

TURNING CRISIS INTO CAPITAL

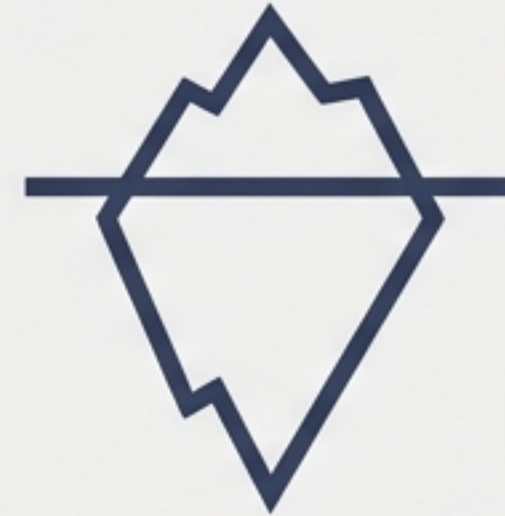

The SGraph Send Incident Handling Series & Operational Playbook.

THE STRATEGIC SHIFT

THE GOAL

Shift from viewing incidents as rare emergencies to viewing them as the single best opportunity for systemic resilience.

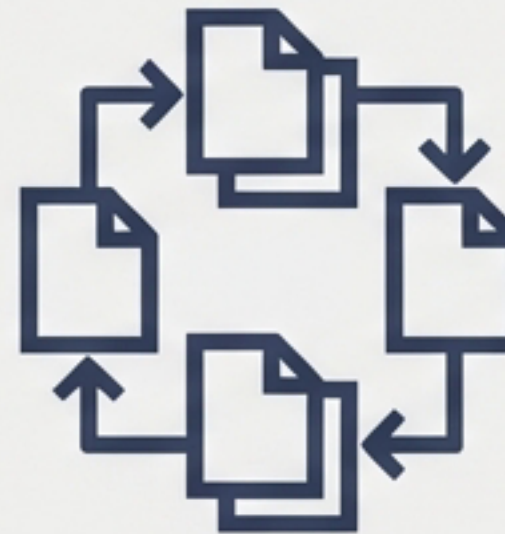

THE METHOD

Treat minor (P3) incidents with critical (P1) rigour. Analyse 'what could have happened' not just 'what happened'.

THE PAYOFF

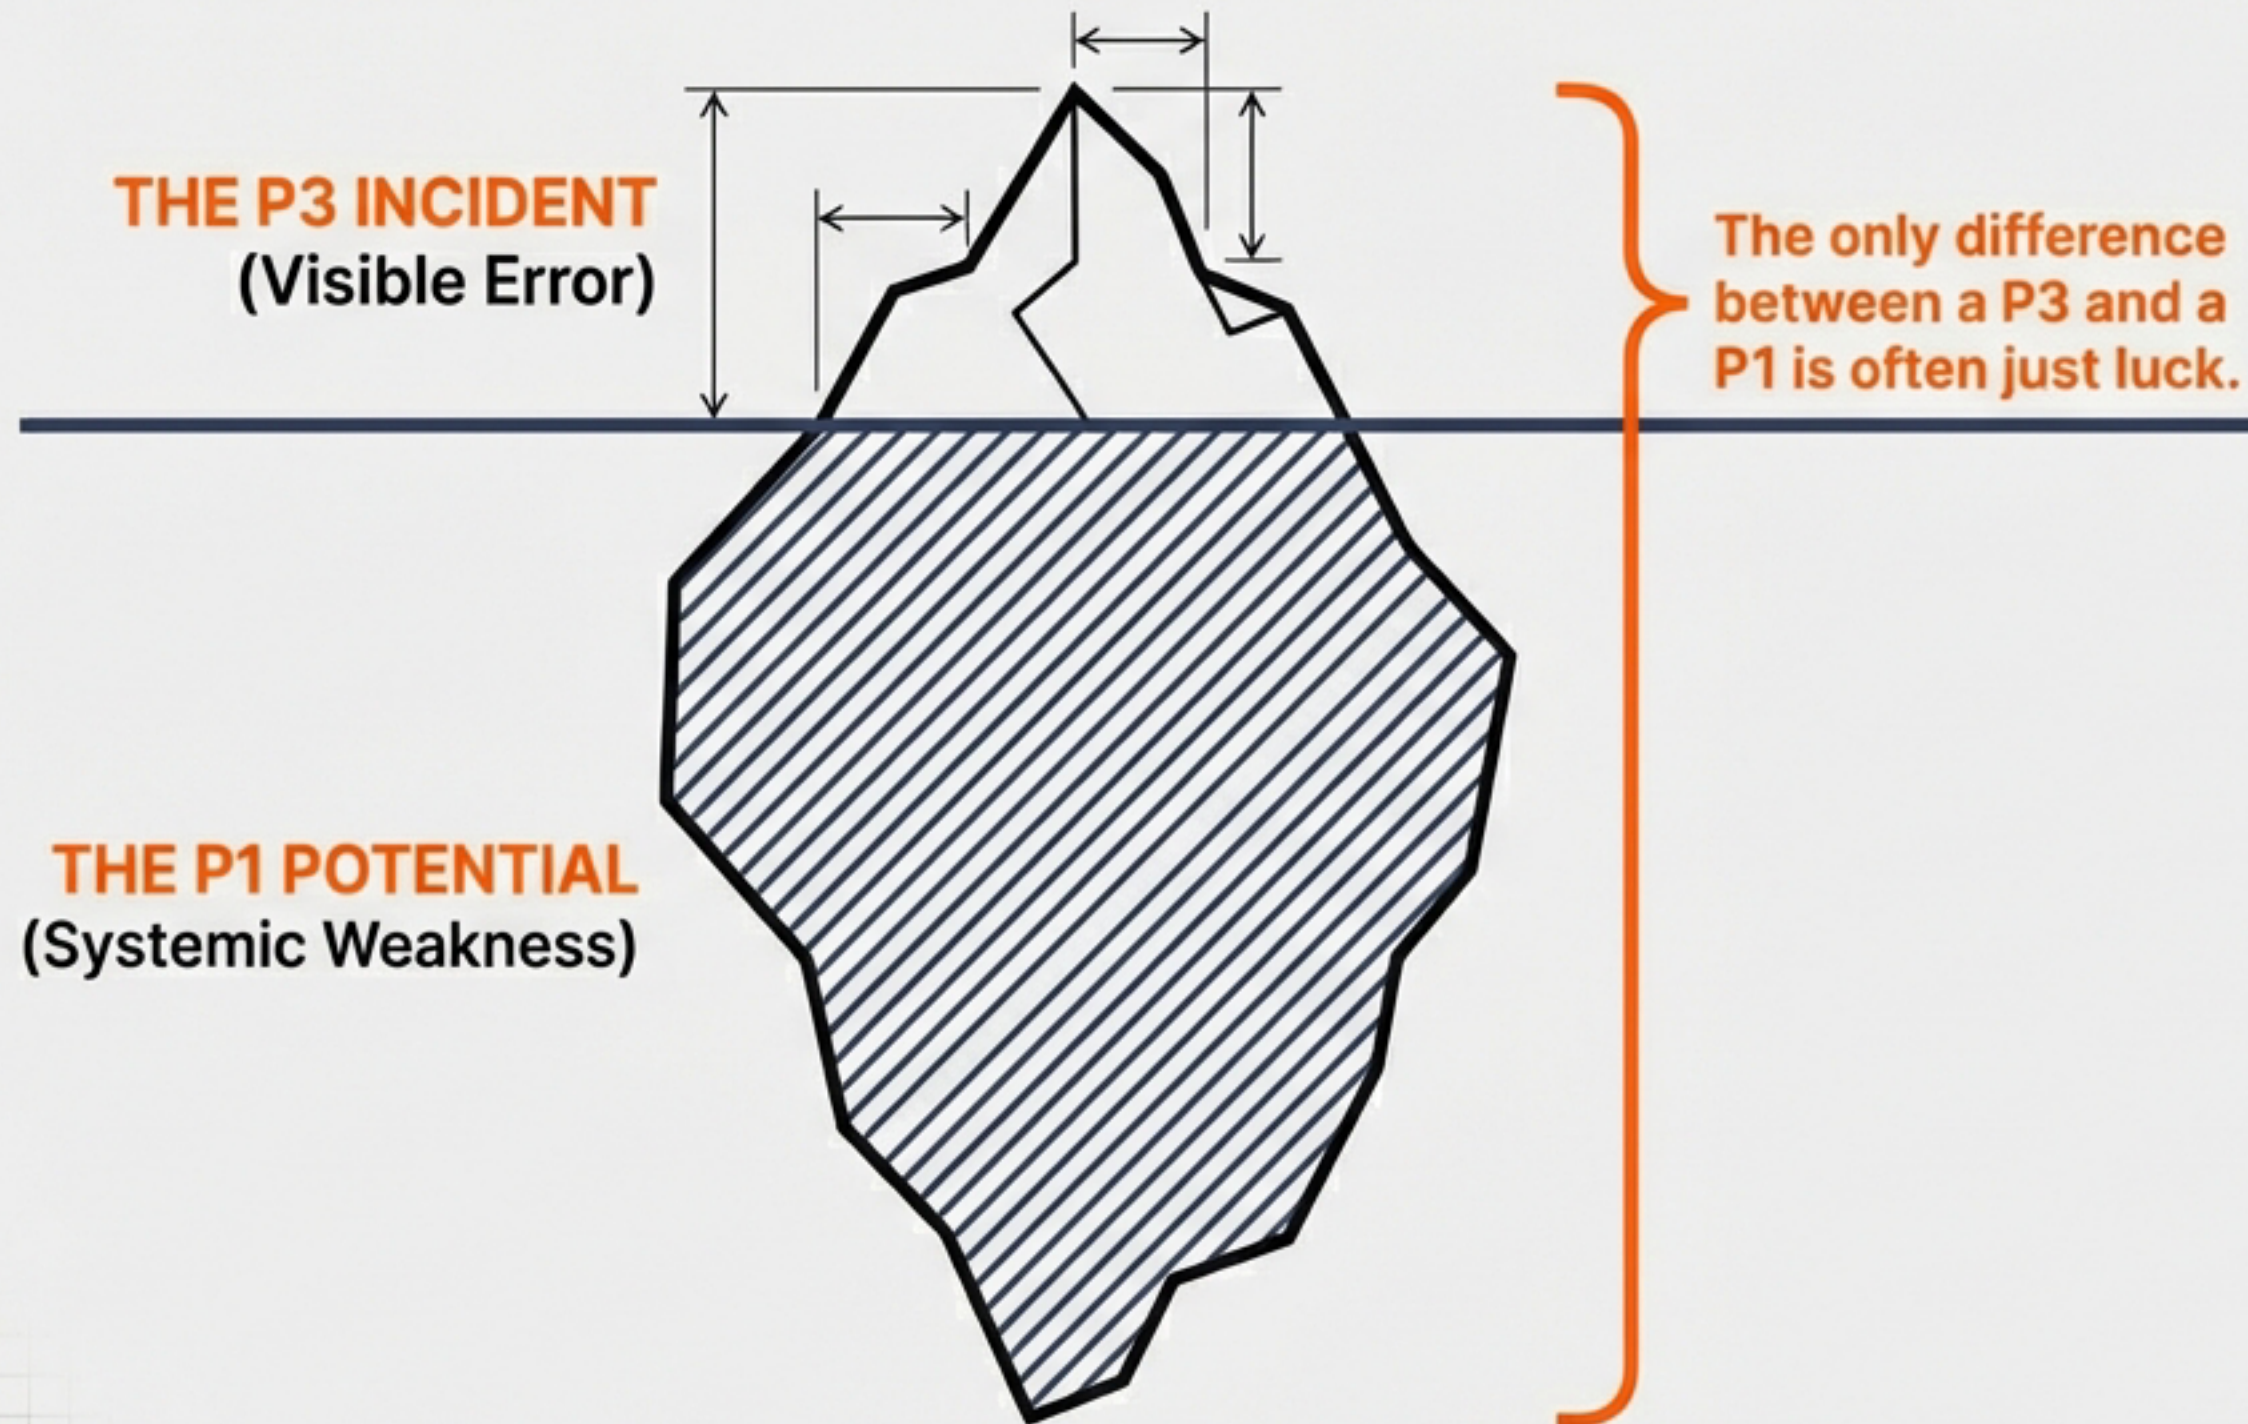

The 5x Multiplier.
In 'War Time' (incidents), friction disappears.
2 weeks of incident work =
2 months of normal progress.

THE STRUCTURE

- 5 Core Documents
- 5 Command Phases
- 1 Unified 'Football Team' Model

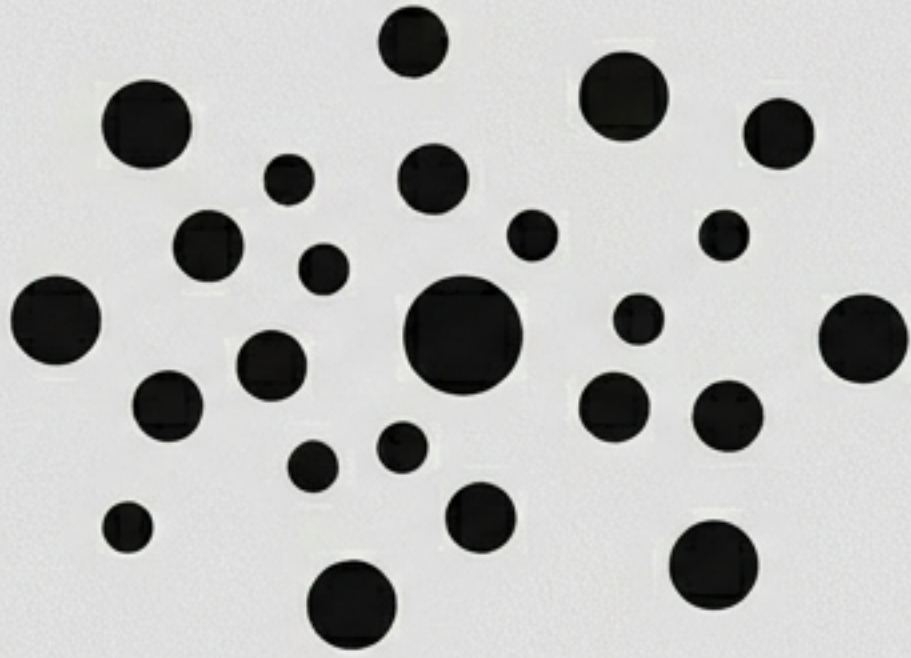

LUCK IS NOT A STRATEGY: P3-AS-P1

THE SECOND STORY
We must analyse the full union of possible damage, not just the actual damage. We look past the human error to find the systemic gap that allowed the error to occur.

THE BEST TIME TO FIX THINGS IS NOW

PEACE TIME (NORMAL OPS)

- Technical debt is debated
- Prioritisation takes weeks
- Resources are scarce

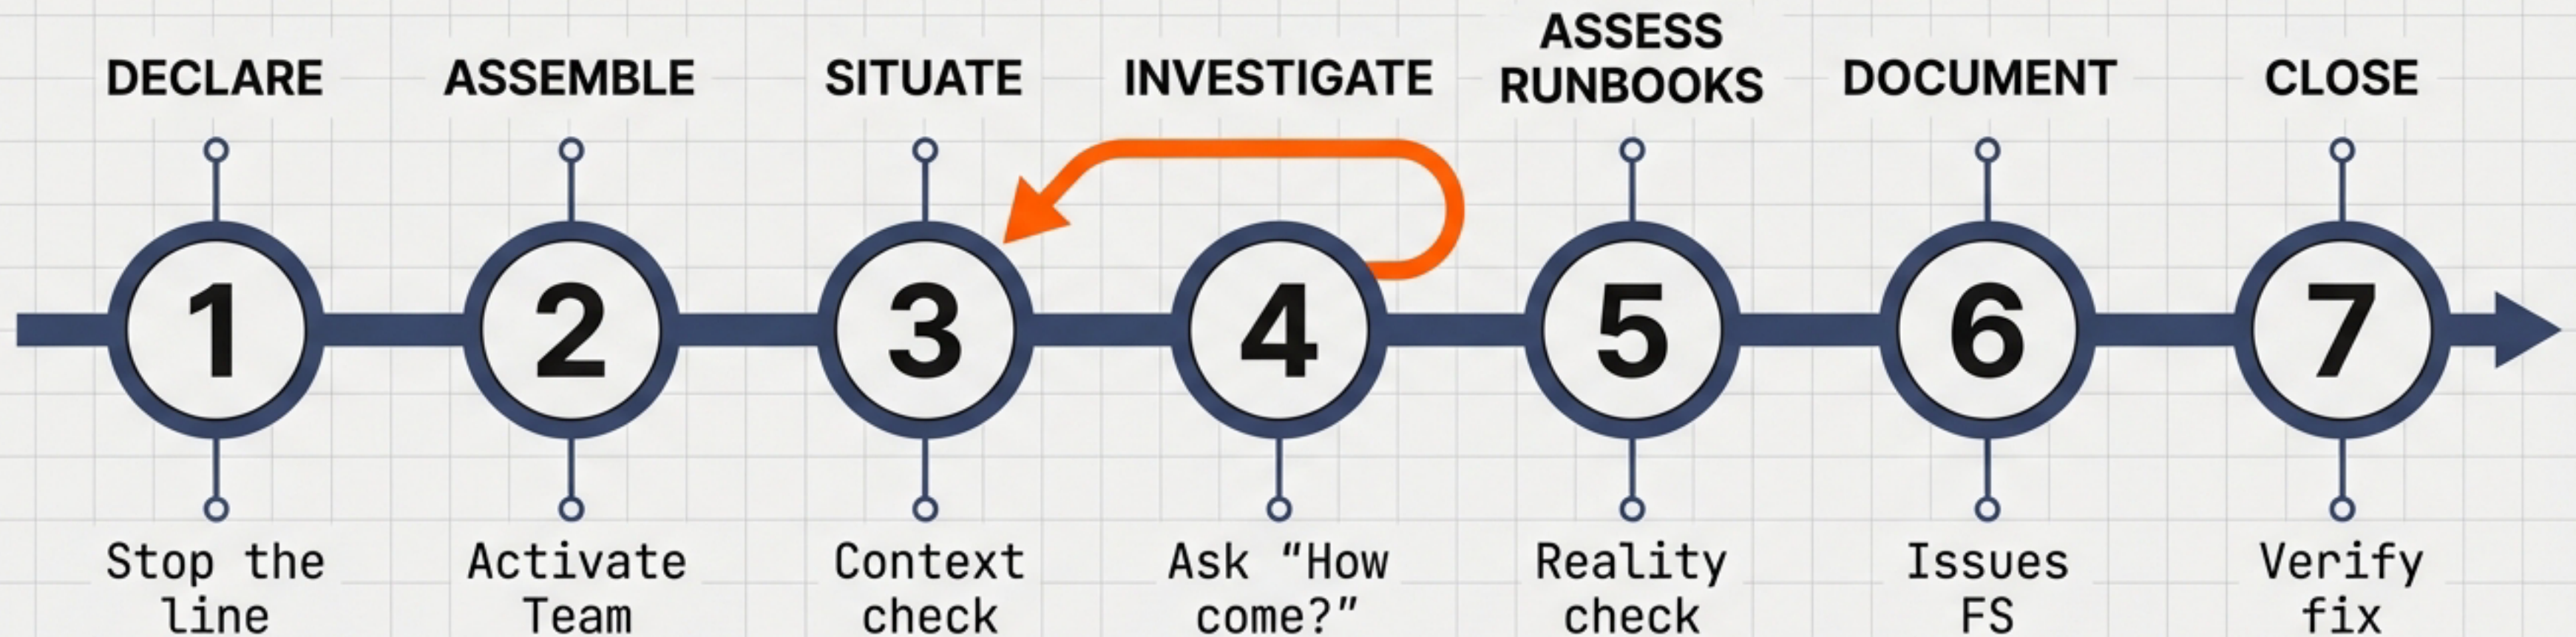

WAR TIME (INCIDENT OPS)

5x MULTIPLIER

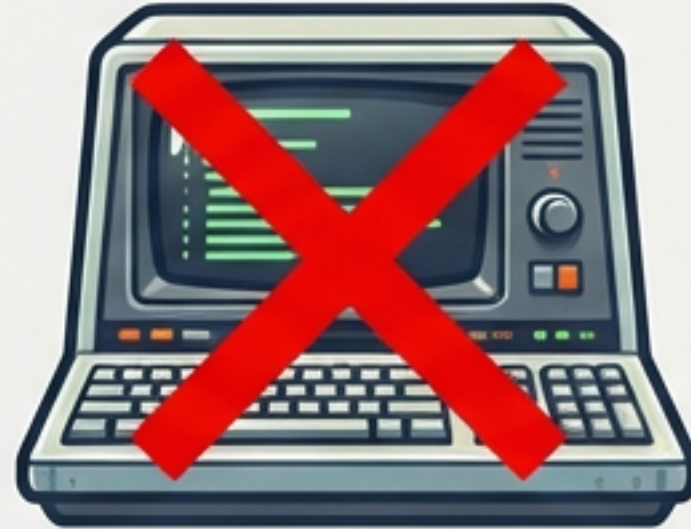

2 Weeks of Incident Ops = 2 Months of Normal Ops.

THE 7-STEP OPERATIONAL CYCLE

Reference: v0.2.23_briefs_incident-practice-running-p3-as-p1.md

NEVER ACT IN PRODUCTION FIRST

NO GUESSING

MODEL FIRST

SIMULATE

Model the response on a whiteboard or Issues FS before touching code.

COMMUNICATE

Generate multi-audience messaging from a single source (Issues FS).

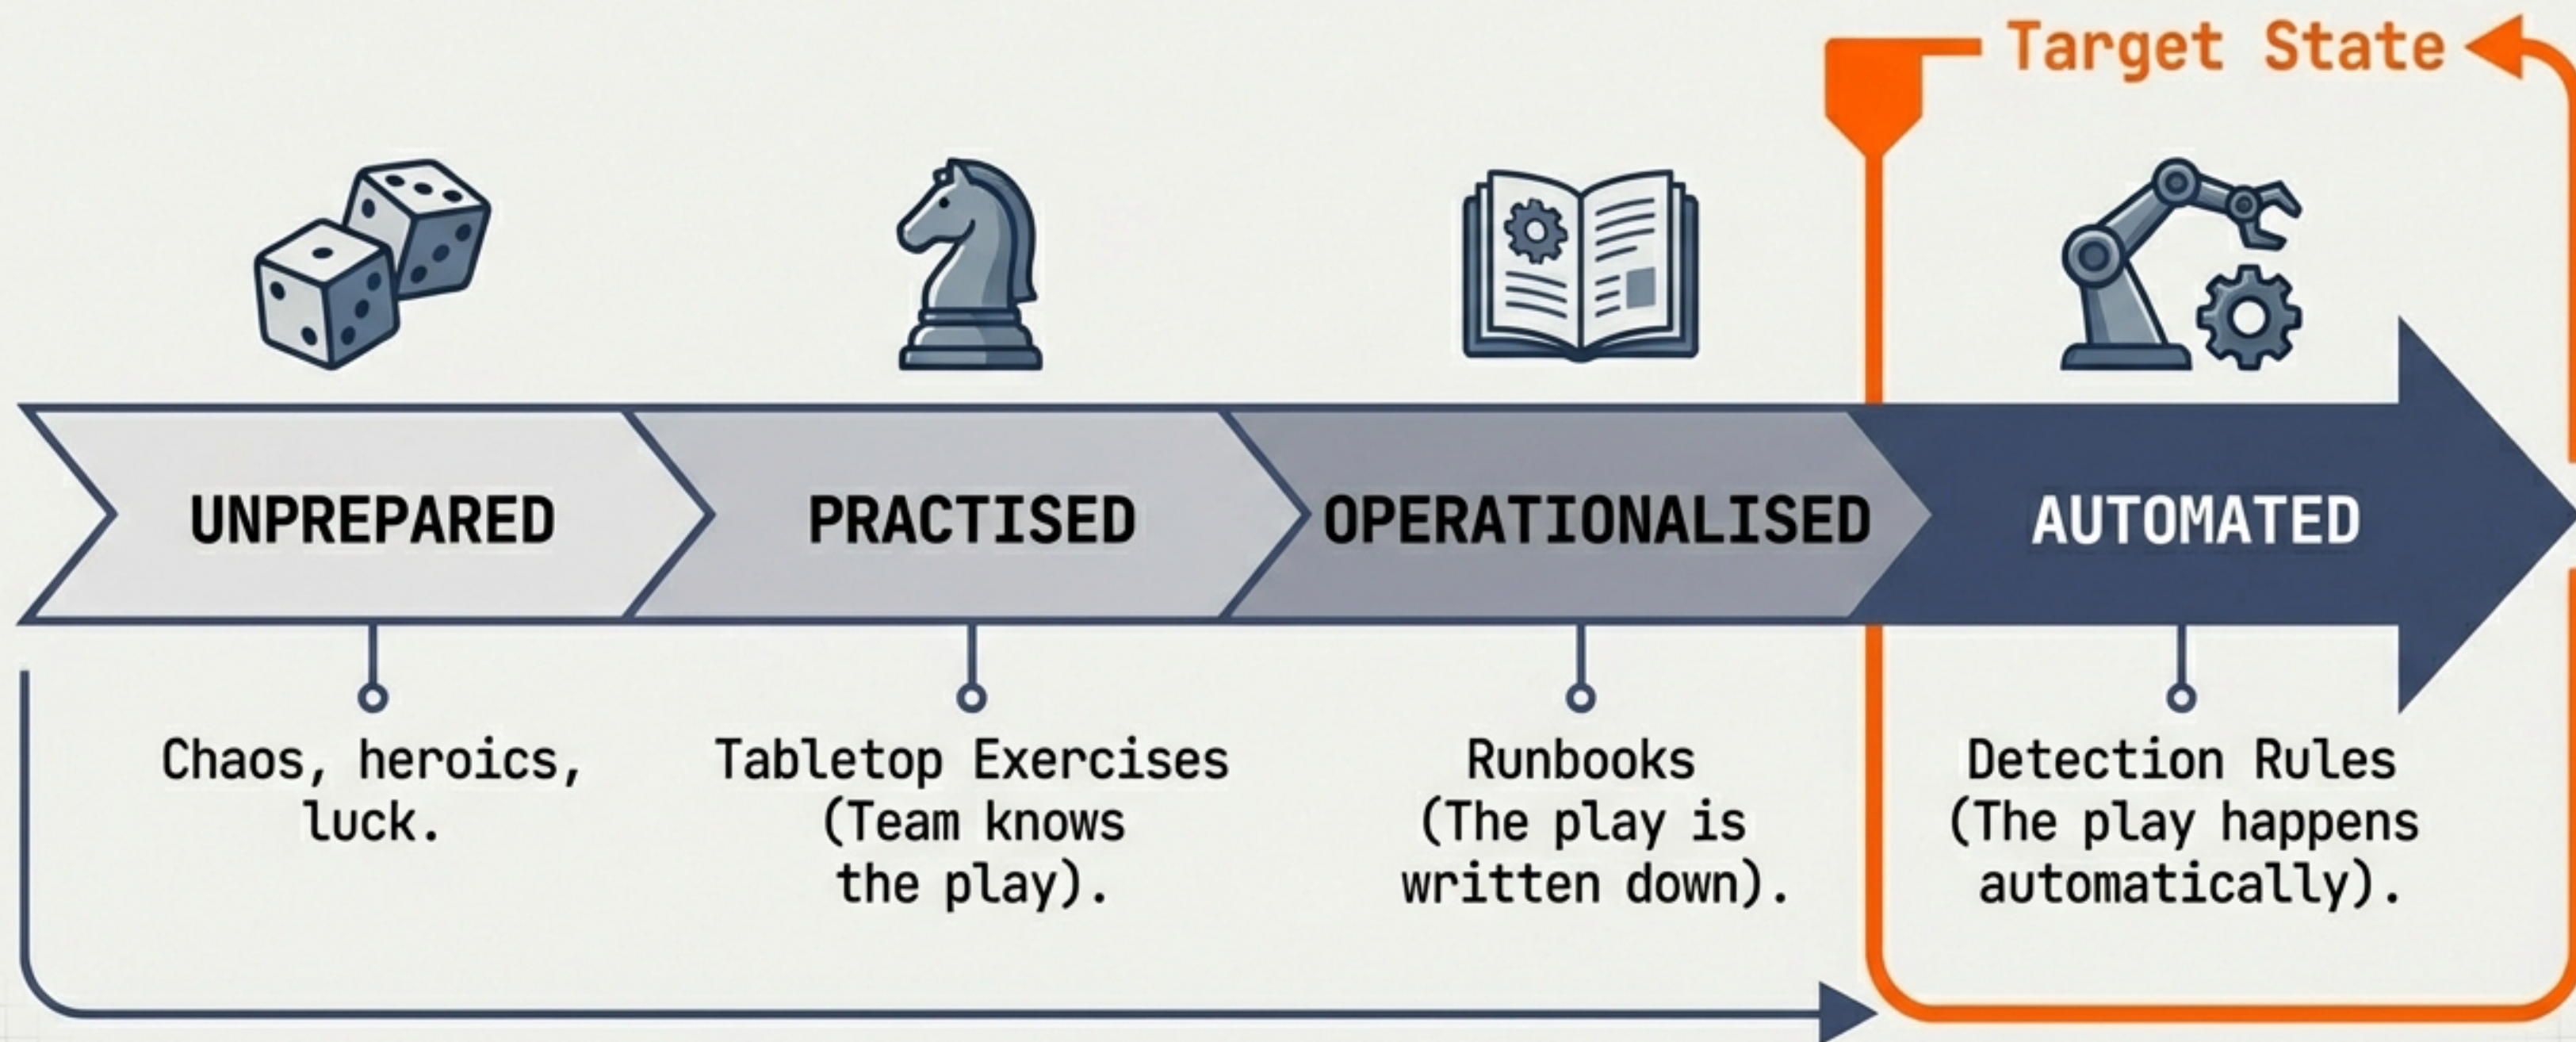

ESCALATE

Use pre-defined matrices to avoid panic decisions.

“WE DO NOT GUESS. WE MODEL.”

THE PREPARATION SPECTRUM

Practice makes real incidents look like exercises.

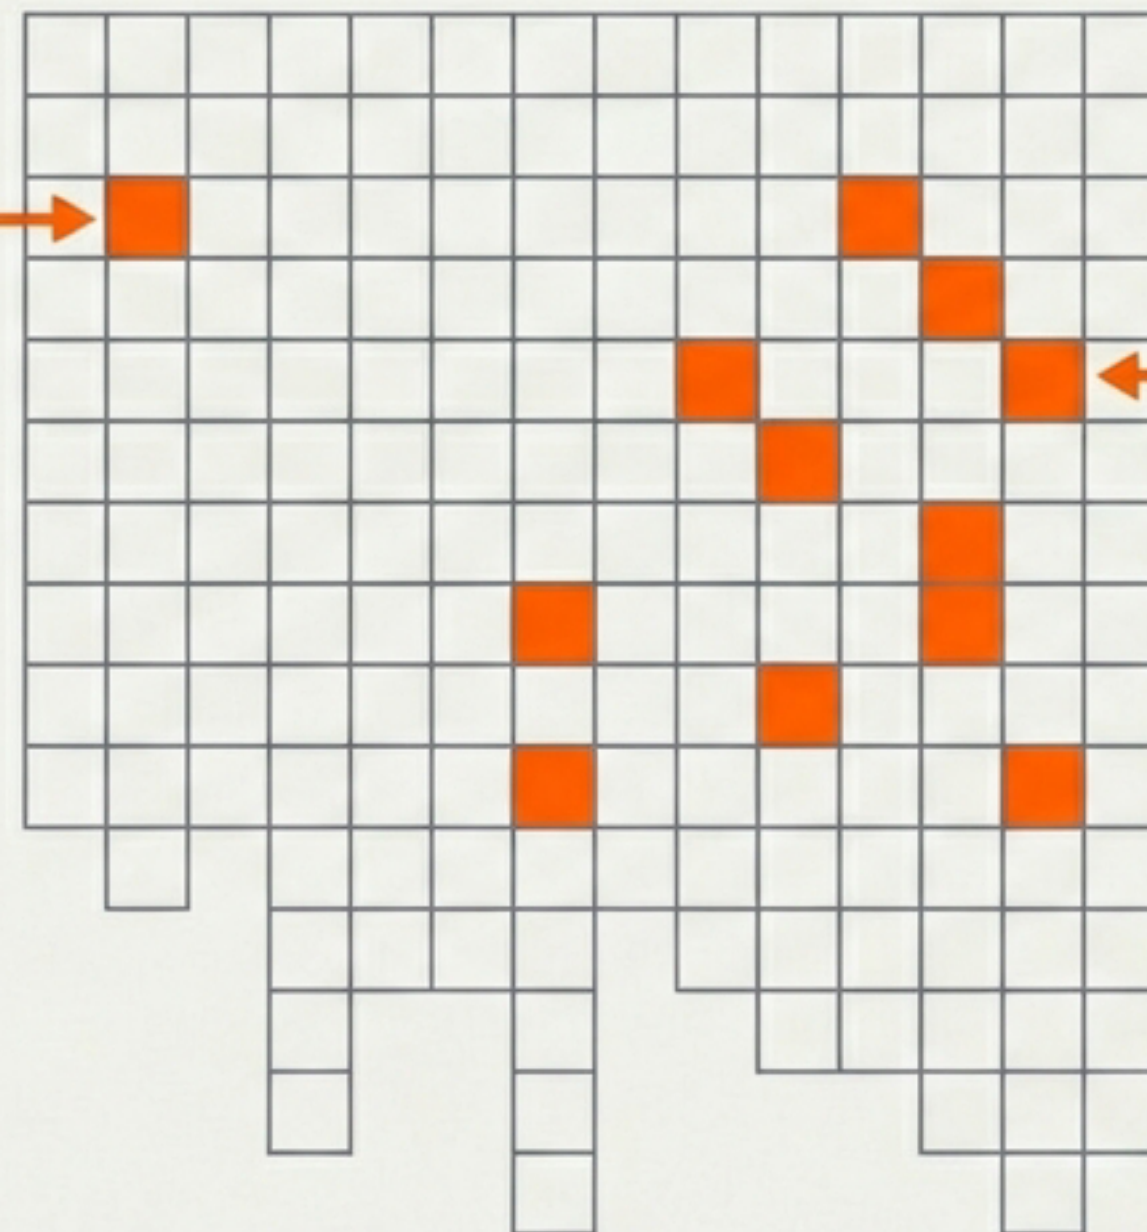

BUILDING COVERAGE, ONE INCIDENT AT A TIME

PROBLEM: Compliance fatigue.
Attempting to implement
MITRE/NIST as a giant
project fails.

SOLUTION: Organic Adoption.
Do not impose checklists.
Earn coverage through
actual incident handling.

INCIDENT #1: →
Map 1 technique.

← INCIDENT #20:
Organic
coverage
earned
through
practice.

THE UNIVERSAL QUESTION

“HOW COME THIS WAS POSSIBLE?”

Outcome: Blameless curiosity leads to systemic hardening.

ACTIVATION PROTOCOLS BY ROLE

CONDUCTOR

- Create incident-template.json
- Schedule sprints
- Manage Issues FS

CISO / APPSEC

- Run “second story” exercises
- Build escalation matrix

QA

- Add scenarios to test matrix
- Design tabletop exercises

DEVOPS

- Create incident detection checklists for CI/CD

JOURNALIST

- Prepare multi-audience drafts
- Create interactive replays

IMPLEMENTATION ROADMAP

1.7

YOU ARE HERE

PHASE 1 (CURRENT): Reading Guide + Catalogue produced by Librarian.

PHASE 2: Update ROLE.md files with ## Incident Response section.

PHASE 3: Extract actionable tasks to Issues FS.

PHASE 4: Execute Tabletop Exercise (Scenario: Total AWS Compromise).

PHASE 5: Publish Journalist article on philosophy.

RESILIENCE IS A PRACTICE, NOT A STATE

PRACTICE MAKES REAL INCIDENTS LOOK LIKE EXERCISES.

- ☒ Read the full series in `team/humans/dinis_cruz/briefs/`
- ☐ Update your `ROLE.md`
- ☐ Prepare for the next P3
