

SECURE SEND EXPANSION STRATEGY

// WORKSTREAMS:

01. PLUGIN ARCHITECTURE

02. INTERNATIONALISATION (i18n)

03. COMMERCIALISATION

VERSION 1.0 DRAFT

DATE: FEBRUARY 2026

DOC: EXEC_STRATEGY.MD

Three Expansion Areas. One Unifying Principle.

Simplicity is a feature. Every addition is a removable plugin, not core complexity.

THE ENABLER

Plugin Architecture

- Modular features
- Optional complexity
- SaaS vs. Enterprise configs

THE DIFFERENTIATOR

Internationalisation

- Beyond translation
- Cultural UX adaptation
- Community growth engine

THE REVENUE

Commercialisation

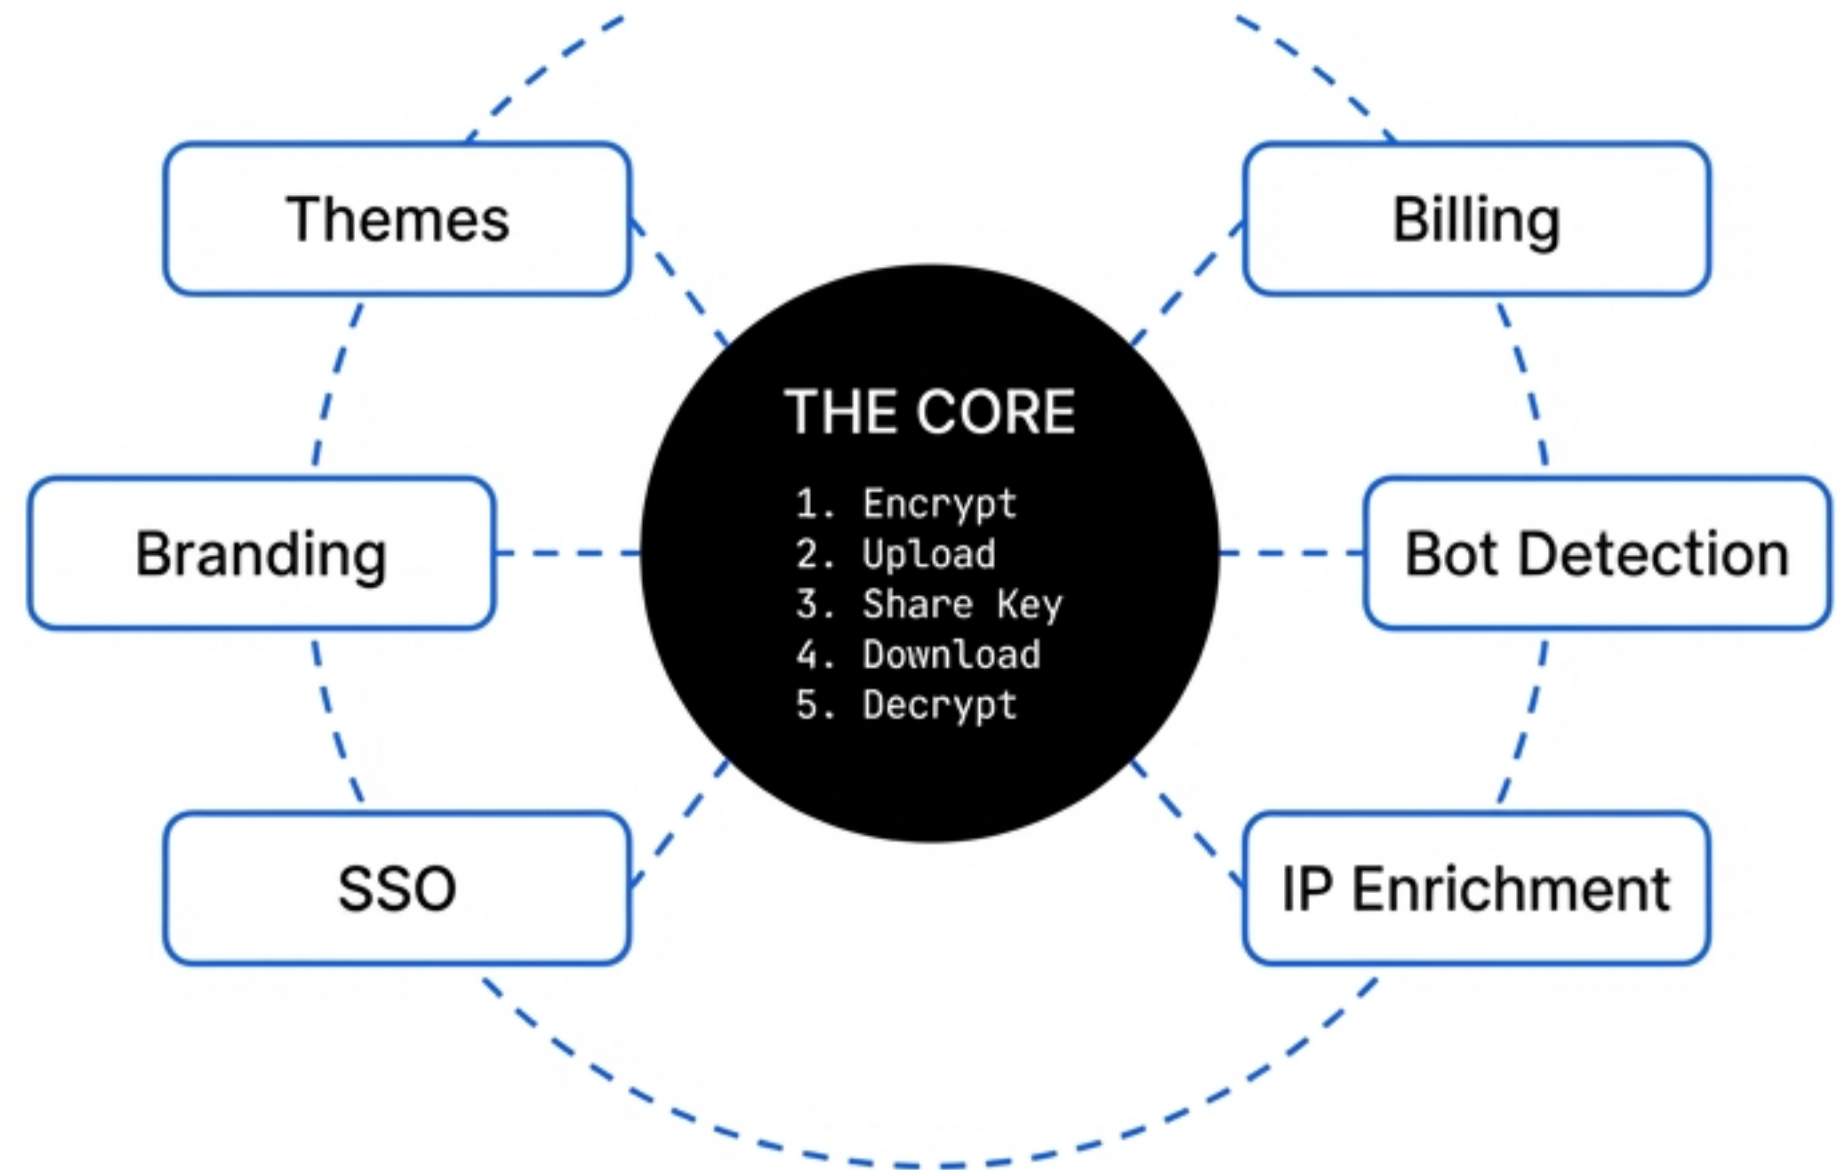

- Open Source Core
- Paid Maintenance Service
- Private Repo Management

The Core Philosophy: Simplicity as a Feature

Strategic Rationale:

1. **Self-hosted:** Keeps installs minimal and auditable.
2. **Enterprise:** Allows specific features (SSO, Branding) without bloat.
3. **SaaS:** Enables feature toggling per-token or per-tenant.

The Orbital Model

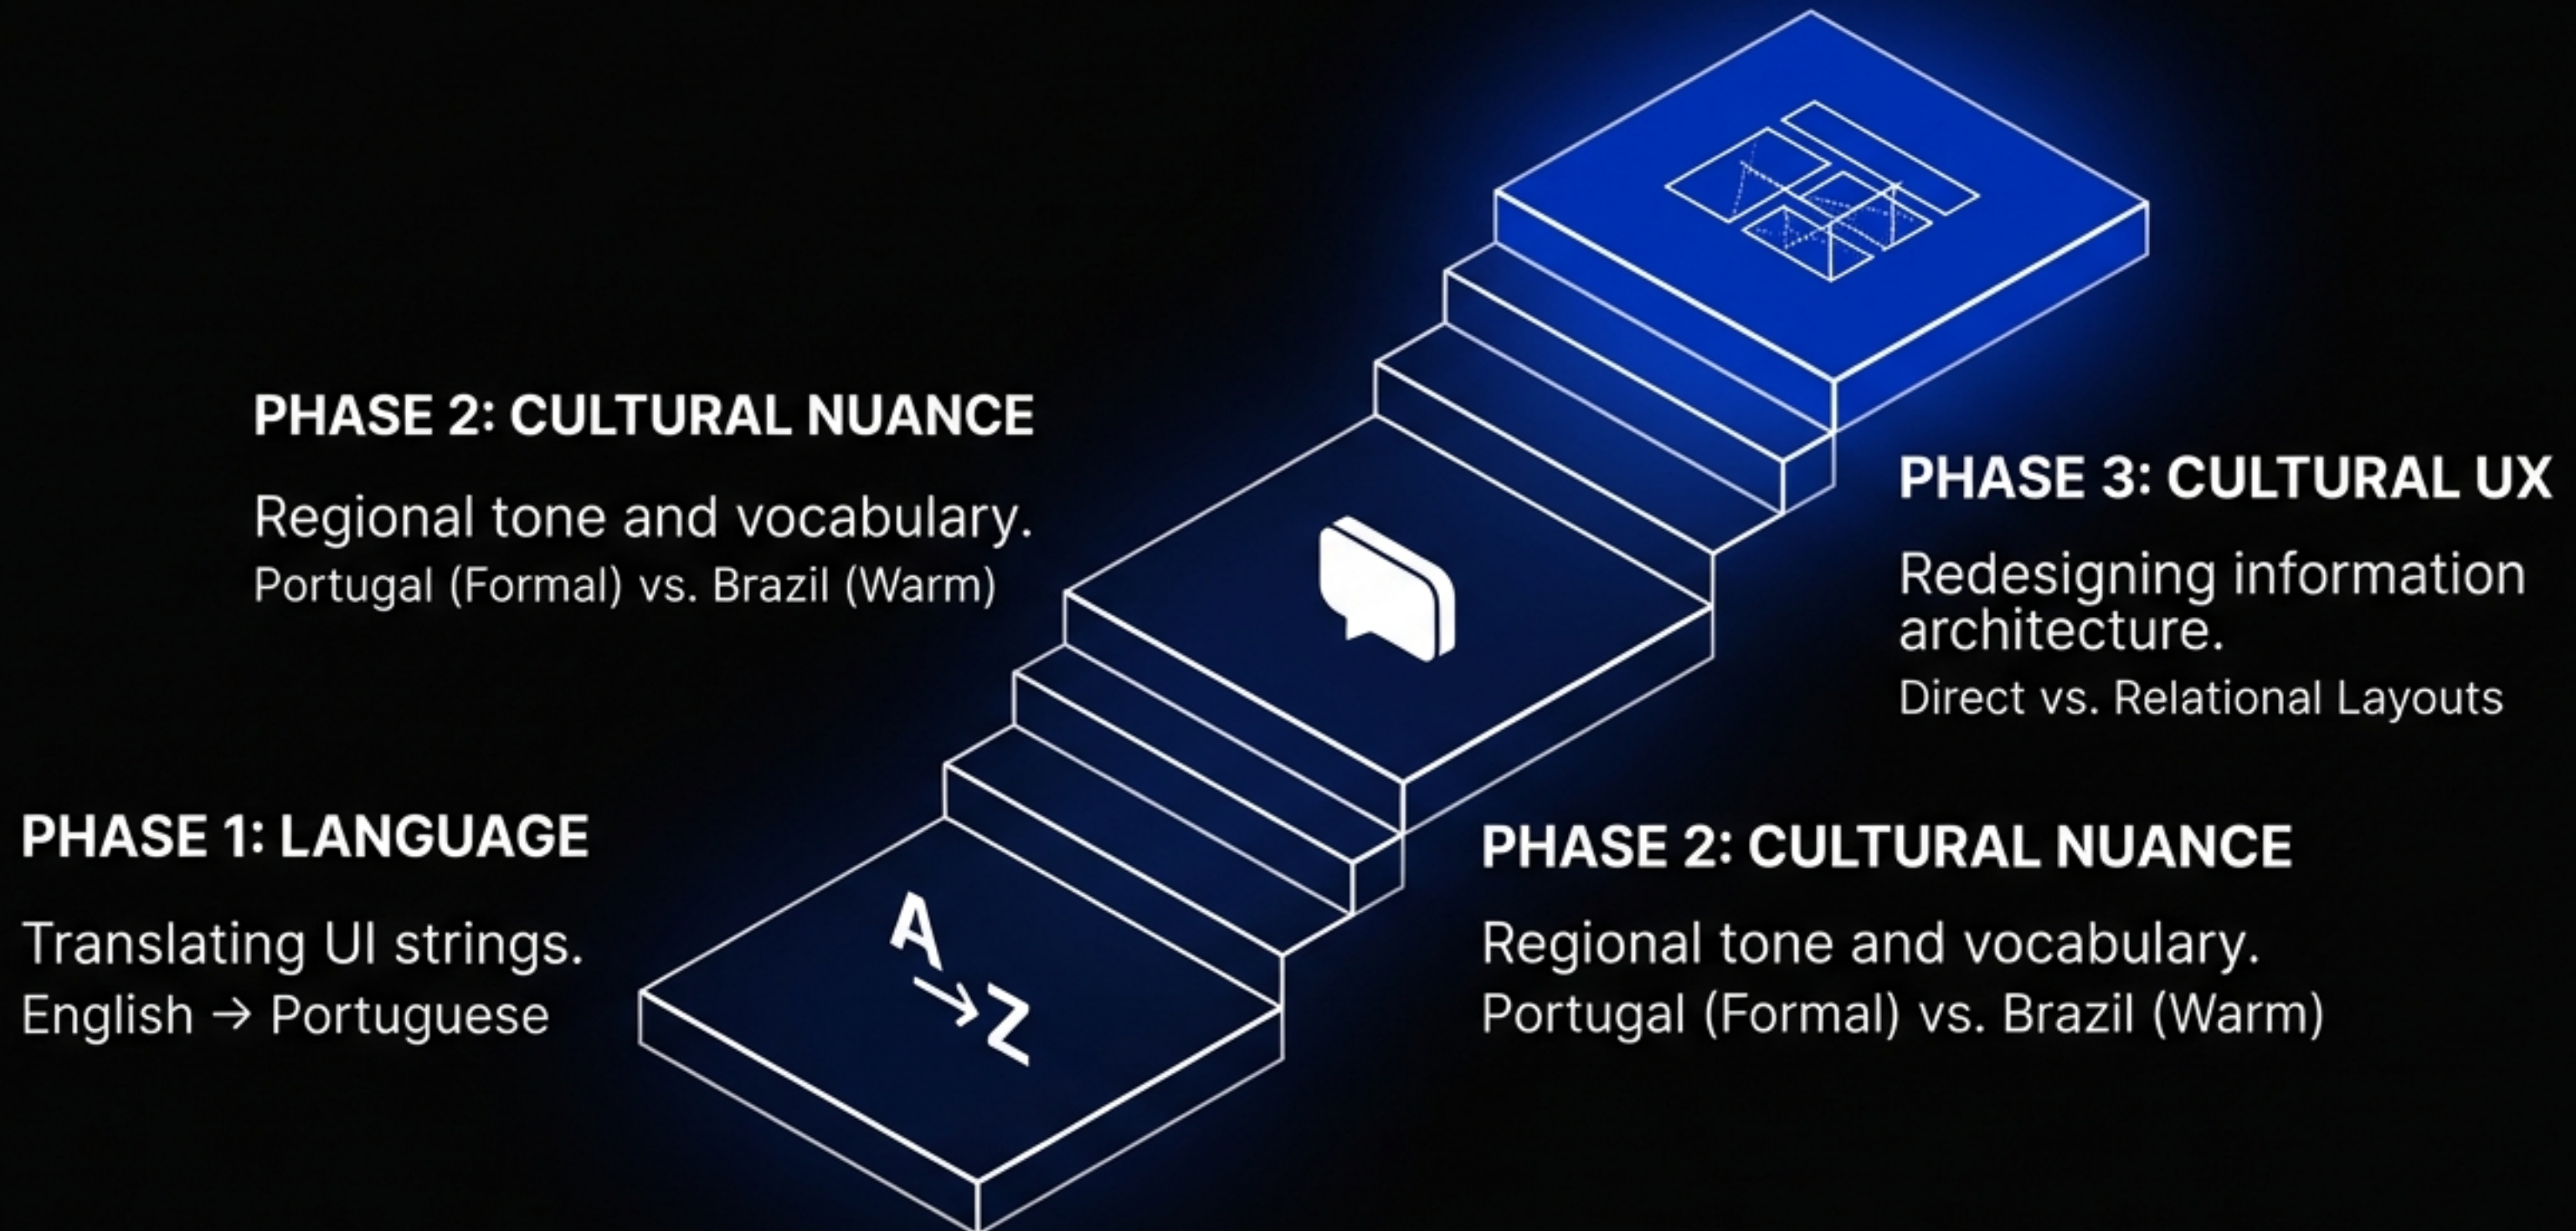

The Plugin Ecosystem

Configuration Matrix: SaaS vs. Self-Hosted Defaults

CATEGORY	PLUGIN MODULES	DEFAULT (SAAS)	DEFAULT (SELF-HOSTED)
Core	Transfer engine, Token auth, S3 storage	ALWAYS ON	ALWAYS ON
Themes	Corporate, Matrix, Seasonal	ON	OFF
Transparency	IP enrichment, Browser fingerprint	ON	OFF
Security	IDS, Bot detection, WAF	ON	RATE LIMIT ONLY
Billing	Stripe credits, Metering	ON	OFF
Branding	Custom logos, Colours, Copy	OFF	OFF
Accessibility	Screen reader, High contrast	ALWAYS ON	ALWAYS ON

The i18n Vision: Beyond Simple Translation

Phase 1 & 2: Capturing Regional Nuance

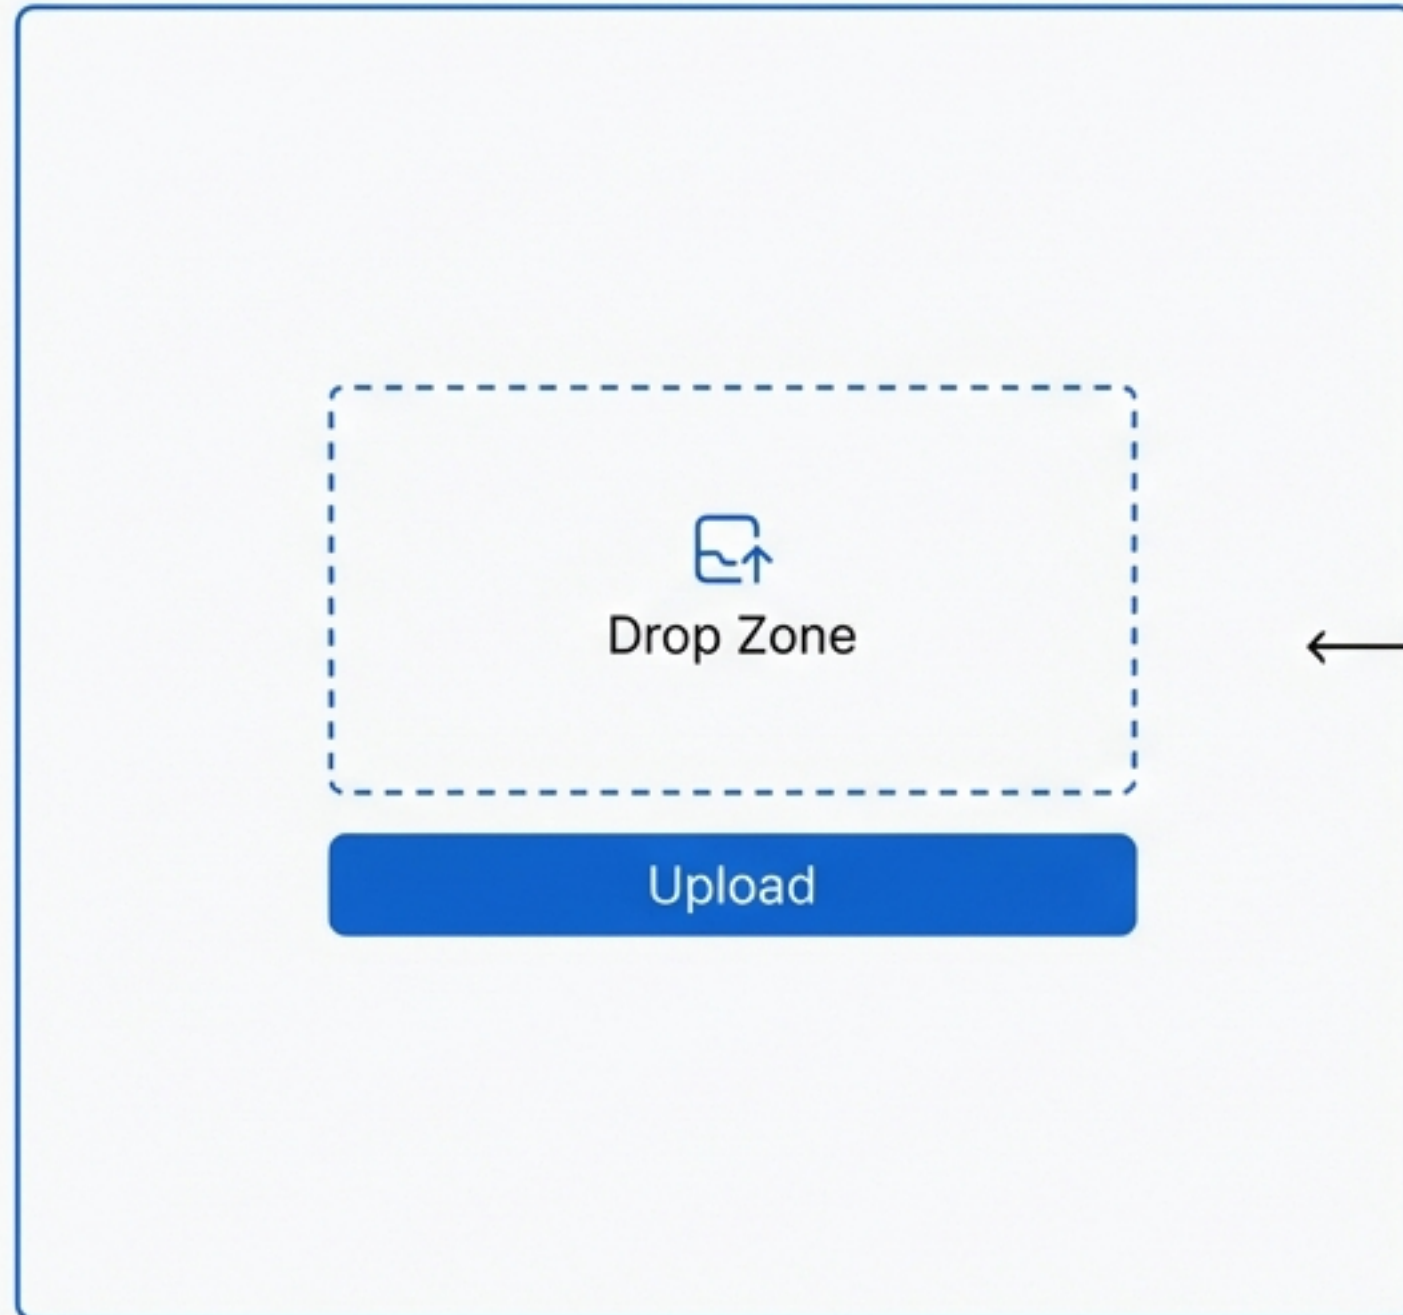

We use LLMs for generation, but native speakers for tone.

Portugal (pt-PT)	Brazil (pt-BR)	Angola (pt-AO)	MVP Target Languages:
TONE: FORMAL / DIRECT	TONE: WARM / CASUAL	TONE: RESPECTFUL / FORMAL	English (GB/US)
O seu ficheiro foi enviado.	Pronto! Seu arquivo foi enviado com sucesso. 🎉	O seu ficheiro foi enviado com êxito.	Portuguese (PT/BR)
			French
			Spanish
			German
			Klingon (Statement Inclusion)

Phase 3: Cultural UX Redesign

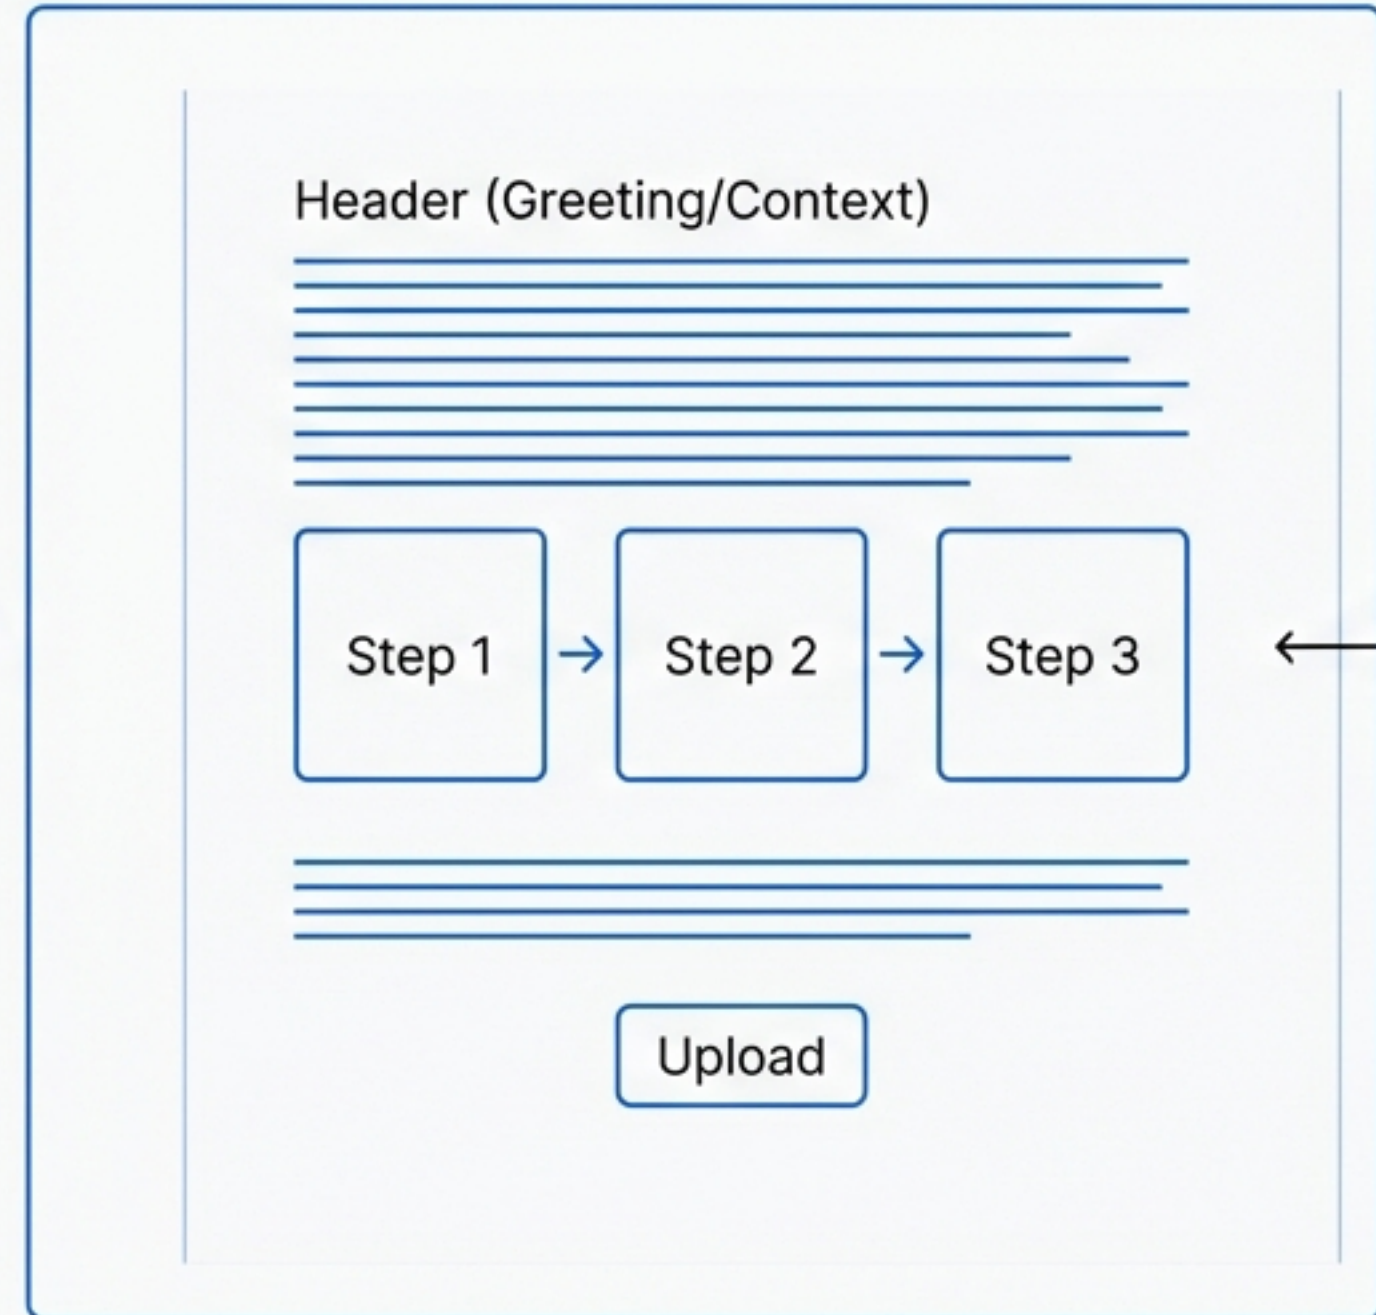

Adapting layout and flow for High-Context vs. Low-Context cultures.

LOW CONTEXT (US / UK)

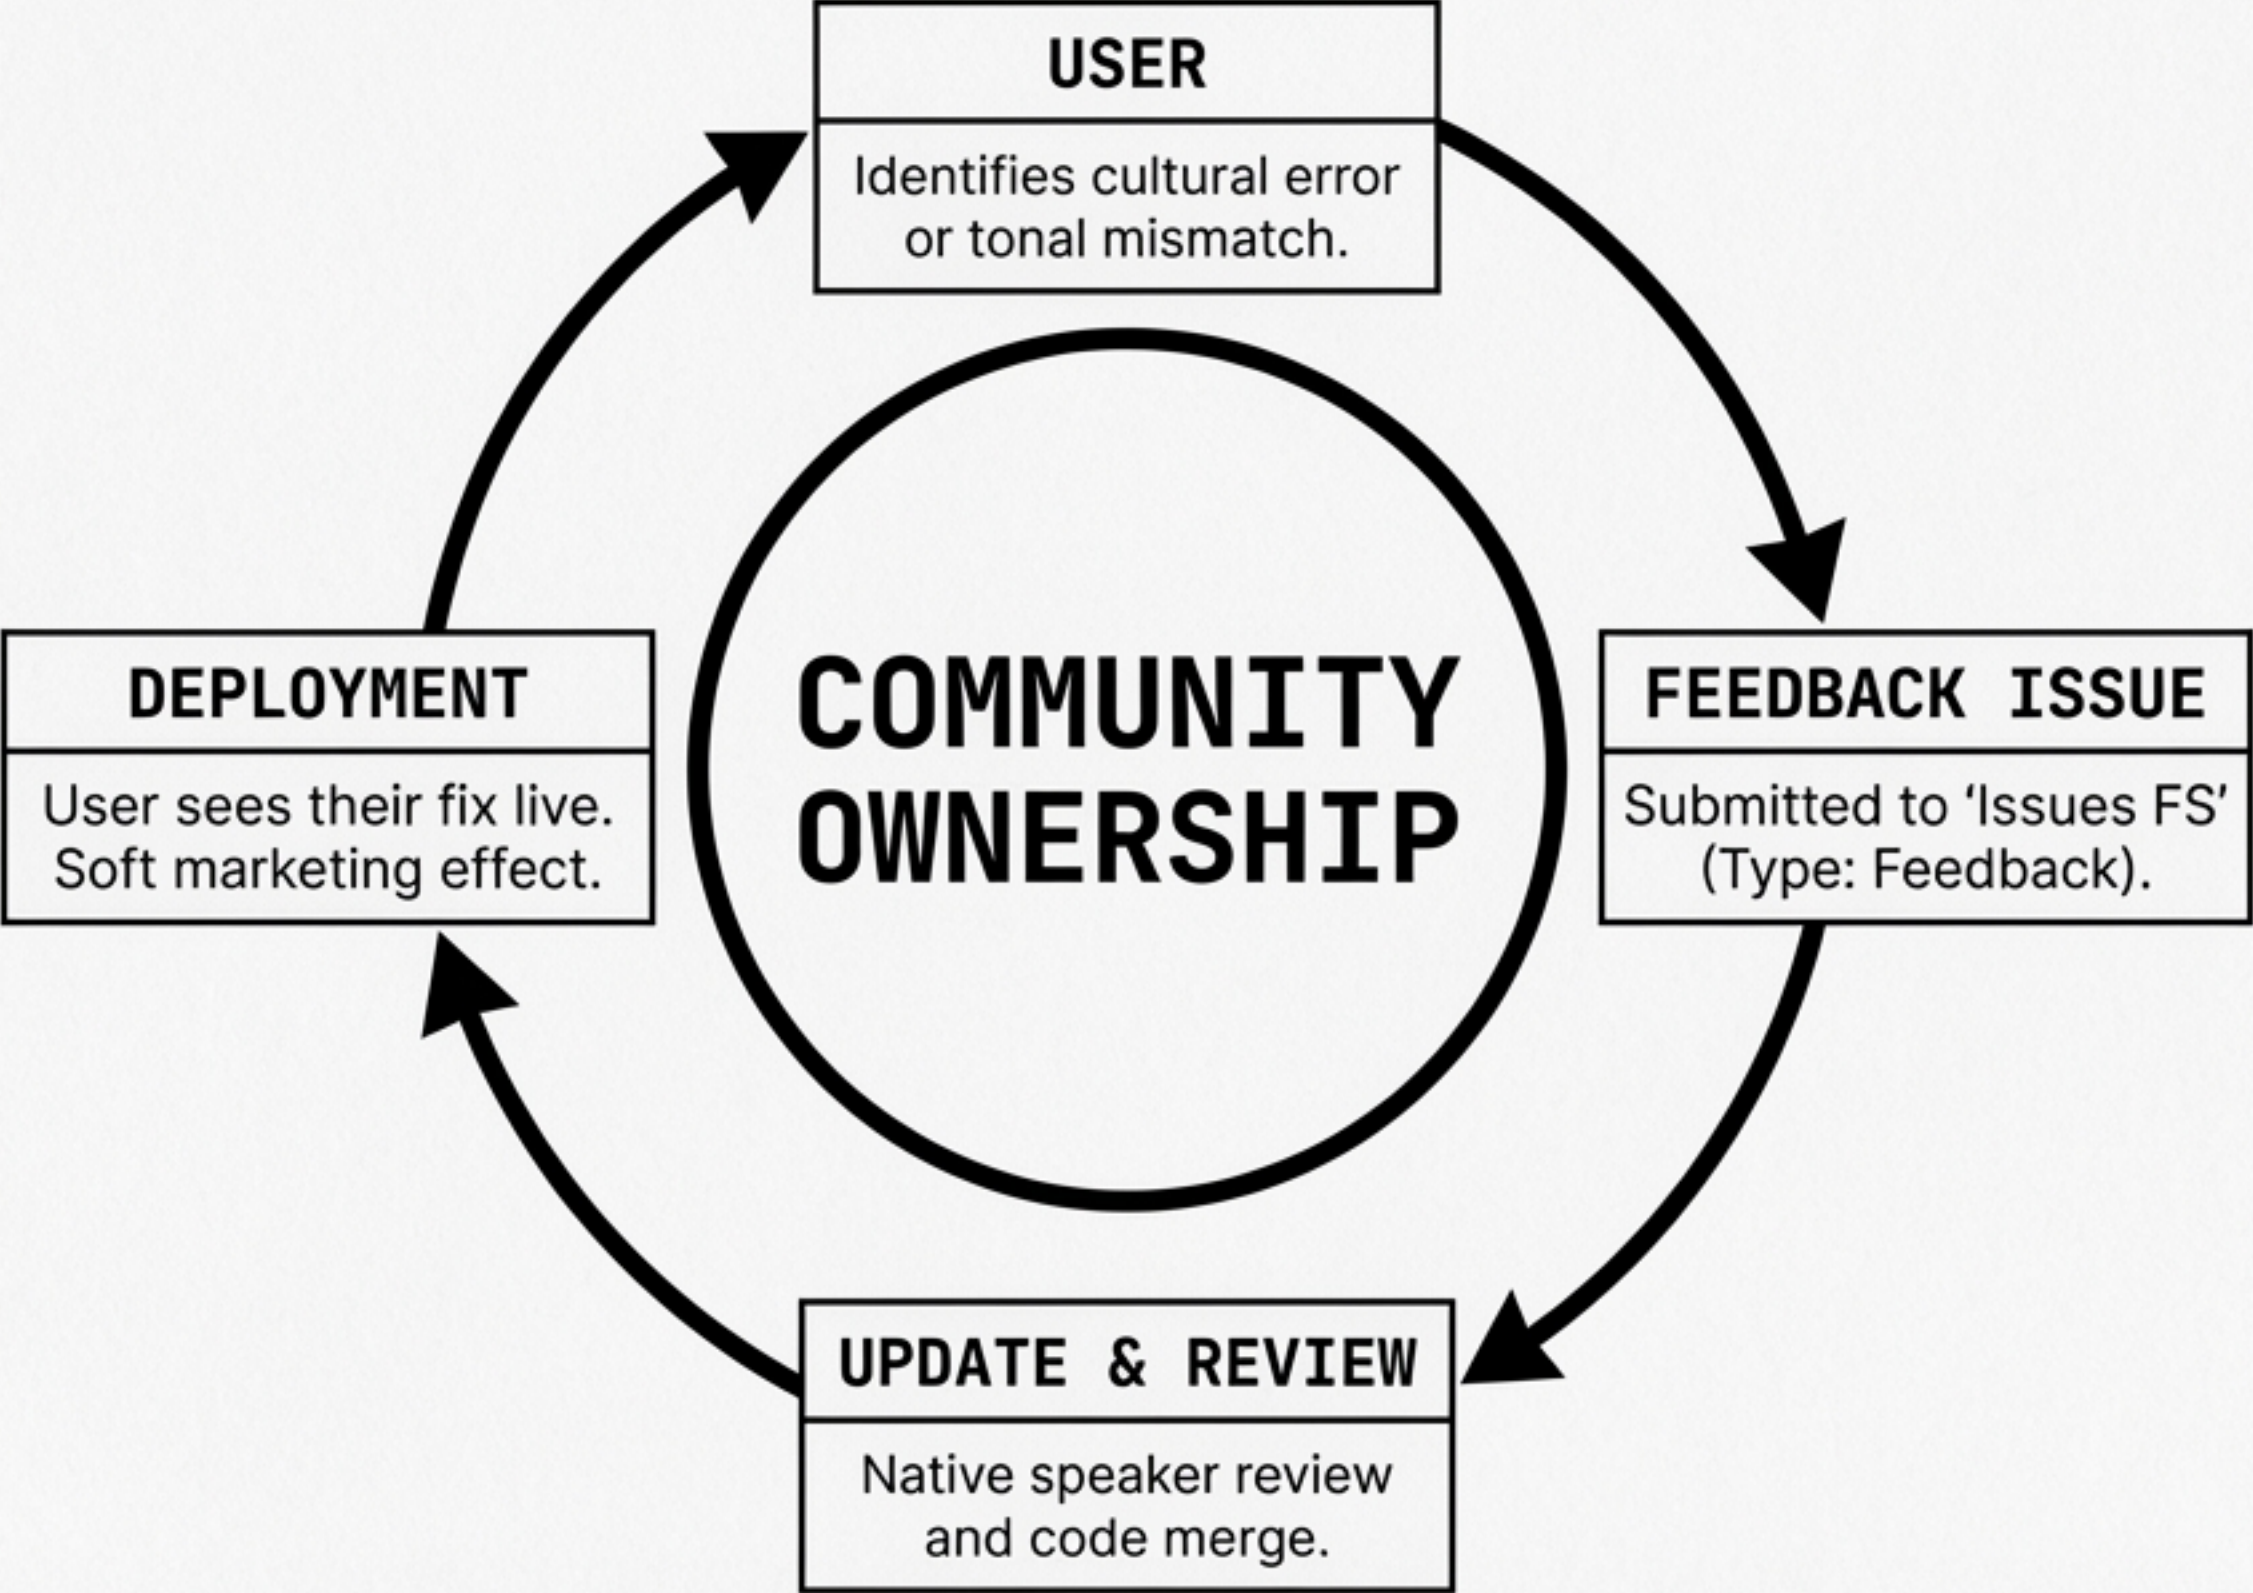

Action-First Orientation

HIGH CONTEXT (JAPAN)

Process-First Orientation

Community Feedback as a Growth Engine

Accessibility is Transparency

“If we believe users should see everything we know about them, we must ensure *all* users can actually see it.”

The Standard: WCAG 2.2 Level AA

1. VISUAL

High contrast modes,
Scalable text (rem units),
Dark mode.

2. AUDITORY

ARIA labels on all interactive
elements. 'aria-live' status
announcements.

3. MOTOR

Full keyboard navigation.
Focus indicators (3:1 contrast).

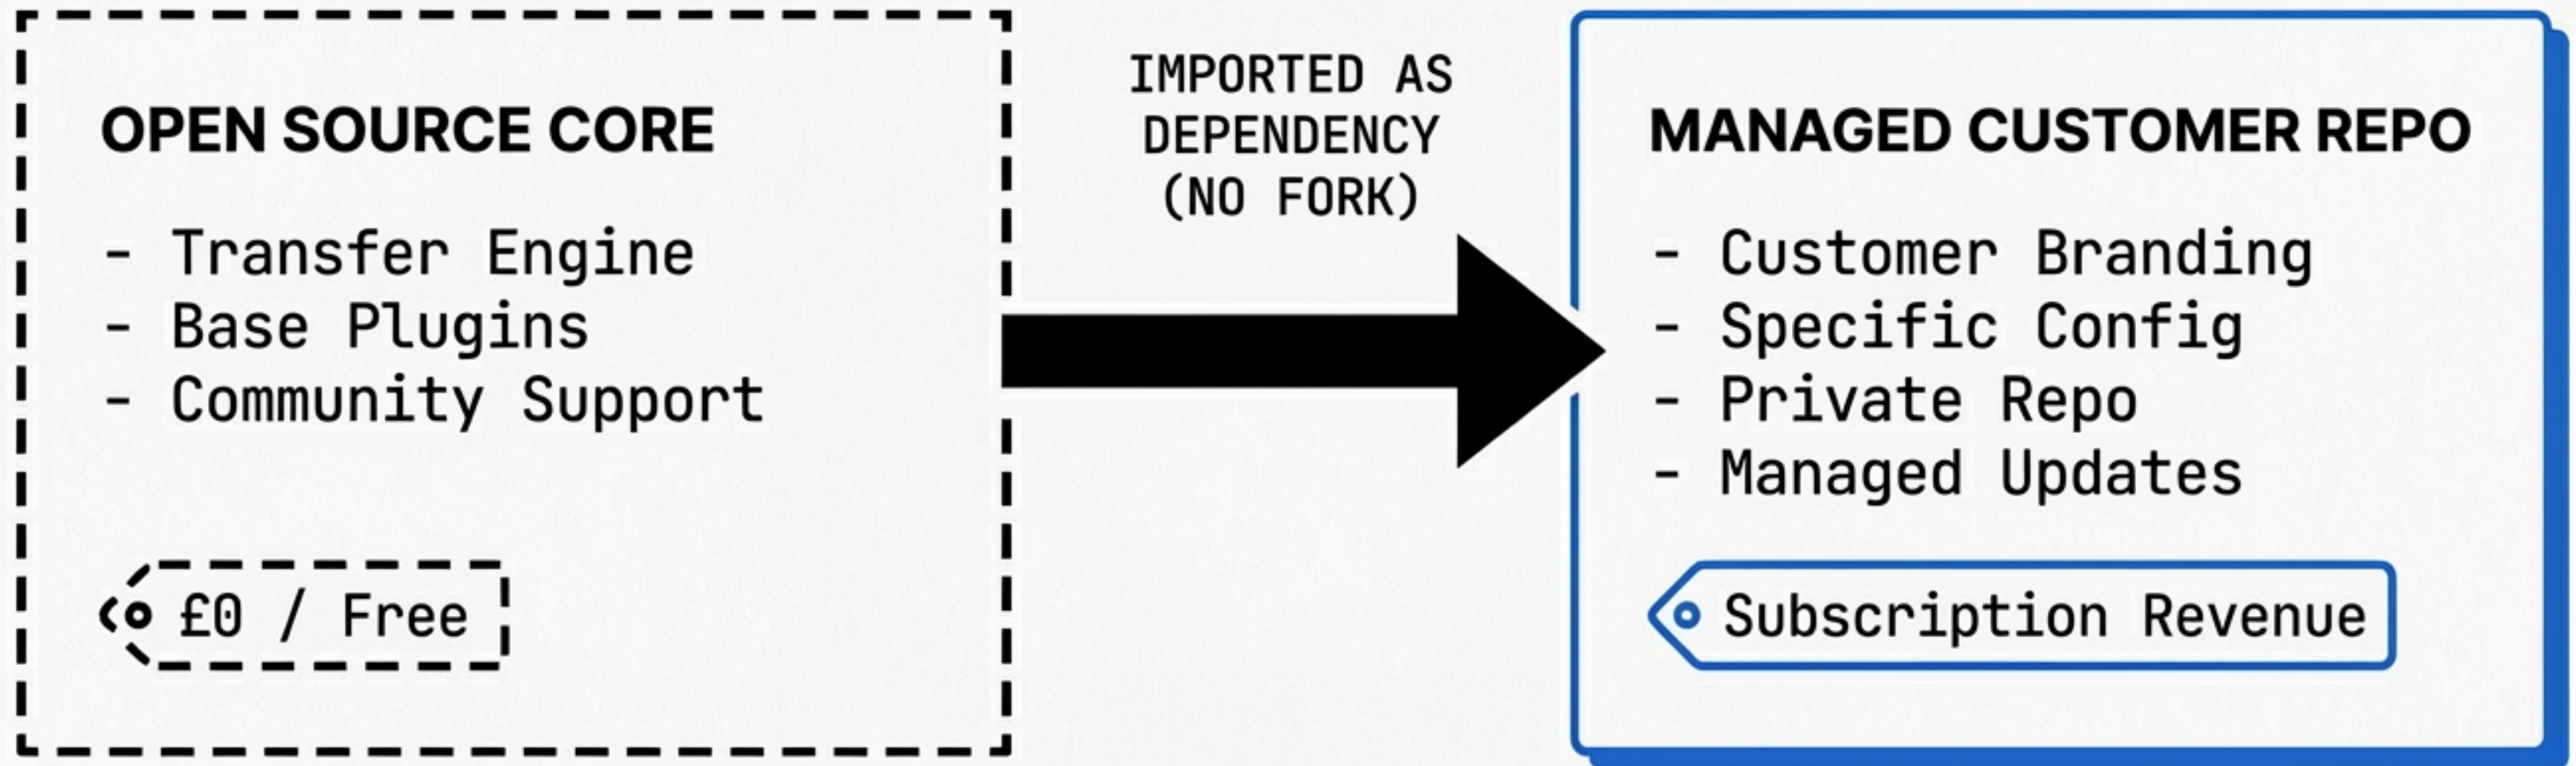

4. COGNITIVE

Error messages described in text,
not just colour codes.

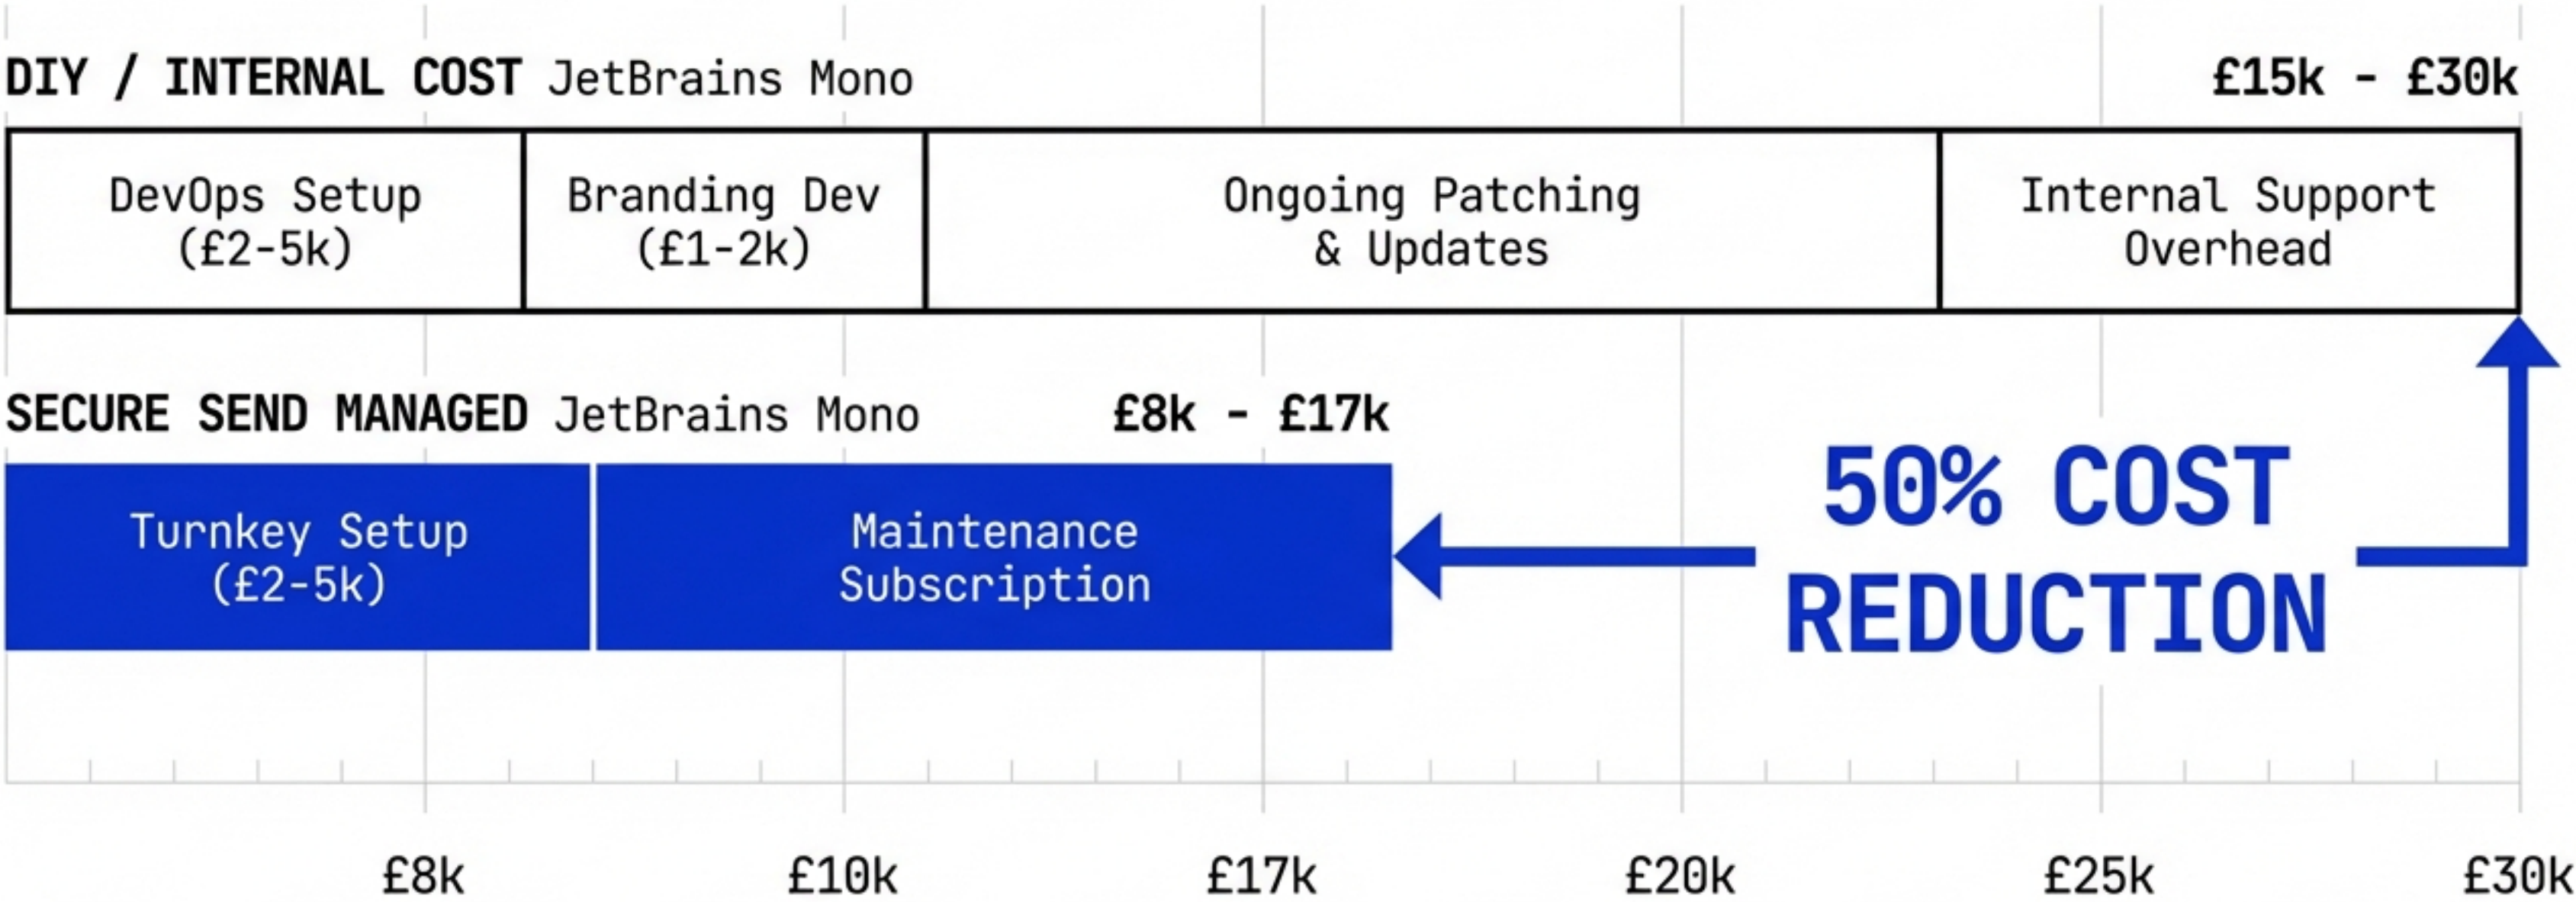

Commercial Strategy: Service Over Code

The Code is free. The configuration is the product.

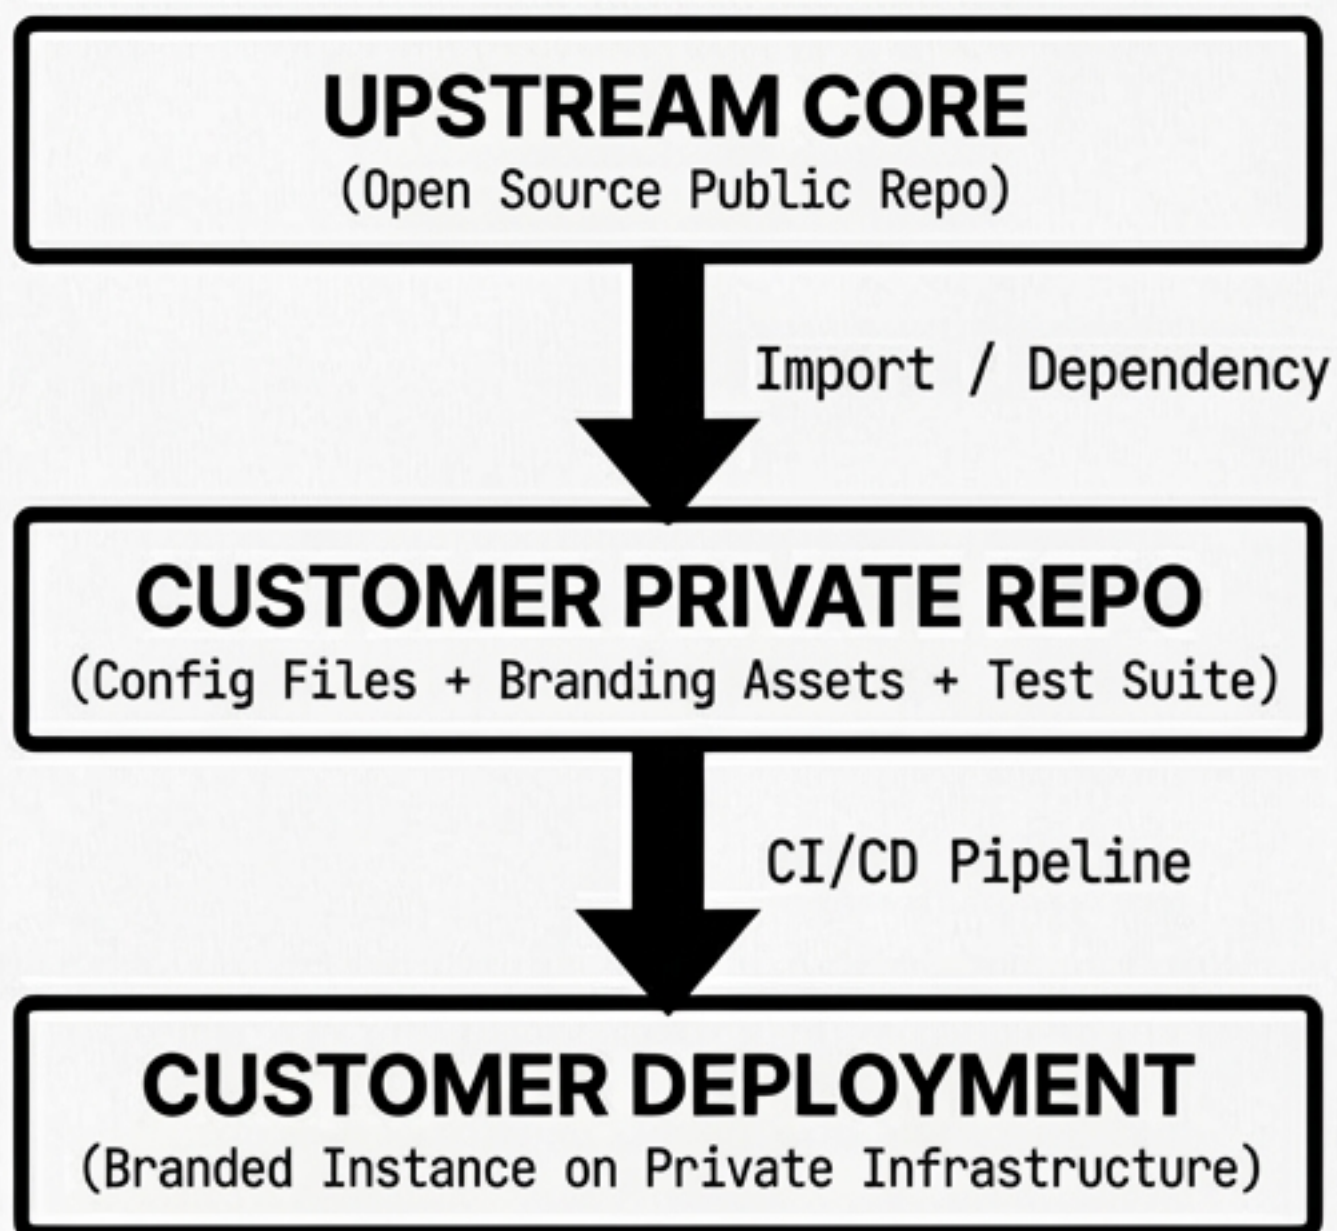

The Value Proposition: DIY vs. Managed

Comparison of Year 1 Total Costs of Ownership

Customer Architecture

Scalable, Secure, Private.

THE GOLDEN RULES:

1. **No Forking:** Import core as dependency.
2. **Layering:** Config is layered on top.
3. **Automation:** Updates trigger auto-testing.

Validation & Dogfooding

Proving the model with our own internal ventures.

THE CYBER BOARDROOM

Audience: CISO / Cyber

Config Highlights:
Security-focused
branding. Heavy
transparency plugins.

Status: Live 

MYFEEDS AI

Audience: Tech / AI

Config Highlights:
AI-focused copy.
Fingerprinting
features highlighted.

Status: Live 

MGRAPH AI

Audience: Developers

Config Highlights:
Technical/Dev-focused
copy. Minimalist
theme.

Status: Live 

Go-To-Market Pricing Tiers

OPEN SOURCE

Free

- Full Codebase
- Self-Hosted
- Community Support

MANAGED BASIC

£49 / mo

- Hosted Instance
- Custom Branding
- 5 Tokens
- Email Support

MANAGED PRO

£299 / mo

- Dedicated Instance
- Unlimited Tokens
- SSO Integration
- SLA

ENTERPRISE

£999+ / mo

- Private Repo Architecture
- Multi-Brand Support
- Dedicated Support Engineer

MARKETPLACE: AWS AMI One-Click Deploy also available (Usage Based).

Roadmap & Summary

Secure Send remains a simple platform. We build the core, the community builds the culture, and the architecture enables the business.
