

Date: 19 Feb 2026

Classification: B3 as B1 / D1

Status: Investor Opportunity Continuation

PKI Strategy & Investor Deployment

From Feature to Identity Infrastructure

Follow-on to v0.4.12 business incident.

THE STRATEGIC MANDATE

VALIDATION TO VISION

The investor meeting validated PKI as the strategic direction, not just a feature.

THE INDUSTRY TIDES ARE TURNING

WHY NOW?

- Browser vendors investing in credential management
- Passkeys replacing passwords
- Certificate-based auth maturing

MAPPING THE TERRAIN (PHASE I)

THE KNOWN UNKNOWN

INTERNAL INNOVATION: THE SANDBOX STRATEGY

PHASE II: THE SAFE HARBOUR

We build on the Admin side first. It is the safe place to experiment, iterate, and break things.

PUBLIC PRODUCT

Locked
Stable
Risk Averse

ADMIN INTERFACE

Dynamic
Experimental
Safe to Fail

- FastAPI Client Certs
- PKI Management UI
- LocalTrnncenti
- LocalStorage Key Mgmt

THE CERTIFICATE IS THE IDENTITY

Technical Architecture Flow

- 1. AuthN: Browser presents client cert -> Server validates.
- 2. AuthZ: Admin cert = Admin access. User cert = User access.
- 3. Encryption: Extract public key from cert for E2EE.

ZERO-KNOWLEDGE KEY MANAGEMENT

Short-term transfer, not long-term vault.

- 1. Generate (RSA/ECDSA/Ed25519)
- 2. View (LocalStorage)
- 3. Export/Import (Share via SG/Send)
- 4. Generate Certs (Self-signed/CSR)

Server never sees private keys.

Provocation: The 'Send the Private Key' Mode

A Radical Shift for
Exploration

Evaluate: Is this a genuine security
advantage (Forward Secrecy) or complexity
without benefit?

Symmetric Model

Traditional shared secret exchange.

Versus

Ephemeral PKI Model

PHASE III: THE INVESTOR DEPLOYMENT

"Nothing proves it as much as showing we can."

A dedicated, branded instance for the investor group.

GENERIC SG/SEND

WHITE-LABEL
EXECUTION

INVESTOR INSTANCE

Infrastructure as a Service

Inter

- Multi-region (EU, US, AP)
- Ephemeral (Spin up -> Use -> Tear down)
- Isolated Stack

Demonstration Scenarios

Versatility for the Investor

The Corporate
Instance

Branded, persistent,
custom domain.

The Data Room

Due diligence.
Expiring links.
Download limits.

The Burner

Ephemeral. Spun up
for a deal, torn down
upon close.

Unit Economics & Pricing Floor

The Accountant's View

Define the floor price before the next meeting.

From Demo to Marketplace

The Ecosystem Roadmap

Today's 'Investor Demo' is
tomorrow's 'Partner Template'.

'Send Private Key'
Mode

THE FINAL VISION

We are building the engine for secure, sovereign identity.

The certificate is the identity.

IMMEDIATE FOCUS ON D1 TASKS.
