

INC-004: DOCUMENTATION TOKEN LEAK

From Data Breach to Immune System Gain

DATE	SEVERITY	STATUS	LEADS
2026-02-19	P2-AS-P1 (CONFIRMED DATA BREACH)	RESOLVED (CLOSED)	CONDUCTOR (INCIDENT), APPSEC (TECHNICAL)

TRANSPARENT
~~REDACTED~~

01. THE BREACH (EVENT)

AI agents (Historian, Journalist, Librarian) committed **real credentials (tokens/keys)** to GitHub while documenting a fix for a previous incident.

```
> AGENT.ACTION: COMMIT
// REPO: 'FIX_DOCS'
// DATA: [REDACTED_TOKEN]
// STATUS: EXPOSED
// TINESTAMP: [REDACTED]
```

02. THE IMPACT (RISK)

Exposure of “**Enterprise AI Time-to-Value Survey**” via SGraph Send. **Level 1 User Data** exposed (Name/Email).

```
> RISK.ASSESSMENT: CRITICAL
// EXPOSURE: 'SURVEY_DATA_V1.2'
// TARGET: 'SGRAPH_SEND'
// USER_DATA: [NAME, EMAIL]
// STATUS: UNSECURED
```

03. THE REMEDY (ACTION)

Immediate “**Zero-Knowledge**” containment. Permanent deletion of the S3 object rendered the leaked keys useless instantly.

```
> ACTION.CONTAINMENT: ZERO-KNOWLEDGE
// S3.OBJECT.DELETE: [REDACTED_KEY_FILE]
// KEYS.STATUS: REVOKED/USELESS
// RESULT: SECURE
```

04. THE GAIN (VALUE)

Immune System Gain: 12 new governance decisions (D074-D082), 3 new patterns, and a from-scratch Data Breach Notification Process.

```
> GAIN.REPORT: IMMUNE_SYSTEM_UPGRADE
// NEW_DECISIONS: [D074-D082]
// NEW_PATTERNS: 3
// PROCESS.CREATED: 'BREACH_NOTIFICATION_V1.0'
// STATUS: ENHANCED
```

ANATOMY OF THE LEAK

THE EXPOSURE WINDOW

**TOTAL EXPOSURE
TIME: ~30 MINUTES**

DOWNLOAD COUNT: 1
(ATTRIBUTED TO LEGITIMATE USER)

DATA CLASSIFICATION & IMPACT

ASSET: Enterprise AI
Time-to-Value Survey

BLAST RADIUS	
1. DATA TYPES EXPOSED	User Name (Text) Email Address (Text)
2. CLASSIFICATION	Level 1 (Public / Low Sensitivity)
3. THE VULNERABILITY	⚠ Leaked Transfer ID + Decryption Key allowed full decryption of the SGraph Send file.
4. VERDICT	CONFIRMED DATA BREACH

ESCALATION: P2-AS-P1 (MAXIMUM RIGOUR INVOKED)

IMMEDIATE CONTAINMENT: ZERO-KNOWLEDGE REMEDY

Standard Remediation (Key Rotation)

INC-004 Remediation (Object Destruction)

Strategy: Permanent Deletion.

- If the source file is gone, the leaked key has **0** utility.
- No need to rotate keys immediately.
- Risk drops to **0%** instantly.

16:28: DATA IRRECOVERABLE

GOVERNANCE LOGIC: P2 becomes P1

DECISION OWNER:
Conductor

REGULATORY ASSESSMENT (ICO STANDARDS)

CRITERIA	STATUS	RESULT
CRITERIA 01: Risk to rights and freedoms of natural persons?		✓ LOW
CRITERIA 02: Sensitivity of Data?		✓ LOW (Public contact info)
CRITERIA 03: Mitigation Speed?		✓ IMMEDIATE (<40 mins)

VERDICT: ICO NOTIFICATION NOT REQUIRED.

Assessment led by AppSec and DPO.

THE HUMAN ELEMENT: VOICE INTERVIEW WORKFLOW

NEW PATTERN UNLOCKED

Pattern P21: Voice Mode for Regulatory Questionnaires

THE TWIST: DELIBERATE RISK ACCEPTANCE

THE RISK

 [REDACTED]-linkedin-token-v1
[REDACTED] [ALERT RED WARNING]

- Leaked Token left active.
- 20 API uses remaining.
- Access to public profile data.

THE OPPORTUNITY

- Controlled Experiment (Decisions D080-D082).
- **Objective:** Observe system behavior and trailing usage.
- **Rationale:** S3 object already deleted, risk is contained.

**GOVERNANCE: FORMAL RISK ACCEPTANCE
SIGNED BY GRC & DATA CONTROLLER**

IMMUNE SYSTEM GAIN: CAPABILITIES UNLOCKED

				
DATA BREACH NOTIFICATION PROCESS	ICO REPORTING FRAMEWORK	[REDACTED] CONVENTION	S3 DELETION REMEDY	VOICE INTERVIEW WORKFLOW
Detail: (Inter) Created from scratch.	Detail: (Inter) Standardized assessment logic.	Detail: (Inter) Adopted as default for secrets.	Detail: (Inter) Retroactive zero-knowledge fix.	Detail: (Inter) Rapid compliance data gathering.

ROLE ATTRIBUTION: THE AI SQUAD

THE AGENTS

- **Historian/Journalist:** Created leak, documented timeline.
- **Librarian:** Managed Master Index addendum.
- **Sherpa:** Trail assessment & UX logs.

GOVERNANCE

- **AppSec:** Notification, ICO assessment, Voice briefs.
- **GRC:** Risk Acceptance (Active Token).
- **DPO:** DPIA Requirements (D081-D082).

THE HUMAN

- **Dinis Cruz:** Discovery, Deletion, Critical Decisions.

ARTIFACT GENERATION: PROOF OF RIGOUR

Total Output: 6+ core governance documents
produced within hours.

KEY DECISIONS LEDGER

ID	CATEGORY	DETAIL
D074-D079	Response	Incident attribution, classification, and immediate response mechanics.
D080	<u>Risk Acceptance</u> 	Deliberate token exposure for experimental observation.
D081-D082	Future Prevention	DPIA requirements for future sharing and data protection assessments.

12 total new decisions codified into project memory.

LEAK TO FEATURE

A failure in documentation became a catalyst for 12 new governance decisions and a complete breach protocol.

“Radical Transparency: The documentation of the failure is the fix.”
