

GDPR DSAR Concierge Platform

Turning GDPR rights into a button.

AUTHOR: Dinis Cruz

DATE: February 2026

STATUS: Concept / Pre-MVP

The Friction: Why is exercising a legal right so hard?

The Theory

GDPR Article 15: Right of Access.

The data subject shall have the right to obtain confirmation as to whether or not personal data concerning them are being processed.

The Reality

Re: Otter.ai Support - Ticket #99281

Error:

Please submit your request via certified mail to our legal department in California.

The project emerged from a real-world struggle to exercise DSAR rights against [REDACTED]. The gap between the law's simplicity and the process's hostility is the market opportunity.

Core Design Principles

Guide-first, Automate-second

Default mode helps users submit requests themselves. Full orchestration is opt-in.

Zero-Access Architecture

We never see the plaintext data. Client-side encryption ensures only the user holds the keys.

Identity Verification as First-Class Workflow

The system anticipates “prove it’s you” challenges and advocates for minimal disclosure.

Serverless-First

Built on the scalable stack patterns used at investor.myfeeds.ai.

Operating Modes: From Guidance to Facilitation

Mode 1 - Guide-Only (Default)

Platform tells user WHERE and WHAT.
Platform touches ZERO data.

Mode 2 - Facilitated (Zero-Access)

Platform generates packets, tracks
timelines, and stores ENCRYPTED blobs.
Platform CANNOT read results.

The Verification Coach: Minimising Invasive Data Collection

Selfie + ID

High Risk - Agent refuses

Government ID

Agent pushes back / Redaction guidance

Partial Data Match
(e.g. Last 4 digits)

2FA Confirmation

Email Verification

Account Login

Best Practice

Side Note

The Strategy:

The Agent acts as a buffer, providing 'watermarking' advice (e.g., 'Provided solely for DSAR verification...') when ID is unavoidable.

GenAI Agent Architecture

Six narrow experts, not one generalist.

Safety by Design: Agent Tool Contracts

```
1 // ALLOWED TOOLS (THE VERBS)
2 def lookup_company_dsar_info(id): ...
3 def compose_dsar_request(params): ...
4 def classify_incoming_message(text): ...
5 def store_encrypted_artifact(obj): ...
6 def generate_evaluation_pack(history): ...
7
8 // EXPLICIT CONSTRAINTS (HARDCODED)
9 # 1. NEVER request private key
10 # 2. NEVER ask user to paste raw DSAR content into chat
11 # 3. NEVER process plaintext personal data server-side
```

Zero-Access Crypto Workflow

Key Takeaway: We can't read your data even if we wanted to.

Technical Stack: Serverless & Scalable

Business Model: Credit-Based Utility

Pay-per-usage. No subscriptions. Transparent markup.

Credit
Balance: **500**

 Action	 Credit Cost	 What it covers
 Company Lookup	 Low	Discovery agent intel
 DSAR Composition	 Low	Legal text generation
 Facilitated Submission	 Medium	Orchestration & Tracking
 Encrypted Storage	 Recurring	Per GB/month vault cost
 Postal Mailing	 High	Physical print & post costs

Go-to-Market Strategy

MVP Scope: The First 20

IN SCOPE		NEXT PHASE	
☒	🔍 Directory: Top 20 Consumer Services	☐	➤ Facilitated Mode (Automated Sending)
☒	📄 Composer: Access & Portability Requests	☐	🔒 Encrypted Vault Storage
☒	↗️ Mode: Guide-Only (Step-by-step)	☐	📄 Data Parsing Service
☒	💬 Coach: Verification Challenges		
☒	📅 Tool: 30-Day Deadline Tracker		

Future Horizons

Data Explorer

Browser Extension

Risk & Mitigation

Risk: Non-Standard Channels

Mitigation: Guide-only mode uses official forms

Risk: ID Complexity

Mitigation: Coach Agent has company-specific patterns

Risk: User Pasting Data

Mitigation: UI Guardrails & Warnings prohibit pasting secrets.

Risk: Legal Advice Liability

Mitigation: Clear disclaimers; we provide templates, not counsel.

The Privacy Concierge

We are building the missing interface for GDPR—transforming a complex legal right into a simple, automated, and secure user action.
