

# SGraph Send — Brand Identity

## Addendum A: Strategic Naming Exercise

---

**Context:** Based on kickoff feedback regarding 'SGraph' and user perception.

TO: Cruz & Cruz  
FROM: SGraph Design Team  
DATE: 15 February 2026  
REF: v0.3.7 (Supplements v0.3.3)

# We heard you: “Graph” creates friction.

## The Insight

During the kickoff review, you highlighted that “graph” creates a barrier for non-technical users. It is abstract, technical, and implies complexity.

## The Reality

For a product positioned as “effortless encryption,” the name shouldn’t require an explanation. If we have to explain the name, we have already lost a beat.

## The Decision

You were right. We need to explore alternatives formally before locking the brand identity.

# The Conflict: Technical Accuracy vs. User Perception

## ENGINEERING REALITY

Current Name: SGraph Send ~~██████████~~

Rationale: The “S” stands for Secure, Semantic, Simple. “Graph” connects to the underlying technology platform.

Status: Chosen for namespace uniqueness and technical precision.

## MARKET REALITY

The Problem: “Graph” feels like homework. ~~██████████~~

Target Persona: Includes everyday users, not just developers.

The Risk: The name acts as a barrier to the “effortless” positioning we are striving for.

# Safe, not scary.

# Our goal is effortless encryption.

The name must do the heavy lifting before the user even opens the app.

## Core Attributes

### 1. Instantly Understandable

No cognitive load.

### 2. Approachable

Security products often sound intimidating; we want the opposite.

### 3. Verbal

Must work in conversation ("I'll [name] it to you").

### 4. Scalable

Must accommodate the future product family (Image, Text, Billing).

# The Scope: Three Tiers of Exploration

Shorthand for the current name. Keeping the equity but fixing the friction.

Alternative names keeping "Send". A new brand handle, but the same descriptive action.

Complete freedom. No constraints from the current name.

Requirement: We need 3–5 strong candidates per tier.

# Tier 1: Shorthand & Evolution

Concept: The full name “SGraph Send” remains, but the everyday brand becomes a sleek abbreviation.

Current Internal Idea: SG/Send

- Using the forward slash as a visual separator.
- “SG” becomes the brand prefix; “Send” is the product.

Exploration Prompts:

- Does the slash work typographically and as a logo?
- Does it work at favicon scale?
- Scalability Check: Does the pattern hold for SG/Image and SG/Text?

# Tier 2: A New Name (Keeping 'Send')

The Brief: If 'SGraph' is replaced, what is the new handle?

Constraint: You must keep 'Send' as the action word. The new name must work as a prefix for the entire suite.

## Deliverable Requirements:

- Show the product name (e.g., [Brand] Send).
- Show the family extension.
- **Domain Reality:** We currently own sgraph.ai and sgraph.com. New names need a viable domain path.

# Tier 3: Complete Freedom.

**The Brief:** No constraints from the current name.  
What SHOULD this product be called?

Output: 3–5 candidates with typographic treatments.

## MANDATORIES

- Must communicate security/privacy without being intimidating.
- Must feel modern and approachable.
- Must work internationally (no negative connotations).
- Must have a viable domain path (clean .com/.ai or subdomain).

# The Guardrails: What to Avoid.

**The “Fortress” Trap:** Do not use metaphors like these. We are not building a prison; we are building a communication tool.

TECHNICAL  
GUARDRAIL

**No Enterprise Jargon:** Avoid cold, corporate, or overly complex terminology.

LANGUAGE  
CONSTRAINT

**The Tone:** We are aiming for “Safe,” not “Scary.”

BRAND TONE

# Why 'SGraph' might still win.

**Context:** We are not committed to changing the name yet. We need to see alternatives to make an informed choice.

## The Defense of SGraph

- **Semantic Vision:** Once SGraph Text ships, users will literally see graph visualisations. The name becomes accurate over time.
- **Uniqueness:** Zero SEO competition and no trademark conflicts.
- **Assets:** We own the primary domains.
- **Strategy:** Renaming later is hard, but renaming prematurely loses a name that might earn its keep.

# How we will evaluate the work.

|                          |                                                         |                             |
|--------------------------|---------------------------------------------------------|-----------------------------|
| <input type="checkbox"/> | Speed: Do I get it in <2 seconds?                       | EVALUATION CRITERIA         |
|                          |                                                         | TIMING CONSTRAINT           |
| <input type="checkbox"/> | Emotion: Does it feel safe, not scary?                  | EMOTIONAL RESONANCE         |
|                          |                                                         |                             |
| <input type="checkbox"/> | Usage: Can I use it as a verb?                          | FUNCTIONAL APPLICABILITY    |
|                          |                                                         |                             |
| <input type="checkbox"/> | Distinction: Is it distinct from competitors?           | COMPETITIVE DIFFERENTIATION |
|                          |                                                         |                             |
| <input type="checkbox"/> | Scale: Does it work for the whole product family?       | SYSTEM SCALABILITY          |
|                          |                                                         |                             |
| <input type="checkbox"/> | Design: Is it typographically interesting for the logo? | AESTHETIC QUALITY           |
|                          |                                                         |                             |

# Deliverables: Visuals, not just words.

Format: A single presentation containing all three tiers.

## The Requirement:

- Each candidate must include a rough typographic treatment.
- We need to see how the name LOOKS, not just how it reads.
- Do not send lists of words.

# Process & Logistics

**Timing:** This runs in parallel with Phase 1 logo exploration.

**Integration:** The naming exercise should INFORM the logo work.

**Unchanged Scope:** The design system, mockups, and theme work are name-agnostic and should proceed as planned.

# Our Promise to You.

CORE COMMITMENT // 01

INTEGRATION POINT

# We won't ask you to name the product and then ignore the work.

## STRONG PROPOSALS

If you propose something strong, we will take it seriously.

1-1

1-1

## CURRENT NAME CONSIDERATION

If we keep "SGraph," we will explain exactly why.

1-2

1-1

## TYPOGRAPHIC SHORTHAND

Even if we keep the name, we will likely adopt the shorthand/typographic treatment you develop in Tier 1.

This exercise directly feeds the brand identity.

# Let's explore.

We are looking forward to seeing  
where you take this.
