

Evolution Map v0.6.32

The MCP Pipeline & AI-as-Sender

OLD WORLD: HUMAN BROWSER

NEW WORLD: AI AGENT (MCP)

SGraph Send is No Longer Just a Browser Tool

SENDER

Claude.ai via MCP Connector

RESULT

100% Zero-Knowledge Guarantee

STATUS

Validated in Production (26 Feb 2026)

On Feb 26, 2026, an AI agent successfully generated, encrypted, and delivered a document. The server never saw the plaintext, filename, or key.

The Landscape: Mapping the Shift

SGraph Send is No Longer Just a Browser Tool

SENDER

Claude.ai via MCP Connector

RESULT

100% Zero-Knowledge Guarantee

STATUS

Validated in Production (26 Feb 2026)

On Feb 26, 2026, an AI agent successfully generated, encrypted, and delivered a document. The server never saw the plaintext, filename, or key.

From Theory to 'Custom-Built'

Movement occurs when a component proves reliability across different contexts.

SGraph Send is No Longer Just a Browser Tool

SENDER

Claude.ai via MCP Connector

RESULT

100% Zero-Knowledge Guarantee

STATUS

Validated in Production (26 Feb 2026)

On Feb 26, 2026, an AI agent successfully generated, encrypted, and delivered a document. The server never saw the plaintext, filename, or key.

The Landscape: Mapping the Shift

Significance: Establishes a dual-mode API pattern: Multipart (Human) vs. Data-Param (AI).

On Feb 26, 2026, an AI agent successfully generated, encrypted, and delivered a document. The server never saw the plaintext, filename, or key.

The Dependency Chain

The exact sequence executed on 26 Feb 2026.

On Feb 26, 2026, an AI agent successfully generated, encrypted, and delivered a document. The server never saw the plaintext, filename, or key.

SHERPA AGENT: The First AI Sender

Component Specification: C24

COMPONENT SPECIFICATION: C24

SHERPA AGENT

The First AI Sender

EVOLUTION STAGE: GENESIS → EARLY CUSTOM-BUILT

CAPABILITY: PDF GENERATION, ENCRYPTION, UPLOAD

STATUS: PROTOTYPE

CONSTRAINT: Requires Manual Orchestration. The agent currently needs step-by-step guidance; it is not yet 'fire and forget'.

STRATEGIC NOTE: Opens a new product category: Secure Delivery for AI.

On Feb 26, 2026, an AI agent successfully generated, encrypted, and delivered a document. The server never saw the plaintext, filename, or key.

The Architecture Held

SAFE ZONE (Client-Side)

Sherpa Agent

Key and Plaintext exist here.

Local Browser

ZERO-KNOWLEDGE BOUNDARY

UNTRUSTED ZONE (Server-Side)

SGraph Server

Only Ciphertext exists here.

Storage

The server saw NOTHING. No plaintext, no filename, no key. The architecture is sender-agnostic.

Expanding the Trust Perimeter

Unlike browser delivery, email delivery exposes the key to the email provider. This is a deliberate trade-off for utility.

Browser Delivery

Email Delivery

Maturing the MCP Upload Route

CURRENT STATE (Custom-Built)

- ☐ Error Handling
(Structured errors for AI)
- ☐ Rate Limiting
(Per-token/IP)
- ☐ Monitoring/Alerting
(MCP failure alerts)
- ☐ API Documentation
(MCP Tool Schema)

GOAL STATE (Product)

ESTIMATED EFFORT: 4-6 SESSIONS

Maturing the AI Sender (Sherpa Agent)

CURRENT STATE (Prototype)

- ☐ Single-instruction autonomy ('Send this to X')
- ☐ Error recovery (Retry logic)
- ☐ Session memory (Context retention)
- ☐ Delivery confirmation (Receipt verification)

GOAL STATE (Autonomous Product)

ESTIMATED EFFORT: 8-12 SESSIONS
(High Automation Effort)

Three Key Strategic Shifts

NEW INTEGRATION SURFACE

MCP Connectors are now a first-class citizen alongside Browsers.

DUAL-MODE API

We must support both Multipart (Human) and Data-Param (AI) inputs.

NEW NARRATIVE

SGraph is now infrastructure for the AI economy, not just a privacy tool for humans.

Immediate Next Steps: Cartographer's Log

COMPLETED (v0.6.32)

- ☒ Publish Map v0.6.32 [DONE]
- ☒ Map new components C22-C28 [DONE]

IN PROGRESS

- ☐ Update Trust Boundary map for Email implications
- ☐ Formalize MCP Tool Schema Documentation
- ☐ Assess n8n workflow maturity

FUTURE

- ☐ Handover Package #1
- ☐ Investor Narrative Update

A Validated Pattern for AI-Native Privacy

We have crossed the chasm from "Browser Tool" to "Programmable Zero-Knowledge Platform"

Appendix: Component Glossary

CODE

DEFINITION

C22

MCP Upload Route (send.sgraph.ai)

C23

SGMETA Envelope (Filename preservation)

C24

Sherpa Agent (AI Sender)

C25

n8n Email Integration

C26

AWS WorkMail (Commodity)

C27

Browser Decryption (Stable)

C28

data Parameter (MCP upload fix)
