

INCIDENT HANDLING SERIES: FULL TEAM ACTIVATION

DATE: 12 FEB 2026 PRIORITY: HIGH — DEFINES OPERATIONAL MATURITY
FROM: HUMAN (PROJECT LEAD) REF: DOCTRINE_UPDATE_v0.2
TO: ALL ROLES (VIA CONDUCTOR)

We are shifting our operational stance. This briefing initiates the new doctrine for how we detect, investigate, respond to, and learn from incidents.

THE STRATEGIC DOCTRINE: P3-AS-P1

INPUT: MINOR INCIDENT (P3)

Routine Error. Glitch.
Near-miss.

TREAT AS

PROCESS: MAJOR INVESTIGATION (P1)

Full Forensic Analysis. Root Cause.
Blast Radius. Strategic Fix.

Why 'what could have happened' matters more than 'what happened'.

- **Strategic Case:** Treat minor incidents as full investigations to build capability.
- **Focus Areas:** Near-miss analysis, 'second stories', paths not taken, and calibrating defences to real threat actors.
- **Source:** v0.2.16__briefs__incident-philosophy-p3-as-p1.md

THE METAPHOR: FOOTBALL TEAM

THE 5x MULTIPLIER

- Incidents are the Best Time to Fix Things.
- Productivity: 2 weeks of incident response > 2 months of normal ops.

THE FIX LIST [Observability] [Runbooks] [Dashboards] [Knowledge] [Architecture] [Tests]

THE INTEL: 5-PART SERIES

Source material located in </project/v0.2.16/briefs/>

PHASE 1: KNOWLEDGE INGESTION

	1. Philosophy	2. Practice	3. Payoff	4. Simulation	5. Team
CISO, GRC, DPO, AppSec	[READ]	[READ]	[READ]	[READ]	[READ]
Conductor, DevOps, Journalist, Historian	[READ]	[READ]	[READ]	[READ]	[READ]
All Other Roles	[READ]	[READ]	[context]	[context]	[READ]

LIBRARIAN ACTION: Catalogue series and create official reading guide.

PHASE 2: UPDATE ROLE.MD

```
1  ## Incident Response
2
3  As the [Role Name], during an incident I am responsible for...
4
5  ### Triggers
6  * List specific signals I watch for...
7
8  ### Outputs
9  * List artefacts I produce...
10
```

THE DIRECTIVE:

Every role must add this section.

THE CONSTRAINT:

Write in your own voice. Internalise the philosophy.

- The Advocate sounds like the Advocate.
- The Dev sounds like the Dev.

GOAL:

When activated, you re-read your own file to know exactly what is expected of you.

DESIGNING YOUR INCIDENT PROFILE (INPUTS)

Detailed requirements for ROLE.md

DESIGNING YOUR INCIDENT PROFILE (OUTPUTS)

Detailed requirements for ROLE.md

OUTPUTS

1

PRODUCTION

What artefacts do you generate?

- Log extracts, Briefings,
- Timeline entries,
- Blast radius maps,
- Framework mappings.

2

LEARNING

How does the incident feed back into normal work?

- Improvement backlog,
- Updated runbooks,
- New monitoring.

THE PREPARATION SPECTRUM

THE TASK: Define how your role moves incident types rightward along this spectrum.

CONCEPT: We don't just solve the incident; we automate the resolution for next time.

PHASE 3: BUILDER ASSIGNMENTS

1

CONDUCTOR

- Design Escalation Graph (triggers, timeouts)
- Define Assembly Process

2

CISO

- Develop P3-as-P1 trigger framework
- Create 'Do No Harm' checklist

3

DEVOPS

- Inventory on-demand data
- Build automated triage capabilities

4

ARCHITECT & SHERPA

- Create World Model for simulation
- Build Trail Query capability

PHASE 3: ANALYST ASSIGNMENTS

1

JOURNALIST

- Develop multi-audience briefing templates
- Create Incident-as-news-story format

2

HISTORIAN

- Define Timeline format
- Establish Incident Register

3

LIBRARIAN

- Build the Incident Library
- Index by trigger, severity, and role

4

CARTOGRAPHER

- Prepare Blast Radius templates
- Design Incident Visualisation tools

PHASE 3: GOVERNANCE & TRUST ASSIGNMENTS

FRAMEWORKS

- **GRC**: Map organic framework (MITRE/NIST/ISO) — expanded one incident at a time.
- **AppSec**: Establish Systemic Weakness Register.

NOTIFICATIONS

- **DPO**: Prepare ICO and Data Subject notification templates.
- **Ambassador**: Process for turning resolved incidents into trust-building content.

QUALITY & USERS

- **QA**: Establish incident-derived test tracking.
- **Advocate**: Define user-impact assessment template.

PHASE 4: THE FIRST TEST

EVENT: TOTAL AWS COMPROMISE
TYPE: TABLETOP EXERCISE

1. **EXECUTION:** Must use the new Doc 2 process.
2. **BACKBONE:** Use "Issues FS" (File System).
3. **LEADERSHIP:** CISO Leads. Conductor Coordinates.
4. **AGENTS:** Participate exactly as defined in your updated ROLE.md.

PHASE 5: THE STORY & THE AUDIT

JOURNALIST DIRECTIVE

Cover the Series: Write an article introducing the philosophy.

Key Message: "We treat minor incidents as major investigations to build operational capability."

THE AUDIT

Review incoming ROLE.md updates.

Quality Control: Are roles genuinely internalising the philosophy, or just parroting?

Action: Highlight gaps.

FINAL COMMAND: MUSCLE MEMORY

The ROLE.md update is not paperwork. It is your programming.

When an incident hits, your file must tell you:
What to watch. What to do. What to learn.

> LET'S GO.
