

FOOTBALL PILATES SCHEDULER

Privacy-First Coordination via M-Graph & Claude Teams

THE CHALLENGE: COORDINATING THE CHISWICK PILOT

CURRENT STATE: CHAOS

- **CONTEXT:** Coordinating Pilates for 35-60s across multiple football teams.
- **PAIN POINT:** Fragmented WhatsApp groups. Missed messages. Scheduling fatigue.
- **PRIVACY GAP:** Convenience currently requires data exposure.

FUTURE STATE: SIGNAL

- **CONCEPT:** A 'Signal for Scheduling'—Zero-Knowledge Architecture.
- **CORE PROMISE:** Server-blind coordination.
- **GOAL:** Frictionless utility. Absolute privacy.

THE VOTER EXPERIENCE: LOW FRICTION, HIGH PRIVACY

CORE PHILOSOPHY:

Click link. Pick time. Submit.

CONSTRAINT:

No Login. No Accounts.

X: 2048
Y: 480
SCALE: 1:1

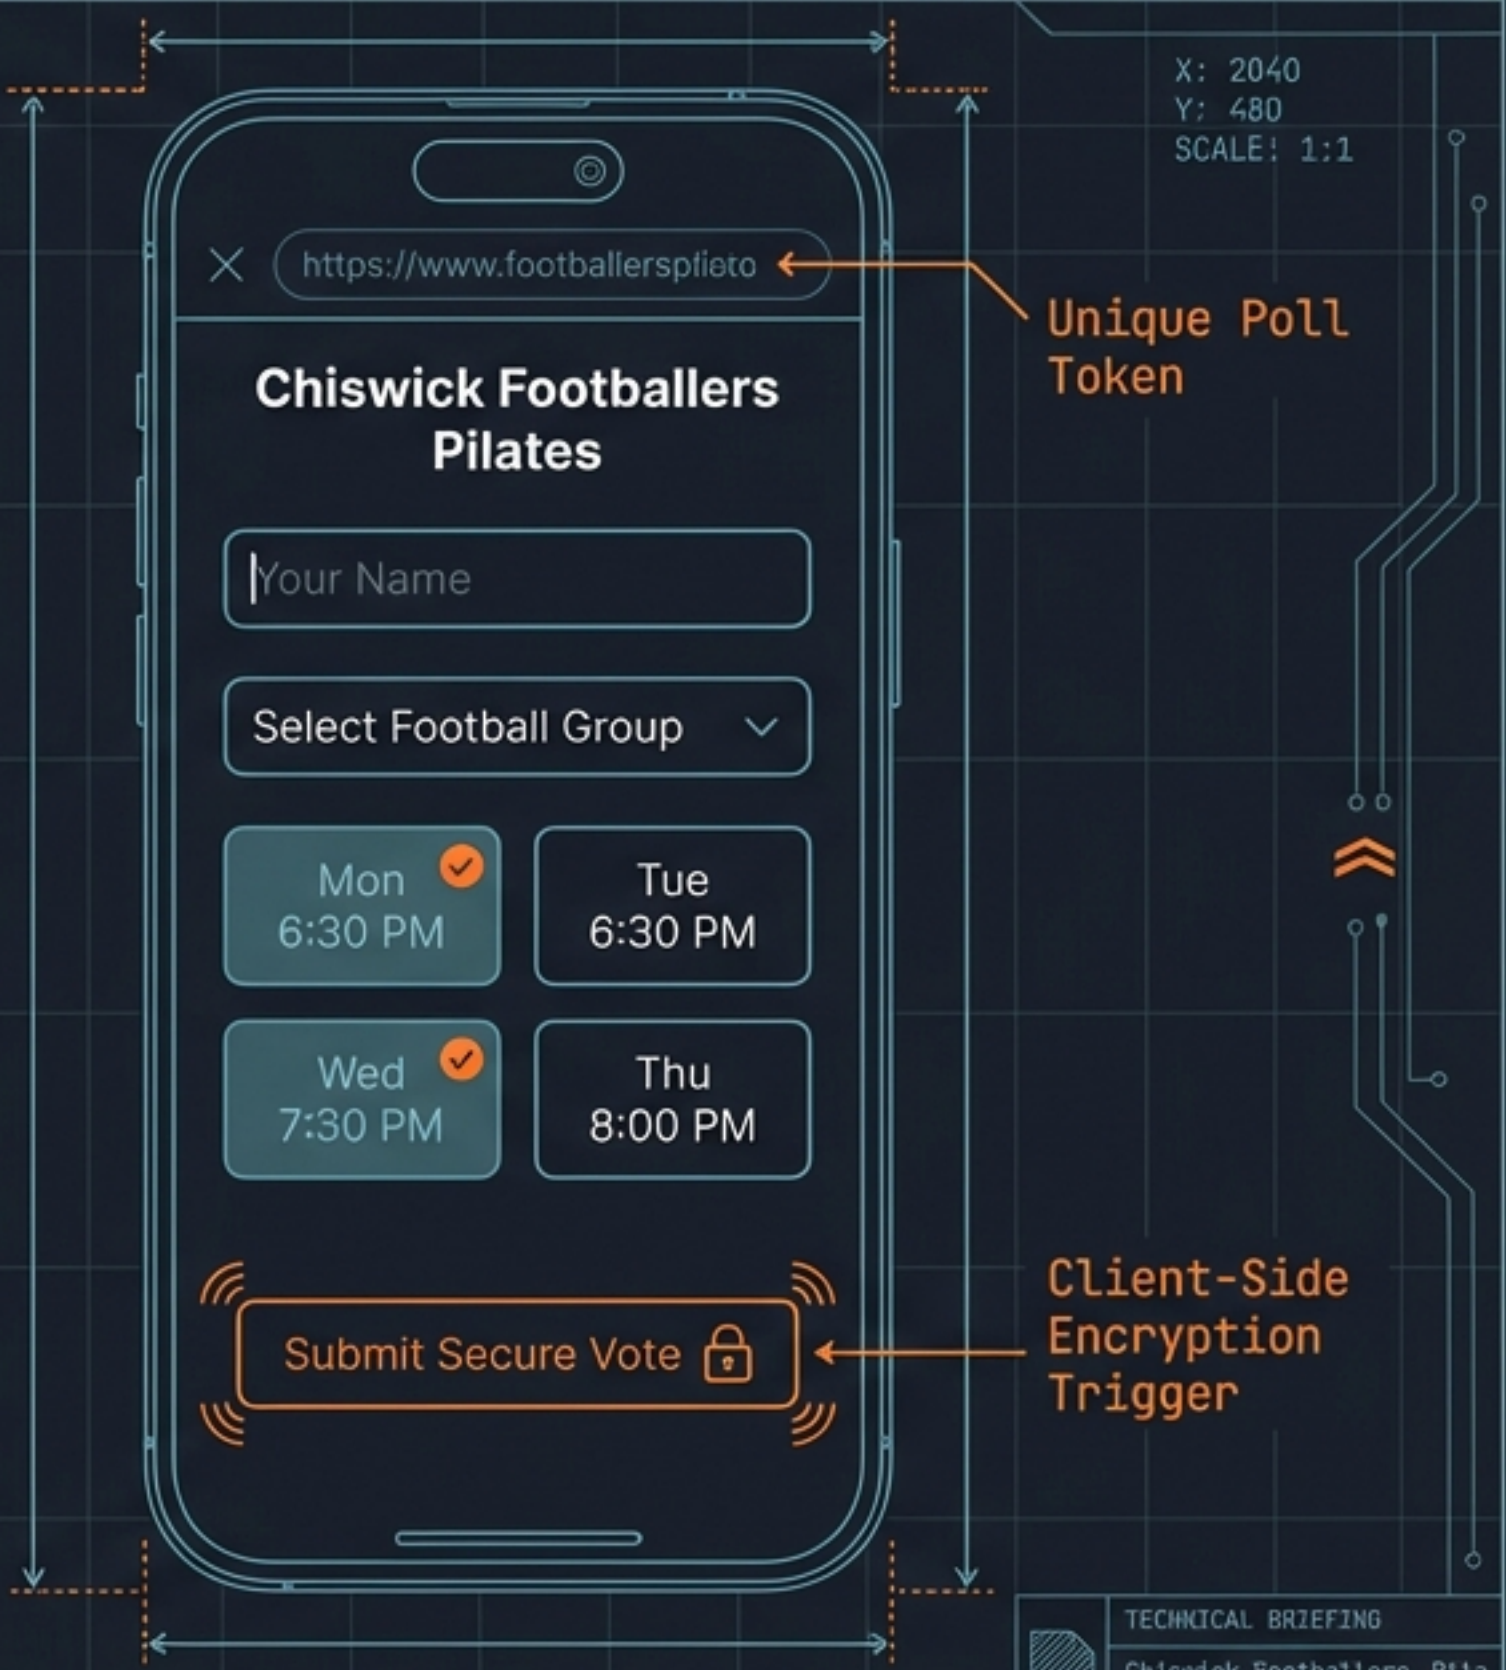

[VOT-1] **CONTEXT:** Immediate understanding of studio offer.

[VOT-2] **ACTION:** Enter name, select group, pick slots.

[VOT-4] **PERSISTENCE:** LocalStorage for future edits.

[VOT-6] **MOBILE:** Flawless WhatsApp in-app browser execution.

Chiswick Footballers Pita		
VERSION	1.1	

THE ORGANISER EXPERIENCE: TOTAL CUSTODY

CORE PHILOSOPHY:

The Admin is the sole data custodian.

MECHANISM:

Private key never leaves the device.

[ORG-1] CREATION:
Generate Poll + Keypair.

[ORG-3] DECRYPTION:
Client-side decode of names/times.

[ORG-5] ANALYSIS:
Visual breakdown of winners.

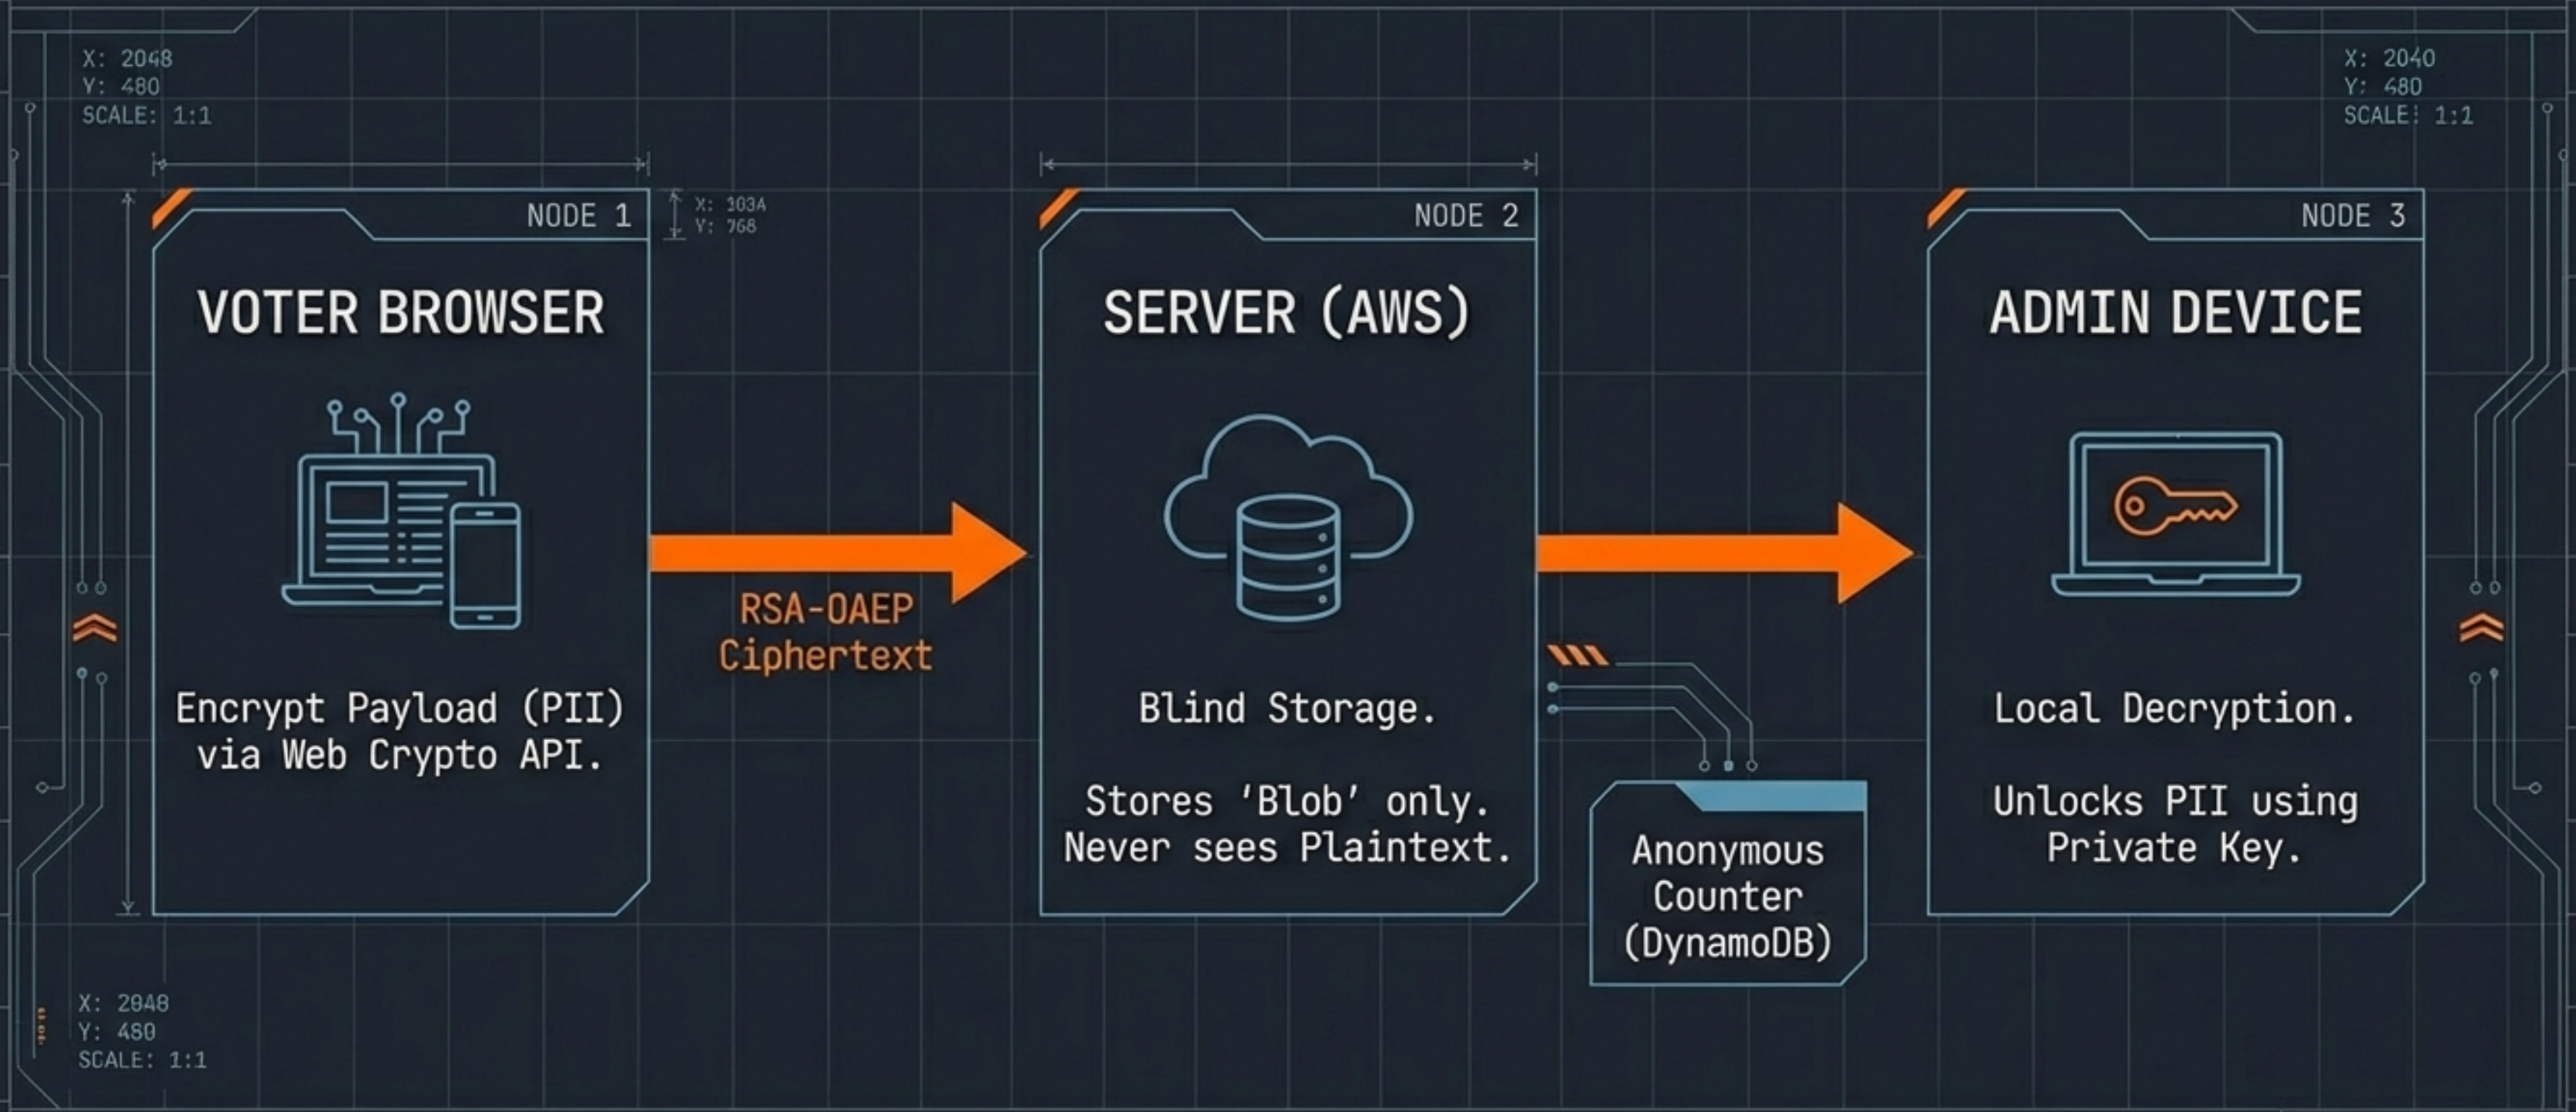

[ORG-7] LIFECYCLE:
Open/Close poll status.

VERSION 1.1

X: 2048
Y: 480
SCALE: 1:1

THE CONDUCTOR: GUARDIAN OF FLOW

X: 2048
Y: 1152
SCALE: 1:1

IDENTITY

The only role with a full-ecosystem view.

X: 104
Y: 100

X: 388
Y: 152

CORE MISSION

FLOW. Moving work from inception to completion without stalling.

KEY PRINCIPLES

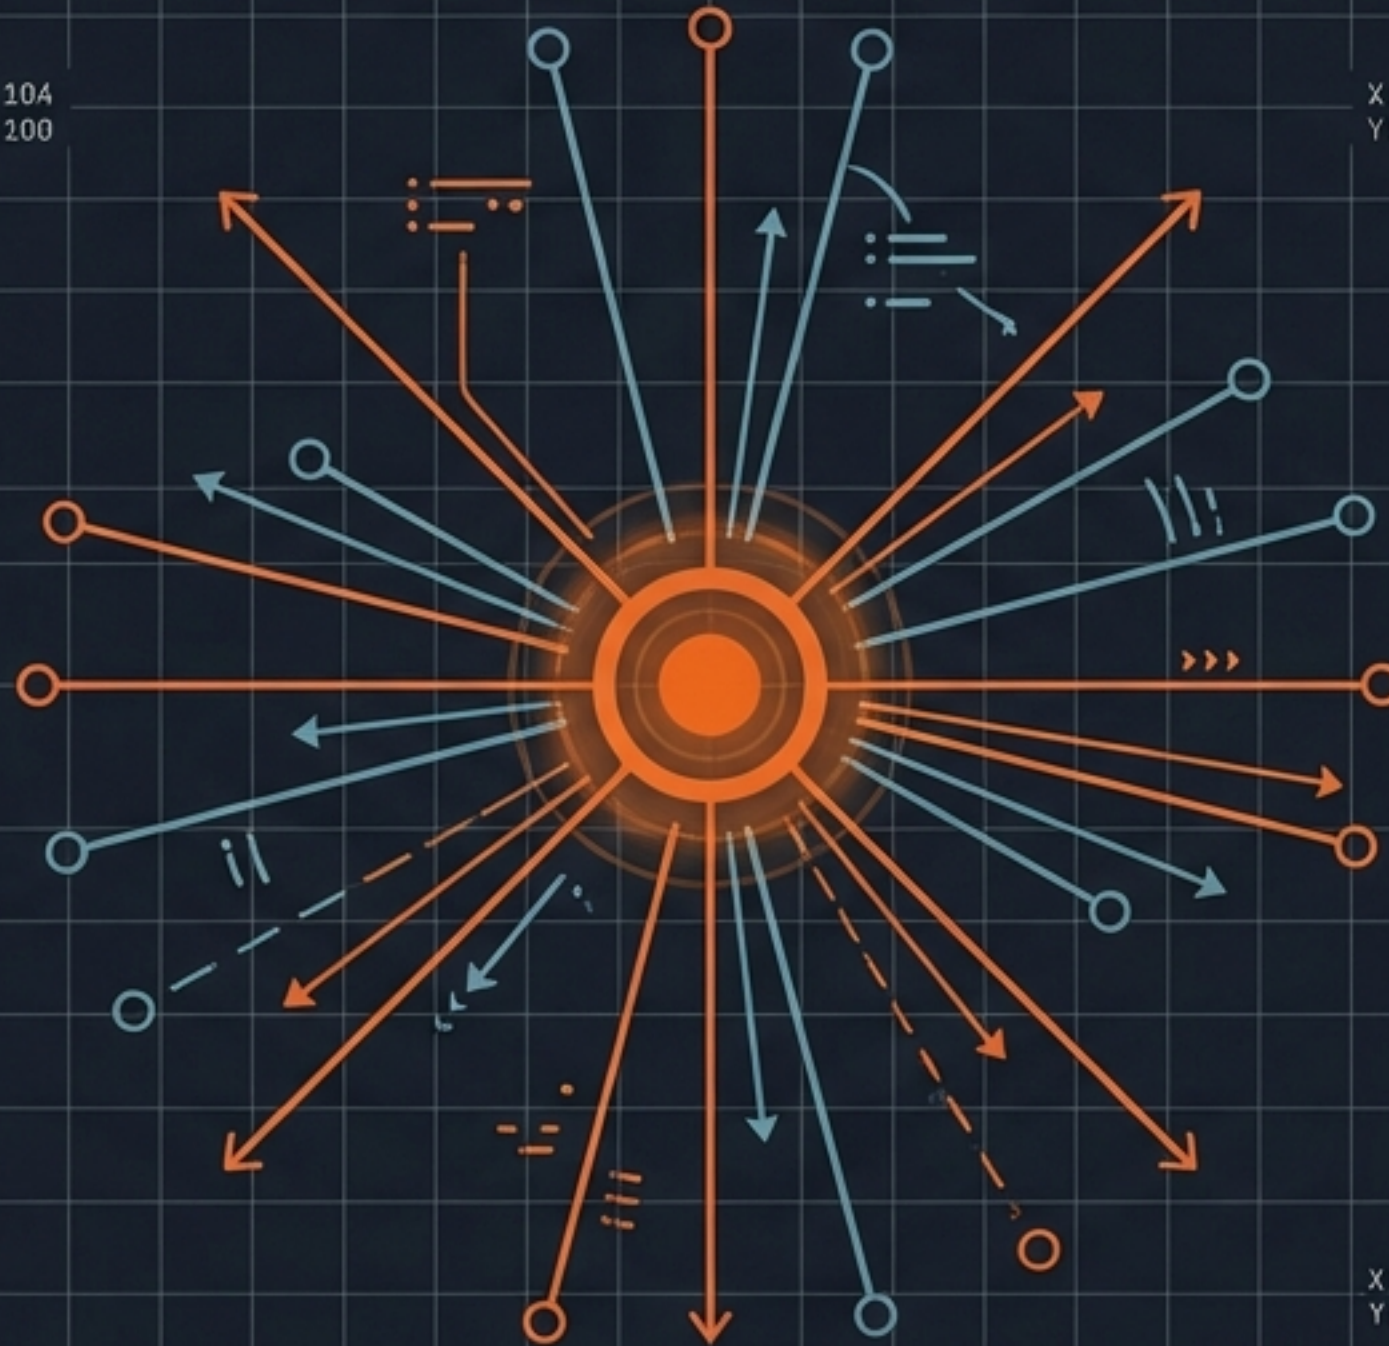

1. VISIBILITY: Global state awareness.
2. PRIORITY: Importance over urgency.
3. BLOCKING: A blocked role is a wasted role.

X: 2048
Y: 1252

LIMITATION

Does not write code.
Clears the path for those who do.

THE NERVOUS SYSTEM

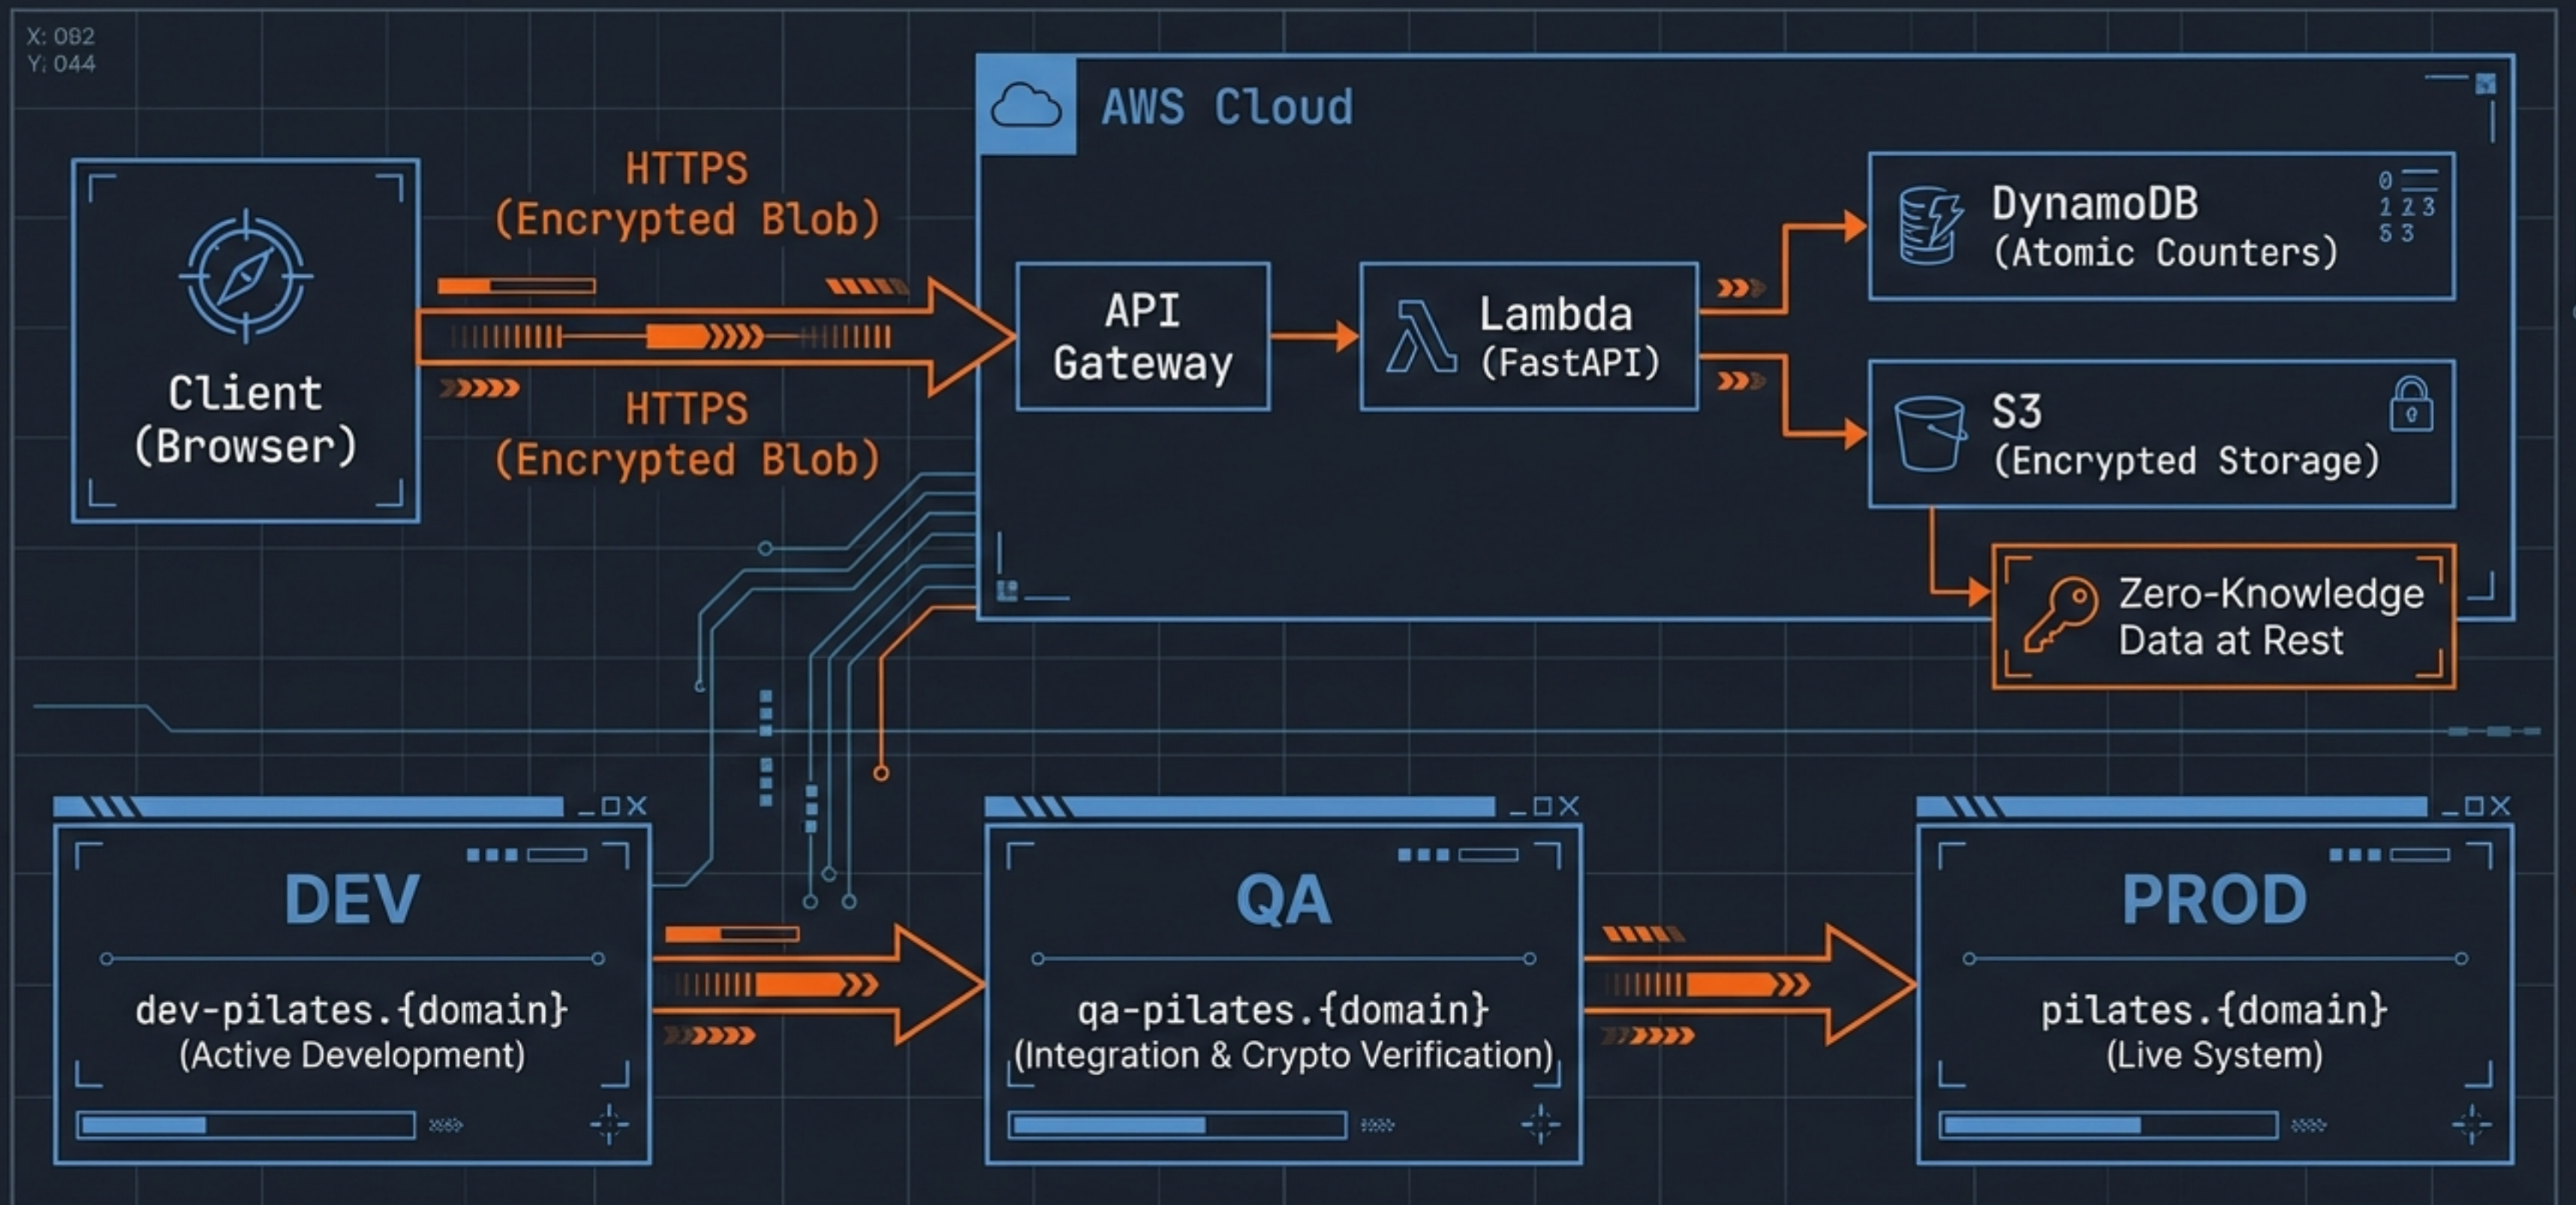

All state is stored in the file system.
If it's not in the tree, it doesn't exist.

ISSUE TYPES:

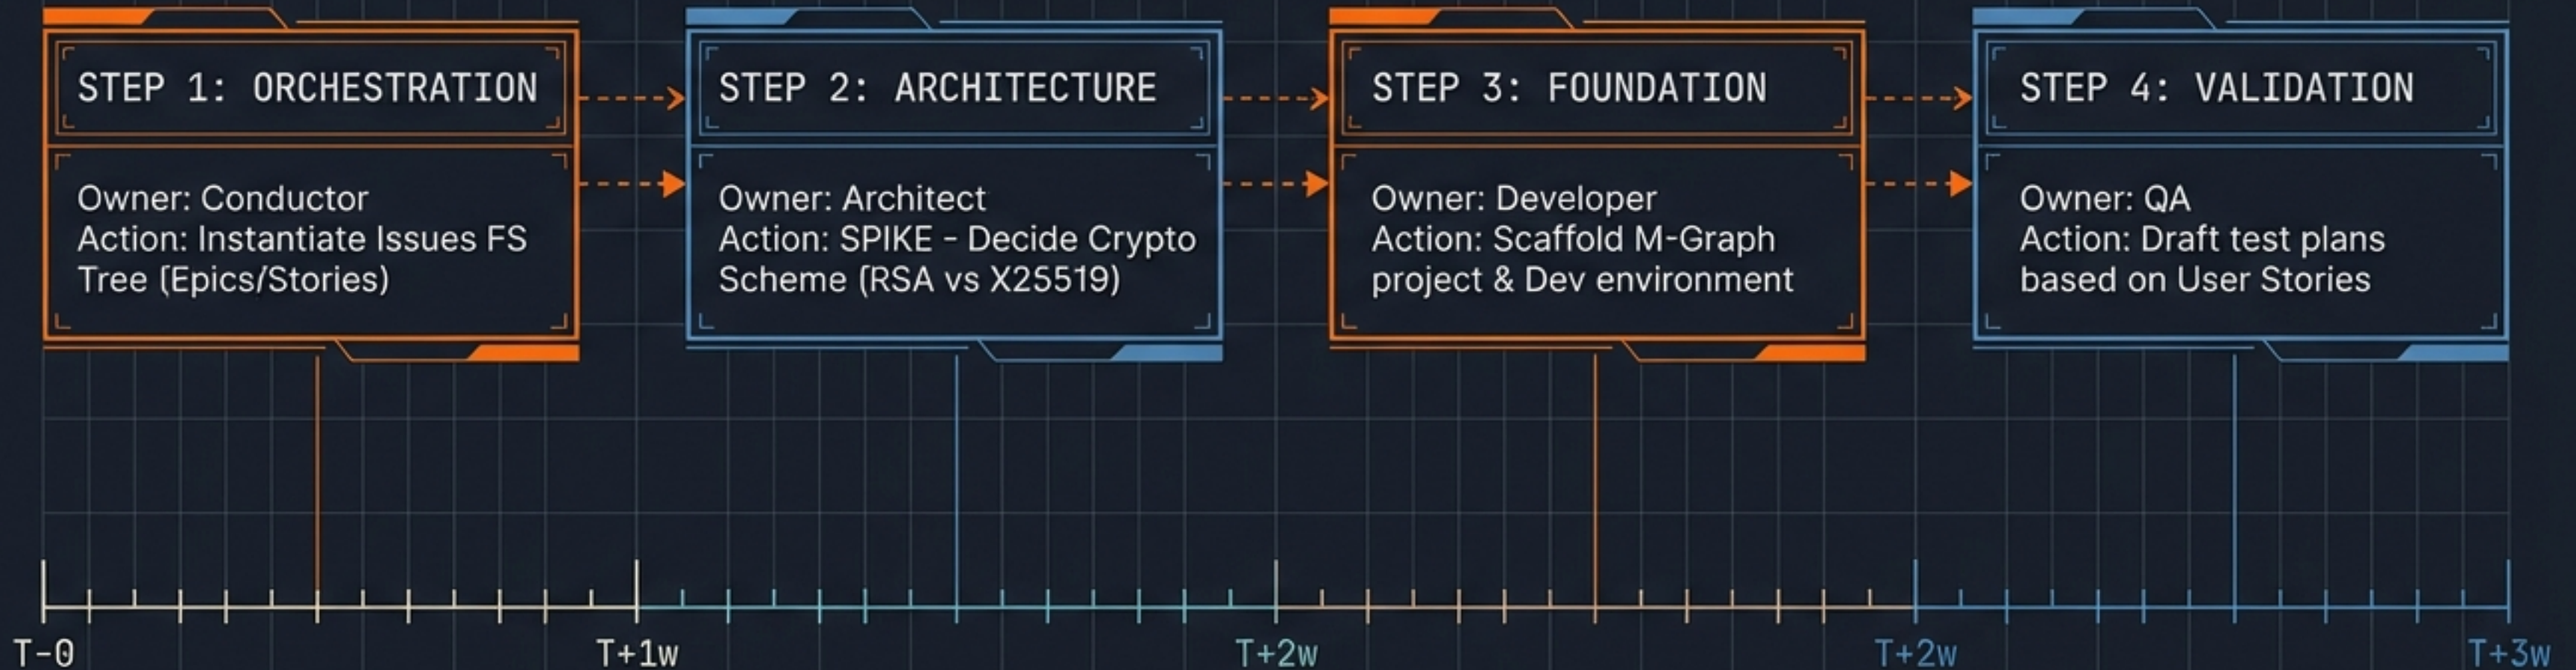

- **TASK**: Implementation Unit
- **HANDOFF**: Formal transfer between roles
- **BLOCKER**: Urgent stop requiring triage
- **KNOWLEDGE_REQUEST**: Documentation trigger

LIFECYCLE: Backlog -> In-Progress -> Verified

TECHNICAL ARCHITECTURE & ENVIRONMENTS

THE PATH FORWARD: PHASE 1 EXECUTION

STATUS: AGENTS READY. BRIEF LOADED.

X: 128 Y: 882

SUMMARY: SECURE COORDINATION

THE MISSION: Solve the 'Chiswick Pilot' coordination problem.

THE METHOD:

1. **ZERO-KNOWLEDGE:** Server is blind to PII.
2. **ORCHESTRATED FLOW:** Conductor ensures efficiency.

RESULT: A robust, privacy-first scheduler ready for the pitch.

APPENDIX: OPEN DECISIONS

QUESTION	OPTIONS	DECISION OWNER
Crypto Scheme	RSA-OAEP vs X25519	Architect (Spike)
Counter Atomicity	S3 Conditional Put vs DynamoDB	Architect
Frontend Framework	Vanilla JS vs Preact	Architect
Admin Auth	API Key vs JWT	Architect

All decisions to be recorded as ADRs in the repository.
