

SGraph Send

Design Vision & Strategy

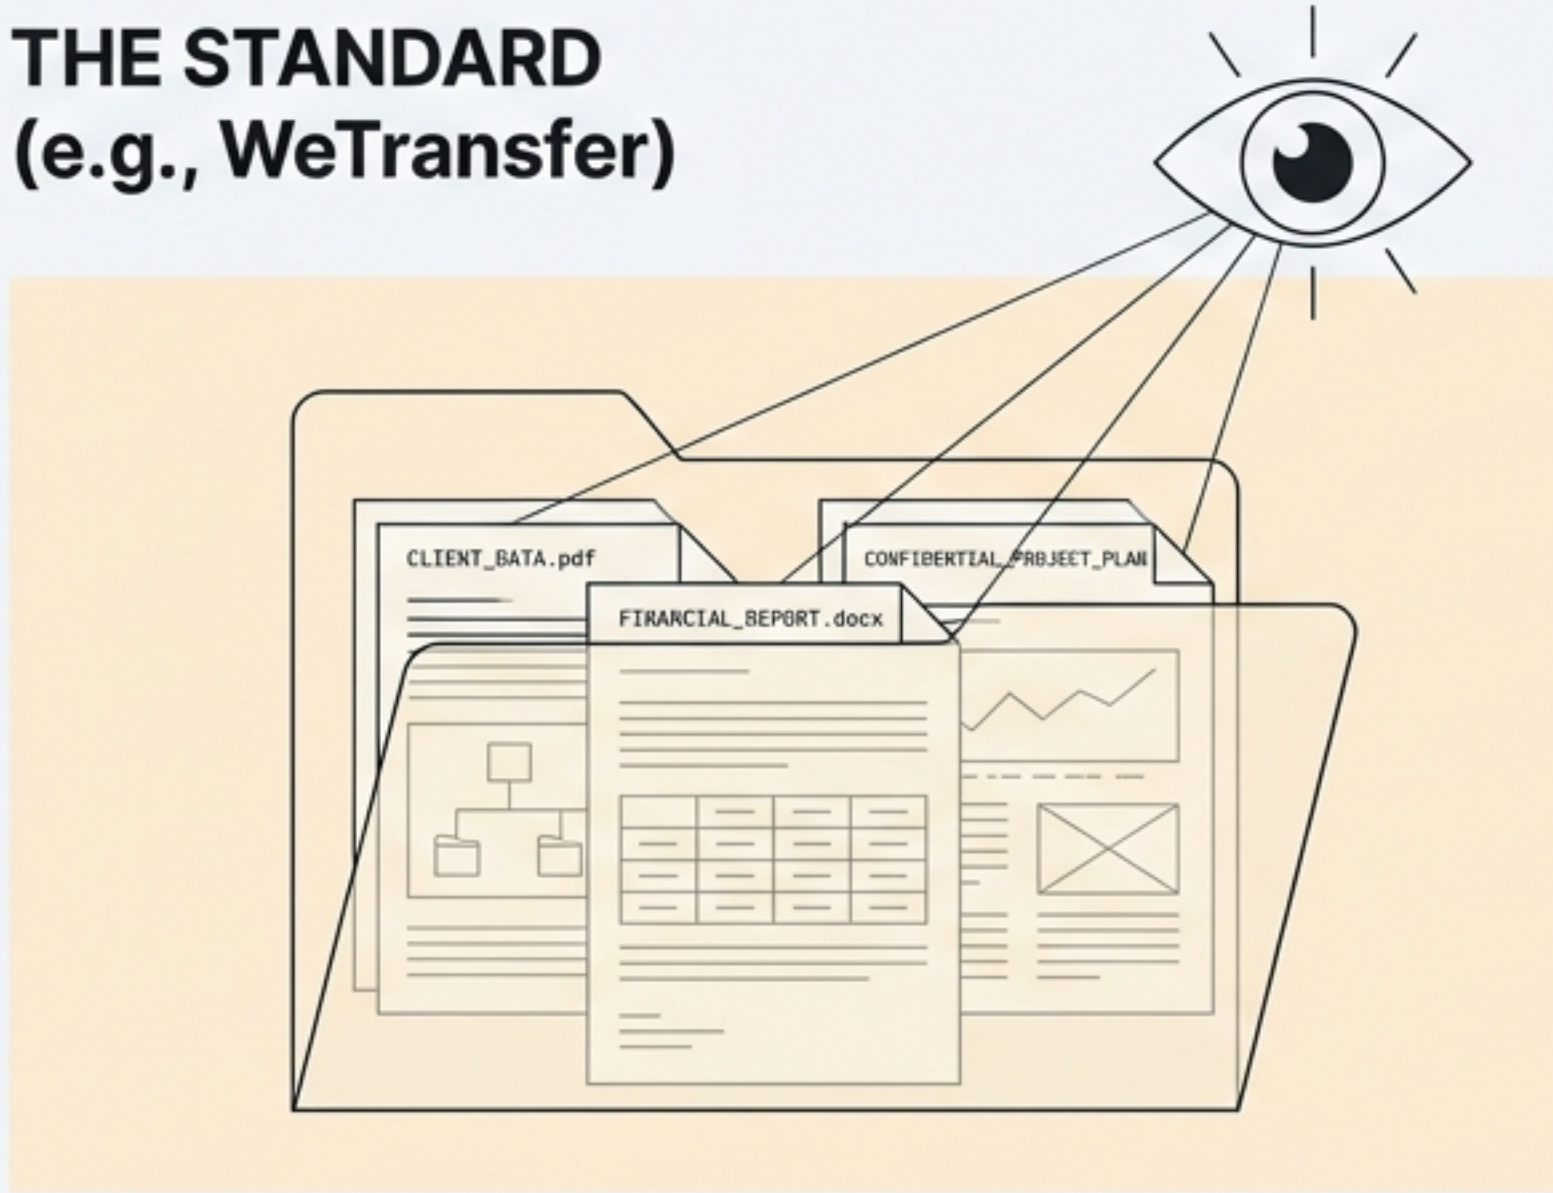

CONTEXT:
A COLLABORATION BRIEF
FOR CRUZ & CRUZ

We are building SGraph Send at send.sgraph.ai. Our mission: To create a file-sharing service where the server is blind, but the user experience is transparent.

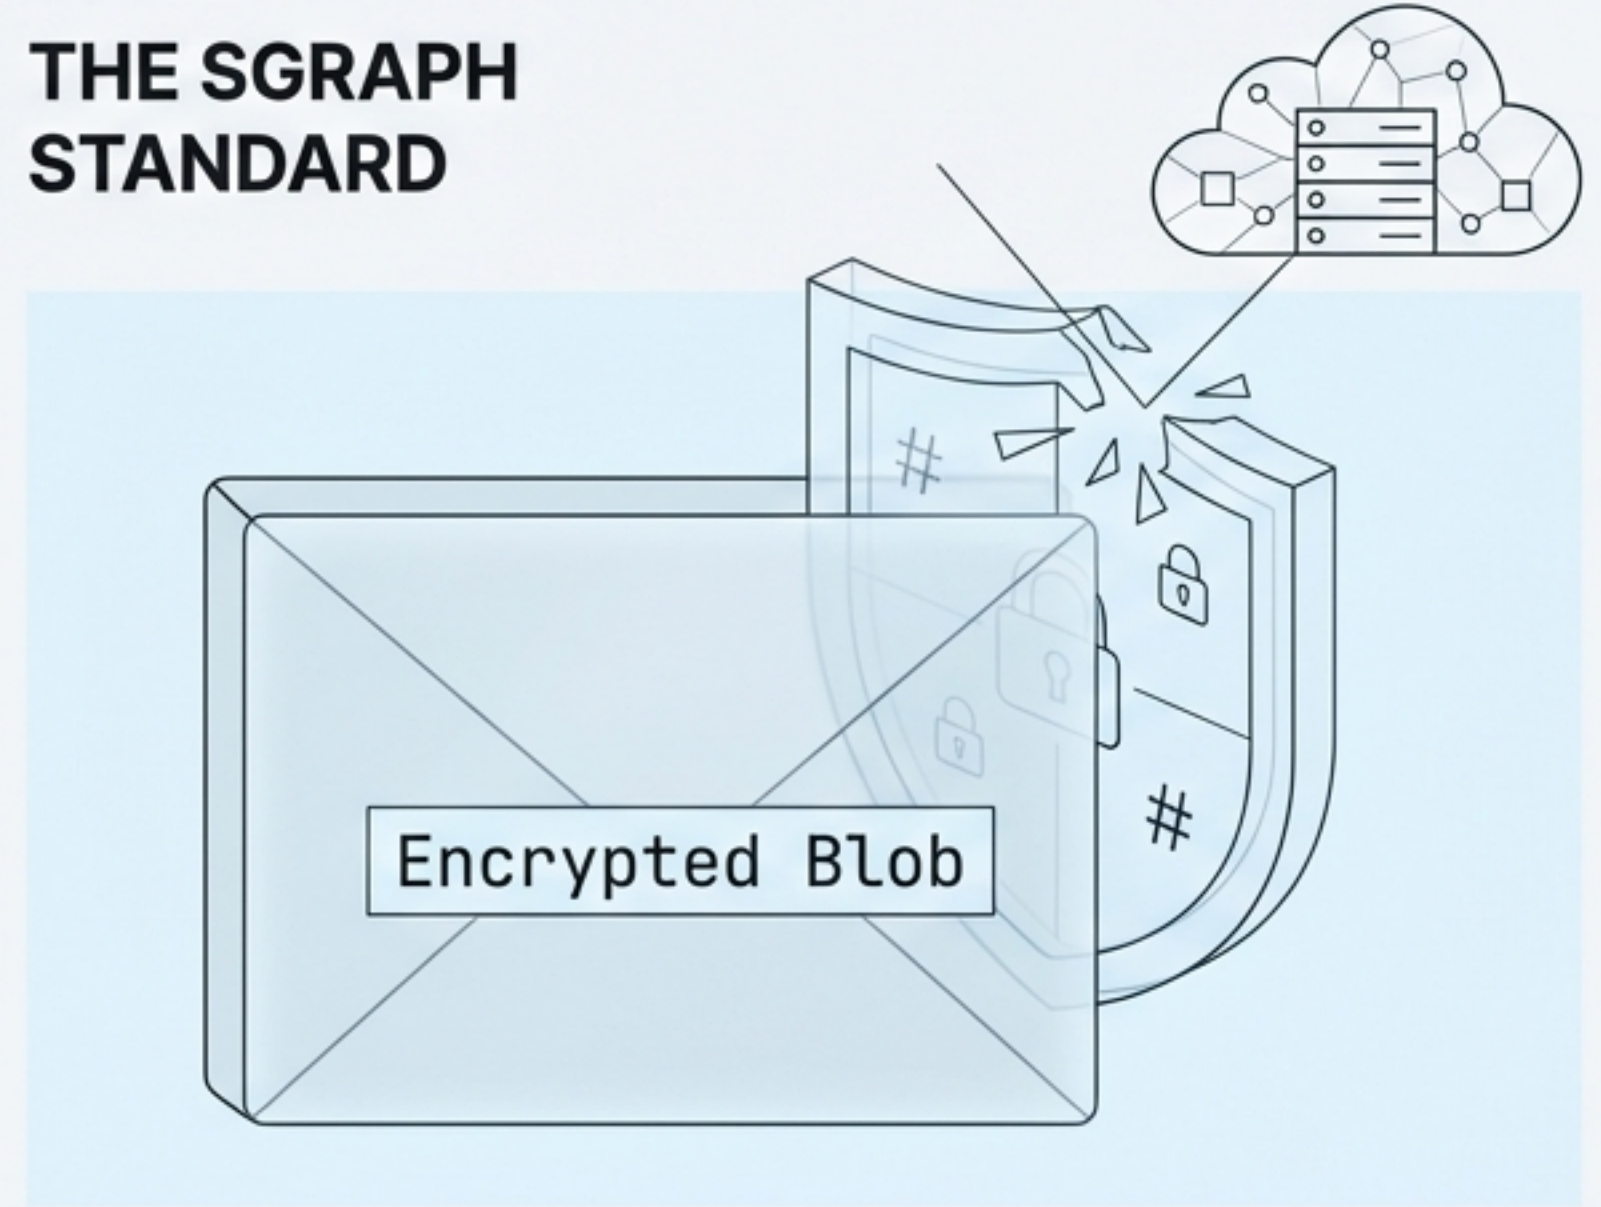

It's like WeTransfer, but we cannot see the files.

THE STANDARD (e.g., WeTransfer)

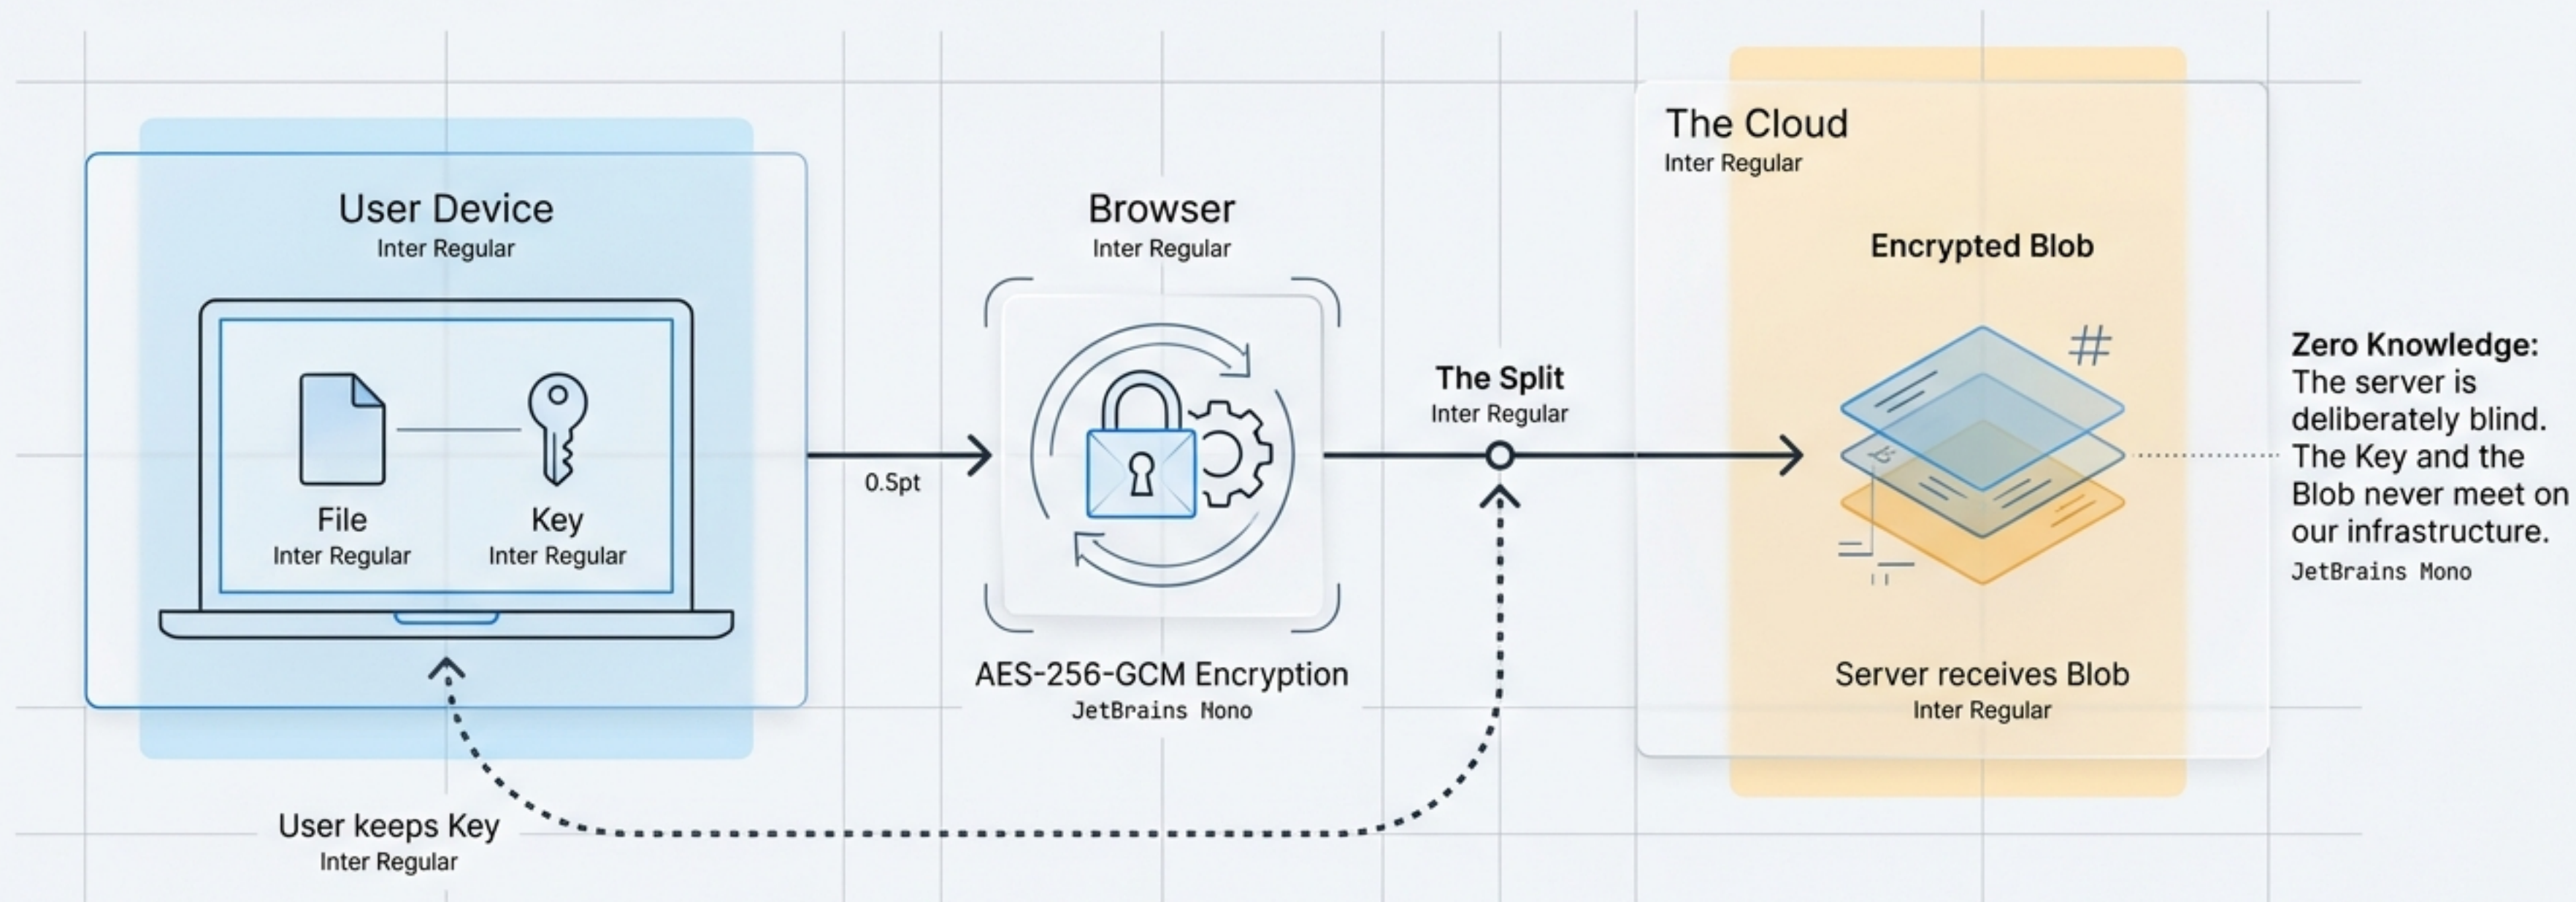

- Standard services store plaintext.
- Employees or hackers can access content.
- Server holds the keys.

THE SGRAPH STANDARD

- Files encrypted in-browser before upload.
- Attackers find only encrypted blobs.
- We hold no keys. We know nothing.

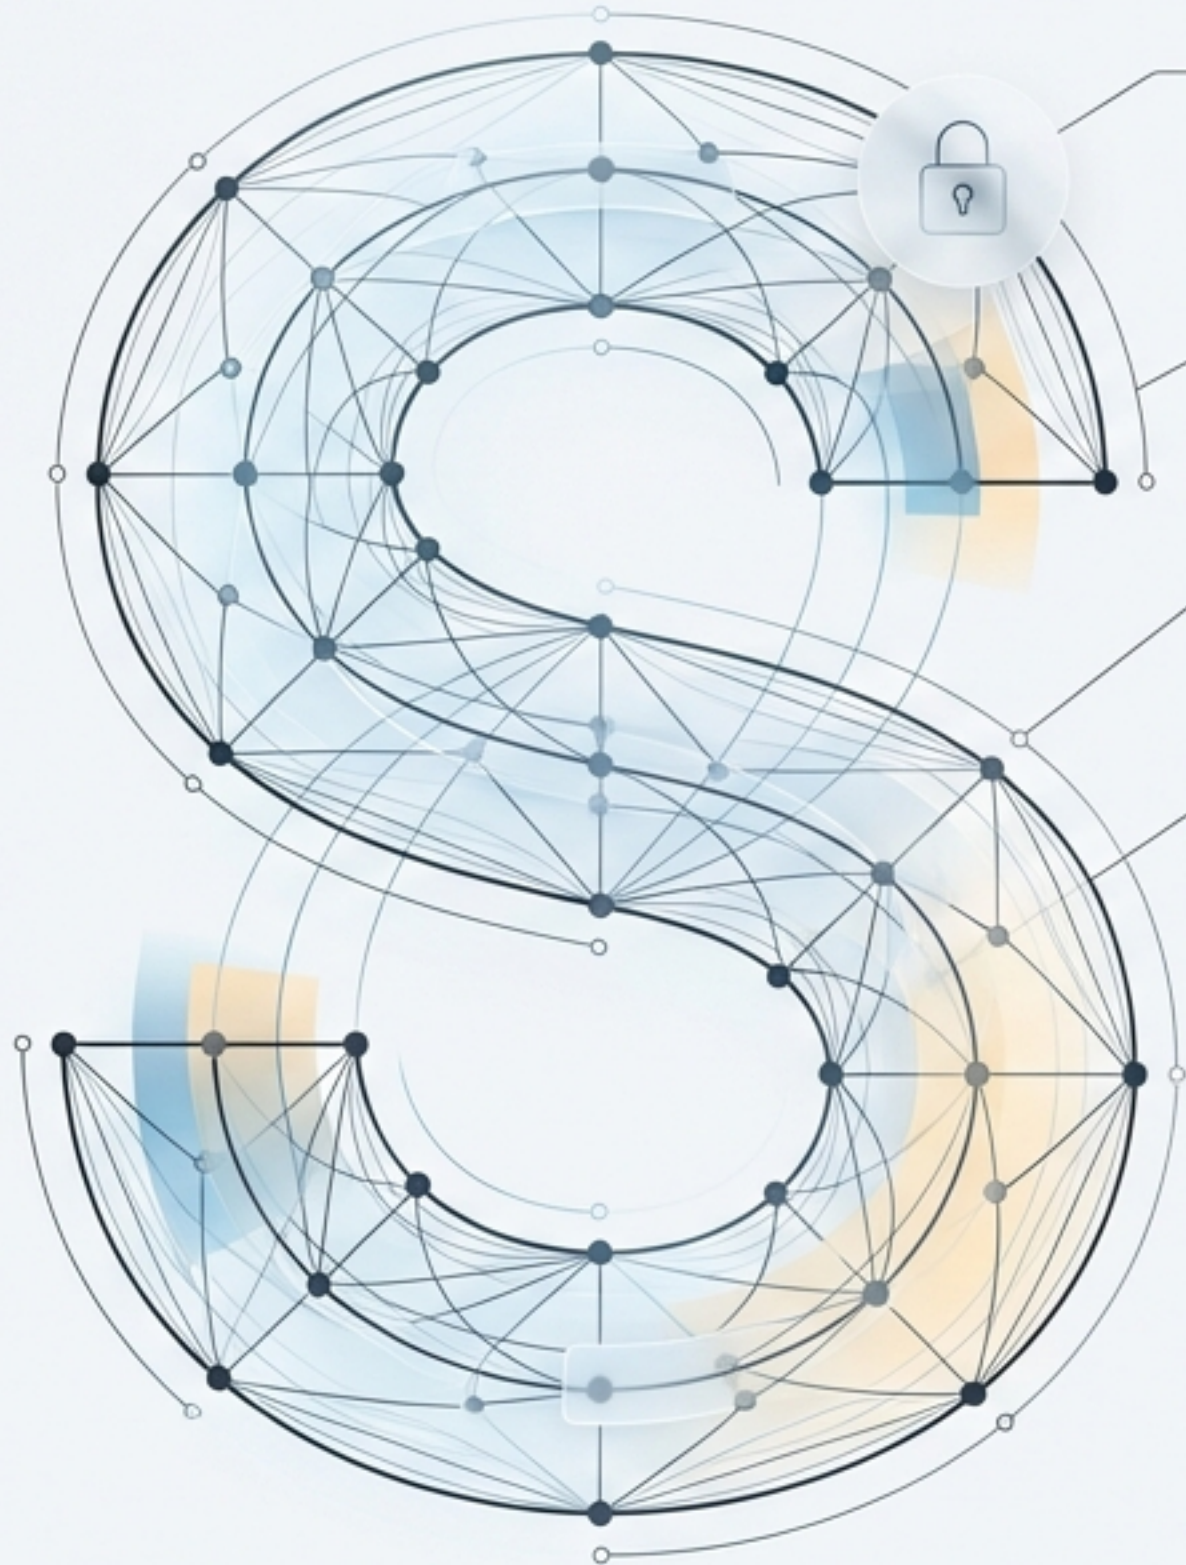

The Architecture of Trust: The Blind Server

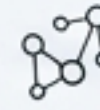

The design challenge: Visualizing safety without using fear-based imagery like padlocks.

Inter Regular

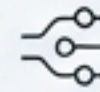

Decoding the SGraph Identity

SECURE: Privacy-first, zero-knowledge.
Inter Regular, JetBrains Mono

SEMANTIC: Powered by knowledge graphs.
Inter Regular, JetBrains Mono

SIMPLE: Minimal, focused, no bloat.
Inter Regular, JetBrains Mono

SEND: The core utility.
Inter Regular, JetBrains Mono

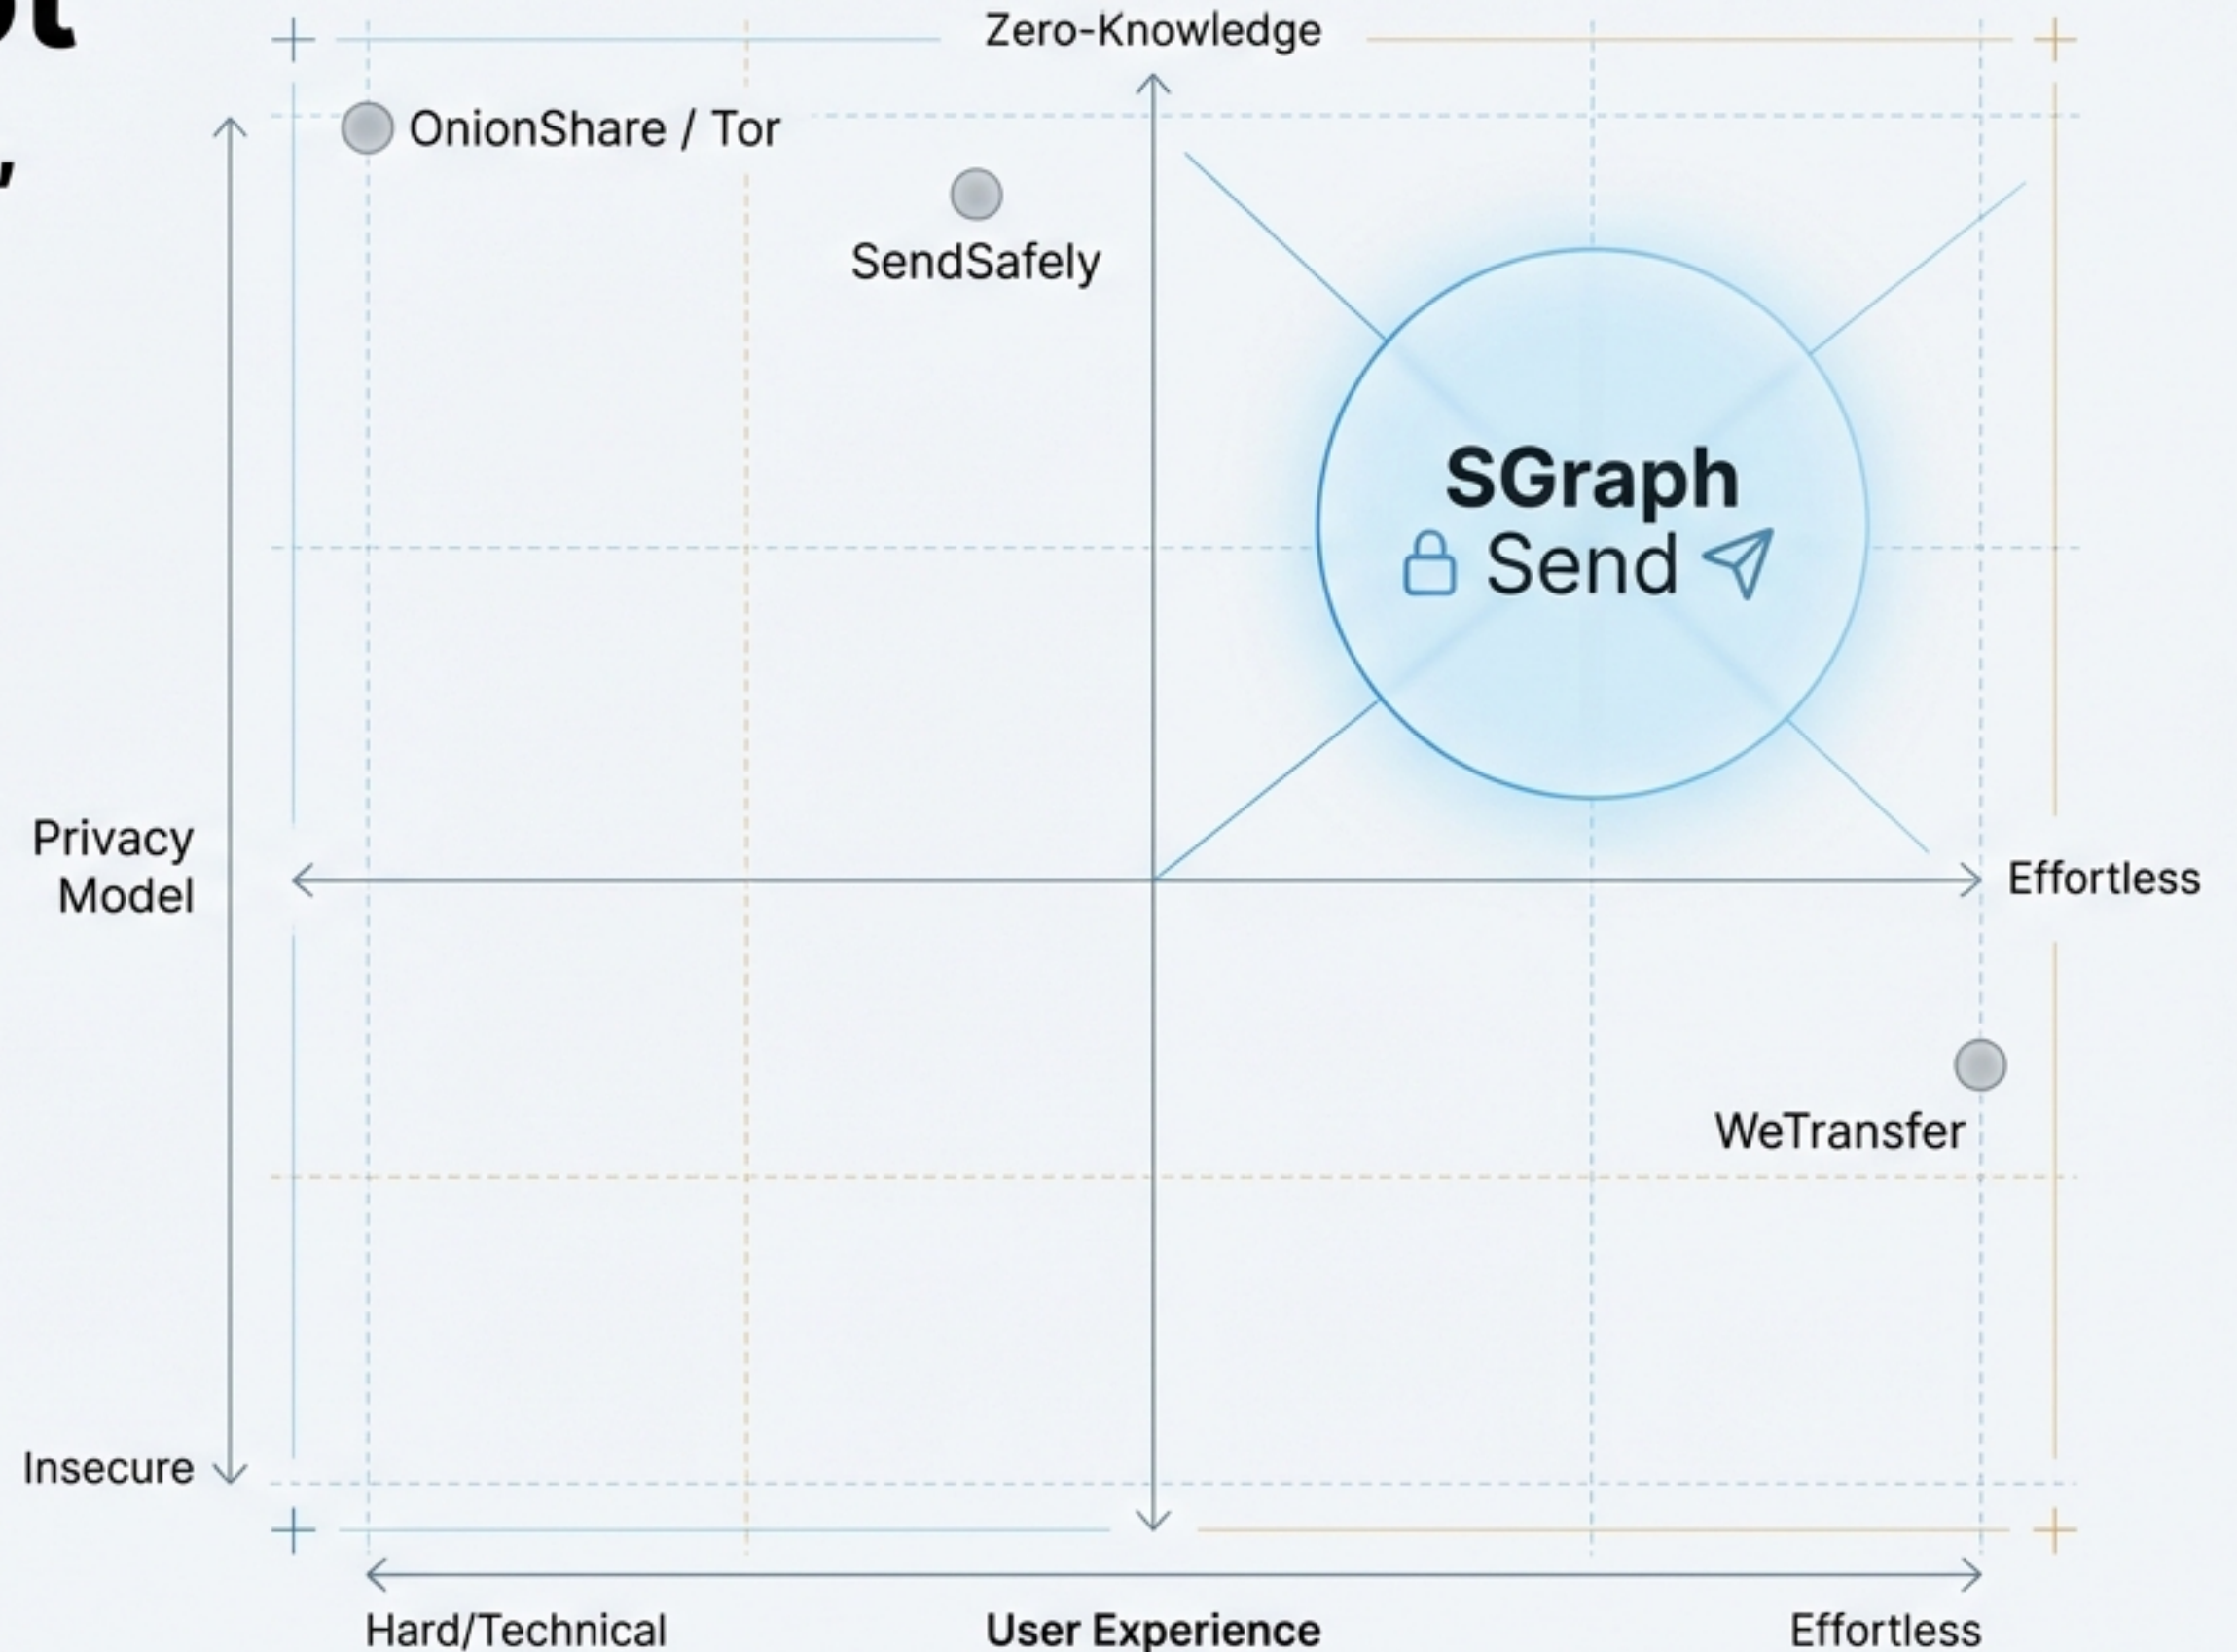

BRAND DNA

- Trust-based, not fear-based (**No fortresses**).
- Culturally Aware (**RTL & Multi-theme ready**).
- Simple over Complex (**Features are plugins**).
- Visual Goal: The brand and the product are one.

The Sweet Spot

Uncompromising Security,
Consumer Simplicity.

We combine WeTransfer's approachability with SendSafely's security. We are the only product combining zero-knowledge encryption, radical transparency, and a plugin ecosystem.

Designing for Humans

The Privacy Pro

Lawyer/Journalist. Needs trust signals and polish. Low friction tolerance.

Persona_ID: PRIVACY_PRO
Trust_Level: HIGH_REQ

The Everyday User

Friends & Family. Doesn't understand encryption. Needs it to "just work" visibly.

Persona_ID: EVERYDAY_USER
UX_Priority: EFFORTLESS

The Developer

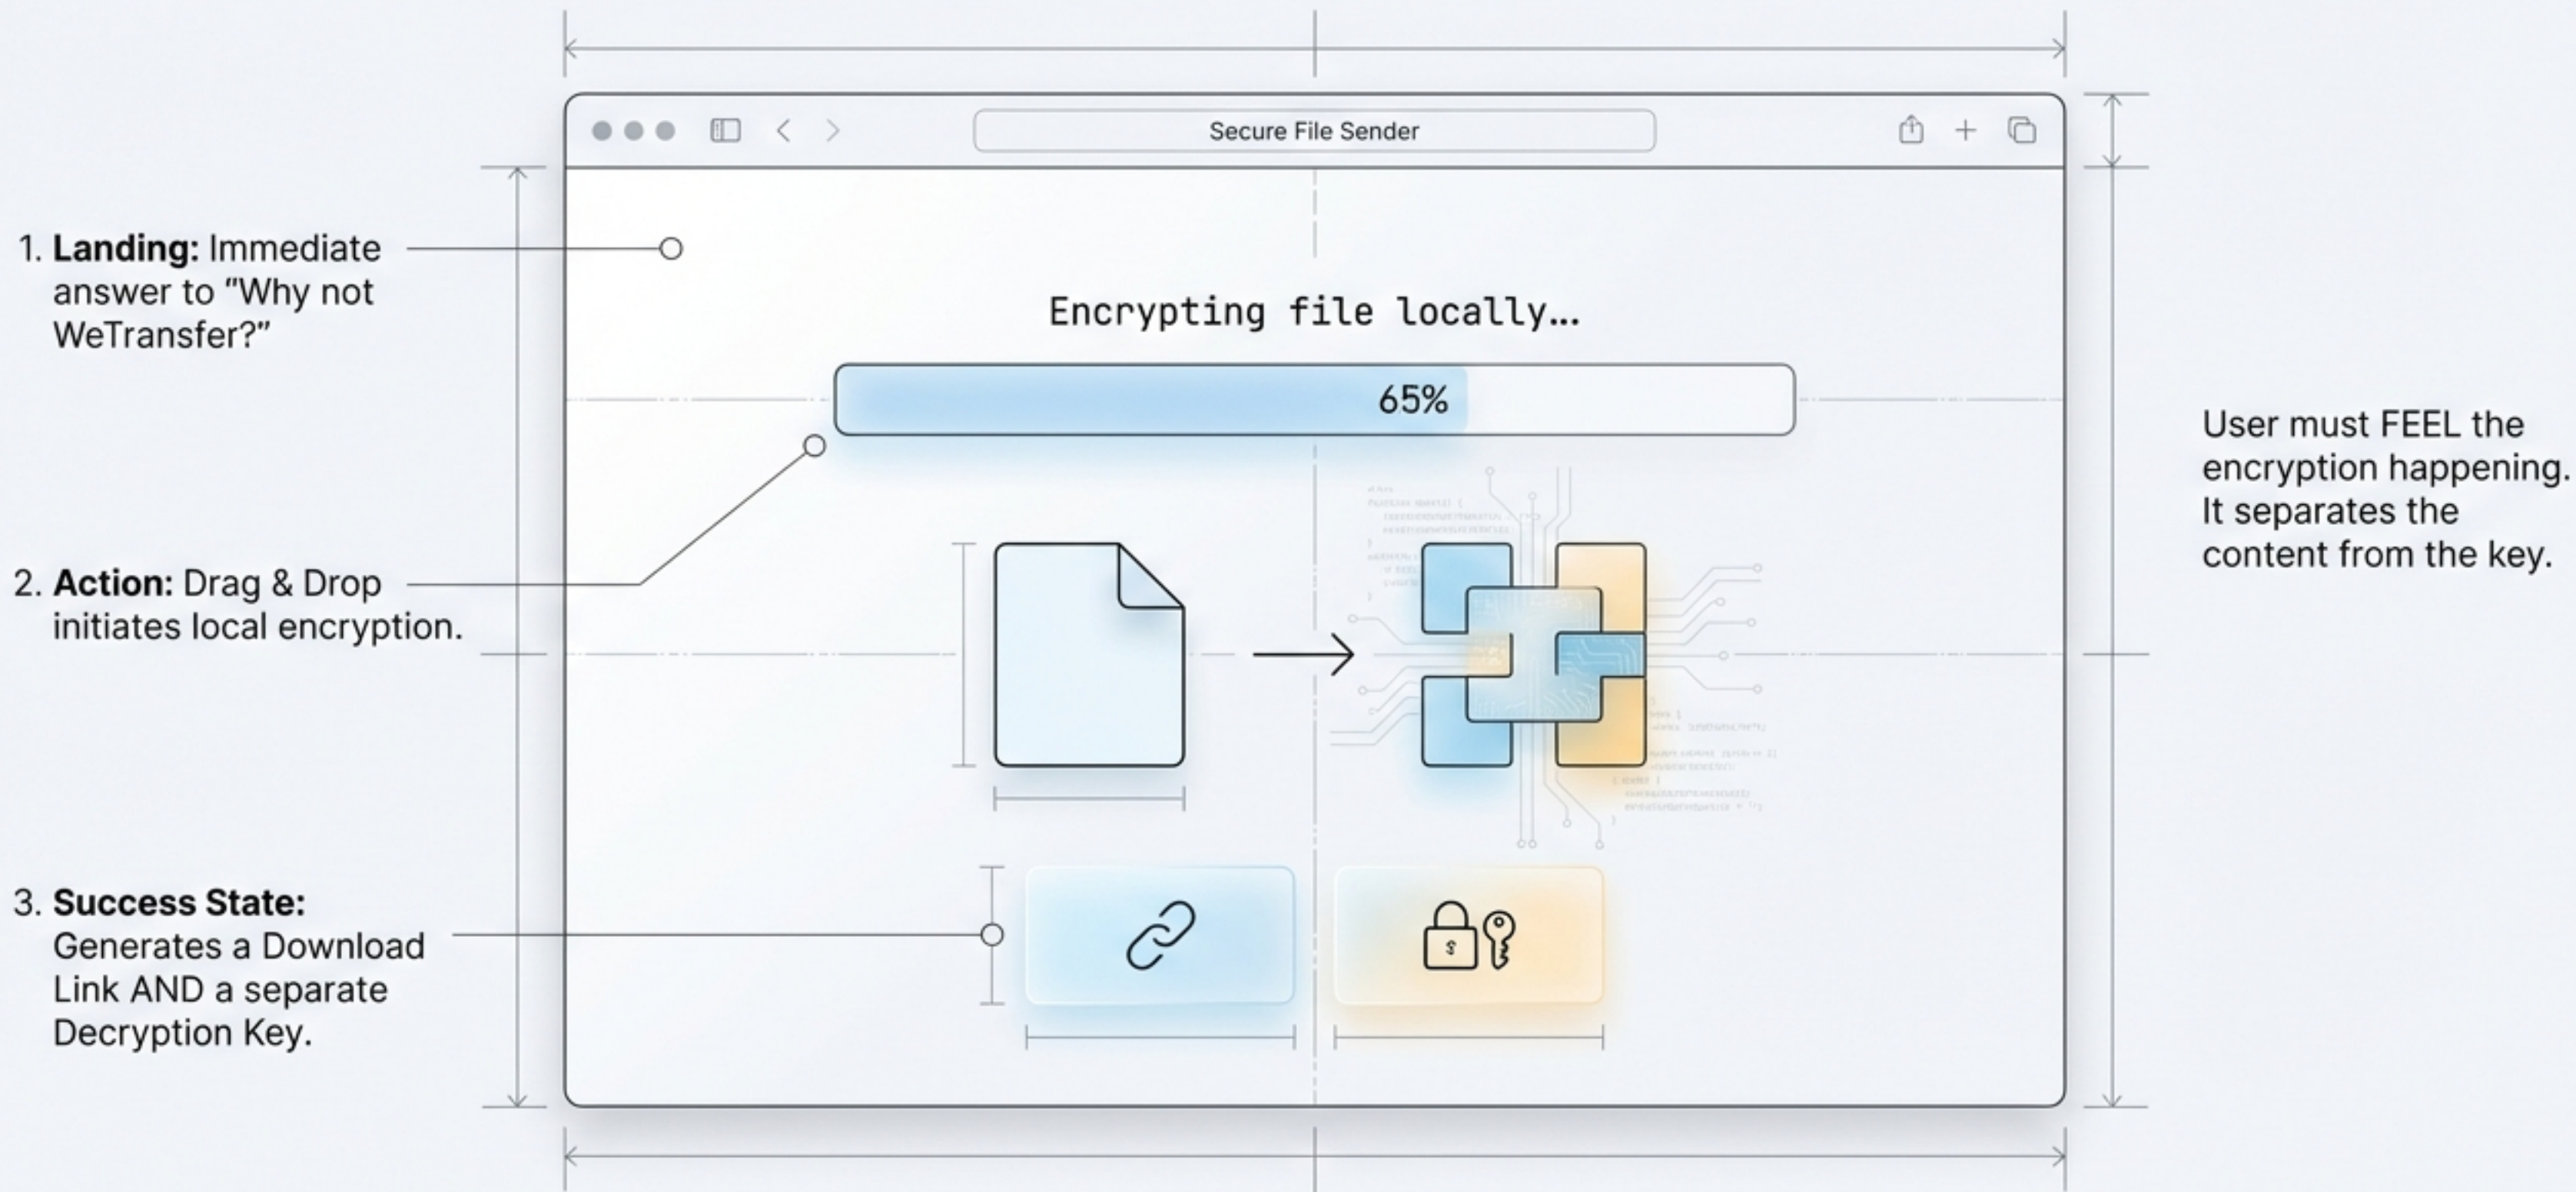

Tech-Savvy. Values open source. Rejects "enterprise" bloat.

Persona_ID: DEV_USER
Values: OPEN_SOURCE
Aversion: BLOAT

Design Goal: Make privacy effortless. Not scary.

Goal_ID: EFFORTLESS_PRIVACY

The Sender Experience

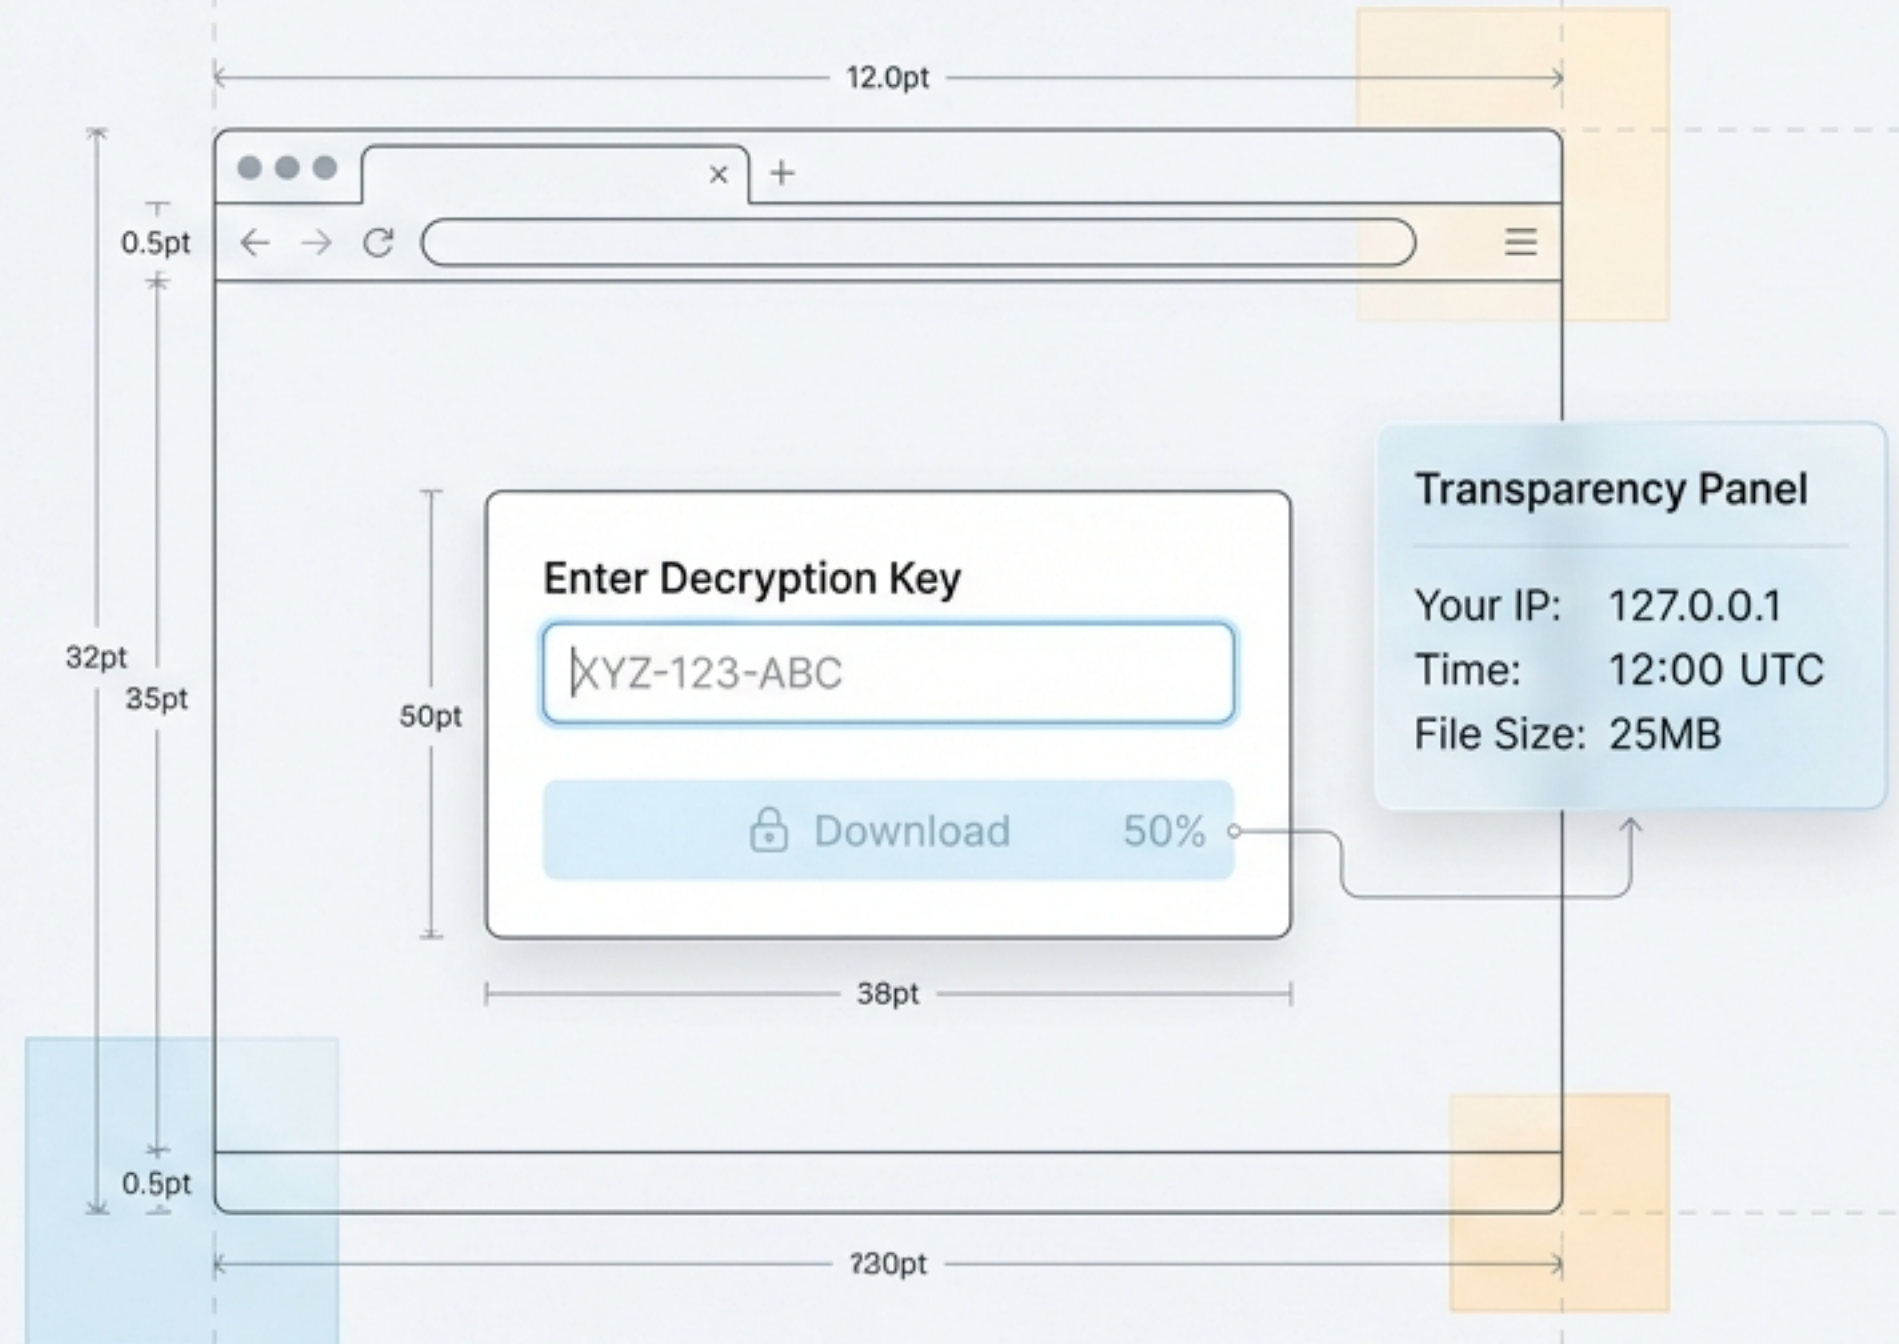

The Receiver Experience

Strategic Note: Every receiver is a potential new user.

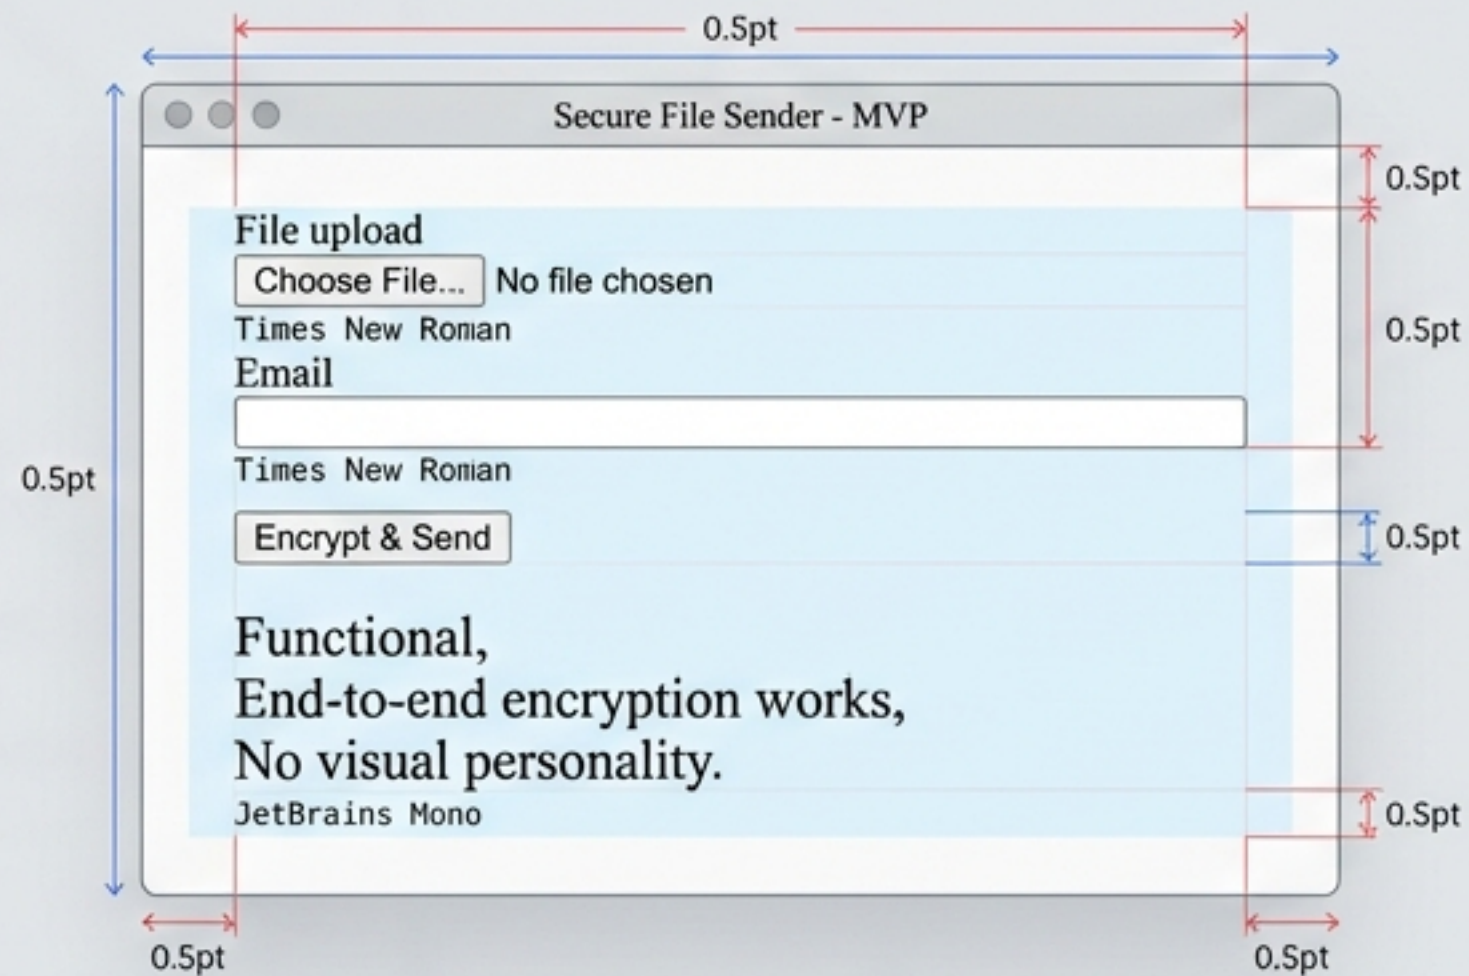

The Flow: Link -> Enter Key -> Client-side Decryption -> Download.

The Goal: Explain WHY the extra step (the key) exists. It's for their protection.

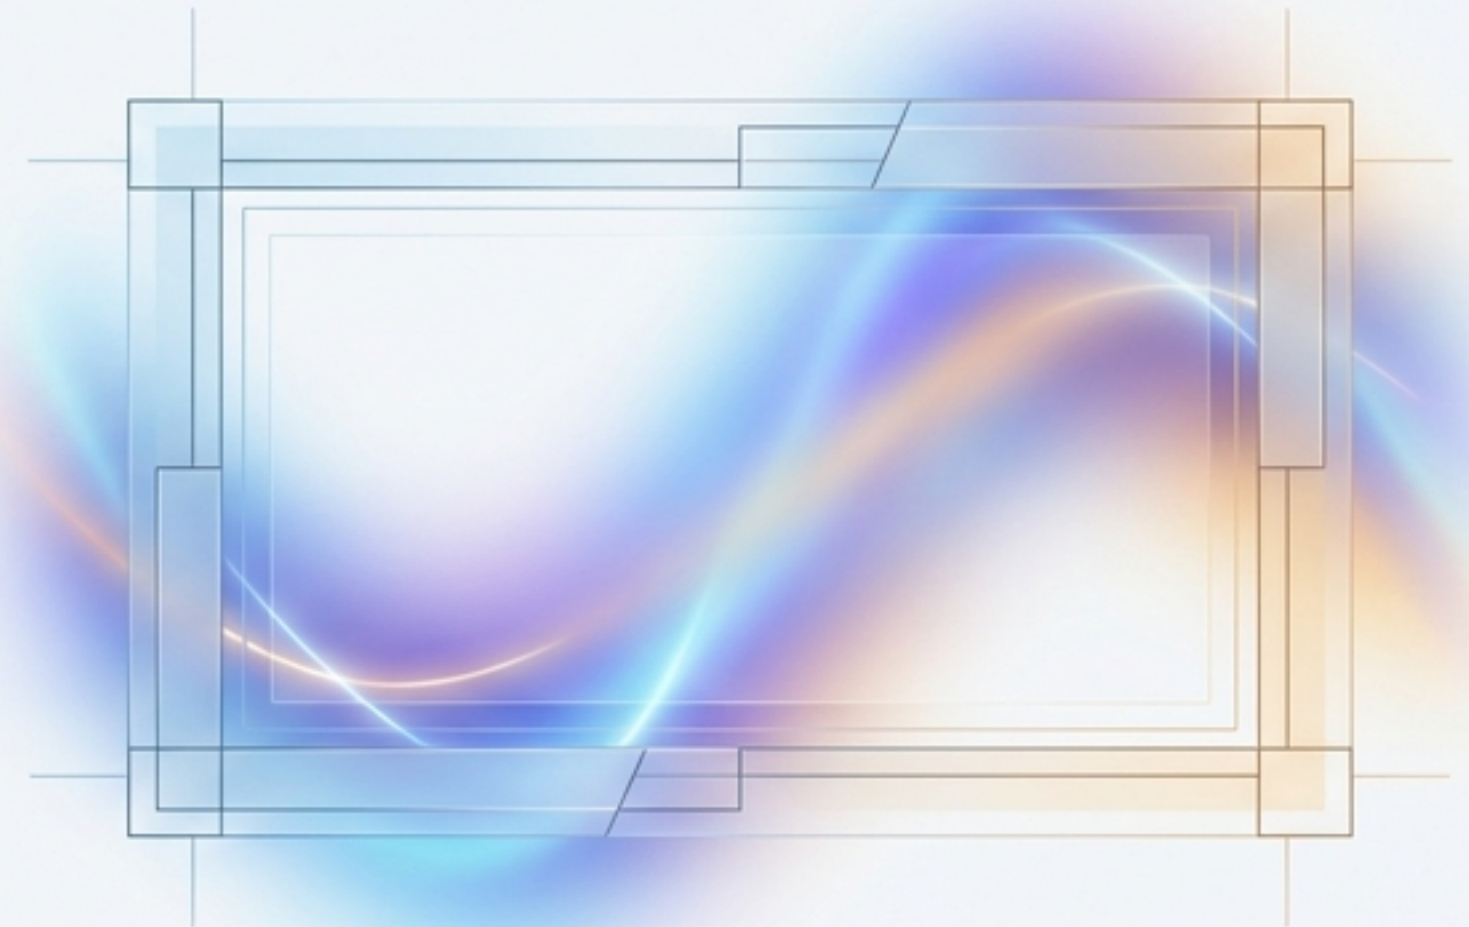

Current State vs. Future Vision

TODAY: The MVP

TOMORROW: The Vision

A visual language that answers "Why?" without words.
Modern, clean, approachable.

Visual Identity Requirements

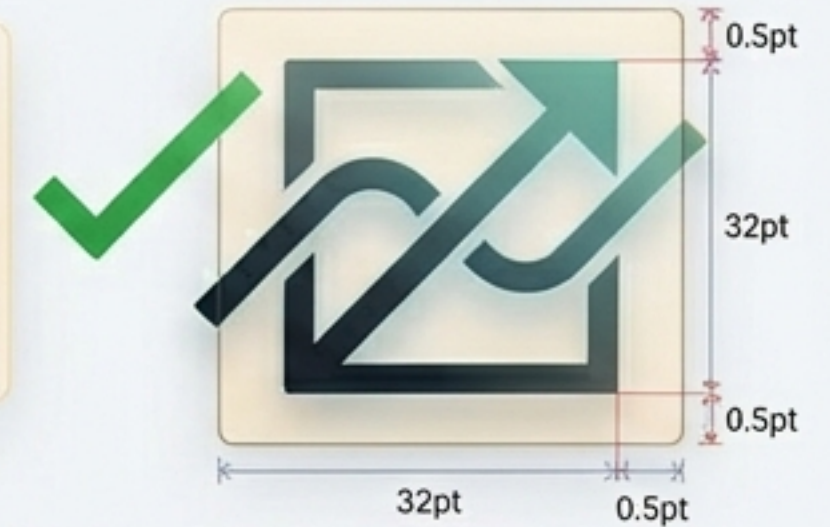

Trust, Movement, Modernity.

LOGO CONSTRAINTS

No Fear:
Avoid fear-based
imagery.

Concept:
Communicate
Movement + Security.

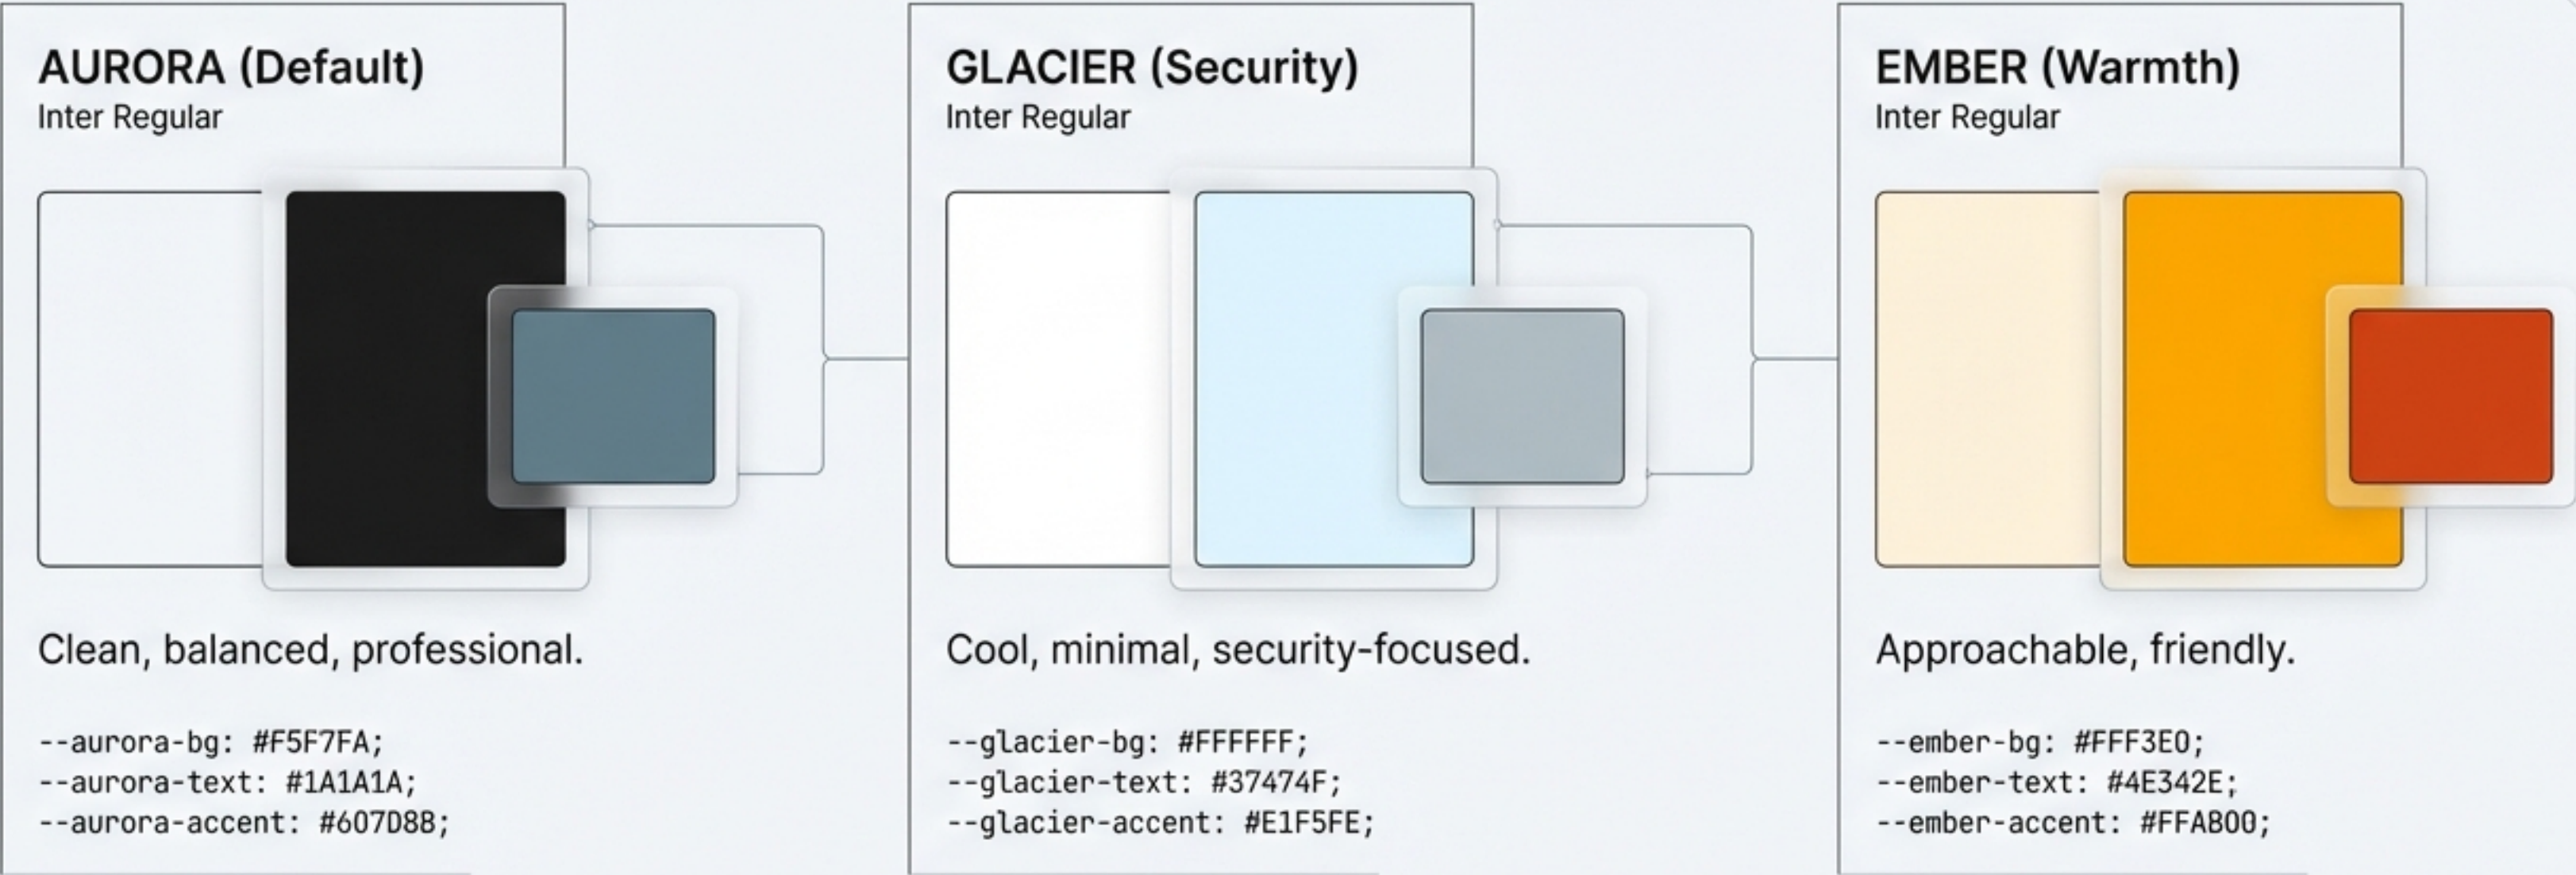

Versatility: 16x16px to Billboards.

TONE OF VOICE

Clear. Direct. Trustworthy. Slightly Warm.

The 'Graph' Concept: Optional references to nodes/connections are welcome.

Multi-Theme Architecture

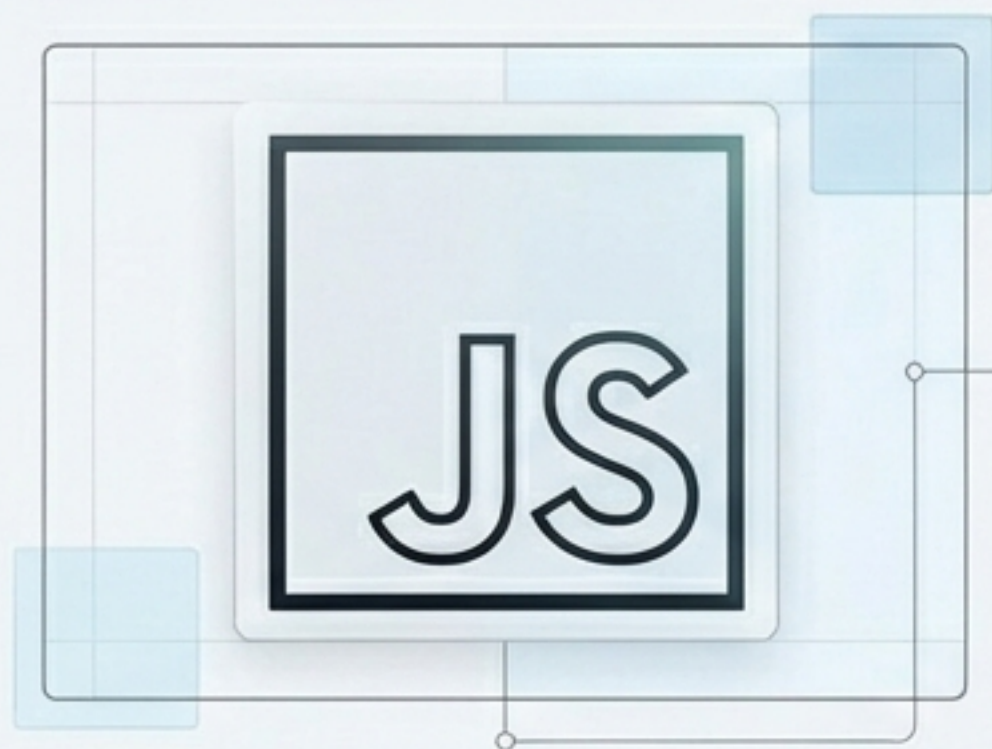

ACCESSIBILITY THEMES

Implementation: All themes map to CSS Custom Properties (Variables).

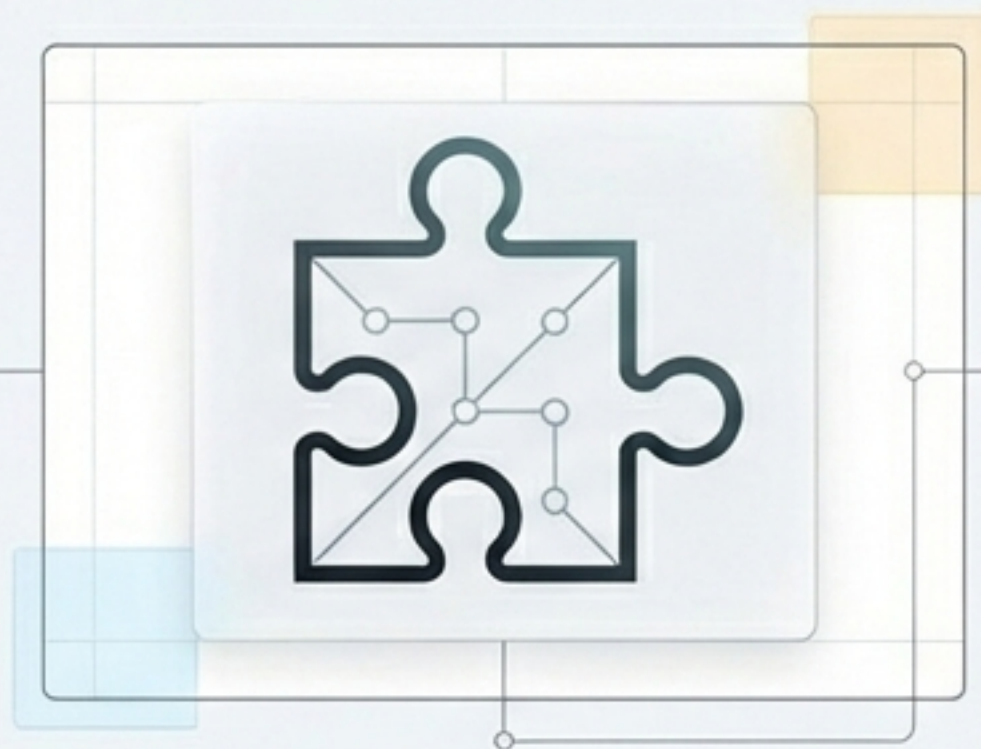

Design as Code

Technical Constraints & Stack.

Vanilla JS

No frameworks. No bloat.

Web Components

Encapsulated & Reusable UI.

CSS Variables

Theming via variable swaps.

CHECKLIST

No Text in Images:

Content decoupled for translation.

Responsive:

Mobile-first, tablet, desktop.

Performance:

Lightweight assets only.

Built for Everyone, Everywhere

Helvetica Now Display Bold, Tight Tracking.

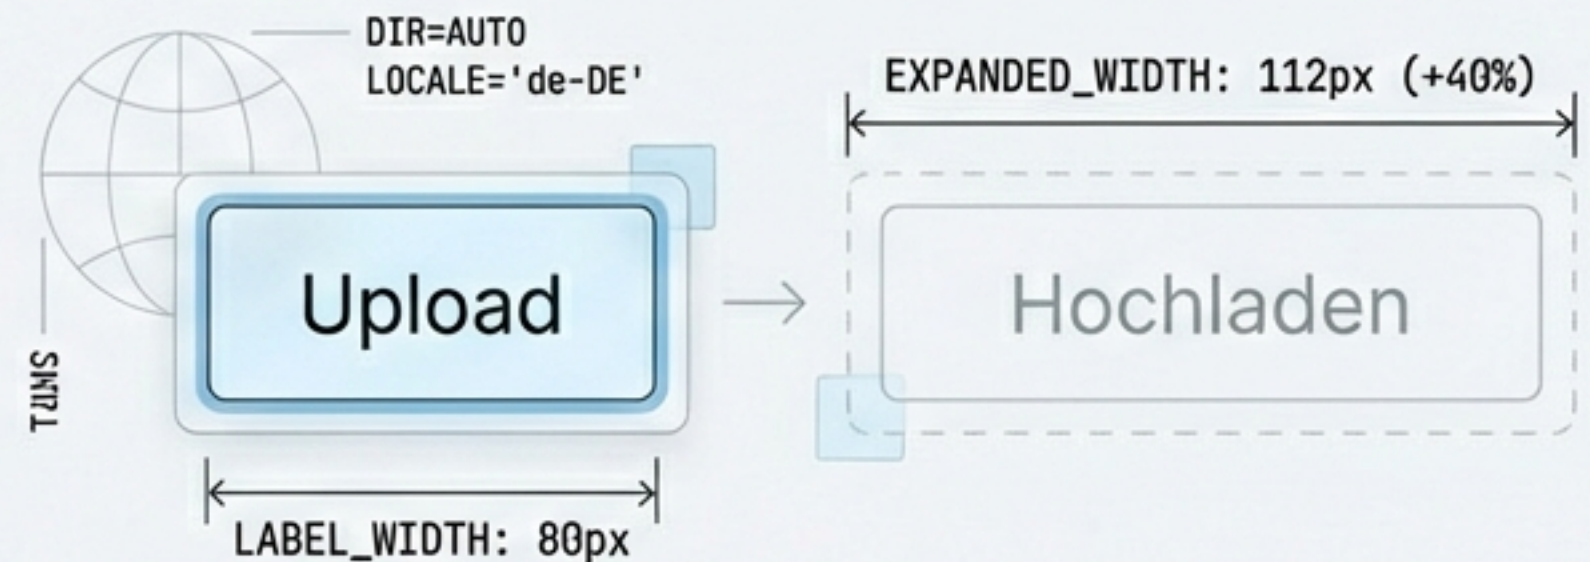

ACCESSIBILITY (a11y)

- ✓ WCAG 2.1 AA Standard.
- ✓ Touch targets: Min 44x44px.
- ✓ Colour independence: Status not rely on colour alone.

FOCUS_RING_SIZE > 2px

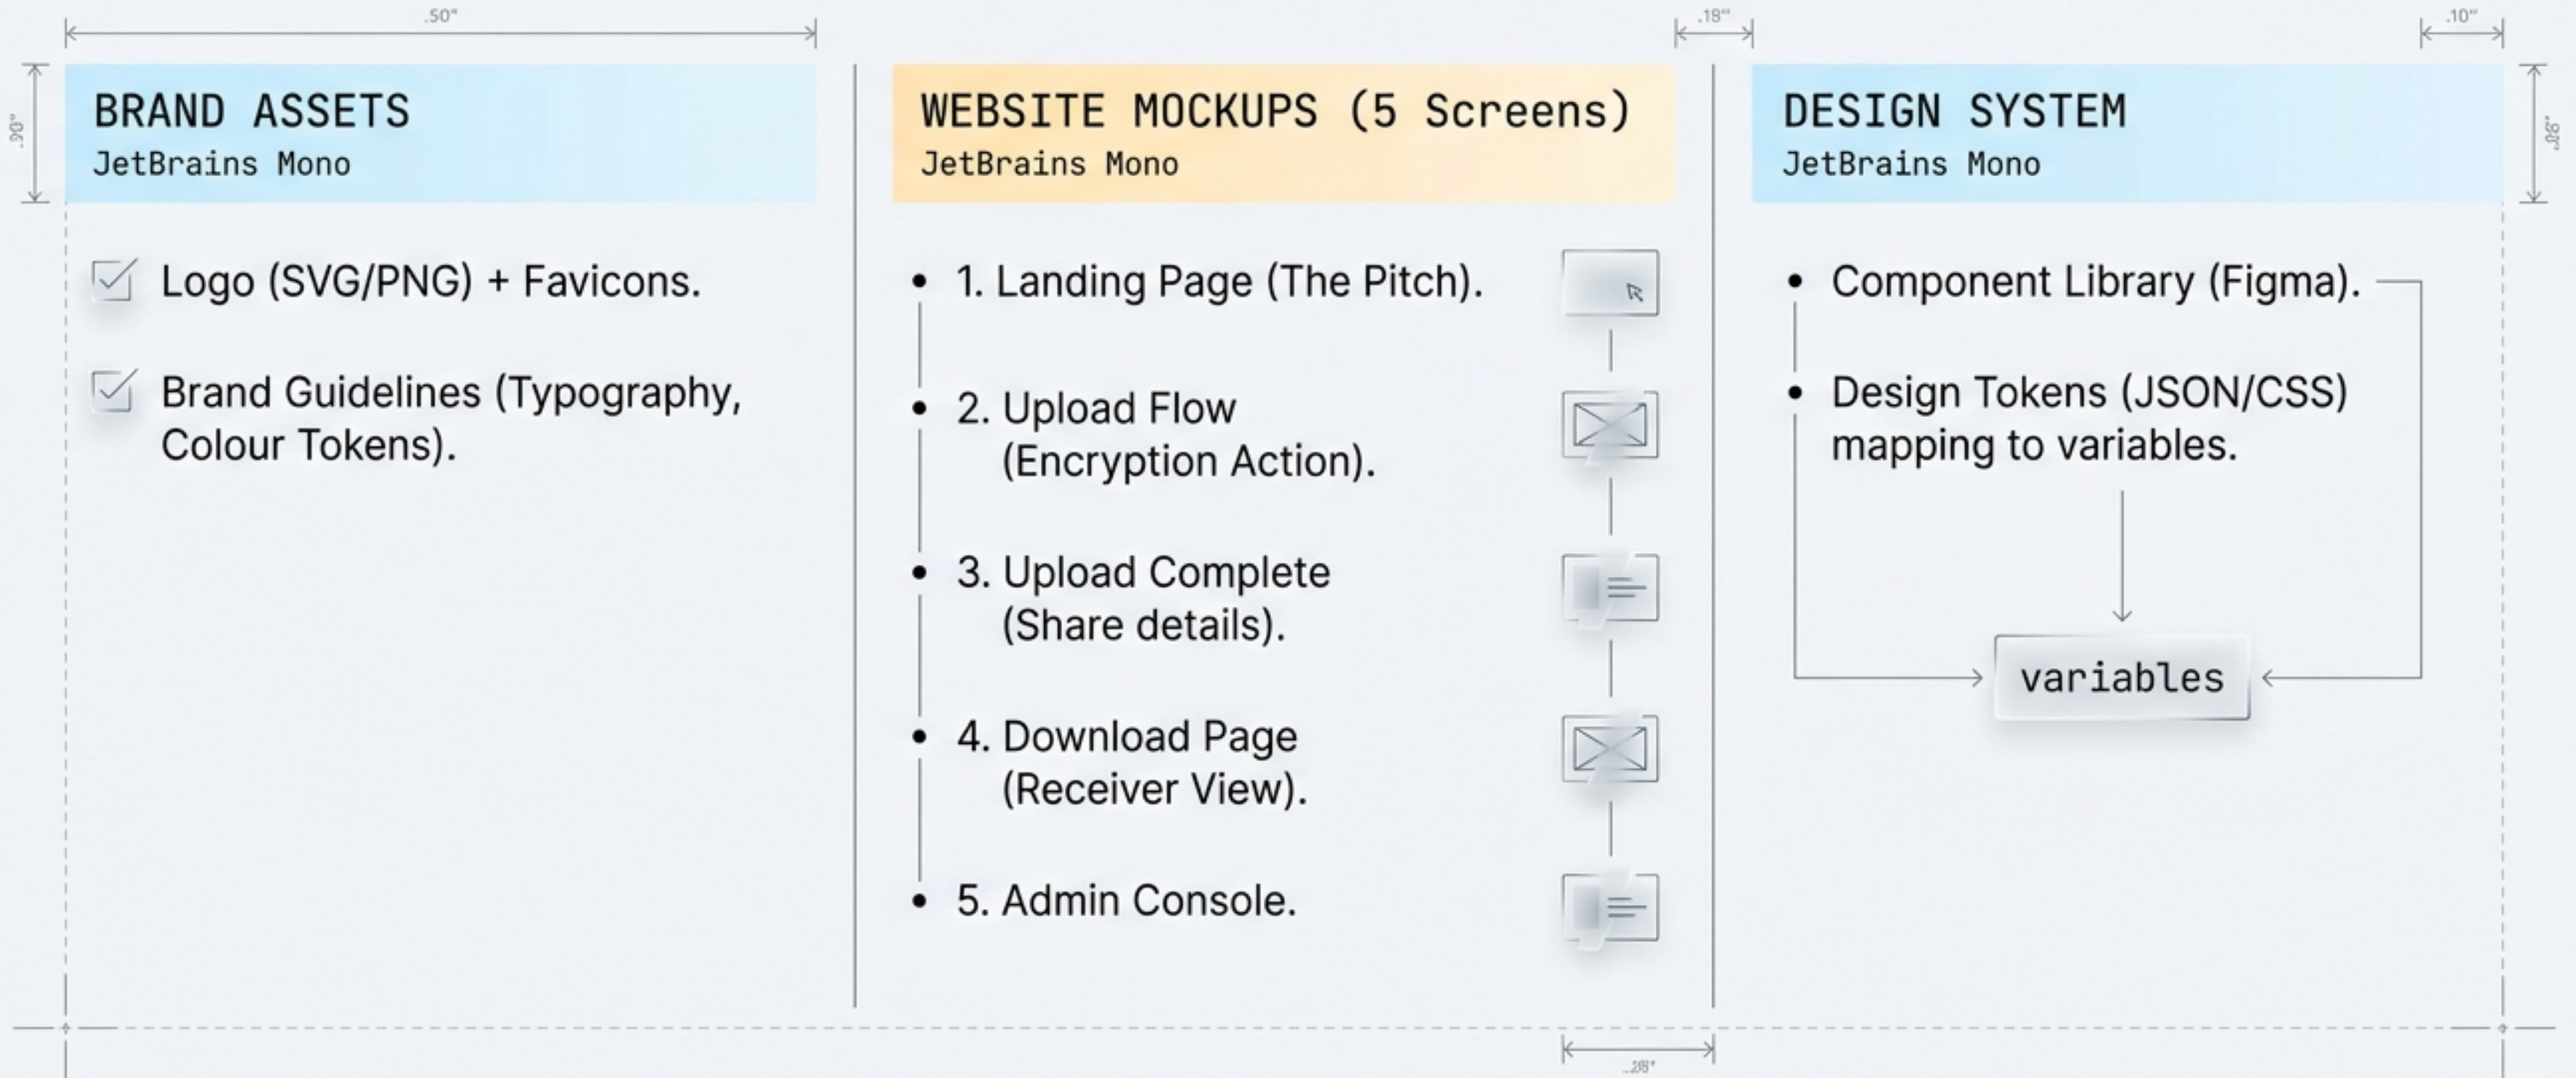

CONTRAST_RATIO > 4.5:1

INTERNATIONALISATION (i18n)

- Text Expansion: Accommodate +40% length.
- RTL Ready: Logical properties for Arabic/Hebrew.
- Cultural Sensitivity: Adaptable colour meanings.

The Deliverables

The Goal

Privacy as the Obvious Choice.

We want users to choose SGraph Send not because they are scared of surveillance, but because it is the most beautiful, simple, and trustworthy tool available.

Success is making zero-knowledge encryption feel effortless.
