THE DIGITAL IMMUNE SYSTEM: INCIDENT ATTRIBUTION & GROWTH

v0.4.16 Historian Report – 19 February 2026

ORIGIN: [REDACTED] ⚠ VECTOR: [REDACTED]
[REDACTED] ➡ STATUS: ADAPTIVE ●● [REDACTED]

**“WE CELEBRATE INCIDENTS
THE WAY A MARTIAL ARTIST
CELEBRATES SPARRING
ROUNDS: EACH ONE REVEALS
A GAP, BUILDS A RESPONSE,
AND MAKES THE SYSTEM
HARDER TO BREAK NEXT TIME.”**

The Practice Ground Philosophy: Incidents are unplanned drills provided by the real world.

! ALERT: INCIDENT RESPONSE PROTOCOL //
DO NOT REDISTRIBUTE

VITAL STATISTICS: THE COST OF EVOLUTION

4

Total Incidents

0

User Data Compromised

1 Data Breach (INC-004) retroactively remedied.

0

ICO Notifications Required

82

Decisions Logged

Range: D001 - D082

SYSTEM STATUS: RESILIENT // STRENGTHENED

THE AGENT ROSTER

Autonomous agents creating value and risk.

DEV AGENT

Role: Logic & Code.
Incident: INC-003
(URL Token Logic).

HISTORIAN AGENT

Role: Recording Events.
Incident: INC-004
(Decryption Key Examples).

JOURNALIST AGENT

Role: Reporting.
Incident: INC-004
(Article Examples).

LIBRARIAN AGENT

Role: Indexing.
Incident: INC-004
(Master Index Propagation).

Attribution Leaderboard: Creators vs. Discoverers

Incident	Created By	Discovered By	Discovery Type
INC-001	Agent (DevOps)	Automated Pipeline	Machine
INC-002	Legacy (Pre-existing)	User A (External)	Human (External)
INC-003	Agent (Dev)	Dinis Cruz	Human
INC-004	Agents (Hist/Journ/Lib)	Dinis Cruz	Human

“
Key Insight:
Agents create bugs; humans currently find them.”

Internal eyes normalise risk. External eyes identify it (See INC-002).

INC-004: THE MULTI-AGENT PROPAGATION

DATED: [REDACTED]
DATE: [REDACTED]

Lesson: A secret's sensitivity is intrinsic to its value, not its context.

INC-001: THE DEPLOYMENT SMOKE TEST

DATED:

DATE:

INCIDENT DATA

TRIGGER:
Agent (DevOps)

DETECTION:
Automated
(Deployment Pipeline)

SEVERITY:
P4 (Resolved)

THE ANTIBODY:
Smoke tests after every
deploy.

VISUAL DIAGRAM

DATED:

DATE:

INC-002: THE VALUE OF EXTERNAL EYES

DATED: [REDACTED]
DATE: [REDACTED]

INCIDENT DATA

TRIGGER:
Pre-existing Legacy

DETECTION:
User A
(External Reviewer)

SEVERITY:
P3-as-P1

THE ANTIBODY:
Vulnerability classification
framework.

VISUAL CONCEPT

INTERNAL EYES NORMALISE. EXTERNAL EYES IDENTIFY.

INC-003: THE URL CREDENTIAL LEAK

DATED:
DATE:

INCIDENT DATA

TRIGGER:
Agent (Dev) logic error

DETECTION:
Human (13:50)

TIME TO FIX:
~100 Minutes

THE ANTIBODY:
Hotfix branch discipline,
153 new tests.

VISUAL CONCEPT

RULE: AUTHENTICATION CREDENTIALS MUST NEVER TRAVEL IN URLS.

Impact: P2-as-P1 Data Breach.

Remedy: Retroactive S3 deletion removed data before  access occurred.

Antibody: Voice interview workflows and the 
 convention for all documentation.

CONFIDENTIAL

CODIFYING THE LESSONS: NEW PATTERNS

DATED: 
DATE: 

PATTERN 23

EVERY INCIDENT IS PRACTICE

Incidents are not failures; they are unplanned **drills**. The goal is fast detection, fast response, and permanent learning.

PATTERN 24

DOCUMENTATION IS A THREAT VECTOR

Documentation pipelines require the same security controls as code pipelines. Real values are the exception;  is the default.

IMMUNE SYSTEM CAPABILITIES UNLOCKED

DATED: [REDACTED]
DATE: [REDACTED]

- [UNLOCKED] → Data breach notification process (Documented)
- [UNLOCKED] → ICO assessment framework (Tested)
- [UNLOCKED] → Voice interview workflow (Validated x2)
- [UNLOCKED] → Credential scanning awareness (Explicit)
- [UNLOCKED] → 153+ new tests & Negative test patterns

Every row represents a capability that did not exist prior to these incidents.

SYSTEM EVOLUTION: BEFORE VS. AFTER

DATED: [REDACTED]

DATE: [REDACTED]

STRENGTHENED

BEFORE INC-001

- Roles with incident experience: 0
- Data breach process: Non-existent
- Decisions logged: ~60

AFTER INC-004

- Roles with incident experience: **10**
- Data breach process: **Fully Documented**
- Decisions logged: **82**

THE FUTURE STATE: ANTIFRAGILITY

DATED: [REDACTED]

DATE: [REDACTED]

We do not aim for zero incidents. We aim for fast detection, rapid response, and zero repeated errors.

DATED: [REDACTED]

DATE: [REDACTED]

STATUS: RESOLVED

The digital immune system is materially stronger than we found it.

Version: v0.4.16

Date: 19 February 2026
