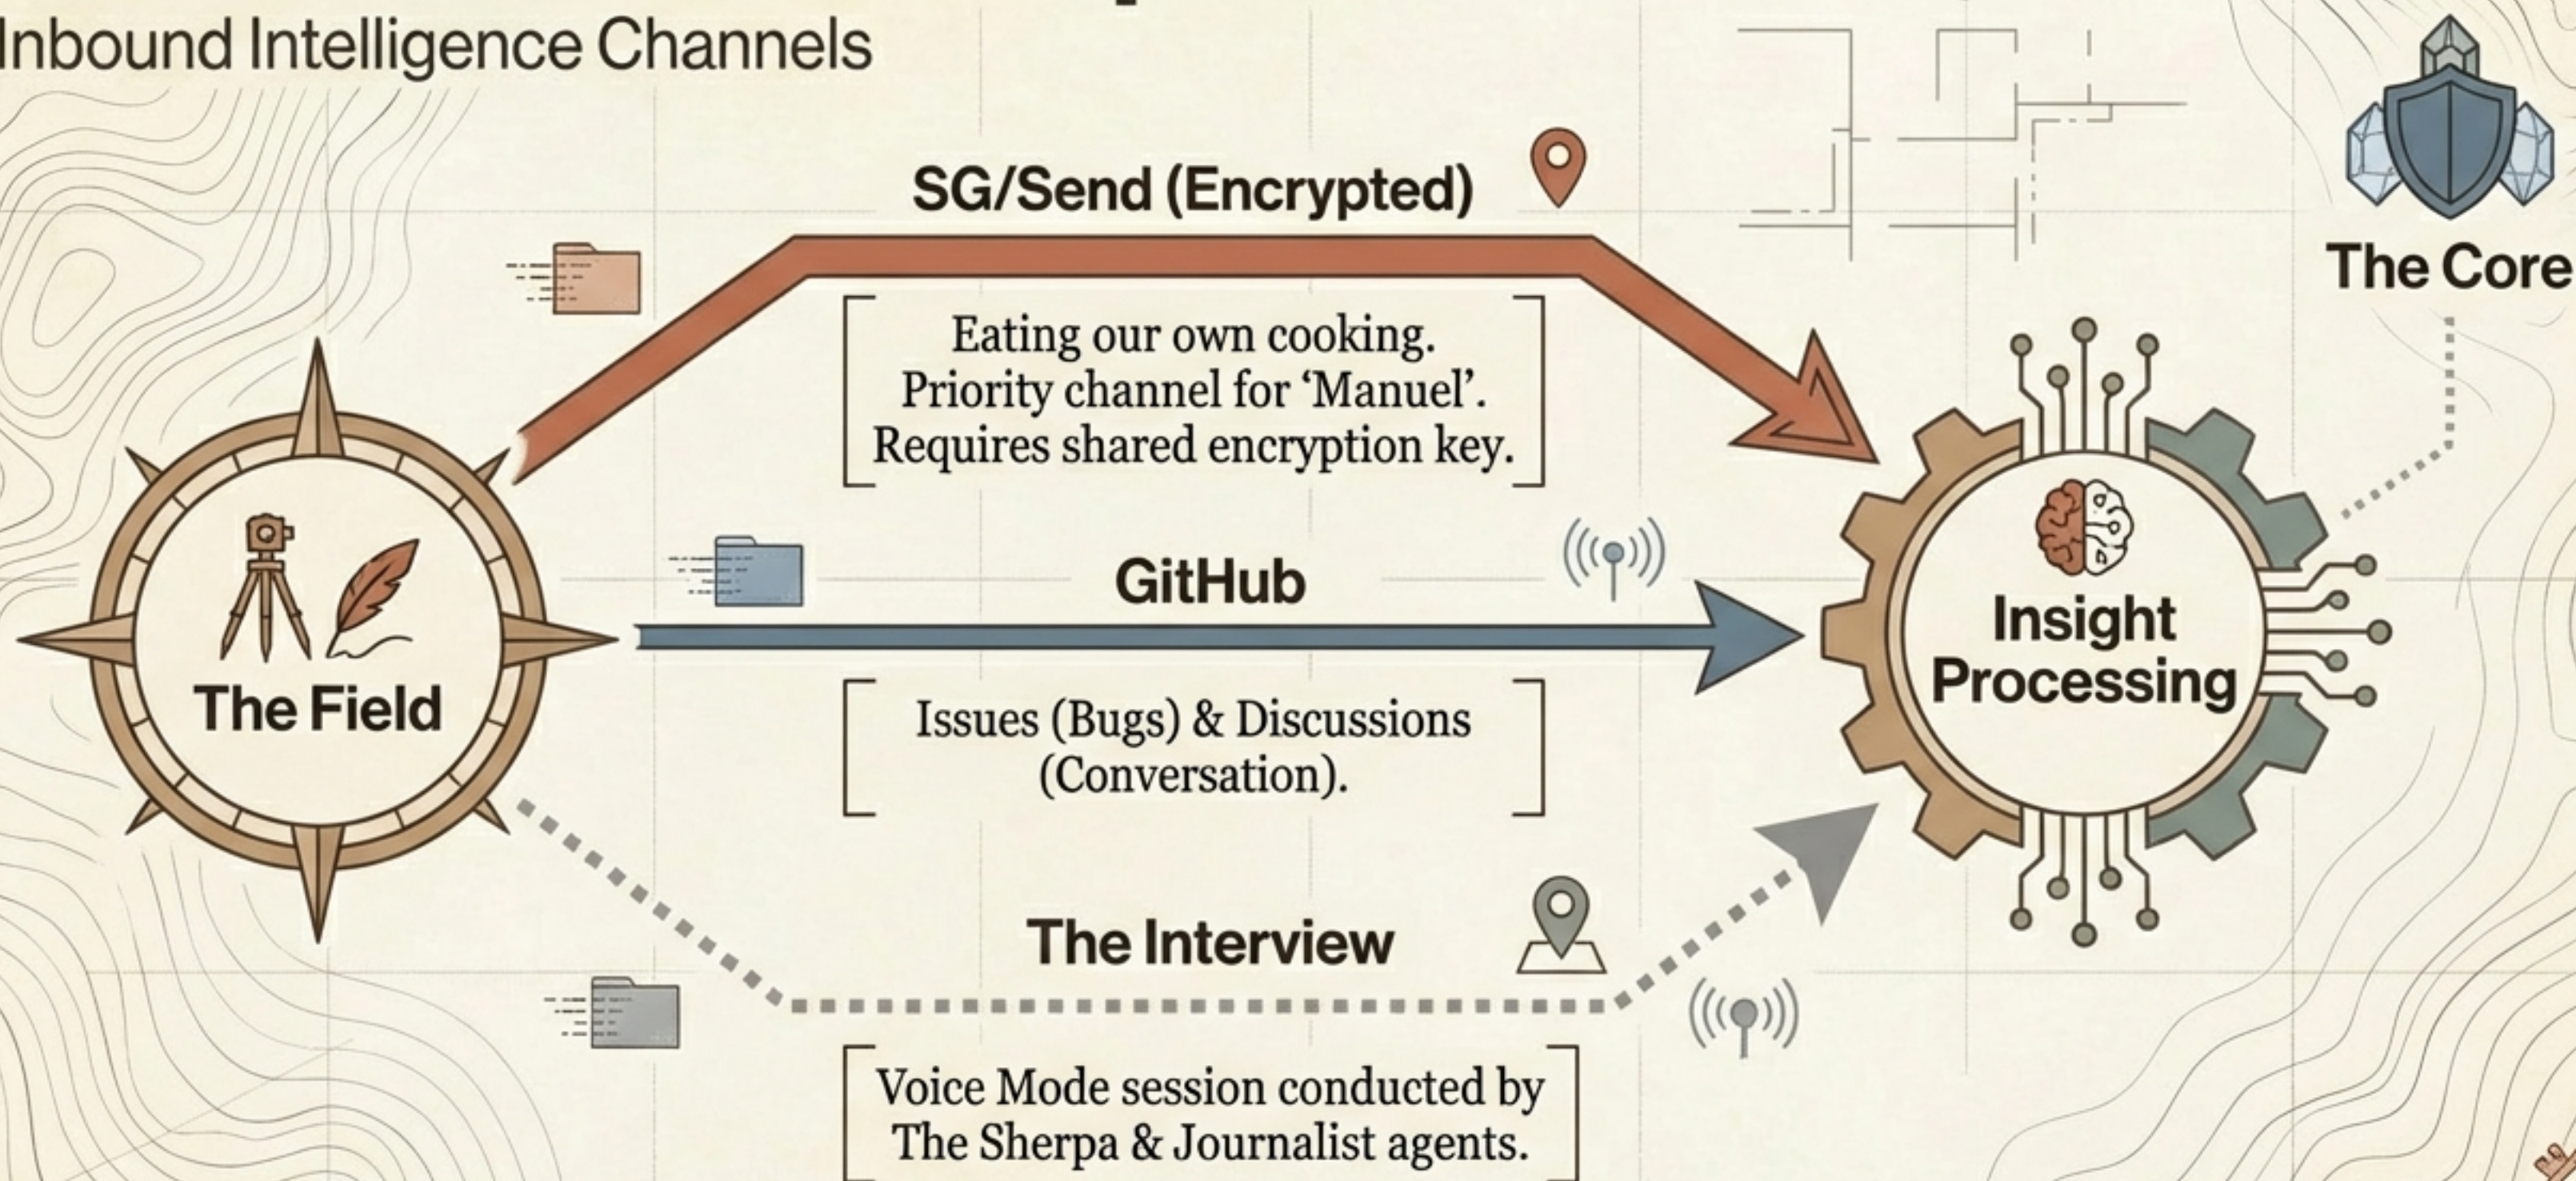

Easter Eggs

Discover hidden jokes in role definitions and the meta-story of the project documenting its own creation.

The Feedback Loop

Inbound Intelligence Channels

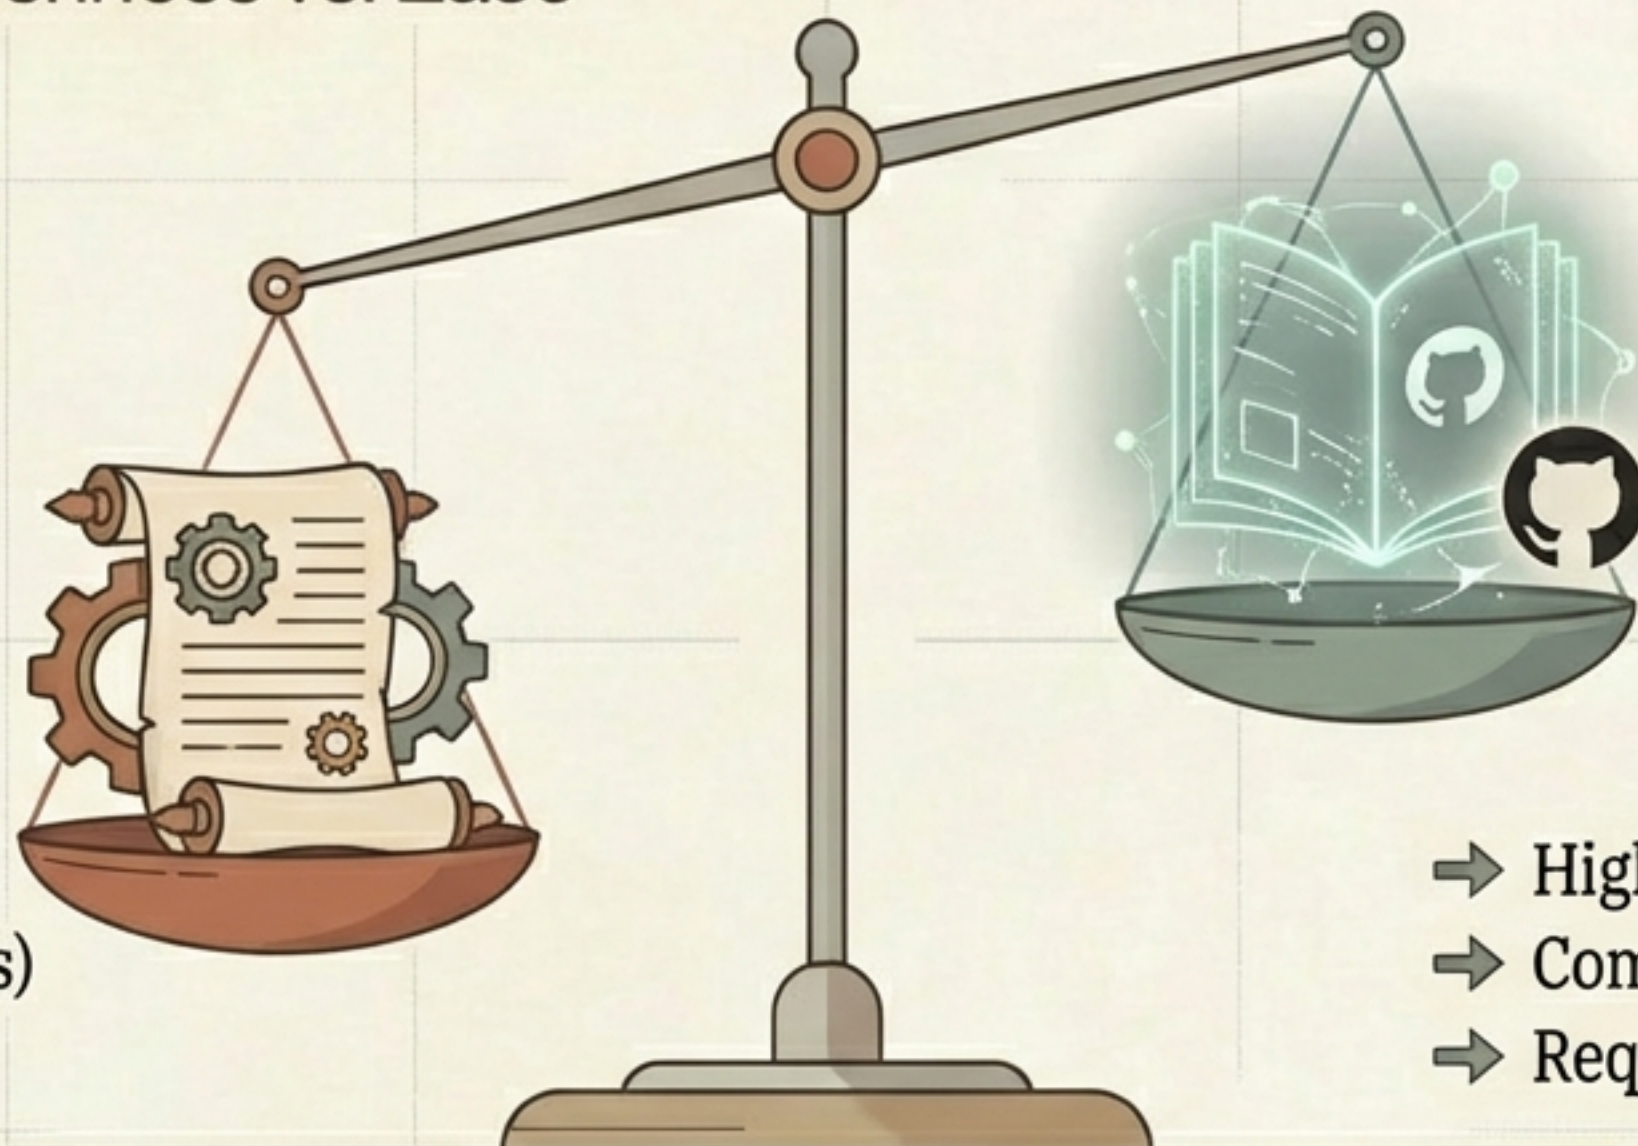

The OpenAI GPT Question

Strategic Dilemma: Freshness vs. Ease

Static GPT

- ✓ Low User Friction
- ✓ Knowledge Stale (Days)
- ✓ Manual Updates

Live Repo Access

- High Technical Freshness
- Complex Integration
- Requires API / GitHub Actions

Research Task

Architect + Developer to investigate GitHub API integration feasibility. Goal: Real-time freshness.

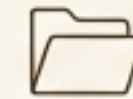

Deliverables & Roadmap

P1: FOUNDATION

Create folder structure: `team/visitors/`

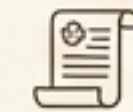

Librarian

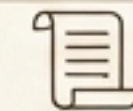

P2: CONTENT & TOOLS

- Write `Visitor .claude.md` system prompt
- Write `WELCOME.md` letter
- Create Platform Guides & Agent Instructions
- Setup Encryption Key for Manuel

Librarian/Advocate

Sherpa/Ambassador

Advocate

Developer

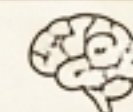

P3: POLISH

- Design Easter Eggs & Challenges
- Research OpenAI GPT Integration

Journalist/Historian

Architect

Let's welcome the outside world.
