

ARCHITECTURE + DEV BRIEF

Dual Authorisation File Delivery

PROJECT REF: v0.6.14

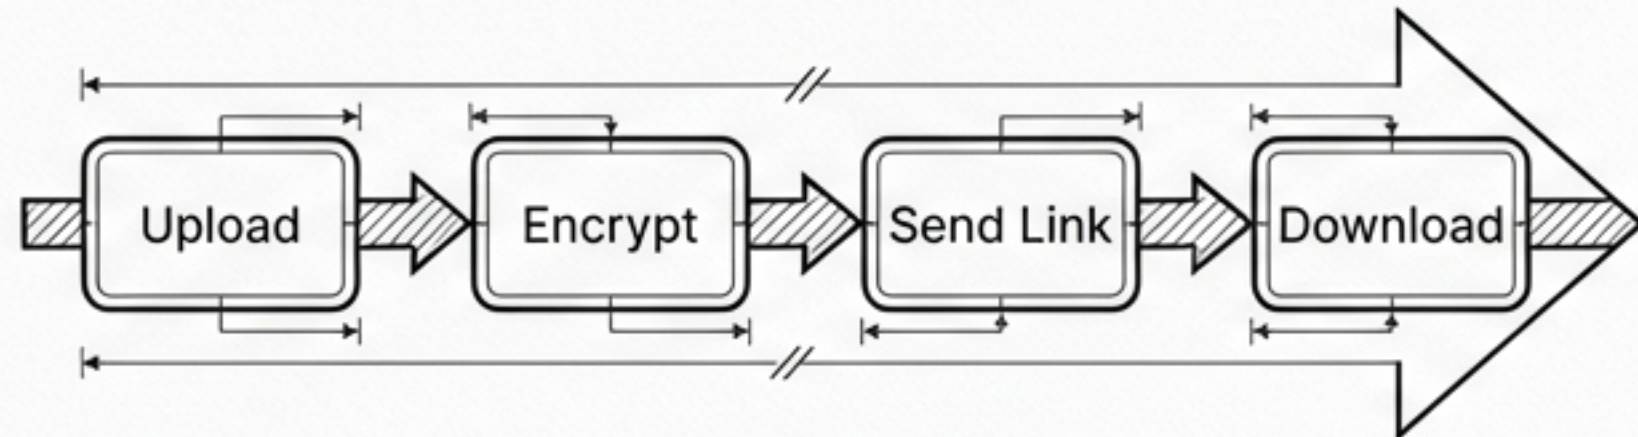

DATE: 23 Feb 2026

T0: Lead Architect, Developer, Designer

The Two-Eyes Principle

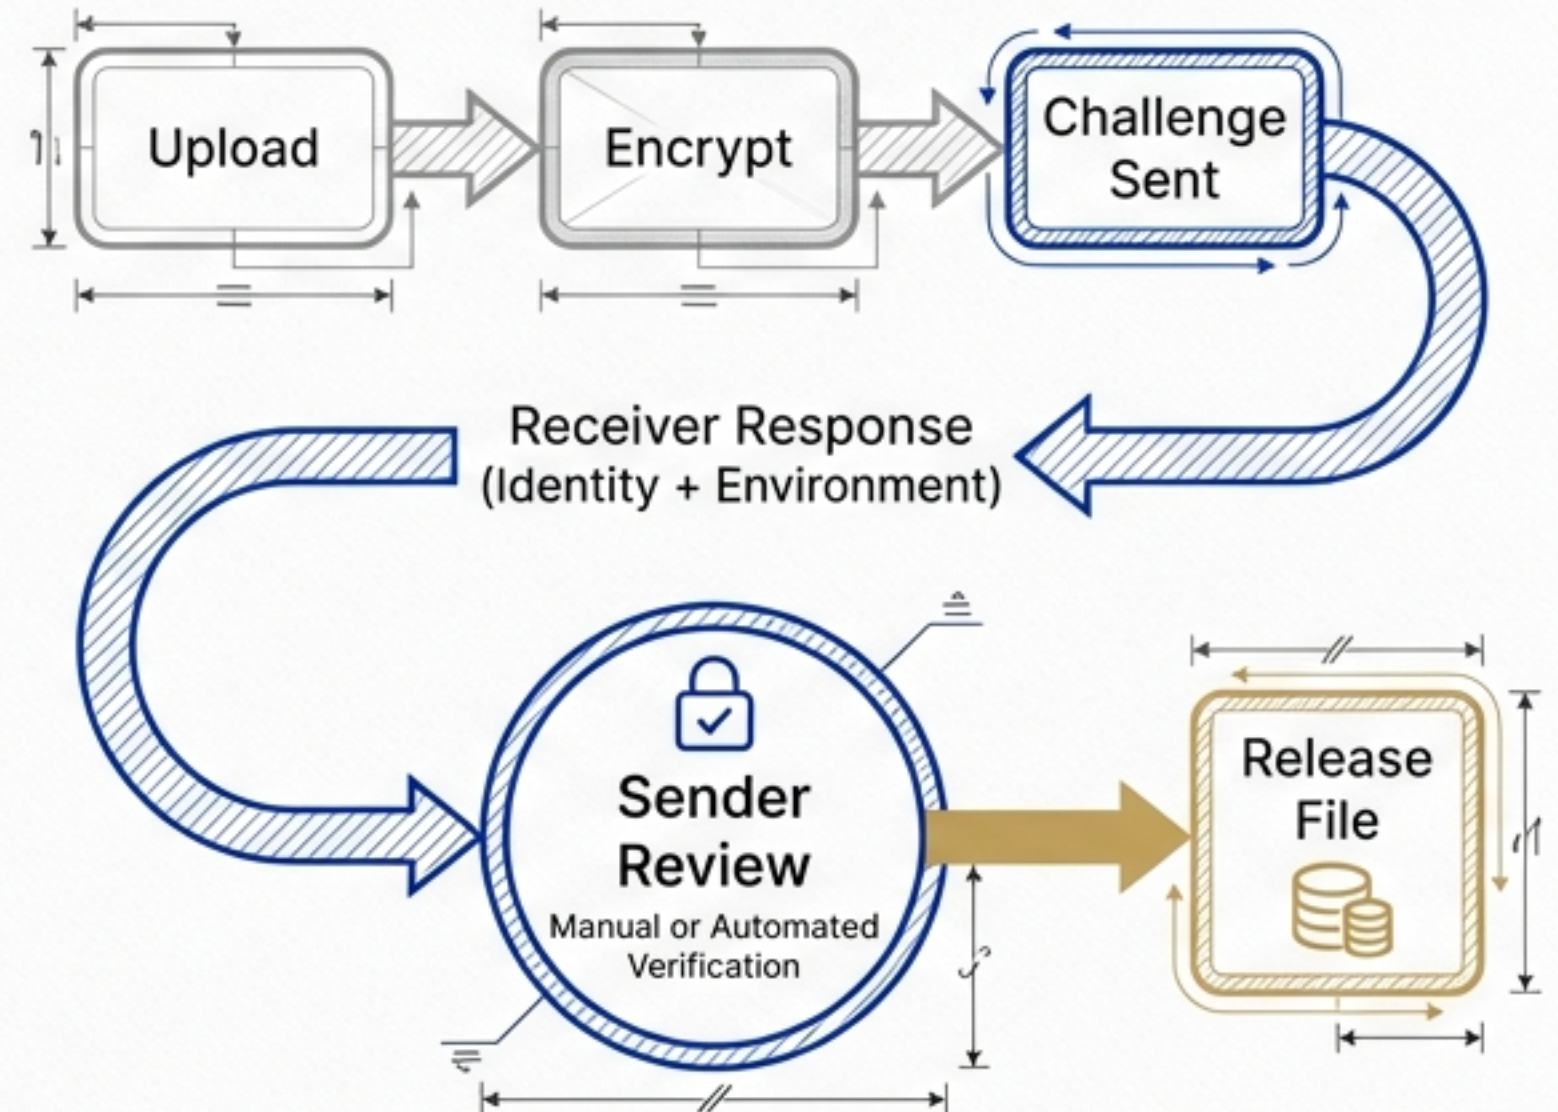

Paradigm Shift: Fire and Forget vs. Verified Exchange

NORMAL FLOW

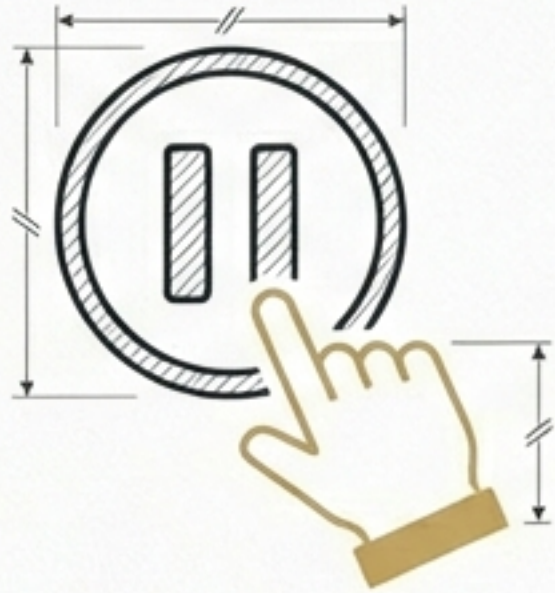

Single Step: Zero Verification

DUAL AUTHORISATION

Two Steps: Verified Delivery

The Utility of Friction

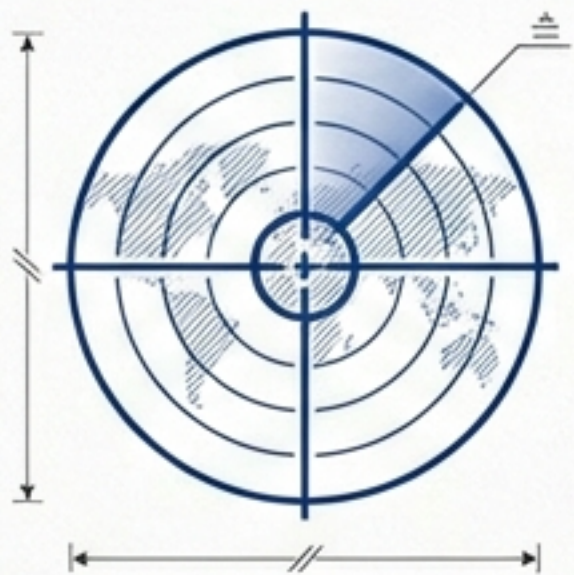

Sender Control

The sender decides IF and WHEN to release. No automatic downloads. Action is based on evidence, not hope.

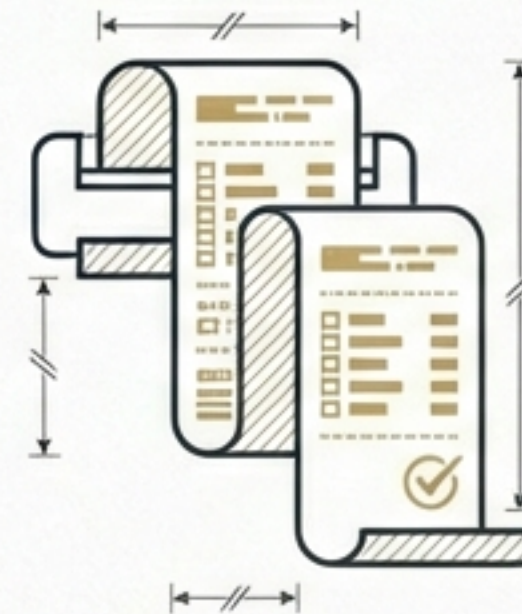

Transparent PKI

Invisible Bootstrap. Receiver gets a key pair automatically. Sender receives the Public Key. Full PKI established in one exchange.

Environmental Verification

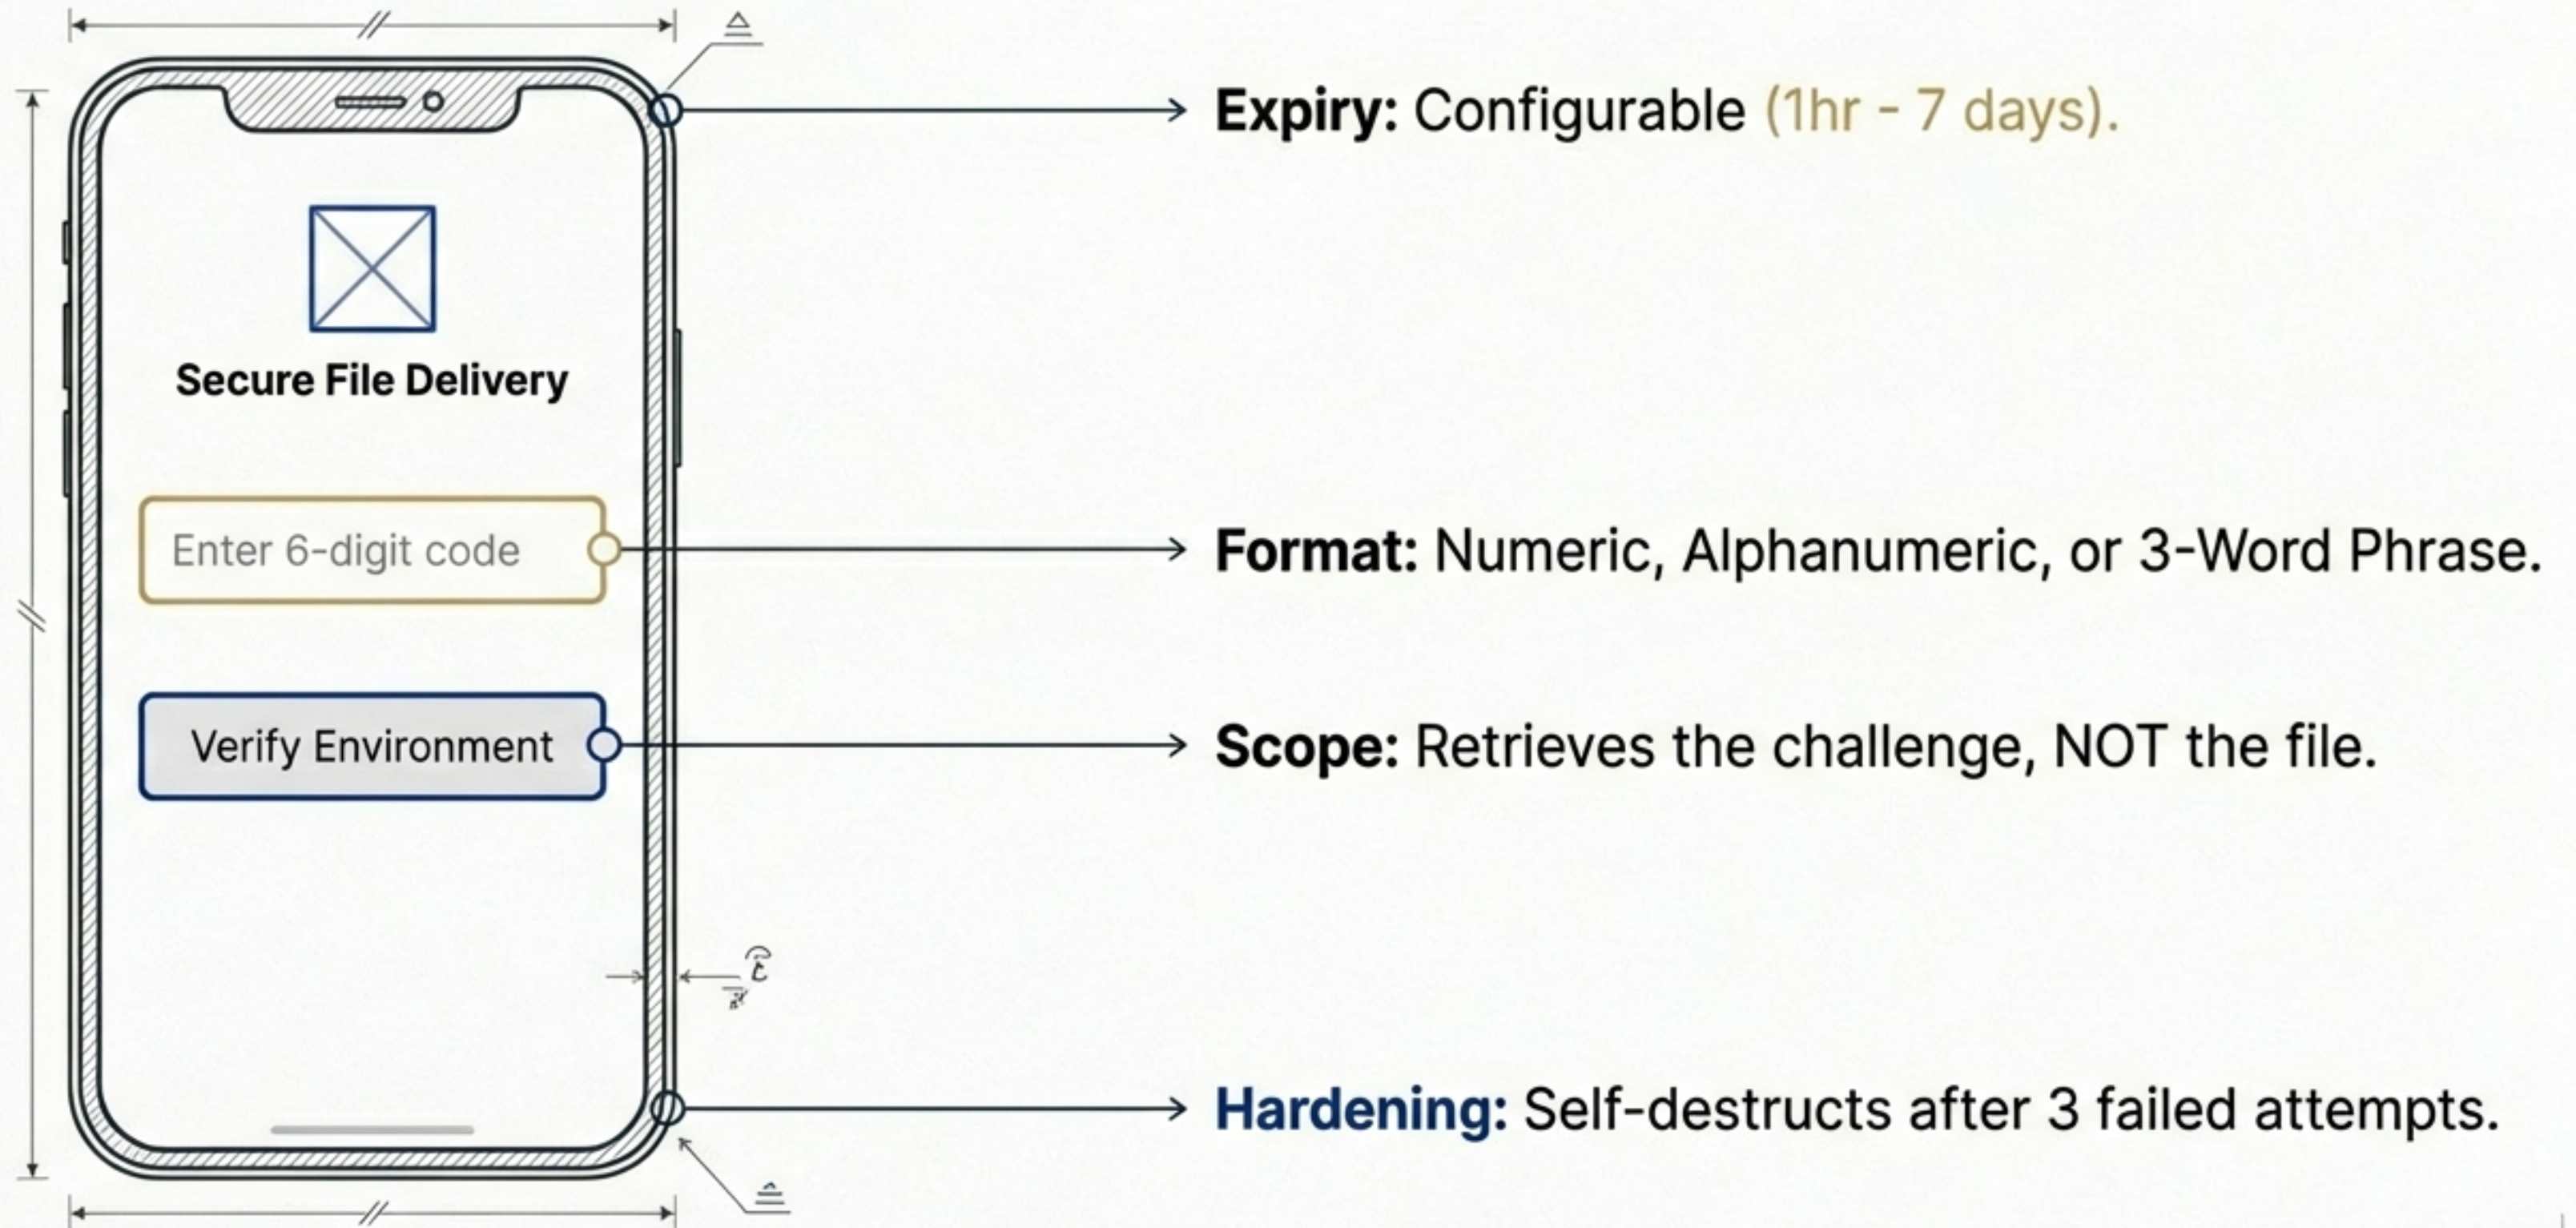

See WHERE the file is opened. Verify OS, Browser, and Geo-location before the asset is unlocked.

Audit Trail

Complete chain of custody. Challenge sent, response logged, review completed, file released.

Step 1: The Gateway Challenge

Step 2: The Environmental Interrogation

Step 3: The Release Decision

SENDER DASHBOARD UI WIREFRAME
ACTION PANEL

Pending Request: Financial_Q3_Report.pdf

Environment Report

- Request from: ID #8842
- Location: London, United Kingdom
- Device: Chrome on macOS
- Status: **Verified** Matches Policy

RELEASE FILE

Request Change

 Deny Request

The Digital Handshake.
File remains undelivered
until this click.

ACTION PANEL

The Invisible Handshake

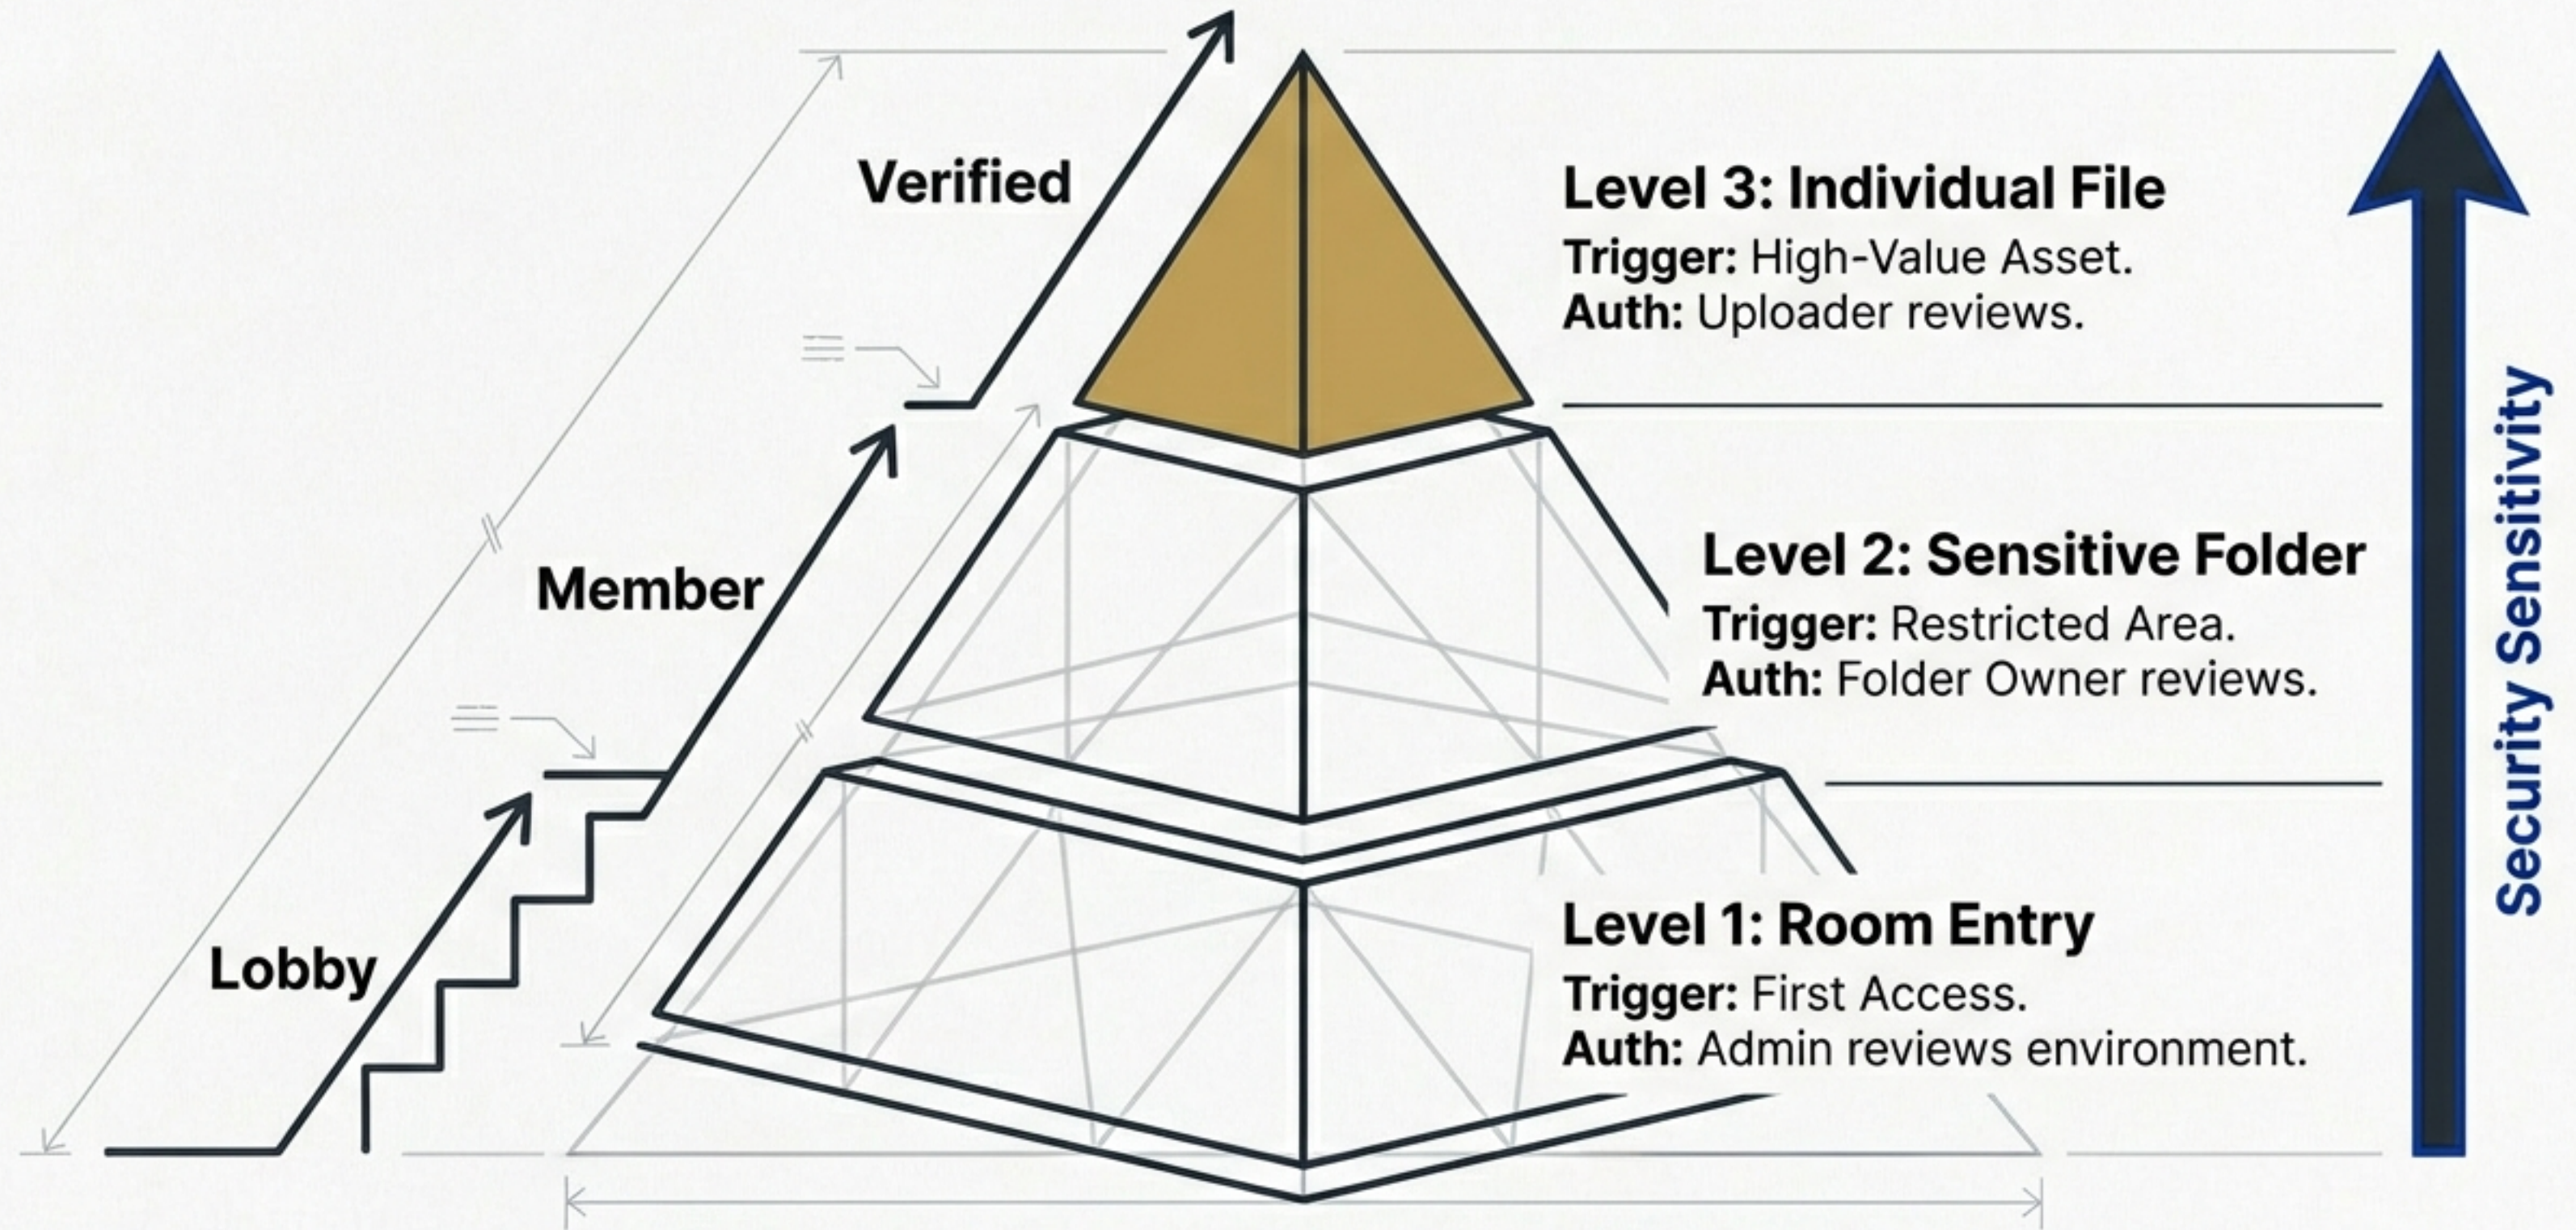

Surface Action vs. Cryptographic Reality

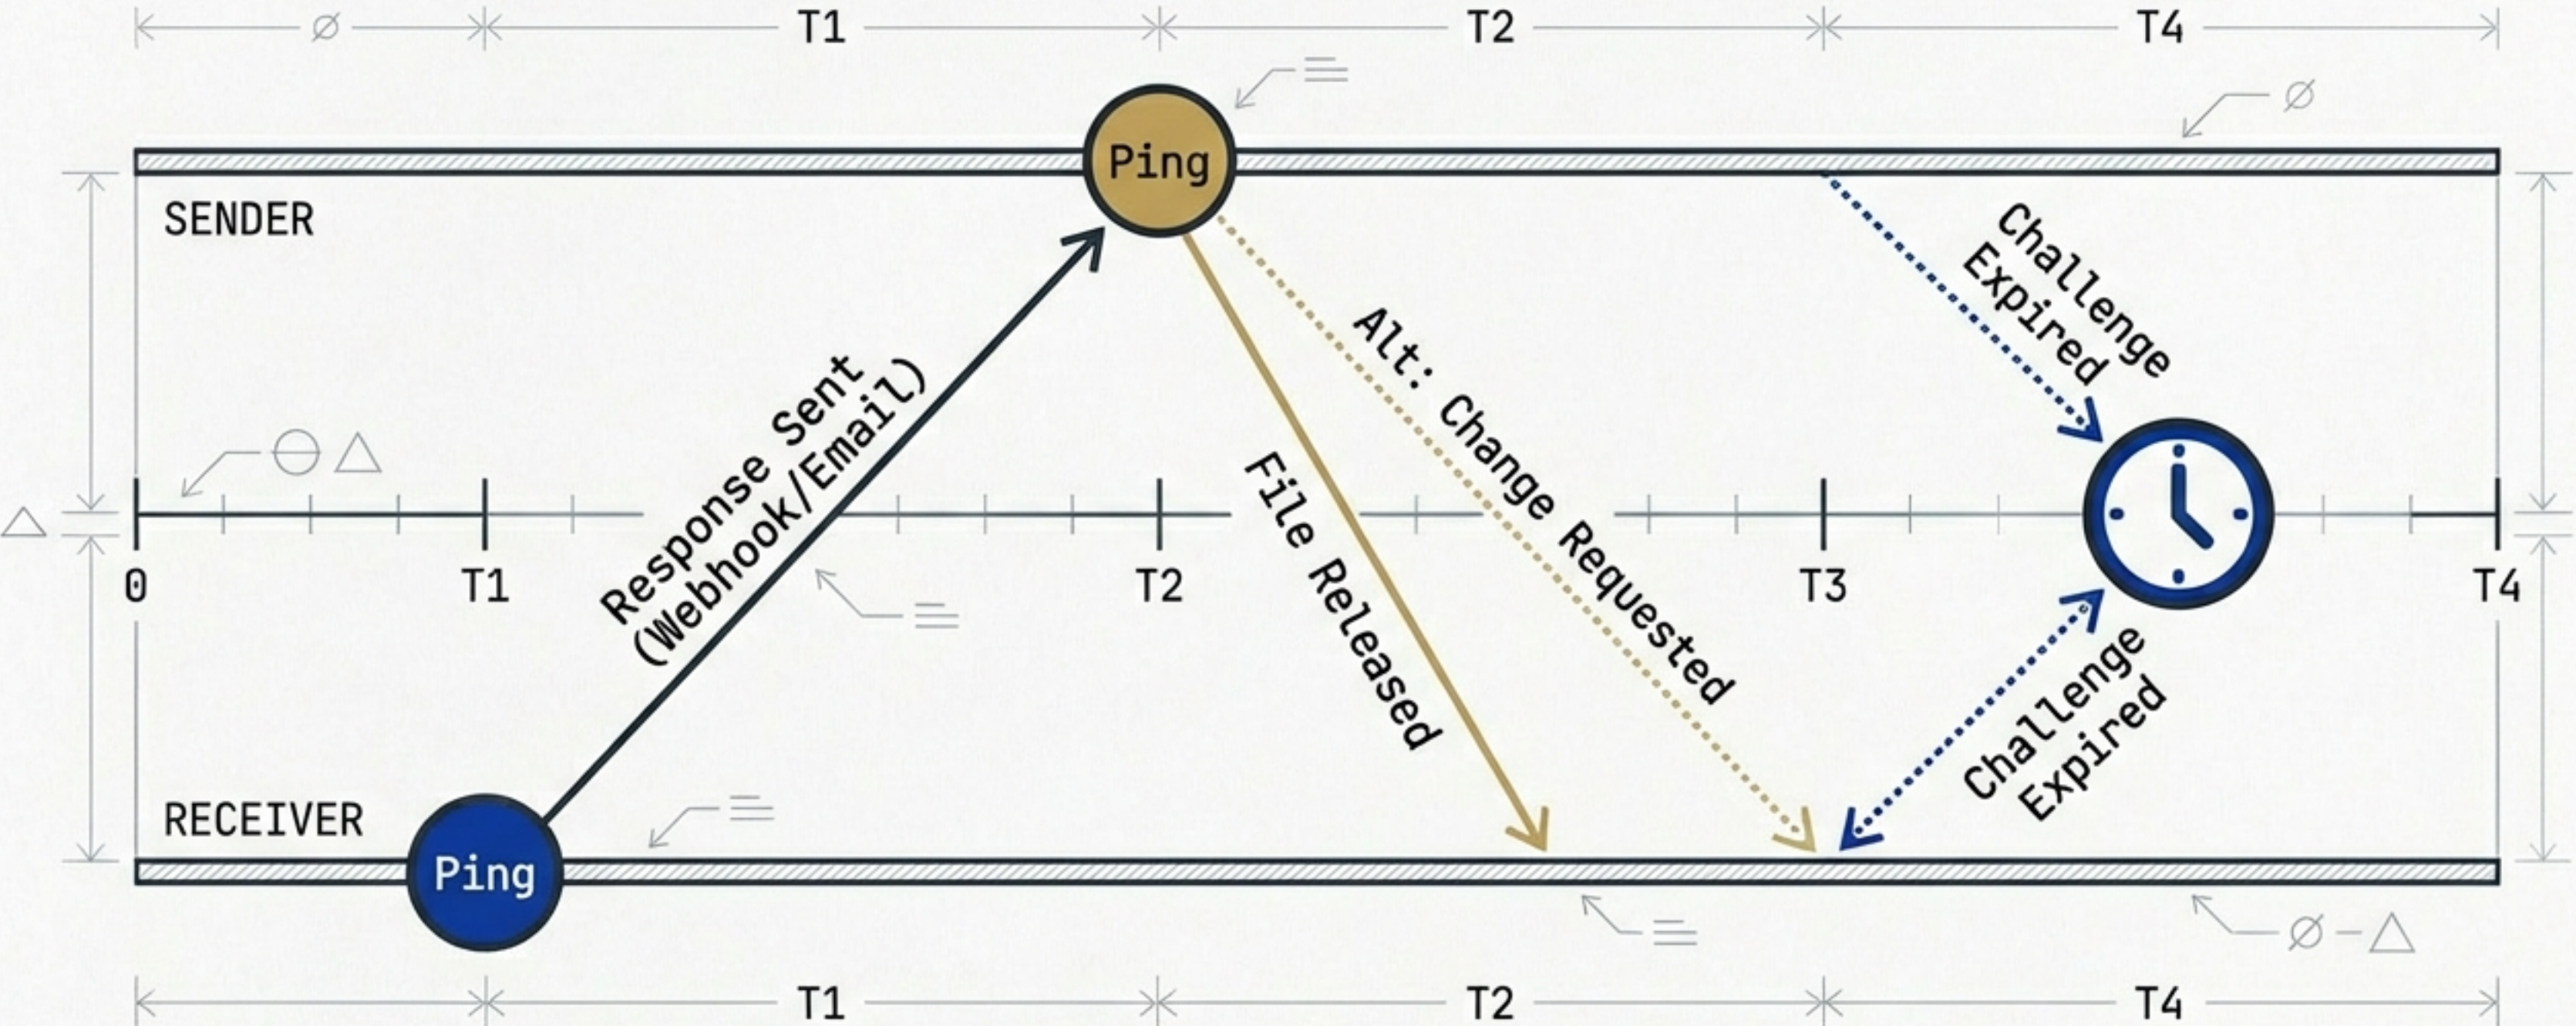

Complex security, zero user configuration

Integration: The Defence in Depth

Acceptance Criteria

v0.6.14 Definition of Done

-
- ☐ 1. Sender toggles 'Secure Delivery' mode.
 - ☐ 2. Challenge code generated & displayed.
 - ☐ 3. Receiver transparency notice displayed.
 - ☐ 4. Encrypted Report + Public Key transmission.
 - ☐ 5. Sender Dashboard (Release/Deny/Change).

- ☐ 6. File LOCKED until explicit release.
- ☐ 7. Transparent PKI exchange complete.
- ☐ 8. Self-destruct on failure/expiry.
- ☐ 9. Configurable requirements (Geo/VPN).
- ☐ 10. State change notifications active.
